

The term 'Barclays PLC Group' or the 'Group' means Barclays PLC together with its subsidiaries and the term 'Barclays Bank PLC Group' means Barclays Bank PLC together with its subsidiaries. 'Barclays' and 'Group' are terms which are used to refer to either of the preceding groups when the subject matter is identical. The term 'Company', 'Parent Company' or 'Parent' refers to Barclays PLC and the term 'Bank' refers to Barclays Bank PLC. In this report, the abbreviations '£m' and '£bn' represent millions and thousands of millions of pounds sterling respectively; the abbreviations 'US\$m' and 'US\$bn' represent millions and thousands of millions of US Dollars respectively and '€m' and '€bn' represent millions and thousands of millions of euros respectively.

Unless otherwise stated, the income statement analyses compare the 12 months to 31 December 2011 to the corresponding 12 months of 2010 and balance sheet comparisons, relate to the corresponding position at 31 December 2010. Unless otherwise stated, all disclosed figures relate to continuing operations. Relevant terms that are used in this document but are not defined under applicable regulatory guidance or International Financial Reporting Standards (IFRS) are explained in the glossary online at www.barclays.com/annualreport. A hard copy can be provided on request by contacting Barclays Investor Relations, Barclays PLC, 1 Churchill Place, London E14 5HP.

Adjusted profit before tax and adjusted performance measures have been presented to provide a more consistent basis for comparing business performance between periods. Adjusted profit before tax is explained further on page 22 and defined in the glossary.

Forward-looking statements

This document contains certain forward-looking statements within the meaning of Section 21E of the US Securities Exchange Act of 1934, as amended, and Section 27A of the US Securities Act of 1933, as amended, with respect to certain of the Group's plans and its current goals and expectations relating to its future financial condition and performance. Barclays cautions readers that no forward-looking statement is a guarantee of future performance and that actual results could differ materially from those contained in the forward-looking statements. These forward-looking statements can be identified by the fact that they do not relate only to historical or current facts. Forward-looking statements sometimes use words such as "may", "will", "seek", "continue", "aim", "anticipate", "target", "expect", "estimate", "intend", "plan", "goal", "believe" or other words of similar meaning. Examples of forward-looking statements include, among others, statements regarding the Group's future financial position, income growth, assets, impairment charges, business strategy, capital ratios, leverage, payment of dividends, projected levels of growth in the banking and financial markets, projected costs, estimates of capital expenditures and plans and objectives for future operations and other statements that are not historical fact. By their nature, forward-looking statements involve risk and uncertainty because they relate to future events and circumstances, including, but not limited to, UK domestic, Eurozone and global economic and business conditions, the effects of continued volatility in credit markets, market related risks such as changes in interest rates and exchange rates, effects of changes in valuation of credit market exposures, changes in valuation of issued notes, the policies and actions of governmental and regulatory authorities (including requirements regarding capital and Group structures and the potential for one or more countries exiting the Euro), changes in legislation, the further development of standards and interpretations under IFRS applicable to past, current and future periods, evolving practices with regard to the interpretation and application of standards under IFRS, the outcome of current and future litigation, the success of future acquisitions and other strategic transactions and the impact of competition – a number of such factors being beyond the Group's control. As a result, the Group's actual future results may differ materially from the plans, goals, and expectations set forth in the Group's forward-looking statements.

Any forward-looking statements made herein are as at the date they are made. Except as required by the UK Financial Services Authority (FSA), the London Stock Exchange plc (LSE) or applicable law, Barclays expressly disclaims any obligation or undertaking to release publicly updates or revisions to forward-looking statements to reflect any change in Barclays expectations with regard thereto or any change in events, conditions or circumstances on which any such statement is based. The reader should, however, consult any additional disclosures that Barclays has made or may make in documents it has filed or may file with the LSE and/or the SEC.

The Annual Report includes certain information required to be included in the joint Barclays PLC and Barclays Bank PLC Annual Report on Form 20-F for 2011. Form 20-F will contain as exhibits certificates pursuant to Sections 302 and 906 of the Sarbanes-Oxley Act of 2002, signed by the Chief Executive and the Group Finance Director.

Cover image

As part of our Citizenship agenda, we focus on empowering young people with the necessary financial, entrepreneurial and life skills to achieve economic independence and security.

Barclays supports Cycle into Work, an initiative developed and delivered by our social enterprise partner Bikeworks, which helps disadvantaged Londoners to learn key skills and find employment in the cycling industry.

The community investment programme supports Bikeworks to work in partnership with homeless hostels and shelters in London to reach vulnerable young people, offering them bicycle building and maintenance courses.

Employees also volunteer as mentors to help participants improve their confidence, communication skills and job prospects, as well as provide them with opportunities for team work and social interaction.

Trainees access on-the-job training and professional qualifications in bike mechanics alongside tailored personal development support. Graduates of the programme are then supported to access employment opportunities with Barclays Cycle Hire and cycling retailers in London.

Barclays at a glance

Barclays universal banking model continues to be a competitive strength. Revenues remained resilient overall, reflecting the strength of our customer franchise and the balanced mix of our business. We have intensified our cost discipline while selectively investing in growth areas that support our execution priorities.

Total income

£32,292m

Total income up 3% on 2010. Adjusted income excluding own credit and debt buy-backs down 8%

Credit impairment

£3,802m

Credit impairment improved 33% on 2010

Profit before tax

£5,879m

Profit before tax down 3%. Adjusted profit before tax down 2% and broadly balanced across the retail and investment banking businesses

Liquidity pool

£152bn

Liquidity pool remained strong, in line with 2010

Core Tier 1 ratio

11.0%

Core Tier 1 ratio strengthened from 10.8% at year end 2010

Return on equity

5.8%

Return on average shareholders' equity down on prior year due to worse than predicted macro economic conditions. Adjusted return on average shareholders' equity 6.6%

Gross new lending to UK

£45.0bn

Gross new lending to UK household and businesses of £45.0bn and Project Merlin lending targets exceeded by 13%.

Institutional funding

\$1 trillion

Raised over \$1 trn of funding for institutions, including almost \$400bn for governments and public sector entities

People supported

2,000,000

Supported over 2 million people, primarily building their enterprise, employment and money management skills, including helping 3,500 people to find employment through a range of programmes

Net tangible asset value per share

Adjusted profit before tax

Dividends per share

Why we report by segment and geography

We move, lend, invest and protect money for customers and clients worldwide.

By reporting by business segment and geography, we demonstrate the diversification of our business, and the universal banking model which we operate.

Barclays is a major global financial services provider engaged in retail banking, credit cards, corporate and investment banking and wealth management with an extensive international presence. With over 300 years of history and expertise in banking, Barclays operates in over 50 countries and employs over 140,000 people.

Retail and Business Banking

- 1 UK Retail and Business Banking – £4,656m**
UK Retail and Business Banking is a leading UK high street bank providing current account and savings products and Woolwich branded mortgages. UK Retail and Business Banking also provides unsecured loans and general insurance as well as banking and money transmission services to small and medium sized businesses.
- 2 Europe Retail and Business Banking – £1,226m**
Europe Retail and Business Banking provides retail services, including credit cards, in Spain, Italy, Portugal and France, as well as lending to small and medium sized businesses, through a variety of distribution channels.
- 3 Africa Retail and Business Banking – £3,767m**
Africa Retail and Business Banking provides retail, corporate and credit card services across Africa and the Indian Ocean. Africa Retail and Business Banking combines the operations previously reported as Barclays Africa and Absa.
- 4 Barclaycard – £4,095m**
Barclaycard is an international payments business service provider to retail and business customers including credit cards and consumer lending.

Corporate and Investment Banking

- 5 Barclays Capital – £10,335m**
Barclays Capital is the investment banking division of Barclays providing large corporate, government and institutional clients with a full spectrum of solutions to meet their strategic advisory, financing and risk management needs.
- 6 Barclays Corporate – £2,912m**
Barclays Corporate provides integrated banking solutions to large corporates, financial institutions and multi-nationals in the UK and internationally.
- 7 Barclays Wealth – £1,744m**
Barclays Wealth is the wealth management division of Barclays. It focuses on private and intermediary clients worldwide, providing international and private banking, fiduciary services and brokerage.
- 8 Investment Management – £53m**
Investment Management manages the Group's economic interest in BlackRock, Inc. and the residual elements relating to Barclays Global Investors, which was sold on 1 December 2009.

Barclays Head Office Functions and Other Operations – (£334m)
Head Office Functions and Other Operations comprise head office and central support functions and consolidation adjustments. This figure excludes own credit gain of £2,708m and gains on debt buy-backs of £1,130m.

*excluding own credit and debt buy-backs

Group Chairman's statement

“Our performance in 2011 reflected the challenging economic environment in which we operated.”

A handwritten signature in black ink that reads "Marcus Agius". The signature is written in a cursive, flowing style.

Marcus Agius
Group Chairman

Your Chairman's view

The Chairman's primary role is to provide leadership to the Board, creating the conditions for overall Board effectiveness and ensuring that Barclays satisfies its legal and regulatory responsibilities.

Here he takes the opportunity to provide his views on the performance of Barclays, the Board, and thoughts on current economic conditions.

Market conditions in the second half of the year were particularly difficult as investor nervousness over global economic growth prospects grew and concerns about the fiscal deficit of certain Eurozone countries became acute.

The Board is resolved to navigate the current difficult economic environment safely, ensuring that Barclays is positioned to continue to be profitable and successful in the future. We are also committed to acting as responsible corporate citizens at a time when so many people have been affected by the financial crisis and subsequent economic downturn.

The Board and I are very conscious that returns to shareholders have been unacceptably low in recent years. The urgent priority for the Group in this respect is to improve its Return on Equity (whilst not increasing leverage), as the correlation between the price to book value ratio (and hence share price) and Return on Equity has been very strong. In the short term, our business is still adjusting to the significantly higher levels of capital that we now have to hold as a result of new regulatory requirements. Accordingly, we are focused on ensuring that actions are in place to drive a significant and sustainable increase in the Return on Equity and, hence, the share price over the medium term. The share prices of banks were impacted during the year by the Eurozone debt crisis, which deteriorated further in 2011, with sovereign bond yields in a number of countries rising to unsustainable levels. Fortunately, there has been notable progress over the past few months, with Eurozone leaders committing to a system of enforceable fiscal rules designed to bolster confidence in the ability of countries to service and repay their debt. In addition, the action of the European Central Bank to provide liquidity support to banks has helped confidence. Although financial market volatility is likely to remain high, we believe the current European downturn will be moderate.

Uncertainty of regulation continues to dominate the agenda, however there are welcome signs that some of the regulatory fog within which we have been operating over the last four years is beginning to clear. The publication of the rules regarding the capital levels to be held by "Systemically Important Financial Institutions", of which Barclays is one, and the acceptance by the UK Government of the Final Report by the Independent Commission on Banking, were important milestones in this respect. We welcome the move towards regulatory certainty that this brings, as it allows Barclays and the rest of the banking industry in the UK to plan ahead with a greater level of clarity. Barclays engaged constructively with the commissioners during their deliberations and the final report makes a number of recommendations which will make the industry safer and more sound. Whilst we do not agree that the proposed retail ring-fence is the best solution, we are clear that Barclays can accommodate it and we will work with the regulators and the Government on its introduction. Most importantly, it means that the universal banking model which we operate, and which we believe brings diversified strength to our business, will continue to be valid for the future. It is critically important that the new regulatory architecture is monitored carefully to ensure that it does not result in unintended consequences, particularly given the essential role that banks need to play in supporting economic recovery. It also continues to be vital that international banks such as Barclays can operate on a global level playing field and there are some concerning signs that the UK continues to be super equivalent in a number of key areas.

Remuneration

Remuneration continues to be the subject of considerable discussion. It remains our policy that we only pay for performance, not failure, and that we only pay the minimum necessary to be competitive. Historically, there

has been intense competition for talent, particularly in the investment banking industry. The difficult economic environment and the impact of regulation on the profitability of investment banking lessened this competition in 2011 and, as a consequence, performance related pay across the Group reduced significantly. We recognise that compensation has to adjust to the new reality of lower returns for the sector and we will continue to ensure that our remuneration policies and practices are aligned with the long-term interests of our shareholders.

Citizenship

Barclays has always taken its role in society seriously and believes that being a valued, respected and trusted citizen is vital in creating sustainable shareholder value. That ethos has been part of our corporate values since the bank was founded over 300 years ago. Events in the global economy have led us to reflect further on how we help others recognise the value of what we do.

Citizenship as an execution priority for Barclays is about three things: how we contribute to growth in the real economy; the way we do business; and supporting our communities. We see our success as inseparable from that of the communities we serve and so will bring the same discipline and focus to this part of our agenda as for everything else that we do. Indeed, our community investment increased by 15% to £63m in 2011. More importantly, by aligning our community investment strategy to our core business, the positive impact of our activity is much more than just a financial contribution. Youth unemployment is at record levels and last year we saw the consequences of the resulting disaffection expressed in a very public way. The future of communities and economies around the world is reliant on the next generation having the right skills. Our community programmes are focused on empowering disadvantaged young people by helping them access the skills they need to achieve financial independence and security.

Talented and diverse employees are not only crucial to delivering our Citizenship agenda, but are the foundation of our success across all business priorities. We have committed to ensure that at least 20% of our Board will be made up of women by the end of 2013, rising to 25% by 2015.

Board Changes

The only Board change during the year was the retirement of Sir Richard Broadbent as Deputy Chairman in September. Richard joined the Board in 2003 and was an outstanding non-executive Director, chairing the Board Risk Committee from 2006 to 2009 and the Board Remuneration Committee from 2007 to 2011. He became Senior Independent Director in 2004 and Deputy Chairman in 2009. His clarity of thought and steadiness of nerve were particularly valuable during the financial crisis. We will miss his insights and immense contribution and wish him well for the future.

Conclusion

In conclusion, I would like, on behalf of the Board – and on behalf of all our shareholders – to thank Barclays 140,000 employees. They have continued to work hard in a very difficult environment to deliver excellent service to our customers and clients. It is through their efforts that Barclays will succeed in rebuilding the trust of our key stakeholders and deliver sustainable value to our shareholders.

Chief Executive's review

“When we're at our best, we serve the real economy by doing our best for all our stakeholders: our customers and clients, the communities we serve, our people and our shareholders.”

A handwritten signature in black ink, appearing to read 'B. Diamond', with a long horizontal flourish extending to the right.

Bob Diamond
Chief Executive

Your Chief Executive's view

The Chief Executive Officer is responsible for managing the daily operations of Barclays through working closely with the Executive Committee and overseeing successful delivery of the Group strategy. His priorities are a focus on four areas of execution: Capital, Funding and Liquidity; Returns; Income Growth; and Citizenship, which he uses to guide Barclays through the uncertain economic and regulatory environment and deliver shareholder returns.

In this summary, he reflects on the year, giving his views on progress towards delivery of our strategy.

2011 was marked by a challenging market and economic environment and our solid performance relative to global peers demonstrates the strength of our universal banking model and our relentless focus on clients and customers. Our focus in 2011 was firmly on delivering progress against the four execution priorities. I'd like to give you a review of what we achieved.

Capital, Funding and Liquidity

When I look back over the last few years, one of Barclays best decisions came in October 2008 when regulators made clear that they wanted banks to raise the bar for equity capital. We decided to raise capital swiftly and in scale, to put our ratios ahead of regulatory requirements. We wanted to put a metaphorical sign up for customers and clients saying that Barclays was open for business. Today we're recognised for our strength in terms of capital, liquidity and funding, and as a result we are seen by customers as a safe haven in times of stress.

Our capital position remains rock solid. Even after absorbing the full impact of the third Capital Requirements Directive, our Core Tier 1 ratio stands at 11% and we have a liquidity pool of £152bn that provides protection against unexpected market fluctuations.

Returns

While we use many metrics to manage and measure the business, return on equity is the financial measure that correlates most closely with shareholder value, so it's extremely important to us. Our 13% return target was a vital factor in helping us make disciplined choices over the last 12 months, but we know that our returns today remain unsatisfactory and that we have a lot more work to do.

Since we set this target last year we have faced some significant external headwinds which are detailed over the page in our review of the market and operating environment. Notwithstanding these, we have made a lot of progress on the journey towards achieving our targets. Through operating as a more integrated business we have been able to begin to drive the cost efficiency that will be necessary to deliver that goal, and as a result have increased our cost target to a saving of £2bn by 2013.

Our portfolio of businesses continued to evolve and strengthen, and most of our businesses increased their return on equity in 2011.

We continue to believe that a return on equity of 13% is the right goal, but our ability to achieve this by 2013 will depend upon economic, market and regulatory developments. We remain fully committed to delivering 13% returns over time, by driving improved business performance, reducing expenses, and maintaining a disciplined approach to capital and funding costs.

Income growth

Given the difficult economic environment, we're pleased that we were able to grow income, underlying profit, and market share in many of our businesses. We enter 2012 in a stronger competitive position.

In UK Retail and Business Banking net operating income grew 11%, Barclaycard net income was up 21%, our African business net income grew 11% in local currencies, and Wealth Management had its third successive year of double digit income growth as we continue to build that business.

Income and profits were down in Investment Banking in a very tough market but we continue to have real momentum, which is particularly evident in those areas where we've been actively investing, such as Equities and Advisory. This progress was recognized by International Financing Review (IFR) when it named Barclays Capital its "2011 Bank of the Year" for "growing market share across the board, and becoming an increasingly go-to investment bank".

Citizenship

We have recognized that banks need to become better citizens and that our ability to do this is critical to generate long term value for shareholders. This is not philanthropy – it's about using Barclays unique skills and resources to deliver real commercial benefits in a way that also creates sustainable value for society.

We have made firm progress against our Citizenship agenda in 2011, delivering benefits to the real economy. We exceeded our Project Merlin targets by 13% and delivered £44bn to UK business; we helped 108,000 businesses start up; we helped corporates and institutions raise \$1 trillion of financing through the capital markets globally, including almost \$400bn for governments and the public sector; we employed almost 1,500 graduates and have committed to creating over 1,000 apprenticeships; and we will continue to do everything we can to support our customers and clients in 2012.

We know we have a responsibility to help generate economic growth and create jobs – and we are fully committed to playing our part.

You will find additional information relating to our Citizenship agenda in this document and a Citizenship Report with detailed information on our goals, our targets and our achievements will be available online from 23 April 2012.

Looking forward to 2012

As I look back at 2011, we made firm progress and right across Barclays we entered 2012 in a stronger position. We recognise that in order to achieve our return target we need to improve profitability substantially going forward and we are determined to do that, using all the means within our control to drive the business.

Turning to the external environment, while there are some positive signs of economic recovery, particularly in the US, and increasing clarity on regulation, the global macro-economic, political and regulatory environment remains uncertain and we must again expect a challenging environment in 2012.

As we have shown in the past year, however, Barclays is well positioned to improve our competitive positioning across businesses in challenging environments. Our universal banking model, as well as our rock solid capital, liquidity and funding positions, give us the balance and flexibility to meet the challenges ahead. We are confident that by putting clients and customers at the center of everything we do, we will support economic growth more broadly and generate the financial returns we're targeting over time.

When we're at our best, we serve the real economy by doing our best for all our stakeholders: our customers and clients, the communities we serve, our people and our shareholders. To be anything less than our best is letting all these people down. That's why we aspire for Barclays to be one of the best organised, best managed and most productive private sector banks in the world.

Market and operating environment

2011 saw further clarity from regulators with implementation of the third Capital Requirements Directive and the final report from the Independent Commission on Banking. The year also saw difficult conditions due to the Eurozone crisis and a slowdown in economic growth, with both events adversely impacting client activity and funding markets.

Market factors

Economic growth

The year saw downward revisions of global GDP forecasts by a number of supranational bodies with a worsening outlook on the pace of recovery following the recent economic crisis. This impacted Barclays income growth as customers and clients were more conservative. This was offset by the improved impairment performance across the Group.

Eurozone crisis and funding

The funding requirements of certain Eurozone governments caused market dislocations through the year due to investor fears of government default and the risk of contagion to other countries. This made it difficult for some European banks to raise funding and added to pressures on their liquidity positions.

Market uncertainty

Regulatory factors

Basel and the Capital Requirements Directive (CRD)

Regulations (CRD3) requiring banks to hold more capital for market risk were implemented on 31 December 2011. Further regulatory change linked to Basel 3/CRD4 will be implemented on 1 January 2013.

Independent Commission on Banking (ICB)

ICB recommendations on reforms to the UK banking sector to promote financial stability and competition were submitted in September 2011. The Government is expected to announce a white paper on the future of UK banking regulation in 2012.

Dodd-Frank Act (DFA)

Becoming law in the US in July 2010, the DFA impact remains unclear. The rules are yet to be implemented and, in some areas, yet to be proposed.

Although our performance in 2011 was adversely impacted by difficult economic conditions, we welcome the increased clarity from the UK and global regulators and expect further developments throughout 2012. Nevertheless, our capital, funding and liquidity positions remain a source of stability for our customers and clients and support us meeting future regulatory requirements.

Economic growth

2011 saw a number of government agencies, including the UK Treasury and US Fed, and supranational bodies, such as the IMF and the World Bank, downgrade their GDP growth forecasts. Although financial market volatility is likely to remain high, we believe the current European downturn will be moderate.

Eurozone

The issue. In 2011, the Eurozone continued to weaken with slowing GDP growth, high unemployment and ongoing political uncertainty. This has impacted Barclays through low client volumes as investors reduced their exposure to riskier asset classes, currency risk with significant fluctuations in the value of the Euro, and through increased funding costs due to a perceived deterioration in the credit risk of European banks.

What we have done about it. Barclays continues to closely monitor its exposure to Eurozone countries. The majority of sovereign exposures are used for hedging interest rate risk relating to local activities and have been actively replaced by non-government instruments. The remaining portion is actively managed reflecting our role as leading primary dealer, market maker and liquidity provider to our clients. Barclays also enters into credit mitigation arrangements to further protect against adverse Eurozone conditions. Despite the difficult conditions, Barclays remains open for business and will continue to contribute to growth in the Eurozone economies in which we operate.

Funding

The issue. In the summer of 2011, the funding markets experienced significant stress due to market concerns on the European sovereign debt crisis, resulting in sovereign bond yields for a number of European countries rising to unsustainable levels.

What we have done about it. Barclays emerged as one of the higher quality names in Europe and we have continued to access a variety of global funding markets. Our funding strategy is to maintain a diversified funding base, access a variety of alternate funding sources and hold liquidity to meet unexpected demands. This enables us to minimise the cost of funding and provides protection against unexpected fluctuations in the market. In 2011, our strong position gave us a competitive advantage during the market dislocation in the second half of the year. Recently, the ECB introduced mechanisms to provide liquidity to banks. This action was a positive development for the sector and reduces the risk of a funding-induced credit crunch in 2012.

Understanding Business Conditions

It is important that we understand the conditions in which we operate in order to run the company effectively. In this section we aim to highlight some of the major factors affecting the banking industry to help the reader understand the context of the current market and environment.

Below we have set out the key market and environment issues faced by Barclays in 2011.

Regulatory change

There has been continuing regulatory change in the wake of the financial crisis. Barclays maintains a proactive stance to regulation, seeking to be involved in the policy discussion in a constructive manner, and taking a serious approach to ensuring compliance with the resulting legislation and regulation. Outlined below are the key regulatory uncertainties we face.

Basel and the Capital Requirements Directive (CRD)

The issue. The Basel Committee published a paper on 'Strengthening resilience of the banking sector' in 2009. The report covered wide ranging proposals including more stringent capital and Risk Weighted Asset (RWA) treatments than the current regulatory regime.

What we have done about it. Barclays maintains a strong dialogue with international regulators including the FSA and the Basel Committee. We are focused on conservative capital management and management of our RWAs with significant reductions of Credit Market Exposures improving the capital efficiency of the Group, enabling us to maintain a robust Core Tier 1 ratio of 11.0% after the impact of CRD3. The strength of our capital ratios, our ability to generate capital organically and our actions to optimise RWAs will enable us to meet our targeted capital ratios under CRD4.

Independent Commission on Banking (ICB)

The issue. One of the key proposals in the final ICB report, which has been endorsed by the Government, is for UK retail and SME operations to be ring-fenced entities. The ICB has also recommended a potential loss-absorbing capacity of 17%. These factors are likely to increase operational costs and could have an adverse impact on the cost of funding for UK banks.

What we have done about it. Barclays strategy and financial targets remain valid in the context of the ICB recommendations. The ICB has estimated the cost to the industry at £4-7bn per annum, however we are unable to provide more accurate estimates of the cost to Barclays until detailed specification is provided and the market reflects the cost of funding. We welcome both the implementation timeline, allowing opportunity to get the detail right, and the ring-fenced entity design flexibility. In addition, we continue to develop internal Recovery and Resolution Plans to ensure Barclays remains a going concern and to assist regulators in the unlikely event that the bank is wound down.

Dodd-Frank Wall Street Reform and Consumer Protection Act (DFA)

The issue. The DFA was enacted by the US to implement financial regulatory reform as a response to the recent economic crisis. Certain provisions of the DFA may have an effect on the Group, including:

- the Fed imposing additional risk management requirements;
- the Volcker Rule, which aims to restrict proprietary trading and fund-related activities; and
- derivatives trading requirements, where certain swaps-related activities may be limited in our US entities.

What we have done about it. Barclays continues to engage with the US authorities as they consult on proposals for rules and proceed to rule-making. We have taken a centralised approach to monitoring this process and to ensuring compliance with the rules that are developed as a result.

Regulatory timeline

2011	Basel 2.5 (CRD3) implemented on 31 December
H1 2012	UK Government to publish White Paper on banking reform following ICB recommendations in 2011
Q1 2013	Implementation of RWA calculations under Basel 3 (CRD4)
H1 2013	Financial Services Act to be implemented which will change the structure of the UK regulatory bodies
2013 – 2015	Expected enactment of UK Government White Paper on banking reform
2014 – 2018	Phasing in of capital deductions under Basel 3 (CRD4)
2019	Implementation of UK Government White Paper on banking reform
2022	Full compliance with US Dodd-Frank Act

For more detailed information, please see [Supervision and Regulation, page 154](#)

Our strategy and business model

Barclays moves, lends, invests and protects money for customers and clients worldwide.

Business model

Customers

Our purpose:

To help individuals, institutions and economies progress and grow

Store and transfer money / payments	Manage and invest money	Offer financial advice and other services	Provide access to loans and liquidity	Manage risks and different maturities	Make markets and trade
-------------------------------------	-------------------------	---	---------------------------------------	---------------------------------------	------------------------

Our vision:

One of the premier globally integrated universal banks providing superior benefits to each of our stakeholders (customers, shareholders, colleagues, and communities)

Integrated universal banking model
Diversification by business, geography, client and funding
Relentless customer and client focus

Our execution:

Execute our strategy focusing on four priorities (capital, funding and liquidity, returns, income growth, and citizenship)

Operational Excellence Deliver cost effective, high quality solutions for customers, particularly those with global and complex needs	Risk Management Increase resilience by matching, balancing, and diversifying income and funding and in managing our risks	Financial Discipline Allocate capital efficiently across our businesses to maximise returns
---	---	---

Create value for shareholders and deliver a top quartile Total Shareholder Return

Shareholders

The ultimate objective of our strategy is to create and deliver long-term sustainable shareholder value. We fulfil our purpose by delivering the fundamental functions of a bank to our customers. We do this through an integrated universal banking model which we believe is the best model through which to build strong and stable relationships with our customers, employees and suppliers to deliver operational excellence; manage our risks appropriately; and allocate scarce resources, including capital, efficiently.

As banking markets around the world continue to evolve, with regulatory change, and with the distinct need for rebuilding trust in the banking industry post crisis, our strategy and our execution priorities allow us to continue to serve the wide ranging needs of our customers in a safe and stable manner that is aligned with our responsibilities as corporate citizens and is able to deliver attractive returns for shareholders.

We take a long-term view on our strategy and have not changed it for many years. Changes in the environment continue to influence Barclays, especially how we choose to execute our strategy. We are currently focused on four execution priorities: Capital, Funding and Liquidity; Returns; Income Growth; and Citizenship.

Implementing our strategy

To achieve the primary objective of maximising Total Shareholder Returns, we focus on four key execution priorities.

These execution priorities drive Barclays performance and continue to improve our competitive position. We have made solid progress, with a resilient financial performance despite the difficult trading conditions in 2011, and the bank is well positioned to generate the financial returns that we are targeting over time.

Strategy

Our focus is on execution and in particular delivering our promises in four key areas.

At the beginning of 2011 we set out our execution priorities based on a three year plan to improve both the bank's performance and its position. We have made solid progress in 2011 despite the market uncertainty.

1. Capital, Funding and Liquidity

We remain mindful of the changing regulatory environment and our rock solid capital, funding and liquidity positions give us confidence that we will meet future requirements. Our robust Core Tier 1 ratio of 11.0% is supported by our ability to generate capital organically and we do not expect to seek additional capital from our shareholders. We have also maintained resilient funding and liquidity profiles despite recent market stresses caused by the Eurozone crisis. This has allowed us to access diverse funding sources, minimising the cost of funding and providing protection against unexpected fluctuations.

2. Returns

Our focus on delivering returns is a key driver in the way we manage the business. We seek to improve return on equity to ultimately increase shareholder returns, reflecting the strong link between the share price and return on equity. In doing so we also look to maintain strong capital, liquidity and leverage ratios, to enable us to deliver returns on a sustainable basis. Although the worse than predicted macroeconomic conditions as well as new regulatory constraints mean that we may not be able to deliver 13% returns by 2013, we will continue to focus on delivering a steady improvement in returns and achieve 13% over time.

3. Income Growth

A component of delivering improved returns is generating income growth. Despite the macro environment depressing income growth, we generated momentum and improved the competitive positions of all our major businesses in 2011. We grew net operating income in all businesses, except Barclays Capital which was most affected by difficult trading conditions, as we remain focused on improving the quality of assets to ensure that we do not grow at the expense of future credit losses.

4. Citizenship

We believe that being a valued, respected and trusted citizen is vital in creating long term value for all our stakeholders. We produce a Citizenship Report each year in order to benchmark our progress in the key areas of focus: contributing to growth in the real economy; the way we do business; and supporting our communities.

Total Shareholder Return (TSR)

Our primary objective is to maximise returns for shareholders and in doing so, we aim to deliver top quartile TSR.

TSR consists of two components: the movement in market value of the shares and the income received on those shares in the form of dividends. Over the past five years there has been a clear relationship between TSR and return on equity (RoE) with the market value of shares improving with higher reported RoE. Increased dividend payments positively affect both TSR and RoE. Therefore, improving the bank's RoE is a key driver in the way we manage the business to maximise TSR.

While we seek to have a progressive dividend policy, we must balance this with requirements for capital in order to ensure sustainable and long term TSR creation.

As RoE declined throughout the crisis to a low point in 2008, so too did TSR. Barclays maintained positive RoE and outperformed peers during the crisis as we remained profitable.

In recent years TSR and RoE have become more closely aligned as share prices have reflected market uncertainty, low sector RoEs, and low dividend payout ratios. This has strengthened the link between market valuation and returns, and therefore TSR and RoE.

Board of Directors

The non-executive Directors are independent of management. Their role is to advise and constructively challenge management and monitor the success of management in delivering the agreed strategy within the risk appetite and control framework set by the Board.

For more detailed information, please see Board of Directors page 50

Key responsibilities of the Board of Directors

The Board's principal duty is to promote the long-term success of Barclays by creating and delivering sustainable shareholder value. It does this by setting strategy and overseeing its implementation by management. While the ultimate focus is long-term growth, the Board seeks to ensure that management strikes the right balance between long and short-term objectives.

In setting and monitoring the execution of strategy, the Board aims to ensure that the Group maintains an effective system of internal control and an effective risk management and oversight process across the Group, delivering growth in a controlled and sustainable way.

Executive Committee

Charter of Expectations

The role profiles, responsibilities, time commitments, key competencies and behaviours we expect of our Directors, together with the key indicators of high performance, are set out in our Charter of Expectations, which was reviewed and updated during 2011 to take account of the best practice recommendations set out in the Guidance on Board Effectiveness issued by the Financial Reporting Council (FRC). The Charter of Expectations is available on our website at www.barclays.com/corporategovernance.

Key responsibilities of the Executive Committee

The Board delegates responsibility for the day-to-day management of the Group to the Chief Executive, who is responsible for ensuring that the business is operating effectively within the strategy and risk appetite agreed by the Board. The Chief Executive is supported by the Executive Committee, which he chairs.

Board Corporate Governance and Nominations Committee Marcus Agius

In order to deliver our strategy, we need the right people. The Board Corporate Governance and Nominations Committee has a key role in reviewing new appointments and succession plans to ensure that we have a Board and an executive management team with the appropriate skills, knowledge and experience to operate effectively in an ever challenging environment.

For more detailed information on the Board Corporate Governance and Nominations Committee, please see page 38

Board Audit Committee Sir Michael Rake

It is important that we generate income in a sustainable way and manage our risks and costs properly, without eroding the controls we have in place. The Board Audit Committee has a key oversight role in ensuring that our financial statements are a true and fair representation of our financial position and strength and that our control environment is robust and maintained.

For more detailed information on the Board Audit Committee, please see page 40

Good corporate governance is vital in supporting the delivery of our strategic priorities.

Our Board Committees play an important role in working with management to ensure our business is financially strong, that it is well-governed and that any risks are identified and mitigated.

Our corporate governance practices have been brought together in Corporate Governance in Barclays, which is available on our website at www.barclays.com/corporategovernance. This framework provides the basis for promoting the highest standards of corporate governance in Barclays.

The fundamental purpose of any company is the creation and delivery of long-term sustainable shareholder value in a manner consistent with its obligations as a responsible corporate citizen, and corporate governance must be seen in this context.

We aim to create and sustain value over the long term by understanding the external factors that present risks and opportunities for our business, thereby ensuring our strategy is appropriate; building strong and stable relationships with our customers, employees and suppliers; and ensuring that we manage our risks and resources, including capital, appropriately. Our strategy is focused on four key priorities: Capital; Returns; Income Growth; and Citizenship and we ensure our Board discussions are focused on these issues.

We have complied with the UK Corporate Governance Code and applied its principles throughout 2011 and we continue to review our corporate governance processes and practices to ensure they remain fit for purpose.

Actions taken in this respect during the year included:

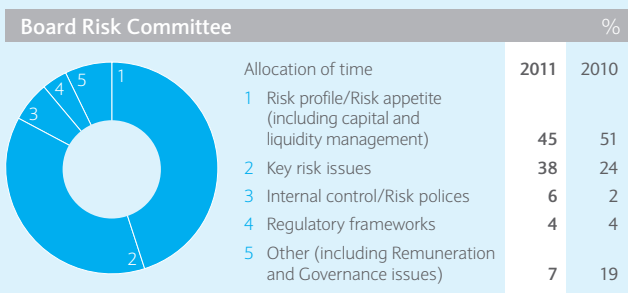

- once again conducting a rigorous, externally facilitated Board Effectiveness Review;
- in addition to our scheduled Board meetings, we held eight additional meetings to discuss key issues that our business has faced;
- creating, in late 2011, a Board Citizenship Committee to have oversight of our conduct with regard to our wider value and obligations to society and our reputation as a responsible corporate citizen; and
- while ensuring that all Directors are appointed on merit, and ensuring that there is an appropriate range and balance of skills, experience and background on the Board, we have set ourselves the aspirational target of ensuring that at least 20% of our Board is made up of women by the end of 2013 and for this position to exceed 25% by the end of 2015.

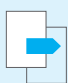

Marcus Agius
Group Chairman
7 March 2012

Board Risk Committee David Booth

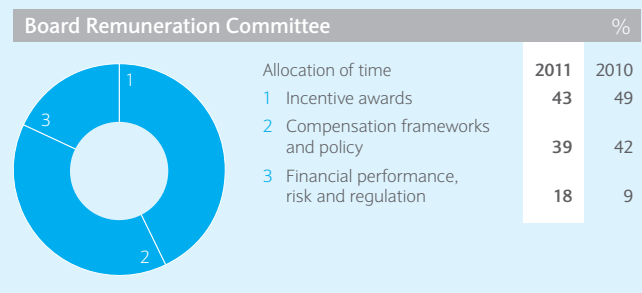

Understanding, monitoring and mitigating risk is a fundamental task for any board. The Board Risk Committee plays a critical role in setting the tone and culture that promotes the achievement of effective risk management across the Group and has provided oversight of, and advice on, both our risk appetite and risk management and our capital and liquidity strategies.

 [For more detailed information on the Board Risk Committee, please see page 43](#)

Board Remuneration Committee Alison Carnwath

The debate on executive remuneration has continued, with particular focus on the relationship between bonus payments and company performance. It is essential that we reward our people appropriately, that their pay reflects performance and that we do not incentivise them to take inappropriate levels of risk. The Board Remuneration Committee provides direction and oversight of remuneration policy.

 [For more detailed information on the Board Remuneration Committee, please see page 54](#)

Risk management

Banking involves risks that must be understood and managed to successfully deliver sustainable returns and play our key role in supporting wider economic growth.

“Our impairment performance and asset quality continued to improve in spite of the difficult economic environment.”

Robert Le Blanc
Chief Risk Officer

Risk management

Barclays has clear risk management objectives and a well-established strategy to deliver them, through core risk management processes.

Responsibility for risk management resides at all levels within the Group, from the Board and the Executive Committee down through the organisation to each business manager and risk specialist. Barclays distributes these responsibilities so that risk/return decisions are taken at the most appropriate level: as close as possible to the business, and subject to robust and effective review and challenge.

Risk appetite, which is the level of risk Barclays is prepared to sustain whilst pursuing its business strategy, is approved by the Board. Financial Risk Committee, Treasury Committee, Operational Risk Committee and Tax Risk Committee monitor their relevant risk profiles against risk appetite and the output is presented to the Board Risk Committee. Management assurance processes are assessed by Barclays Internal Audit and the effectiveness of the Group's control framework is assessed by the Governance and Control Committee.

During 2011, the Principal Risk Policy, which covers the categories of risk to which Barclays has its most significant actual or potential exposures, was updated resulting in risks being grouped into four categories: Credit, Market, Funding and Operational. Each risk owned is by a Group Principal Risk Owner, who is a senior individual within the Group Risk function. There was no significant change to the underlying risk types monitored as a result of this regrouping.

Performance in 2011

Loan impairment charges reduced 33% on 2010 reflecting the generally improving underlying trends across the retail and wholesale businesses. The Group loan loss rate decreased to 77bps (2010: 118bps), which was a very strong performance for this point in the economic cycle.

Retail loan impairment decreased as portfolio quality improved across almost all businesses. This included lower charges in our cards businesses in the UK and internationally. Similarly, impairment rates in unsecured loans and mortgages remained very moderate in the domestic and international markets.

Loan impairment also dropped in our wholesale portfolios across all businesses. Our corporate portfolios in Spain and Portugal remained under pressure from the difficult economic environment in those countries.

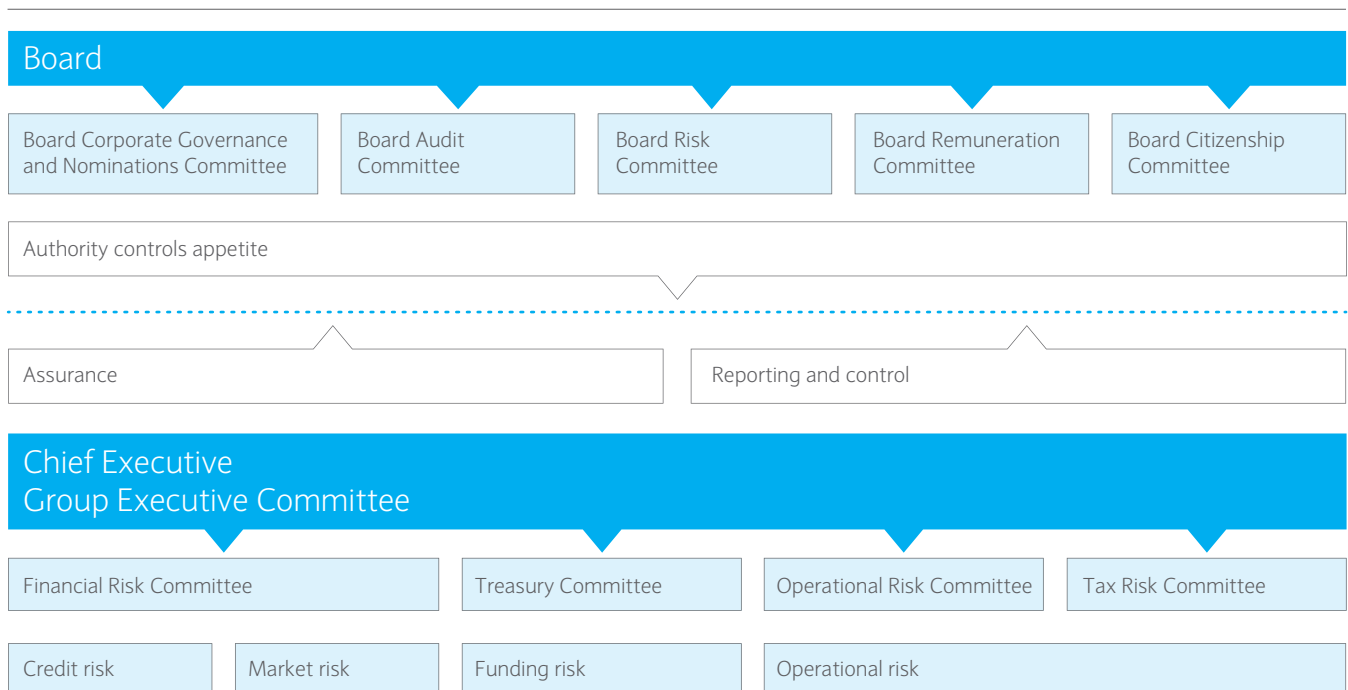

Key developments in relation to capital funding and liquidity are covered in the Finance Director's review on page 22.

Market exposures decreased in 2011 although there was a moderate increase in daily value at risk due to higher market volatility.

There have been no significant changes in our operational risk profile during 2011.

Our risk management overview

Barclays has clear risk management objectives and a well-established strategy to deliver them, through core risk management processes. This enables us to fully understand and minimise the impact of uncertainty on the business.

Four Principal Risks

Credit risk

Credit risk is the risk of the Group suffering financial loss if any of its customers, clients or market counterparties fails to fulfil their contractual obligations to the Group. This arises mainly from wholesale and retail loans and advances together with the counterparty credit risk arising from derivative contracts entered into with its clients. Other sources of credit risk arise from trading activities, including debt securities, settlement balances with market counterparties, available for sale assets and reverse repurchase loans. This can also arise when an entity's credit rating is downgraded, leading to a fall in the value of Barclays investment in its issued financial instruments.

Market risk

Market risk is the risk of the Group suffering financial loss due to being unable to hedge its balance sheet at prevailing market levels. The Group can be impacted by changes in both the level and volatility of prices e.g. interest rates, credit spreads, commodity prices, equity prices and foreign exchange rates. The risk is reported as traded risk where Barclays supports customer activity primarily via Barclays Capital; non-traded risk to support customer products primarily in the retail bank; and pension risk in relation to investment returns within the defined benefit scheme.

Funding risk

Funding risk comprises three key risks:

- Liquidity risk – the Group is unable to meet its obligations as they fall due resulting in: an inability to support normal business activity; failing to meet liquidity regulatory requirements; or changes to credit ratings.
- Capital risk – the Group is unable to maintain appropriate capital ratios which could lead to an inability to support business activity; failing to meet regulatory requirements; or changes to credit ratings.
- Structural risk – management of non-contractual risks and primarily arises from the impact on the Group's balance sheet of changes in primarily interest rates on income or foreign exchange rates on capital ratios.

Operational risk

Operational risk is the risk of direct or indirect impacts resulting from human factors, inadequate or failed internal processes and systems or external events. Operational risks are inherent in the Group's business activities. The key risks that this principal risk includes are external suppliers, fraud, financial reporting, information, legal, product, payments, people, premises & security, regulatory, taxation, technology and transaction operations. For definitions of these key risks see pages 74 to 78.

For more detailed information, please see the Risk Management section pages 67 to 158

Citizenship

At Barclays, we have a clear sense of our business purpose: to help individuals, businesses and economies progress and grow. For us, the term Citizenship captures this purpose and directs how we use our resources and expertise to create long term value for all our stakeholders.

“Banks need to become better citizens. This is not about philanthropy – it’s about delivering real commercial benefits in a way that also creates value for society.”

Bob Diamond
Chief Executive

Citizenship is one of Barclays four execution priorities and is integral to our business.

In the first instance, Citizenship is about contributing to growth in the real economy, creating jobs and supporting sustainable growth. Second, it is about the way we do business: putting our customers’ interests at the heart of what we do, and managing our impact responsibly. Third, it is about supporting our communities through investment programmes and the direct efforts of our employees.

Our approach

Throughout the year, we engaged with a diverse set of stakeholders to understand the challenges they face and how we can best help. Stakeholders play a pivotal role in helping us determine how we prioritise the issues we need to address. This involves listening to our customers and clients, our shareholders and employees, while working in collaboration with charities and governments.

We made firm progress in 2011 but still have a long way to go. That’s why in 2012 we will launch a Citizenship Plan outlining our longer term commitments to 2015. These objectives will be aligned to rigorous planning and reporting processes to drive delivery of this agenda, including responsibilities as corporate taxpayers. In this respect, we note HMRC’s reaction to a transaction that we voluntarily disclosed to them and recognise that we need to anticipate better its changing approach to the taxation of corporates.

Board Citizenship Committee

In 2011, we strengthened our governance framework by creating a Board Citizenship Committee as a formal sub-committee of our Board of Directors. The committee is chaired by Group Chairman Marcus Agius and includes two non-executive Directors.

Progress against our priorities is reviewed regularly and will be formally assessed at least twice yearly by the Board Citizenship Committee and the Executive Committee. A range of management committees are responsible for specific aspects of Citizenship performance.

Citizenship reporting

We have included here a summary of our progress. We will publish a comprehensive analysis in our Citizenship Report.

We measure and monitor progress across a wider range of issues in our annual Citizenship Report. The Report contains an extensive amount of information on our strategy, impacts, and performance and is independently assured using a robust reporting framework. Read the online Report from 23 April 2012 to access full 2011 data.

For more information, please see barclays.com/citizenship

Understanding our role within society

Banks play an integral role in society. Without a strong banking sector, economies and communities cannot thrive. We believe that the creation of sustainable value is particularly important in challenging economic times. Businesses, especially banks, need to help create jobs and foster growth. To do this effectively, we are working to rebuild trust and focus on the interests of the customers, clients and communities.

Our Citizenship strategy

Contributing to growth

We operate a profitable business helping individuals, businesses and institutions to pursue their goals.

We are committed to increasing lending to businesses and have exceeded our Project Merlin targets in the UK. Of the £43.6bn delivered, £14.7bn was provided to SMEs. We raised over US\$1 trillion in funding for institutions, including US\$388bn for governments and public sector entities. In a difficult year for the Eurozone, we were the leading manager of bonds for the European Financial Stability Mechanism. We also help individuals to manage their money, and last year supported 10,000 people in buying their first home.

Case study: supporting UK SMEs

In 2011, we helped over 100,000 businesses to start up and our nationwide seminars provided practical business advice to over 14,000 people. We were one of the first banks to respond to the riots in UK communities in August, helping assess cash flow impact and offering temporary overdrafts.

We are holding 'lending clinics' across the UK, answering questions on lending and the loan application process, to provide small businesses with the confidence to invest for growth.

The way we do business

We seek to reinforce our integrity every day in the way that we manage our business and treat our customers.

The interests of our customers and clients are at the heart of what we do, and we strive to improve the service that we provide. UK Banking complaints reported to the FSA (excluding PPI) fell 30% year on year, but we recognise we have more to do to in this area. We make responsible decisions in how we govern the business and treat our colleagues (see page 53), and actively manage the social and environmental impacts of what we do. As part of our Climate Action Programme, we have committed to reduce our carbon emissions by 4% by 2013.

Case study: customer satisfaction

We worked to improve customer satisfaction across the business during 2011.

For example, in the UK, our corporate bank ranked first for client satisfaction amongst peers and a division in our wealth management business won 'Best Customer Experience Award in Financial Services' in the Customer Experience Awards. Our UK retail bank improved customer satisfaction ranking to fourth amongst peers and received the Which? Award for 'Positive Change'.

Supporting our communities

Our role in the communities goes far beyond what we deliver through our core business activities.

The future success of communities and economies is reliant on the next generation having the right skills. We focus on empowering young people with the necessary financial, entrepreneurial and life skills to achieve financial independence and security. In 2011, we invested £63.5m in community programmes which reached over two million people. These activities were supported by 73,000 colleagues who donated their time, skills and money to support community causes.

Case study: empowering young people

Our partnership with Youth Business International (YBI) helps young people start their own businesses and create employment. YBI works with young people to provide access to capital, training, mentoring and other business development services. This benefits 50,000 young entrepreneurs in 34 countries.

Our employees volunteer in a variety of ways, including mentoring and providing professional support.

Key performance indicators

Key Performance Indicators (KPIs) are used to measure our success against each of the four execution priorities.

We have made solid progress in 2011 through improving the competitive position across all of our businesses but we recognise there is still work to do to achieve our medium term targets.

Capital

We have further improved our Core Tier 1 ratio to 11.0% through generating capital organically and reducing risk weighted assets. We therefore do not expect to seek additional capital from our shareholders to meet future regulatory requirements. Our diverse funding sources and strong liquidity pool of £152bn has minimised the cost of funding and provided protection against unexpected market fluctuations, despite the Eurozone crisis and subsequent market stress.

Core Tier 1 ratio

Returns

The Group continues to evolve and the strength of our universal banking model helped to achieve balanced profits across our retail and business banking and corporate and investment banking businesses but we recognise that our Return on Equity was below our stated goal of 13% for 2013. Although the worse than predicted macroeconomic conditions as well as new regulatory constraints mean that we may not be able to deliver 13% returns by 2013, we will continue to focus on delivering a steady improvement in returns and achieve 13% over time.

Return on equity

Income growth

Total income has increased 3% and benefited from gains on own credit and debt buy-backs. Excluding these items, total income declined 8% impacted by the macro environment. However, we have improved the competitive positions of all our major businesses and all businesses have grown adjusted net operating income, with the exception of Barclays Capital, which was most affected by difficult trading conditions. As we deliver income growth, we remain focused on improving the quality of assets to ensure that we do not grow at the expense of future impairment.

Total income

Citizenship

We have a clear sense of our business purpose – to help individuals, businesses and economies progress and grow. We clearly demonstrated this by delivering £45.0bn gross new lending to UK households and businesses. We exceeded Project Merlin targets in providing £43.6bn to UK businesses, including £14.7bn to SMEs. We also supported 10,000 first time buyers in the UK.

Gross new lending to UK households and businesses

For more detailed information, please see Financial Review page 159

How we measure our strategy's success

We use KPIs to help report on the progress of our business against our strategic objectives. This allows us to measure, monitor and manage performance improvement.

Our KPIs represent a set of measures focusing on aspects of performance that are the most critical for the current and future success of Barclays.

Rock solid capital funding and liquidity have been maintained to better deal with regulatory and economic conditions

Measures	2011	2010	2009	
Core Tier 1 ratio	11.0%	10.8%	10.0%	Page 160
Adjusted gross leverage	20x	20x	20x	Page 160

RoE down due to increased equity base and challenging market conditions. We continue to target an RoE goal of 13%

Measures	2011	2010	2009	
Return on average shareholders' equity (RoE)	5.8%	7.2%	6.7%	Page 160
Return on average tangible equity (RoTE)	6.9%	8.7%	9.0%	Page 160
Return on average risk weighted assets (RoRWA)	1.0%	1.1%	0.9%	Page 161
Profit before tax	£5,879m	£6,065m	£4,585m	Page 161
Cost: income ratio	64%	64%	57%	Page 161
Loan loss rate	77bps	118bps	156bps	Page 161
Dividend per share	6.0p	5.5p	2.5p	Page 161

Total income remained resilient in 2011, as improving income from our UK operations helped mitigate income pressures from the challenging economic environment

The geographical regions have been revised since January 2011. Ireland is now included within the Europe region and Middle East is now reported with Africa. Comparatives have been updated to reflect these changes.

Measures	2011	2010	2009	
Total income	£32,292m	£31,440m	£29,123m	Page 162
Income by geography: UK	49%	40%	45%	Page 162
Europe	13%	15%	15%	Page 162
Americas	19%	25%	22%	Page 162
Africa and Middle East	15%	16%	15%	Page 162
Asia	4%	4%	3%	Page 162

Our commitment to lending remains strong with gross new lending to UK households and businesses of £45.0bn and Project Merlin commitment exceeded by 13%.

EOS figure excludes Absa and Barclays Capital for 2011 as surveys conducted in 2010 in Absa and Barclays Capital were designed to span a two-year cycle. Taking their 2010 survey findings into account, the group-wide rate for 2011 is 82%.

Measures	2011	2010	2009	
Gross new lending to UK households and businesses	£45.0bn	£43.5bn	£35.0bn	Page 163
Global investment in our communities	£63.5m	£55.3m	£54.9m	Page 163
Colleagues involved in volunteering, regular giving and fundraising initiatives	73,000	62,000	58,000	Page 163
Group Employee Opinion Survey (EOS) – Proud to be Barclays	81%	83%	81%	Page 163
Percentage of senior managers who are female	22%	24%	24%	Page 163

Finance Director's review

We have delivered resilient profits in 2011 despite the difficult trading environment in the second half of the year. Our capital, funding and liquidity positions remained strong throughout 2011 and we are well protected against further economic stress.

“ We have delivered profit before tax of £5.9bn in 2011 which was well balanced across our retail and investment banking businesses. Our Core Tier 1 ratio improved to 11.0% despite the impact of the third Capital Requirements Directive (CRD3). ”

Chris Lucas
Group Finance Director

For 2011 we reported a slight decrease in profits, as a reduction in income at Corporate and Investment Banking was partly offset by income improvements in all other businesses, a significant improvement in credit impairment and cost reductions. Prudent capital management led to a further increase in our Core Tier 1 ratio. Our funding and liquidity remains strong.

Income Statement

Barclays delivered adjusted profit before tax of £5.6bn in 2011 which was well balanced across the Group. Statutory profits were broadly similar at £5.9bn. The adjusted basis helps to provide a more consistent basis for comparing business performance between periods and principally excludes gains on own credit and debt buy-backs of £3.8bn, impairment on our stake in BlackRock, Inc. of £1.8bn, a £1bn provision for PPI, and almost £600m of goodwill write offs, mainly in Spain.

Income increased 3% including gains on debt buy-backs of £1.1bn and an increase in own credit gains of £2.3bn. Excluding these one-off items, income declined 8% to £28,512m, principally reflecting a decrease in income at Barclays Capital. However, income increased in most other businesses despite continued low interest rates and difficult macroeconomic conditions. This resilience of income is reflected in the RBB, Corporate and Wealth net interest margin which remained stable at 204bps (2010: 203bps). Net interest income from RBB, Corporate, Wealth and Barclays Capital increased 5% to £13.2bn of which the contribution from hedging (including £463m of increased gains from the disposal of hedging instruments) increased by 3%.

Credit impairment charges decreased 33% to £3,802m, reflecting significant improvements across all businesses, and impairment charges as a proportion of Group loans and advances improved to 77bps, compared to 118bps for 2010. In addition, impairment of £1.8bn was taken against our investment in BlackRock, Inc.

Adjusted operating expenses, which exclude the £1bn provision for PPI redress and £597m (2010: £243m) goodwill impairment, were down £548m to £19,180m. Excluding the UK bank levy of £325m introduced in 2011, operating expenses were down 4% to £18,855m, which included £408m (2010: £330m) of restructuring charges taken now in order to deliver future benefits.

Despite cost savings, the adjusted cost: income ratio increased to 67% (2010: 64%), reflecting lower income, increased restructuring charges and the UK bank levy. At Barclays Capital the cost: net operating income ratio was 71% (2010: 65%) and the compensation: income ratio was 47% (2010: 43%), reflecting lower income in difficult conditions.

Balance Sheet

Net asset value per share increased 9% to 456p with net tangible asset value per share, which adjusts for goodwill and other intangible assets, increasing 13% to 391p.

For more detailed information, please see [Financial Review page 159](#)

Your Finance Director's Review

The Finance Director is responsible for monitoring the Bank's financial performance and position and communicating this to both internal and external stakeholders.

Below he discusses in detail the Bank's performance during 2011 and its year end position as at 31 December 2011.

Total shareholders' equity (including non-controlling interests) was £65.2bn (2010: £62.3bn). Excluding non-controlling interests, shareholders' equity increased £4.7bn to £55.6bn, driven by profit after tax of £3.0bn and positive available for sale and cash flow hedge reserve movements offset by negative currency translation and dividends paid.

Total assets increased to £1,564bn (2010: £1,490bn), principally due to an increase in the fair value of gross interest rate derivative assets as major forward curves decreased, partially offset by a decrease in reverse repurchase agreements.

The Group's loan to deposit ratio continued to improve to 118% (2010: 124%) and the loan to deposit and long term funding ratio was 75% (2010: 77%). As a key measure of stability, adjusted gross leverage remained at 20x, moving within a month end range of 20x to 23x. Excluding the liquidity pool assets held as contingency to meet cash outflows in the event of stressed market conditions, adjusted gross leverage remained flat at 17x.

Capital Management

At 31 December 2011, the Group's Core Tier 1 ratio was 11.0% (2010: 10.8%) reflecting the contribution from retained earnings and reductions in risk weighted assets, which more than offset the impact of CRD3.

The Group continued to generate Core Tier 1 capital from retained profits (excluding own credit, impairment of investment in BlackRock, Inc. and goodwill impairment, which are added back for regulatory capital purposes). This contribution of £2.6bn was largely offset by other movements in Core Tier 1 capital, notably pension contributions and foreign currency movements, resulting in an increase in Core Tier 1 capital of £0.2bn to £43.1bn.

Risk weighted assets decreased slightly to £391bn (2010: £398bn) largely reflecting foreign exchange movements and decreases in Barclays Capital from lower levels of activity, risk reduction and sales of credit market exposures, which more than outweighed the approximate £30bn increase resulting from the implementation of CRD3 in December.

We expect that the strength of our Core Tier 1 ratio, our ability to generate capital organically and our optimal use of risk weighted assets will enable us to meet our targeted capital ratios after absorbing the impact of Basel 3.

Funding and Liquidity

The Group's overall funding strategy is to develop a diversified funding base and maintain access to a variety of alternate funding sources, so minimising the cost of funding and providing protection against unexpected fluctuations. Within this, the Group aims to align the sources and uses of funding. Customer loans and advances are largely funded by customer deposits, with any excess being funded by long-term wholesale secured debt and equity. Wholesale funding is well managed with derivative assets and liabilities largely matched.

The Group had £265bn of wholesale debt diversified across currencies, of which just £39bn was secured. Term funding maturing in 2012 totals £27bn. Term funding raised in 2011 amounted to £30bn (2010: £35bn) compared to term funding maturities of £25bn. During January 2012, £5bn of term funding was raised.

Approximately 10% of customer loans and advances at 31 December 2011 were secured against external funding, leaving significant headroom for further secured issuance.

The liquidity pool remained resilient at £152bn and moved within a month-end range of £140bn to £167bn, with short-term funding being rolled over despite the stress in the wholesale funding markets. The liquidity pool comprises high quality liquid unencumbered assets, diversified across currencies, broadly in line with wholesale debt requirements, with 93% (2010: 88%) of the pool comprising cash and deposits with central banks and government bonds.

The Group monitors compliance against anticipated Basel 3 metrics, including the Liquidity Coverage Ratio at 82% and Net Stable Funding Ratio at 97%, and is on track to meet the 100% compliance required by 2015 and 2018 respectively.

Conclusion

To summarise, we delivered resilient adjusted profits of £5.6bn, with adjusted net operating income growth in every business except Barclays Capital. We delivered a 33% improvement in credit impairment, managed adjusted costs down 4% excluding the bank levy, and we increased the dividend by 9%. Our Core Tier 1 ratio increased to 11%, and our funding and liquidity strength continues to give us a competitive advantage.

Our universal banking model enabled us to generate adjusted profit before tax of £5.6bn, driven by increased profits in the majority of our businesses.

Note: The table above excludes Head Office Functions and Other Operations

Divisional review

Retail and Business Banking

Retail and Business Banking (RBB) has performed strongly in 2011 with two businesses, UK RBB and Barclaycard, delivering returns well above our 2013 goal. We have also made significant progress in implementing our vision of One Africa and have taken robust action to reposition Europe RBB.

“In a tough economic climate, we have ensured we are ‘open for business’, supporting our customers when and where they need us.”

Antony Jenkins

Chief Executive, Retail and Business Banking

Our focus in Retail and Business Banking (RBB) is on making our customers' lives much easier. We have put this at the heart of our business and this is now making a significant difference for our customers.

We have focused on improving customer service, listening to our customers and understanding their needs. As a result, we have made changes, so that, for example, all standing order and direct debit changes in the UK are now processed on the day they are received. On a year-on-year basis, banking complaints in the UK (excluding PPI) reduced by 30% and we are committed to reducing these further still.

In a tough economic climate, we have ensured we are ‘open for business’, supporting our customers when and where they need us. In addition to exceeding our lending targets to businesses in the UK, Barclays ran more than 800 seminars across the country to help customers network with their peers and improve their growth. We returned 1,900 existing businesses to health and helped 108,000 entrepreneurs to open their doors for the first time. Of the almost one million home owners to whom we provided loans, more than 10,000 were buying their first property, with our new 90 per cent loan to value mortgage helping customers access the housing market. Every day, across our network, our staff help customers to achieve their aspirations, whether buying a new home, starting a business, investing for the future or simply managing their day to day finances. Their engagement and commitment is the bedrock of our success.

Innovation has also continued to be a differentiator for Barclays as we look to address the changing needs of our customers. We now have 17 million contactless cards in issue in the UK and we have maintained our leading position in this fast-developing area of payments with more than 61,000 retailers using our contactless terminals. We also began the roll-out of contactless payments in South Africa during 2011 and Barclaycard launched the first contactless mobile phone in the UK with Orange. More recently we have launched Barclays Pingit in 2012, Europe's first person-to-person service for sending and receiving money using mobile phone numbers. We will continue to innovate to meet our customers' needs.

A relentless focus on our customers is the foundation of our performance and, we believe, will generate sustainable value for our shareholders. In 2011, in our core UK banking market, we attracted new customers in all our major product categories. Adjusted return on average equity in UK Retail and Business Banking at 15%, and in Barclaycard at 17%, exceeded the Barclays target of 13%, with Africa RBB improving to 10% and Europe RBB returns reflecting the repositioning of the business. Adjusted profit before tax in Retail and Business Banking increased 48% in 2011.

I am confident that we are making good progress on our customer agenda and that through this we are delivering significant value to all our stakeholders.

Corporate and Investment Banking

Against a backdrop of challenging economic and market conditions, results for Barclays Capital were resilient compared with the industry, and the business held or gained market share. The year also saw Barclays Corporate return to profitability driven by a strong underlying performance in the UK business.

“Through continued uncertainty in the markets, and in the global economy, we will continue to focus relentlessly on the need of our clients.”

Jerry del Missier and Rich Ricci
Co-Chief Executives, Corporate and Investment Banking

Our Corporate and Investment Banking business provides clients with loans, financing, risk management, strategic advice and transactional payments support. It supports corporate clients to achieve growth and job creation in the real economy, governments to deliver their stability and growth plans, and institutions to meet the long-term investment needs of their clients.

Against a backdrop of challenging economic and market conditions, results for Barclays Capital were resilient compared with the industry. Profit before tax fell 32%, driven by a 22% reduction in income. However we held or gained market share, and continued to win recognition for our client focus – including Euromoney’s Best Global Investment Bank and IFR’s Bank of the Year.

The strength of our client-focused model means that we are bringing clients integrated solutions that draw expertise from across the organisation. We continued to see real client benefits in 2011 from managing the business in a more integrated way, to bring clients the best of Barclays.

Revenues generated from delivering Barclays Capital products to Barclays Corporate clients increased 28% year on year, and 73% over the past three years, while revenues from delivering Barclays Corporate products to Barclays Capital clients are up 20%.

The substantial improvements we have seen in the results for Barclays Corporate reflect the significant progress we’ve made across every aspect of the business in 2011, delivering on a clear growth strategy and turning an adjusted loss of £388m in 2010 into an adjusted profit of £126m in 2011.

We have continued to take a disciplined approach to investment across Corporate and Investment Banking. Our focus remains on building our platform in those areas where we see real opportunity to deliver an advantage for our clients.

Barclays Capital continues to strengthen its Equities and Investment Banking franchises in EMEA and Asia Pacific, and Barclays Corporate has expanded its hubs in Frankfurt, Hong Kong, Singapore and New York. Our success in securing 16 Corporate Broking mandates in the UK last year is a good example of the strength and reputation we are building in our newer businesses.

We remain committed to our targets for returns, income growth and cost management. Through continued uncertainty in the markets, and in the global economy, we will continue to focus relentlessly on the needs of our clients.

Divisional review

Barclays Wealth

In 2011, Barclays Wealth demonstrated its third successive year of double digit income growth. Now in its third year of the five year Gamma Plan, Wealth is on track to position itself at the top tier of the industry.

“We continue to transform Barclays Wealth into a premier global wealth manager.”

Thomas L. Kalaris
Chief Executive, Barclays Wealth

In 2011, the second year of our five year strategy, we delivered a first rate performance and continued to meet all our financial and franchise targets. We remain well on track against our 2014 commitments.

Unprecedented market turmoil and a challenging business environment underpinned most of 2011. Under these conditions we benefited as a part of Barclays, a global institution with a robust balance sheet, significant product capability and a clear strategy. This provided us with a unique opportunity to serve our clients more comprehensively than before; positioned to bring the best of Barclays to them.

2011 also marked the second year of the five year “Gamma” program; a complex, challenging and ambitious plan to transform Barclays Wealth into a premier global wealth manager. We are well on track to deliver against our promises - a step change improvement in client experience and a significant increase in the productive capacity of the firm.

The execution of this strategy delivered differentiating performance. Our financial results were strong with income growth of 12% to £1.7bn and 27% growth in profit before tax to £207m. The productivity of our relationship managers improved; with the top 25 generating 21% higher revenue than last year. Our clients have begun to benefit from better on-boarding processes; faster turn around of credit decisions; improved reporting and a broader set of products.

2012 will undoubtedly be a challenging year as we deliver the third year of our Gamma plan while still meeting ambitious financial targets. But we are strongly positioned; we have proven the concept and shown that we can deliver. I remain confident that we can meet our commitments to our clients, thereby meeting our commitments to our shareholders.

Case studies

Delivering Barclays Capital for HP

When Hewlett-Packard announced its \$11.7bn US-UK cross-border acquisition of Autonomy, Barclays Capital played a crucial role in every aspect of the transaction.

Underscoring the firm's ability to coordinate globally across regions and product areas to deliver seamless solutions for clients, teams spanning Technology client coverage, M&A, Corporate Broking, Debt Capital Markets, Loan Capital Markets, Global Finance Structuring & Advisory, Risk Solutions and Syndicate partnered to support HP on the transaction – the largest cross-border software M&A deal in history. In addition to providing strategic M&A advice on the transaction as well as delivering a fairness opinion to the HP board of directors, Barclays Capital acted as sole arranger and sole underwriter for a fully-committed \$8.3bn (£5bn) bridge facility to support the transaction, which was successfully syndicated to a select group of core relationship banks upon announcement. Barclays Capital also led, and was billing and delivery agent for \$4.6bn of senior notes.

The ability to provide a commitment of this size on a sole-basis was widely hailed in the media as a validation of Barclays Capital's full-service offering. The New York Times wrote: "Unlike boutiques, the full-service banks can provide a fuller picture of how the capital markets may react to a potential deal as well as the necessary financing for a transaction. Barclays Capital, for instance, committed to providing £5bn to HP for its Autonomy deal, which a boutique advisor could not do."

Barclays Wealth

Offering clients the benefits from our international reach and expertise in private wealth management, investment management, financial planning, brokerage and private banking.

Since the establishment of our private banking business in India three years ago, Barclays Wealth has grown significantly.

In India, private banking clients are typically entrepreneurs who have established multi-generational family businesses with complex financing needs. This provided us with a unique opportunity to serve our clients more comprehensively through our "private investment banking" model, unique investment philosophy and our wealth advisory expertise.

Client assets have reached the £1bn mark since inception. We have built a solid reputation and a strong franchise this was clearly demonstrated by winning the 'Best Private Bank in India' in The Asset Triple A Investment Awards.

Barclays Retail and Business Banking – Pingit

Europe's first person-to-person service for sending and receiving money using mobile phone numbers is launched in 2012.

Barclays has a track record of leading the transformation of banking and financial services through the use of technology. In addition to investing in improving our current services, we are also seeking to meet needs which customers have not yet identified themselves.

Recognising the strength of consumers' attachment to their smartphones and the opportunity that smartphone apps present for rapid and cost-effective innovation, we launched Barclays Pingit simultaneously for Apple, Android and Blackberry users. On the day of Pingit's launch, it was the second most popular app downloaded from Apple in the UK.

Barclays Pingit allows users to receive and send money, for free, to anyone with a UK current account and a UK mobile phone number, simply by using that mobile number. It removes the need to share bank details. Further releases of the app will add new features and extend its use internationally and to other customer groups allowing Barclays to maintain the innovation lead created by its launch.

Barclays Corporate backing Wyke Farms

Wyke Farms is a 125 year old independent family owned business and one of the leading manufacturers and suppliers of branded cheddar cheese, butter and whey protein in the UK.

Towards the end of 2009, the business started experiencing significant trading challenges in volatile market conditions and as a result saw losses start to build monthly. Since that time the Barclays Business Support team has worked closely with Wyke Farms' management to develop and implement a structured 'Fit for the Future' turnaround plan. The results have been outstanding – in 2011 Wyke Farms returned to profitability and is now on a sustainable financial footing, generating good returns for its shareholders, providing stability of employment locally and maintaining its position as the largest premium branded family owned cheddar producer in Britain. Indeed the highly effective working relationship between Barclays and Wyke Farms which resulted in this success was formally recognised by the Institute for Turnaround in December 2011 when Wyke Farms won the IFT 'Private Company Turnaround of the Year' award.

The relationship between Wyke Farms and Barclays has been strengthened even further through this experience. Barclays continues to provide tailored borrowing facilities to the business to enable investment in new staff and machinery and our relationship management team is there to give additional advice and support as the company enters its next phase of growth.

Summary Remuneration Report

The Board Remuneration Committee provides governance and strategic oversight of remuneration.

“The Committee will continue to focus on reaching a sustainable balance between shareholder returns and employee remuneration.”

Alison Carnwath
Chairman, Board Remuneration Committee

We recognise that executive remuneration generally, and bank remuneration in particular, is an important issue. Barclays needs to work with the acceptance of the communities in which we operate and balance the competing demands of our many stakeholders. This includes a close and continuous engagement with the Financial Services Authority and with our shareholders.

In 2011 Barclays delivered a solid set of results, achieved in challenging market and economic conditions. The results were reflected in the remuneration decisions across Barclays including those for Bob Diamond and Chris Lucas. 2011 total incentive awards were down 26% across the Group compared with a 3% reduction in profit. Bonuses for our executive Directors and our eight highest paid senior executive officers were down 48% versus 2010 on a “like-for-like” basis (namely the reduction for individuals in service in both 2010 and 2011).

The Board and the Committee recognise that our return on equity has to improve. In order to achieve this, our operating costs need to be reduced. Remuneration has its part to play in that. We fully recognise that higher capital requirements and the economic environment mean that remuneration levels in the industry have to adjust. That journey will take time and we have taken important steps in the right direction in 2011. Total incentive awards for Barclays Capital were down 35% on 2010 with Barclays Capital profit before tax reducing 32%. The Committee will continue to focus on reaching a sustainable balance between shareholder returns and employee remuneration.

The full remuneration report provides an overview of executive remuneration for 2011, details of the total incentive awards for 2011 and additional disclosures to comply with legal and regulatory requirements. Additional information on Barclays approach to remuneration can be found at www.barclays.com/investorrelations. I trust the remuneration report provides you with a clear picture of how the Committee has discharged its responsibilities in 2011.

Alison Carnwath

Alison Carnwath

Summary Remuneration Report continued

Executive Directors' benefits

	2011 £000	2010 £000
Bob Diamond	474	268
Chris Lucas	28	25

Directors' emoluments and statutory disclosures

	2011 £m	2010 £m
Aggregate emoluments	15.9	15.8
Amounts paid under long-term incentive schemes	5.8	7.0
	21.7	22.8

The aggregate emoluments above include the cost of tax equalising Bob Diamond, consistent with his contract. There were no pension contributions paid to defined contribution schemes on behalf of Directors (2010: £13,588). There were no notional pension contributions to defined contribution schemes (2010: £nil). As at 31 December 2011, there were no Directors accruing benefits under a defined benefit scheme (2010: one Director).

Total Shareholder Return

Figure 1 shows the value, at 31 December 2011, of £100 invested in Barclays on 31 December 2006 compared with the value of £100 invested in the FTSE 100 Index. The other points plotted are the values at intervening financial year ends. The FTSE 100 Index is a widely recognised performance comparison for large UK companies and this is why it has been chosen as a comparator to illustrate Barclays total shareholder return.

Barclays Remuneration Policy

The Remuneration Policy provides a framework for the Committee in carrying out its work. The aims of the Remuneration Policy are to:

1. Attract and retain those people with the ability, experience and skill to deliver the strategy;
2. Create a direct and recognisable alignment between the rewards and risk exposure of shareholders and employees;
3. Incentivise employees to deliver sustained performance consistent with strategic goals and appropriate risk management, and to reward success in this;
4. Deliver remuneration that is affordable and appropriate in terms of value allocated to shareholders and employees; and
5. Encourage behaviour consistent with Barclays guiding principles.

More details on the Remuneration Policy including Barclays guiding principles can be found at www.barclays.com/investorrelations. The

Committee reviews the Remuneration Policy to ensure that Barclays remuneration remains competitive and provides appropriate incentive for performance. To ensure appropriate operation of the Remuneration Policy, the Committee has established remuneration governance frameworks for each major business and for the Group. The frameworks are forward looking and are based on financial metrics, including key remuneration ratios, that assess the current and future affordability of remuneration. The frameworks are designed to ensure that remuneration is managed in a way that is consistent with delivering the strategy and performance of Barclays and each of the businesses, whilst maintaining capital strength.

For individual remuneration decisions made by the Committee, including the decisions for executive Directors, the level of remuneration across Barclays and each of the businesses is taken into account. The combined potential remuneration for the executive Directors and for senior employees from bonuses and long term incentive awards outweighs the fixed component of remuneration, and is subject to individual and business performance. This means that the majority of remuneration is risk-adjusted.

Remuneration governance

The Committee determines the bonus pool by reference to a number of quantitative and qualitative measures. In doing this the Committee is informed by the remuneration governance frameworks and associated financial metrics and remuneration ratios. The Committee receives input from the Group Finance Director and the Chief Risk Officer on key financial and risk matters. The Committee works closely with the Board Audit Committee and the Board Risk Committee, and receives input on internal audit, compliance and risk matters. This includes the Committee receiving a report from the Board Risk Committee on the risk performance of the businesses in order to ensure that the bonus pool properly reflects this performance.

The Committee reviews individual remuneration recommendations for executive Directors, Code Staff and employees with total remuneration of £1m or more. Remuneration decisions are directly linked to individual performance, both financial and non-financial. Individual performance is reviewed by line management through a formal assessment process, which includes a review against objectives set at the start of the year. The assessment includes reviewing individual behaviour against Barclays guiding principles and applicable risk and control policies.

Bonuses above a threshold level (set annually by the Committee) include awards in the form of deferred bonuses. The vesting of deferred bonuses is dependent on future service and subject to clawback provisions. The Committee reviews the operation of clawback provisions and may reduce the vesting level of an unvested deferred bonus (including to nil).

The risk and compliance functions play a key role in remuneration governance. The risk function provides regular updates to the Committee on risk-adjusted business performance and it also provides input on the remuneration governance frameworks, bonus pool proposals and new incentive plan designs (including risk-adjusted metrics for use in long term incentive plans) from a risk management perspective. The input of the compliance function focuses on the assessment of individual employee behaviour based on the operation of compliance controls.

Corporate governance report

Dear Shareholder

The fundamental purpose of any company is the creation and delivery of long-term sustainable shareholder value in a manner consistent with its obligations as a responsible corporate citizen. Corporate governance must be seen in this context – it is not an objective in its own right but a vital facilitator to the creation of long-term value for our owners. However, the creation of shareholder value is influenced by many factors, both internal and external and the Board and I are very conscious that the financial crisis has resulted in Barclays shareholders suffering a large erosion in the value of their holding. We continue therefore to review our corporate governance processes and practices carefully to ensure they are fit for purpose and have again conducted a rigorous, externally facilitated Board Effectiveness Review during 2011.

So, how is the Barclays Board seeking to create and sustain value over the long-term? We aim to achieve this by understanding the external factors that present risks and opportunities for our business, thereby ensuring our strategy is appropriate; building strong and stable relationships with our customers, employees and suppliers; and ensuring that we manage our risks and scarce resources, including capital, appropriately. Our strategy is focused on four key priorities: Capital; Returns; Income Growth; and Citizenship and we ensure our Board discussions are focused on these issues.

External factors continue to have a significant impact on Barclays. The demands and expectations of governments, regulators and of society as a whole as to the role of banks and other financial institutions have resulted in a number of changes in the regulatory environment that will have a profound impact on our strategy and business model. Furthermore, ongoing global economic uncertainty, particularly surrounding the Eurozone, has led to continued weak market conditions. It is important in such an environment that the Board meets regularly and is kept fully informed. Consequently, in 2011, in addition to our eight scheduled meetings, two of which were held overseas, we held eight additional Board meetings to discuss, amongst other things, the uncertainty in the Eurozone; market conditions; the findings and recommendations of the Independent Commission on Banking (ICB), as published in both their interim and final reports; and our commitments under Project Merlin, the agreement between the UK Government and the four major UK banks on commitment to lending in the UK.

Good corporate governance is vital in supporting the delivery of our strategic priorities. Our Board Committees play an important role in working with management to ensure our business is financially strong, that it is well-governed and that any risks are identified and mitigated. It is important that we generate income in a sustainable way and manage our risks and costs properly, without eroding the controls we have in place. The Board Audit Committee, chaired by Sir Michael Rake, has a key oversight role in ensuring that our financial statements are a true and fair representation of our financial position and strength and that our control environment is robust and maintained. It is vital that our levels of capital, funding and liquidity are regarded as rock solid, particularly in times of economic dislocation, and the Board Risk Committee, chaired by David

Booth, provides oversight of and advice on both our risk appetite and management and our capital and liquidity strategies. And it is essential that we reward our people appropriately, that their pay reflects performance and that we do not incentivise them to take inappropriate levels of risk. The Board Remuneration Committee, chaired by Alison Carnwath, provides direction and oversight of our remuneration policy. Each of the Board Committee Chairmen reports personally later in this report.

We must also demonstrate our wider value to society. To support the delivery of this objective, in August 2011 we created a Board Citizenship Committee, which I chair. I am joined on the Committee by Sir John Sunderland and Dambisa Moyo, and we held its first meeting in late 2011. Our remit is to have oversight of our conduct with regard to our corporate and societal obligations and our reputation as a responsible corporate citizen. We will oversee matters such as our progress against our Treating Customers Fairly objectives and our conduct on matters relating to our shareholders, clients, customers, employees, suppliers and the communities in which we operate. More information on this Committee can be found in its Terms of Reference on our website.

Of course, in order to deliver our strategy, we need the right people. To this end, one of our priorities is to ensure that we have a Board and an executive management team with the appropriate skills, knowledge and experience to operate effectively in an ever challenging environment. One way of ensuring that we continue to have the right people is to have a rigorous appointment and an effective succession planning process in place for Board and key management roles. The Board Corporate Governance and Nominations Committee has a key role to play in reviewing new appointments and succession plans and during the year we specifically debated both Board composition and succession planning for Executive Committee positions.

Board composition is critical in ensuring effective and value-adding corporate governance. The debate about Board diversity and the representation of women on company boards progressed at pace in 2011 and we welcomed and supported the recommendations in Lord Davies' report into Women on Boards. However, diversity is much wider than the issue of gender: it is about ensuring that there is an appropriate range and balance of skills, experience and background on the Board. Nevertheless, while ensuring that all Directors are appointed on merit, we have set ourselves the aspirational target of ensuring that at least 20% of our Board is made up of women by the end of 2013 and for that position to have exceeded 25% by the end of 2015. We are also continuing to support initiatives to ensure that the pipeline of credible women candidates for Board positions is strengthened, including my own personal participation in the FTSE 100 Cross-Company Mentoring Programme and our sponsorship of the Cranfield Female FTSE Board Report. More details of our approach to diversity and inclusion may be found on page 53 and I report in more detail on our Board appointment process and succession planning initiatives in my report on the activities of the Board Corporate Governance and Nominations Committee on page 38.

We continue to embrace the provisions and principles of the UK Corporate Governance Code (the Code) and the rest of my report explains how we applied those principles in 2011.

Marcus Agius
Group Chairman
7 March 2012

Board – Group Chairman, two executive Directors, nine non-executive Directors

Leadership

What is the role of the Board?

Our principal duty, collectively, is to promote the long-term success of Barclays by creating and delivering sustainable shareholder value. We do this by setting the strategy and overseeing its implementation by management. While our ultimate focus is long-term growth, we also need to deliver on short-term objectives and we seek to ensure that management strikes the right balance between the two. We are mindful of our wider obligations and consider the impact our decisions will have on Barclays and on various stakeholders, such as our employees, our shareholders, our suppliers, the environment and our community as a whole. In setting and monitoring the execution of our strategy, we aim to ensure that we maintain an effective system of internal control and that management maintains an effective risk management and oversight process across the Group, so that growth is delivered in a controlled and sustainable way.

In order to ensure that we meet our responsibilities, specific key decisions have been reserved for approval by the Board. These include decisions on the Group's strategy, approval of risk appetite and capital and liquidity matters, Board membership, financial results and governance issues. A full formal schedule of matters specifically reserved to the Board can be found on our website, at www.barclays.com/corporategovernance.

To assist us in carrying out our functions and to ensure there is independent oversight of internal control and risk management, the Board has delegated certain responsibilities to Board Committees, which are comprised solely of independent non-executive Directors. Each Board Committee has agreed Terms of Reference, which are approved by the Board. Copies can be found on our website.

The Chairman of each Board Committee reports to the Board on the matters discussed at Board Committee meetings. You will find later in this section reports from the Chairman of each Board Committee on their activities in 2011 and their priorities for 2012.

More information on the role of the Board and its Committees in general can be found in "Corporate Governance in Barclays", which is available on our website.

Board composition

The names of our Directors and their full biographical details, including the skills and experience they each bring to the Board, can be found on pages 50-52.

As Chairman, my primary responsibility is to provide leadership to the Board to ensure that we satisfy our legal and regulatory responsibilities. I set the Board's agenda in consultation with the Chief Executive and Company Secretary, taking full account of the issues and concerns of Board members and giving consideration to the need to allow adequate and sufficient time for the discussion of the items on the agenda, in particular, strategy. You can find my full role profile in our "Charter of Expectations", which is available on our website. In addition to the Board, I also chair the Board Corporate Governance and Nominations Committee and the Board Citizenship Committee and I am a member of the Board Remuneration Committee. Although I am not a member of the Board Audit and Board Risk Committees, I make a point of attending a number of their meetings each year: this allows me to gain a deeper understanding of the specific issues each of those committees is discussing and also allows me to observe the committees in action and assess their effectiveness. In 2011, I attended five meetings of the Board Audit Committee and three meetings of the Board Risk Committee.

It is the responsibility of the executive Directors, Bob Diamond and Chris Lucas, to make and implement operational decisions and to run the business day-to-day within the strategy and risk appetite agreed by the Board. They are supported by the Executive Committee, which Bob chairs. Bob reports to each Board meeting on the significant matters debated at Executive Committee meetings and members of the Executive Committee regularly attend Board meetings to report on their business or area of responsibility.

The non-executive Directors are independent of management. Their role is to advise and constructively challenge management and monitor the success of management in delivering the agreed strategy within the risk appetite and control framework that is set by the Board.

Sir Richard Broadbent served as our Senior Independent Director until his retirement from the Board on 30 September 2011 and I am grateful to him for the advice and support he afforded to me in managing the business of the Board. Sir Michael Rake succeeded to the role of Senior Independent Director with effect from 1 October 2011: his significant experience as a listed company chairman, as a board member and of business in general, gained from his long career at KPMG, will prove extremely valuable. You can find the role profile for the Senior Independent Director in our Charter of Expectations.

Corporate governance report continued

To facilitate the smooth running and effective management of our meetings at all stages, Lawrence Dickinson, our Company Secretary, supports me, the Chief Executive and the Board Committee Chairmen in setting the annual meeting agenda and ensuring that agreed actions are completed. Lawrence also works closely with senior management to ensure that there are timely and appropriate information flows within and to the Board, the Board Committees and between the Directors and senior management in general. During the year, we introduced a new secure, electronic system for the delivery of Board and Committee papers to Directors, which they can access using tablet computers, thus enabling faster information flows. More details on the role of the Company Secretary and the support provided to the Board can be found in our Charter of Expectations.

Corporate Governance in Barclays

All of our corporate governance practices have been brought together in one document, Corporate Governance in Barclays. This framework provides the basis for promoting the highest standards of corporate governance in Barclays. Corporate Governance in Barclays is available on our website at www.barclays.com/corporategovernance.

Charter of Expectations

The role profiles, responsibilities, time commitments, key competencies and behaviours we expect of our Directors, together with the key indicators of high performance, are set out in our Charter of Expectations, which was reviewed and updated during 2011 to take account of the best practice recommendations set out in the FRC's Guidance on Board Effectiveness. The Charter of Expectations is available on our website.

How does the Board operate?

We normally meet eight times a year, which includes an annual two day strategy meeting. We meet more frequently when the need arises and, in 2011, we arranged and held eight additional meetings at short notice to discuss issues such as market conditions, the interim and final reports of the ICB and significant Group developments, such as the court ruling on Payment Protection Insurance. In total, we met as a Board 16 times during the year. All Directors make every effort to attend each meeting, whether it is in person, by telephone or by video conference, unless circumstances prevent them from doing so, such as illness or prior commitments. In such instances, they are able to give to me ahead of the meeting any views or comments they may have on the matters to be discussed. I meet privately with the non-executive Directors as a group ahead of each Board meeting to take soundings on any particular matters they may wish to raise at the meeting. I also meet with the Company Secretary after each meeting to agree the actions to be followed up and to discuss how effective the meeting was.

I can confirm that each Director committed an appropriate amount of time to their Barclays duties in 2011 and the non-executive Directors met the time commitment specified in their letters of appointment. Details of Board meeting attendance in 2011 is as follows:

a Unable to attend a scheduled meeting owing to a prior commitment.

b Unable to attend a scheduled meeting owing to illness.

How did we discharge our responsibilities in 2011?

In 2011, ongoing difficult global economic conditions and the changing regulatory environment formed the backdrop to our decision-making process and highlighted the strategic challenges that we face. Key activities for the Board during the year included:

- We undertook regular reviews of strategic options open to the Group given the developing regulatory environment in the UK and globally. Significant time was set aside for discussions on strategy, including discussion over dinner ahead of the formal Board meetings. The evening sessions have provided an opportunity for more high-level discussions and have enabled wide-ranging debate on critical issues, without the constraints of a formal meeting agenda.
- We reviewed progress against our four execution priorities of Capital, Income Growth, Returns and Citizenship, including reviewing the cost reduction programme and the performance of each of our businesses against our return on equity target.
- Following the publication of the ICB interim report in April 2011, and the final report published in September 2011, we met to discuss the potential implications for our overall strategy.
- We received regular updates on global economic conditions and the outlook for the market. We also discussed bank sector valuations, with input from our corporate brokers.
- We held a separate meeting to discuss the Project Merlin agreement and received regular reports on the Group's compliance with its commitments under the agreement.
- We held a special meeting to discuss the implications of the court ruling on Payment Protection Insurance (PPI) policies and the Group's response.
- We received updates from each of our principal businesses to discuss their progress against agreed strategy, plus updates on our brand and marketing strategy and investor relations strategy.
- We considered the Group's liquidity (including liquidity risk appetite), the capital plan and also approved the Group's Risk Appetite for 2012.
- We reviewed senior management succession plans, which identify talent in the Group at the level below the Executive Committee.
- Given our significant North American operations, in 2011 we held two board meetings in New York and there are plans to hold more overseas meetings in 2012.

The chart below illustrates how we allocated our time during 2011.

What are our objectives for 2012?

We are yet to see any real signs of sustained growth in many developed economies and ongoing difficult economic, political and market conditions, coupled with the changing regulatory landscape, will form the background to our deliberations in 2012. I see the Board's focus continuing to be on:

- identifying and developing our strategic options in light of regulatory change, macroeconomic uncertainty and market conditions;
- monitoring management's progress against our four execution priorities of Capital, Returns, Income Growth and Citizenship; and
- ensuring we have stable and effective management in place by maintaining an appropriate succession plan.

Effectiveness

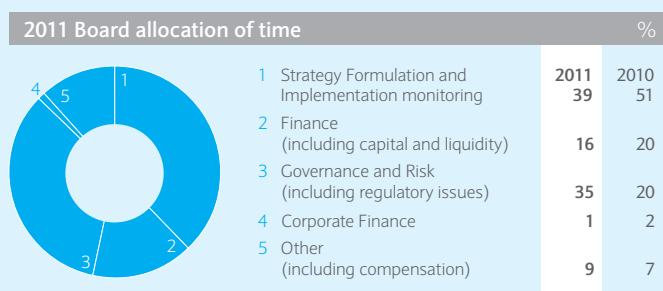

How do we ensure the effectiveness of our Board?

Board Size, Composition and Qualification

We have determined that the optimum Board size for Barclays is 12-15 members. We currently have 12 Directors on our Board: in addition to me as Chairman, we have two executive Directors and nine independent non-executive Directors. The size, composition and qualifications of the members of a board have a great impact on how effective that board is. We regularly review the size, composition and balance of skills we have on the Board, both in terms of what we need now and what we might need to be successful in the future. Our aim is to ensure that we have the right mix for constructive Group discussion and, ultimately, effective Board decisions.

We recognise the benefits of diversity on the Board and the current members of the Board have a wide range of skills and experience required to govern effectively a global banking business such as Barclays. There are currently two women on the Board, representing 16% of the total Board membership. We aim to increase the number of women we have on our Board to ensure that we meet the aspirational targets we have set in light of the recommendations of the Davies Review.

The balance of the Board is illustrated below.

Corporate governance report continued

Director Independence

We consider non-executive Director independence on an annual basis, as part of each Director's performance evaluation. I was considered to be independent on appointment as Chairman, as recommended by the Code. The Board Corporate Governance and Nominations Committee and the Board has reviewed the independence of each non-executive Director and concluded that each of them continues to demonstrate those behaviours that the Board considers to be essential indicators of independence, which are set out in our Charter of Expectations.

Director Re-election

The Code requires that all Directors submit themselves for re-election at the Company's Annual General Meeting (AGM), which this year will be held on 27 April 2012. Following a rigorous performance evaluation of each Director and the Board as a whole, I can confirm that all the Directors submitting themselves for re-election are considered by the Board to be fully effective. Biographical details of each of the Directors may be found on pages 50-52 and you will find full details of the performance evaluation process and results in my report on Board evaluation on page 37.

Succession Planning and Board Appointments

Having a good succession plan in place mitigates against risks associated with the departure or absence of well-qualified and experienced individuals. We recognise this and our aim is to ensure that the Board and management are always well resourced, with the right people in terms of skills and experience, to deliver our strategy. When making Board appointments, we seek to ensure that we have a diverse range of skills, background and experience, including industry and geographical experience. We also recognise that, even though new faces bring fresh ideas and perspective to how things are done, continued tenure brings a depth of company-specific knowledge that is important to retain. As a result, we consider length of tenure when making appointments to the Board to ensure that we have the optimum balance and can progressively refresh the Board. The length of tenure of the current non-executive Directors and their geographical experience and background is illustrated in the charts on page 35 and below.

The Board Corporate Governance and Nominations Committee is responsible for both executive and non-executive Director succession planning and recommends new appointments to the Board. More detail on the role of the Board Corporate Governance and Nominations Committee is given in my report below.

Non-executive Director Terms of Appointment

On appointment, our non-executive Directors are given a letter of appointment that sets out the terms and conditions of their Directorship, including the fees payable and the expected time commitment. Each non-executive Director is expected to commit a minimum of 20 days per annum to the role. Additional time commitment is required to fulfil their roles as Board Committee members and/or Board Committee chairmen, as applicable. On average, the time commitment of non-executive Directors is in the range of 30–36 days per annum, although the Board Committee Chairmen devote considerably more time.

Directors' external activities and conflicts of interest

Our Directors have a statutory duty to avoid situations in which they have or may have interests that conflict with those of Barclays, unless that conflict is first authorised by the Directors. This includes potential conflicts that may arise when a Director takes up a position with another company.

We recognise the importance of the experience, value and knowledge that can be brought to the Board by Directors undertaking other roles or activities. Our Directors are obliged to obtain authorisation prior to doing so and it is their responsibility to ensure that they will be able to meet the time commitment we expect of them and that the additional role will not impact their effectiveness as a Barclays Director.

Our executive Directors may take up only one FTSE 100 non-executive directorship and they are allowed to retain any fees they receive. No such fees were received in 2011.

Our articles of association allow the Board to authorise potential conflicts, and we have a comprehensive procedure in place to deal with any actual or potential conflict of interest. The Board takes into consideration all the circumstances and deals with each appointment on its individual merit. All potential conflicts approved by the Board are recorded in an Interests Register, which is reviewed on an annual basis by the Board Corporate Governance and Nominations Committee to ensure that the procedure and process are working effectively. Following a review of the Interests Register, the Committee concluded that all the potential conflicts as registered have been considered thoroughly and appropriately. During 2011, the Board authorised Sir Richard Broadbent's appointment as a non-executive Director of Tesco PLC, recognising that there would only be a short overlap given his impending retirement from the Board. In view of the potential conflict that might arise given Tesco's retail banking activities, following this appointment Sir Richard excused himself from any Board discussions relating to our UK Retail Banking business.

Board Induction and Professional Development

Although newly appointed non-executive Directors have a wealth of experience and knowledge, there is still the need to ensure they are provided with a bespoke induction programme to deepen their understanding of our business and their knowledge of Barclays, its operations and staff. I work with the Company Secretary to ensure that a comprehensive induction programme is in place, which includes sessions with each of the executive Directors, members of the Executive Committee and meetings with the senior executives responsible for each of our businesses and central functions: these sessions focus on the challenges, opportunities and risks that are faced by each business. The Board Corporate Governance and Nominations Committee undertakes an annual review of our Director induction and development programmes to ensure that they are appropriate and fit for purpose. More information on our Board induction process can be found in Corporate Governance in Barclays.

Geographical mix (main experience) of non-executive Directors No.

Industry/background experience^a No.

Notes

a Individual Directors may fall into one or more categories.

Ongoing professional development is equally important given the rapidly changing environment in which we operate and my role includes ensuring that Directors have the opportunity to update and refresh their knowledge. During the year, non-executive Directors attended briefing sessions on balance sheet composition and capital allocation and on risk weighted assets. They also attended a demonstration of our contactless technology. Personal development logs are maintained for each non-executive Director, which record external and internal briefings and other events that each attends, such as internal management conferences.

Evaluation of Board Performance

In order to improve the effectiveness of the Board and its Committees, as well as the effectiveness of each individual Director, we undertake on an annual basis a formal and rigorous Board effectiveness review. One of the advantages of undertaking an annual evaluation, which we have done since 2004, is that we can monitor trends in responses to questions and track progress made against action plans. We annually benchmark our approach against the practices of other companies in the FTSE 20 to ensure that we remain at the forefront of best practice. The Board Corporate Governance and Nominations Committee is responsible for overseeing the process and for monitoring any action plans on behalf of the Board.

Evaluation Statement

I provide below a summary of the Board's progress against its 2011 action plan:

Key Themes	Actions
Ensuring that Board dynamics remain effective following recent membership changes, including the appointment of the new Chief Executive	<ul style="list-style-type: none"> Effective working relationships have been developed and maintained between the non-executive Directors and the Executive Directors, facilitated by opportunities offered by offsite Board meetings and less formal discussions at Board dinners ahead of meetings.
Continuing the focus on strategic decision making in light of the evolving regulatory environment	<ul style="list-style-type: none"> The Board has continued to receive regular updates on the regulatory environment. Strategy presentations to the Board have included additional information on the external environment and its impact. External guest speakers have presented to the Board on significant issues, such as the valuation of banks.
Ensuring that a wide range of skills experience, background and diversity on the Board is maintained	<ul style="list-style-type: none"> Succession planning is a major focus of the Board and the Board Corporate Governance and Nominations Committee considers diversity on the Board when discussing succession plans and potential new appointments.
Revising the format of Board meetings to allow the Board to devote more time to discussion of key strategic issues, including discussions the evening before Board meetings	<ul style="list-style-type: none"> Board dinners are being held on evenings prior to Board meetings to enable Directors to discuss issues in more depth and build relationships. The Board dinners have included presentations and time for discussion of key issues. Routine Board items are being dealt with appropriately, including inverting the agenda, if appropriate, so that routine items are considered last.

As in each year since 2004, the 2011 evaluation process was independently facilitated. We continue to monitor and review the facilitators available in the market and Egon Zehnder International was re-engaged following such review. Egon Zehnder is an executive search agent, but it did not undertake any Barclays Board searches during the year and the Board continues to believe that it provides an impartial and objective service.

The 2011 evaluation process again took the form of questionnaires completed by Directors and key executives, followed by structured interviews with representatives from Egon Zehnder. In addition to the Board evaluation questionnaire completed by all the participants, Board Committee members completed separate Board Committee questionnaires. The areas covered by the questionnaire were unchanged from previous years, although this year the questionnaire included some new questions designed to draw out behavioural issues and group dynamics.

In December 2011, Egon Zehnder presented a report on the evaluation process to the Board. We discussed the results of the evaluation and confirmed that we continue to operate at a very high level of effectiveness. The review identified that the Board is aligned in its understanding of the strategic challenges it faces in a highly regulated and uncertain economic environment; that it continues to work hard and effectively as a team; and that it has demonstrated a high degree of resilience over a significant period of uncertainty for the financial services industry. The review also concluded that the Board benchmarked well against other companies.

The key themes arising from the 2011 evaluation and which will form the basis of the action plan for 2012 are:

- Ensuring that the Board continues to have an appropriate range and balance of skills, experience and diversity.
- Continuing to develop an appropriate process for succession planning for key Board and senior executive management positions.
- Enabling the Board to have greater interaction with Executive Committee members to gain an enhanced understanding of the challenges and opportunities they face in their businesses.
- Ensuring that the Board has visibility of talent amongst senior executive management.
- Continuing to ensure that timely and high-quality information flows to the Board and to Board Committees.

As part of the annual evaluation process, we seek views on the performance of individual Directors. I have discussed this feedback with each of the non-executive Directors and agreed with them any areas for development. My own performance was reviewed by the Senior Independent Director, who sought the views of the other non-executive Directors.

Chairman's Overview of 2011

Following the appointment of a new Chief Executive at the beginning of the year, the focus and attention of the Committee in 2011 was on the need to have a strengthened and effective succession planning process in place for the Board and other senior executive roles. In addition, this year we have given particular thought to the issue of diversity, given the recommendations of the Davies Review on the gender diversity of Boards.

Who is on the Committee?

The Committee consists of me, as Chairman, along with four non-executive Directors. The names of the members of the Committee are shown in the table, together with attendance at meetings in 2011. Committee members include the Chairmen of the main Board Committees. Bob Diamond, the Chief Executive, also attends each meeting, although he is not involved in decisions relating to his own succession.

What is our role and what are our responsibilities?

Our role is to:

- review the composition of the Board and Board Committees to ensure they are appropriately constituted and balanced in terms of skills and experience and to recommend to the Board the appointment of new Directors;
- consider succession plans for the Group Chairman, Chief Executive and other key positions, such as roles on the Executive Committee and other senior management roles;
- monitor corporate governance issues and developments; and
- agree the process for the annual Board Effectiveness Review and track the progress of any actions arising.

The Committee's full Terms of Reference are available from our website.

Board Corporate Governance and Nominations Committee Report continued

How did we discharge our responsibilities in 2011?

We met four times in 2011 and the chart below shows how we allocated our time at our meetings. I describe below how we discharged our responsibilities:

Board Composition

- We reviewed the structure, size and composition of the Board and the principal Board Committees, looking at the need to refresh the Board, the balance and diversity of skills and experience on the Board and planning ahead for any retirements. We undertook a skills analysis and considered the skills that are likely to be required in the future.
- We considered and recommended changes to Board Committee composition during the year. Given the retirement of Sir Richard Broadbent from the Board on 30 September 2011, the Committee approved the appointment of Alison Carnwath as Chairman of the Board Remuneration Committee. Alison is an experienced remuneration committee chairman and her knowledge of the investment banking industry will prove valuable given the regulatory focus on remuneration in that business. Alison also joined the Board Corporate Governance and Nominations Committee.
- We discussed the outcome of the Davies Review on the proportion of women on boards and the implications for Barclays generally. We recommended an aspirational target for the Board to have at least 20% of its membership as women by 2013 and for that position to have exceeded 25% by 2015. To meet this aspirational target, we discussed and agreed steps to identify potential women candidates for the Board by working with our executive search agents.

Succession Planning

- In 2011, we assumed responsibility for oversight of the Group's succession and talent management programme below Board level. We discussed the processes, methodology and contingency plans in place for senior strategic roles. We discussed succession planning for the position of Chief Executive and for the Executive Committee and reviewed potential candidates for these roles.

Corporate Governance

- We reviewed our corporate governance disclosures in the 2010 annual report and considered the proposed disclosures for the 2011 annual report.
- We reviewed and updated Corporate Governance in Barclays and the Charter of Expectations to ensure they continue to remain relevant and fit for purpose, particularly given publication of the Financial Reporting Council's Guidance on Board Effectiveness.
- We were updated on significant corporate governance developments in the UK and those emanating from the European Commission and how these might impact the Group.
- We reviewed and discussed issues raised at corporate governance meetings held with institutional investors and investor bodies.

Board Effectiveness

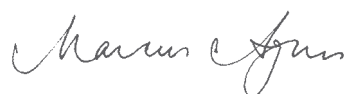

- We discussed and approved the proposed actions to be taken in response to the findings of the 2010 Board Effectiveness Review.
- We reviewed the market for board effectiveness facilitators and agreed to re-appoint Egon Zehnder.

How effective was the Committee in 2011?

To ensure that the Committee is operating effectively, we carried out our annual committee effectiveness review as part of the Board Effectiveness Review. The Committee is reviewed by the members themselves as well as by the Board as a whole. Following the review, the Committee was found to be operating effectively. However, we concluded that the performance of the Committee could be enhanced by making improvements to the induction process for new Committee members and providing greater opportunity for members to bring items onto the Committee meeting agenda. An action plan has been put in place to address these matters.

What is the Committee planning to do in 2012?

For 2012, we will further improve our awareness of succession planning and have greater visibility of potential candidates for senior positions below the Executive Committee level. We will continue to review and monitor Board and Board Committee composition against our skills and experience requirements and our aspirational diversity targets and continue to consider potential candidates.

Chairman's overview of 2011

The Board Audit Committee has seen another extremely busy year, with its agenda shaped by both external and internal factors. Continuing economic uncertainty and, in particular, the situation in the Eurozone, influenced our areas of focus. Furthermore, the aftermath of the 2008 financial crisis has seen our regulators adopt what they describe as a more intensive and intrusive approach to supervision, and this changing regulatory environment has shaped our discussions around internal controls, regulatory compliance and financial reporting.

This year I have visited the Group's operations in Spain and New York, attending meetings of the local subsidiary audit committees. I met regularly with the Chief Internal Auditor during 2011 and have been actively engaged in the recruitment of the new Chief Internal Auditor, who took up post in January 2012. I also regularly interact with the lead audit partner of our external auditors. I have this year met a number of times with representatives of our regulators in both the UK and the US to discuss our approach to internal controls, regulatory compliance and specific financial reporting matters, including a tri-lateral meeting with our UK regulator and our auditor. After each Committee meeting, I present a written report to the Board of the main issues that the Committee discussed and I am available should any Director wish to discuss any particular issues with me in more detail.

There are some areas of potential overlap between the Committee's remit and that of the Board Risk Committee, of which I am also a member. Via the Company Secretary, I have sought to ensure that those areas of overlap, such as the risks and controls associated with our capital and liquidity positions, are managed appropriately, with each Committee viewing the issues through its particular lens.

Who is on the Committee?

Membership of the Committee and attendance at meetings held in 2011 are shown in the table. Sir Andrew Likierman and I are the designated financial experts on the Committee for the purposes of the US Sarbanes-Oxley Act, although each member of the Committee has a depth of financial expertise and collectively, the Committee has considerable financial and financial services experience on which to draw. Having worked at KPMG throughout my career until 2007, I have significant experience of accounting and auditing issues from a UK and global perspective. Sir Andrew is currently Chairman of the National Audit Office and is also Dean of the London Business School, following a career at HM Treasury. Fulvio Conti has many years of financial and accounting experience and his knowledge and experience of the economic and political situation in the Eurozone has proved particularly valuable to our deliberations at both Committee and Board level. Alison Carnwath brings many years of experience of both the financial services sector and corporate finance from her career at Schroders. Simon Fraser has a background in financial services and, as a fund manager, brings insight and perspective as a user of financial statements.

This year, I asked some members of the Committee to take on particular additional responsibilities. Simon Fraser has been engaged with management on the Group's approach to Treating Customers Fairly. Sir Andrew Likierman has been more closely involved in monitoring the Group's internal control framework, working with management to review control issues of Group level significance.

The Committee members meet privately with me ahead of each Committee meeting, which gives me the opportunity to learn of and understand any particular issues that individual members may wish to raise during Committee meetings.

What are our responsibilities?

In summary, the Committee's role is to:

- monitor the integrity of the Group's financial reporting and satisfy itself that any significant financial judgements made by management are sound;
- monitor the Group's internal controls, including internal financial controls; and
- monitor and review the activities and performance of the internal and external auditor, including monitoring their independence and objectivity.

The Committee's full Terms of Reference are available from the corporate governance section of our website.

How did we discharge our responsibilities in 2011?

We met 12 times in 2011 and the chart on page 42 shows how we allocated our time. Our meetings are attended by management, including the Chief Executive, Group Finance Director, Chief Internal Auditor, Chief Risk Officer, Group General Counsel and Head of Compliance. This year we have been particularly interested in interacting with senior management below the Board and Executive Committee level and meetings have been attended by the chief executives of the business units, along with representatives of the control functions at both Group and business unit level.

The external auditor attends each meeting and the Committee also holds regular private sessions with the Chief Internal Auditor and the external auditor. These sessions, which are not attended by management, allow us to discuss any issues of emerging concern in more detail directly with the audit teams.

Board Audit Committee Chairman's Report continued

I describe below the key issues we considered during 2011:

Financial Reporting and Significant Financial Judgements

Given continuing global economic uncertainty and market concerns over the financial health of the sector, our role in monitoring significant financial reporting issues is key in ensuring that trust in the financial services sector and Barclays is maintained. We seek support from the external auditor to assess whether suitable accounting policies have been adopted and whether management has made appropriate estimates and judgements. The main issues we reviewed in 2011 are set out below:

- We regularly reviewed the Group's investment in BlackRock, Inc. and whether it should be impaired. Key in our decision-making was whether the diminution in value could be considered to be significant or prolonged. We closely monitored the BlackRock, Inc. share price throughout the year and agreed with management's conclusion at the time of our third quarter interim management statement that the decline in value was such that the investment should be impaired. The impairment has been recognised in the full year results for 2011.
- We monitored the goodwill held for our business in Spain throughout 2011. We agreed with management's assessment that the goodwill associated with our business in Spain should be written off during the fourth quarter.
- The credit impairment charge during 2011 was significantly better than prior year across each of the businesses. We examined the impairment charge carefully to satisfy ourselves that this was appropriate.
- Management decided in late 2010 that it no longer intended to hold the Protium loan for the long term given its low return on regulatory capital. Consequently, and as part of finalising the year-end 2010 results, we agreed with management's recommendation that the value of the loan should be reduced to the fair value of the underlying assets. This resulted in an impairment charge for the year ended 31 December 2010. During the second quarter of 2011, management decided to restructure the loan and the proposal to purchase the outstanding financial interest in Protium in order to facilitate earlier repayment of the loan was agreed by Board Finance Committee (a specifically authorised sub-committee of the Board). This resulted in Barclays controlling Protium's operating and financial policies and consolidating Protium. The Committee agreed with the accounting treatment.
- Given the continuing economic and political uncertainty in the Eurozone, we reviewed both our exposures to the selected Eurozone countries of Ireland, Italy, Portugal, Spain and Greece and the form of our disclosure of these exposures in our financial reporting during 2011. Our exposures have been reduced during 2011.
- We considered the impact of own credit and other one-off items that could be treated as adjusting items to the adjusted Profit Before Tax measure and worked with management to ensure that equal prominence was given to both the statutory and adjusted results.
- As part of reviewing the results for 2011, we considered the recognition and valuation of deferred tax assets in the US and Spain and agreed with management's judgement that the deferred tax assets were appropriately supported by the forecasted profit. We also considered the appropriateness of tax risk provisions made.
- We also reviewed the appropriateness of the judgements made by management in valuing certain portfolios and asset classes and were satisfied that these judgements were appropriate.
- Following the dismissal in May 2011 of judicial review proceedings brought by the British Bankers' Association in relation to the assessment and redress of Payment Protection Insurance (PPI) claims, we reviewed management's assumptions in arriving at a provision of £1bn against future redress and administration of PPI claims. We were content that the provision was adequate, although it will be considered further against actual claims experience.
- We reviewed the year-end and half-year disclosures in respect of legal proceedings and competition and regulatory matters, particularly in the light of developments in the Lehman litigation.

Internal control

Our role is to review the effectiveness of the Group's internal controls, which is of particular resonance at a time when the business is subject to significant change. We do this by receiving specific control environment reviews from each of the businesses, by reviewing reports on control issues of Group level significance, by looking in detail at specific control issues and by receiving regular reports on regulatory compliance matters. Specific issues we considered in 2011 are described below:

- We undertook control environment reviews of Barclaycard, Barclays Africa, Barclays Capital, Europe Retail and Business Banking, Absa, Barclays Corporate and Barclays Wealth. We reviewed carefully the control environment in Barclays Capital given the pressures on the business from both market conditions and heightened regulatory scrutiny. We particularly wanted to ensure that the control environment is robust and well-documented and that control functions are adequately resourced. Specific areas of focus for the Committee have been the trading and valuation models used by Barclays Capital, and the governance that provides assurance around them. Furthermore, following the report of unauthorised trading at UBS, we received a report on a review of the controls in place at Barclays Capital to ensure that they are designed effectively to prevent the occurrence of a similar incident.
- We continued to monitor the controls and governance around technology, in particular, the progress of a programme implemented to put in place specific control enhancements that had been identified. We also received a report on cyber security and the steps the Group has taken to mitigate the risk of cyber attacks.
- We reviewed the programme that has been put in place to ensure that the Group complies with the UK Bribery Act, which came into force in July 2011.
- During the year we tracked the actions that had been agreed to ensure compliance with the Deferred Prosecution Agreements entered into as part of the settlement reached with US authorities following an investigation into the Group's compliance with US sanctions and US dollar payment practices. This included reviewing whether the actions are on track and monitoring the resources allocated to ensuring that the programme is delivered.
- The FSA imposed a fine on Barclays Capital in January 2011 for breaches of client asset segregation rules. We regularly reviewed the remediation programme that was put in place to enhance the Group's processes and minimise the risk of reoccurrence.
- Following a fine for failures associated with the sales of two investment funds, we reviewed the outputs of an independent third party review and the progress of actions taken to review similar products.
- We received regular reports on the arrangements that the Group has in place to enable employees to raise concerns and were updated on action being taken to address any specific matters.

You can find further details of the Group's system of internal control and risk management, including the main features of our internal control and risk management systems in relation to the financial reporting process, in the Directors' Report on page 48 and in the Risk Management section on pages 67 to 158.

Corporate governance report continued

Board Audit Committee Chairman's Report continued

Objectivity and independence of the external auditor

One of our key responsibilities is to monitor and review the objectivity and independence of our external auditor. This includes having in place a policy to govern the non-audit services that may be provided by the external auditor, which sets out the circumstances in which the external auditor may be permitted to undertake non-audit services. Allowable services are pre-approved up to £100,000, or £25,000 in the case of certain taxation services. Any non-audit service that exceeds these thresholds requires approval from me as Chairman of the Committee and must be robustly justified and, if appropriate, tendered, before it is approved. I closely review all requests for approval, particularly any which concern taxation-related services, and specifically tax advisory services, where our approach is not to use the auditor unless there is a very strong case for not seeking an alternative supplier. The Committee receives a quarterly report on non-audit services undertaken by the auditor so that it can monitor the types of services being provided and the fees incurred.

A breakdown of the fees paid to the auditor for non-audit work may be found in note 8 on page 212. Significant categories of engagement undertaken in 2011 include regulatory audit work, where the work was requested by our regulators in the UK and in South Africa and the use of the auditor was agreed with them, and tax compliance services in connection with our expatriate and international assignees, where we have agreed to use an alternative supplier from 2011 onwards for new assignments.

Further details of the non-audit services that are prohibited and allowed under our policy can be found on our website.

Oversight of Internal Audit and External Audit Internal Audit

We are responsible for monitoring the effectiveness of the internal audit function and ensuring it is adequately resourced and focused on the right issues. We also review and approve the annual Internal Audit plan.

During 2011, we received regular reports from Internal Audit, which set out the Internal Audit function's view of the control environment and performance against any key indicators. Of particular focus was the need to ensure that there is timely remediation of any audit findings. We also specifically reviewed the resources available to the Internal Audit function and any adjustments to be made to the Internal Audit plan, including changes to methodology.

Internal Audit's self-assessment of conformance, which we reviewed in the fourth quarter of 2011, evidenced that the function generally conforms to the standards set by the Institute of Internal Auditors.

External Audit

It is our responsibility to monitor the performance, objectivity and independence of the external auditor and recommend to the Board the appointment of the external auditor. We also agree the audit plan with the external auditor to ensure that the areas of focus are appropriate.

PricewaterhouseCoopers (PwC) has been our auditor for many years, although the lead audit partner is rotated every five years. The current lead audit partner joined the audit team for the 2010 year end and will retire after the 2014 year end. The appointment of PwC as auditor is subject to shareholder approval each year at the AGM, giving shareholders the opportunity to accept or reject the Board's recommendation that they be reappointed. In terms of auditor independence and objectivity, we have a policy that governs non-audit services provided by the auditor, which is described above. PwC also provides specific assurance to us on the arrangements it has in place

to uphold its independence and objectivity. To assess the performance and effectiveness of the auditor, we carry out an annual assessment by seeking views on PwC's performance from key stakeholders across the Group. The results of this assessment are reported to the Committee each year and help inform the Committee's discussion on whether the auditor should be recommended for re-appointment. This includes considering whether the audit should be tendered.

Following the assessment process described above, the Committee is fully satisfied with the performance of PwC and has recommended to the Board and to shareholders that PwC should be re-appointed as the Group's auditors at the AGM on 27 April 2012. PwC has signified its willingness to continue in office.

Effectiveness

The performance of the Committee is reviewed each year as part of the Board Effectiveness Review, both by the Committee itself and by the Board as a whole. This year's review concluded that the Committee continues to operate effectively. Areas where we could enhance our performance include ensuring that the form and content of information presented to the Committee is appropriate given the Committee's busy agenda and we have put together an action plan to address the findings.

Looking ahead to 2012

For 2012, the Committee's areas of focus will continue to be influenced by the impact of the difficult economic environment and the changing regulatory environment. In addition to ensuring we examine the impact of external factors, we will be seeking to ensure that a strong governance and control environment is maintained while the business undergoes a period of internal reorganisation as it integrates the operations of Absa and Barclays in Africa and seeks to deliver cost efficiencies and operational excellence across the Group.

Sir Michael Rake
Chairman, Board Audit Committee

David Booth, Chairman of the Board Risk Committee, gives you his insight into the work of that Committee in 2011.

Chairman's overview of 2011

2011 has seen some particular challenges for the Committee in its oversight of risk management. Global economic conditions have continued to be difficult. Concerns over the economic prospects for the Eurozone, specific countries within it and the possibility of a break up, have greatly influenced our agenda. The regulatory environment has also evolved, as our regulators continue to seek assurance as to the robustness of risk management and the financial viability of financial institutions in a stressed environment.

Understanding, monitoring and mitigating risk is a fundamental task for any board. We play a critical role in setting the tone and culture that promotes the achievement of effective risk management across the Group. It is important to differentiate, however, between those risks that a company actively seeks to take and manage in order to generate income – for Barclays, credit, market and funding risk – and those risks that it seeks to minimise in order to manage costs – what we know as operational risk. The Committee's principal focus is on the former – those risks we take in order to generate income – although we also consider the latter. This year, as Chairman of the Committee, I have sought to refocus the Committee's agenda on key strategic, forward looking risk issues. I have worked with the Chief Risk Officer and Company Secretary to ensure that the Committee's time is used appropriately and that the right information is being provided to the Committee at the right time. I have continued to meet regularly with the Chief Risk Officer, and also with the Group Treasurer and Chief Internal Auditor, to discuss any emerging issues. This year I have also had a number of meetings with representatives of our regulators in the UK and the US to discuss our approach to risk management, and I expect this increased level of interaction to continue in the future. I present written reports to the Board of the main issues that the Committee discusses and any Director may contact me at any time to discuss any particular issues in more detail.

Who is on the Committee?

Membership of the Committee and attendance at meetings held in 2011 are shown in the table. Collectively the Committee has a depth of experience in finance and financial risk management. Both Reuben Jeffery and I have a background in investment banking, with careers at Goldman Sachs and Morgan Stanley respectively. Sir Michael Rake is the former Chairman of KPMG International and has a wealth of financial and business experience. Sir Andrew Likierman has held number of roles in the public financial services sector, including roles at HM Treasury and that of non-executive Director of the Bank of England. Dambisa Moyo is an international economist, who writes on the macroeconomy, having formerly worked at Goldman Sachs.

What are our responsibilities?

The Committee's role is to:

- recommend to the Board the total level of risk the Group is prepared to take (risk appetite) to achieve the generation of shareholder value;
- monitor risk appetite, including setting limits for individual types of risk, e.g., credit, market and funding risk;
- monitor the Group's risk profile;
- ensure that management properly identifies principal risks and that they are being appropriately managed;
- ensure that risk is taken into account during the due diligence phase of any strategic transaction; and
- provide input from a risk perspective into the deliberations of the Board Remuneration Committee.

The Committee's full Terms of Reference are available from the corporate governance section of our website. More information on risk management and the internal control framework can be found in the Directors' Report on page 48 and in the Risk Management section on pages 67 to 158.

How did we discharge our responsibilities in 2011?

We met 9 times in 2011 and the chart on page 44 shows how we allocated our time at our meetings. Our meetings are attended by management, including the Group Finance Director, Chief Internal Auditor, Chief Risk Officer and Group General Counsel. The external auditor also attends each meeting. This year meetings have also been attended by senior management below Board and Executive Committee level, including representatives of the risk management function at both Group and business unit level. We have been especially interested in hearing from those who are responsible at an operational level for implementing risk management in the Group.

I describe below how the Committee discharged its responsibilities during 2011:

Risk Profile/Risk Appetite

Our role is to recommend risk appetite to the Board and then to monitor performance against appetite and the Group's overall risk profile. The main issues we reviewed in 2011 were:

- We received quarterly Group Risk Profile Reports, which provide an update on credit and market risk performance in our main businesses and across our key geographies of the UK, US, Spain and South Africa. The focus of our discussions was on the potential impact of macroeconomic factors, particularly the Eurozone crisis and any impact arising from austerity measures being taken by governments around the world. In late 2011, this report was extended to cover Operational Risk in more detail, in line with the changes made to the Group's Principal Risks Policy, which I describe below.

Corporate governance report continued

Board Risk Committee Chairman's report continued

- We received quarterly updates on capital and liquidity from the Group Treasurer, including an assessment of performance against liquidity risk appetite and an assessment of the Group's liquidity profile, to satisfy ourselves that sufficient liquidity is held to cover both market-wide and Barclays specific stress scenarios. The Eurozone crisis gave rise to difficult conditions in the money markets and we discussed and received regular written updates on counterparty and liquidity risk in the third and fourth quarters of 2011.
- We discussed and agreed scenarios for our internal stress testing exercises and reviewed the results. As part of planning for the stress tests, the Committee specifically requested that a single European peripheral sovereign default be modelled given prevailing conditions in the Eurozone. The stress testing exercises evidenced that the Group remains profitable and well-capitalised above required minimum levels. We also reviewed the results of the stress testing exercises required by the European Banking Authority (EBA), which were published in July 2011. The results of these EBA stress tests showed that Barclays remains capitalised above the required regulatory targets for Core Tier 1 capital.
- We reviewed the Group's economic capital framework, including the governance around the models used, methodology changes introduced in 2011 and how the framework is used to assist risk management across the Group.
- In late 2011, we reviewed the proposed risk appetite for 2012. The risk appetite process again assessed the Group's performance in a 1 in 7 and 1 in 25 scenario and reviewed the performance of agreed parameters in such scenarios to identify any potential constraints. While we were content to recommend risk appetite to the Board, current economic conditions mean that there is a greater likelihood of event risk and we will keep performance against risk appetite under very close review in 2012.

Key Risk Issues

Key risk issues are those that have been proposed by management for review by the Committee in detail, so that we can assess the current and potential future impact and ensure that any risks are being managed appropriately. These in-depth reviews have this year been driven largely by the changing economic and regulatory environment. Some of the specific issues we considered in 2011 were:

- Given the ongoing difficulties in the Eurozone, we undertook two specific country risk reviews in 2011, choosing Portugal and Italy. These reviews took a holistic approach to Barclays business in those countries, focusing on both macro risks and specific business risks, and an assessment of any potential issues those businesses might face in a stressed environment. We were particularly keen to ensure that any lessons learned from these reviews are embedded Group-wide. We also received a presentation on the implications of a break-up of the Eurozone and the actions available to mitigate the impact on the Group.
- We undertook a review of our funding and liquidity risk management framework, particularly given the disruption in the wholesale money markets during the year.
- We received a report on the review of risk management controls that took place following the announcement of unauthorised trading at UBS to ensure that any lessons learned could be captured.
- We reviewed measures that are being taken in Barclays Capital to enhance risk management and to further develop the vision for risk in that business.
- Given US government austerity measures, we reviewed the Group's US Municipal bond business and the scope and extent of our exposures.

- We also reviewed pension risk, in view of the triennial valuation of the pension scheme, and tax risk management, where we considered the Group's own tax risk and the risk it takes on behalf of clients.

Internal Control and Risk Management Framework

We annually review the internal control and risk management framework to ensure it remains fit for purpose. This year we reviewed and agreed proposals to update the Group's Internal Control and Assurance Framework (GICAF) and agreed updates to the Group's Principal Risks Policy, to define four principal risks: Credit, Market, Funding and Operational Risk. More details on the GICAF and the Principal Risks Policy can be found in the Directors' Report on page 48 and in the Risk Management section on pages 67 to 158.

Remuneration

We again provided input to the Board Remuneration Committee on the risk metrics to be used to determine financial performance and we reviewed the risk perspective on performance, which was used to inform remuneration decisions for 2011.

Effectiveness

As part of the annual Board Effectiveness Review, the performance of the Committee is assessed by the Committee itself and by the Board as a whole. This year's review concluded that the Committee continues to operate effectively. Areas where we could enhance our performance include continuing to ensure that information flows to the Committee are appropriate and timely, given the changing environment.

Looking ahead to 2012

For 2012, global macroeconomic factors will continue to shape the Committee's agenda. We will continue to closely monitor our risk profile and performance against risk appetite, with a particular focus on capital and liquidity. We will also continue to monitor carefully our Eurozone exposures.

David Booth

Remuneration

Alison Carnwath, who became Chairman of the Remuneration Committee in 2011, reports on the Board Remuneration Committee's activities during 2011 in the Remuneration Report, which may be found on pages 54 to 65.

Relations with Shareholders

How do we ensure that we understand the views of our shareholders?

As Group Chairman, I am responsible for ensuring that there is effective communication with shareholders. I am in regular contact with institutional shareholders and, in particular, I met with institutional shareholders ahead of the 2011 AGM and reported back to the Board on any significant issues that were raised. The Chief Executive, Group Finance Director and Senior Independent Director also had regular contact with shareholders and the Chairman of the Board Remuneration Committee met with key shareholders to discuss the Group's remuneration structure and policy. In addition, all Directors had the opportunity to attend an investor seminar, which was held in June 2011.

During 2011, the Board received an update on the Group's Investor Relations strategy, which included an update on key market issues raised by our owners, investor relations objectives and activities, share price performance and the share register profile. We also received the results of an investor audit carried out by one of our advisers, which provided an insight into market issues and institutional perceptions of our strategy, management and key issues. In late 2011, the Board also held a session on bank sector valuations, gaining an insight into how the market values banks and the factors influencing the market's valuation.

How do we engage effectively with our shareholders?

We understand the need to be transparent in our dialogue and communications with our shareholders. We are supportive of the UK Stewardship Code's aims of improving dialogue between investors and companies and strive to facilitate meaningful engagement with our shareholders. Our interaction with our shareholders falls into three main areas: institutional shareholders, private shareholders and the AGM. General shareholder information can be found on our website, www.barclays.com/investorrelations.

Institutional Shareholders

We have an active and dedicated investor relations team that manages a planned and comprehensive investor relations programme, which facilitates regular access for investors and buy-side and sell-side analysts to senior management, so that they can interact directly on key topics. Overall in 2011, over 400 separate meetings took place between management and investors, at venues in London, Scotland, USA, Canada, France, Germany, Spain, Ireland, Italy, Scandinavia, Switzerland, the Netherlands, the Middle East, Japan and China, reflecting the international nature of our investor register. Senior management from across the business also hosted investor and analyst meetings during 2011 including our quarterly reporting presentations and an investor seminar in June 2011. In addition to direct meetings, Barclays also participates in investor conferences intended to provide wider access to investors and analysts and took part in 17 such conferences in 2011. Our website also provides information for our debt investors, including information on our credit ratings, capital ratios, senior and subordinated debt securities, and securitisation and covered bond transactions.

Private Shareholders

As we have a large private shareholder base, it is impractical to communicate with our private shareholders using the same direct engagement model we follow for our institutional shareholders. Nevertheless, as we understand the need to treat all shareholders fairly, we follow industry best practice in terms of disclosure. To this end, we ensure that all documents produced for investor events are also provided on the investor relations section of our website. A wide range of information for all our shareholders can also be found on the site. We also maintain a specific shareholder enquiry line with our registrars

for private shareholders to request information. To ensure our registrars continue to provide the highest quality of service to our shareholders, we regularly monitor their operational performance via monthly meetings.

We believe that communicating electronically with our shareholders is beneficial for the environment and lowers costs for the Group.

We therefore actively encourage private shareholders to use our e-view service to receive their shareholder documents electronically and to get immediate access to information relating to their personal shareholding and dividend history. Shareholders can sign up to our e-view service at www.eviewsignup.co.uk/. Barclays e-view participants can also change their details and dividend mandates online and receive dividend tax vouchers electronically. We also encourage our private shareholders to hold their shares in Barclays Sharestore, where shares are held electronically in a cost-effective and secure environment.

Private shareholders can discuss their concerns with us by email: privateshareholderrelations@barclays.com or in writing to Shareholder Relations at Barclays PLC, 1 Churchill Place, London E14 5HP.

AGM

The 2011 AGM was held on Wednesday 27 April 2011 at the Royal Festival Hall in London. In accordance with best practice, all resolutions were considered on a poll, which was conducted by our registrars and monitored by independent scrutineers. The results, along with proxy votes lodged prior to the meeting, were made available on our website the same day. 63% of the shares in issue were voted and all resolutions were approved.

The Board as a whole is committed to the constructive use of the AGM to meet with shareholders, hear their views and to answer their questions. All Directors are required to attend the AGM and all Directors attended the 2011 AGM, where the Chairmen of the Board Committees and I were available to answer shareholders' questions. I look forward to meeting you at the 2012 AGM, which will be held on Friday 27 April 2012 at the Royal Festival Hall in London. The Notice of Meeting can be found in a separate document. The resolutions will be considered on a poll and the results will be announced via the Regulatory News Service (RNS) and made available on our website on the same day. Copies of the AGM speeches will also be released via RNS and posted on our website. Shareholders unable to attend the AGM are encouraged to vote in advance of the meeting via www.barclays.com/investorrelations/vote. They may also submit questions to the Board by writing to Shareholder Relations at the address given above.

Statements of Compliance

UK Combined Code on Corporate Governance

As Barclays is listed on the London Stock Exchange, we comply with the UK Corporate Governance Code (the Code). For the year ended 31 December 2011, we have complied with the relevant provisions set out in the Code and applied the principles of the Code as described in this report. Further information on the Code can be found at www.frc.org.uk.

Disclosure and Transparency Rules (DTR)

Certain additional information that is required to be disclosed pursuant to DTR7.2.6 may be found in the Directors' Report on pages 46 to 49.

New York Stock Exchange

NYSE rules permit Barclays to follow UK corporate governance practices instead of those applied in the USA, provided that any significant variations are explained. This explanation will be contained in our Form 20-F filing, which can be accessed from the Securities and Exchange Commission's (SEC) EDGAR database or via our website.

Marcus Agius
Group Chairman
7 March 2012

Directors' report

Principal Activities and Business Review

Barclays is a major global financial services provider engaged in retail banking, credit cards, corporate and investment banking and wealth management, with an extensive international presence. The Group operates through branches, offices and subsidiaries in the UK and overseas.

The Directors are required to set out in this report a fair review of the business of the Group during the financial year ended 31 December 2011 and of the position of the Group at the end of the financial year and a description of the principal risks and uncertainties facing the Group (known as a Business Review). The purpose of the Business Review is to enable shareholders to assess how the Directors have performed their duties under section 172 of the Companies Act 2006 (to promote the success of the Company). The information that fulfils the requirements of the Business Review can be found in this report and the following sections of the Annual Report, which are incorporated into this report by reference:

	Pages
Chief Executive's review	06-07
Our strategy and business model	10-11
Finance Director's Review	22-23
Financial review	160-191
Key performance indicators	20-21 and 160-163
Citizenship	18-19
Market and operating environment	08-09
People	53
Risk management	16-17
Risk factors	74-78
Divisional review	24-27

Other information that is relevant to the Directors' Report, and which is incorporated by reference into this report, can be located as follows:

	Pages
Likely future developments	04-11 and 24-27
Employee involvement	53
Policy concerning the employment of disabled persons	53
Financial instruments	68-150, 220-223 and 225-237
Remuneration policy, including details of the remuneration of each Director and Directors' interests in shares	54-65
Corporate Governance Statement	32-45
Rights and obligations attaching to shares	276-279
Restrictions on the transfer of securities	276-279
Restrictions on voting rights	276-279

Profit and dividends

The profit for the financial year, after taxation, was £3,951m (2010: £4,549m). The final dividend for 2011 of 3.0p per share will be paid on 16 March 2012 to shareholders whose names were on the Register of Members at the close of business on 24 February 2012. With the interim dividends totalling 3.0p per ordinary share, paid in June, September and December 2011, the total distribution for 2011 is 6p (2010: 5.5p) per ordinary share. The interim and final dividend for 2011 amounted to £728m (2010: £653m).

Board of Directors

The names of the current Directors of Barclays PLC, along with their biographical details, are set out on pages 50 to 52 and are incorporated into this report by reference. Sir Richard Broadbent left the Board with effect from 30 September 2011. There were no other changes to Directors in 2011.

Appointment and retirement of directors

The appointment and replacement of Directors is governed by the Company's Articles of Association (the Articles), the UK Corporate Governance Code (the Code), the Companies Act 2006 and related legislation. The Articles may only be amended by a special resolution of the shareholders.

The Board has the power to appoint additional Directors or to fill a casual vacancy amongst the Directors. Under the Articles, any such Director holds office only until the next AGM and may offer himself/herself for re-election. The Articles also require that at each AGM at least one-third (rounded down) of the Directors retire by rotation. The retiring Directors are eligible to stand for re-election. The Code recommends that all Directors of FTSE 350 companies should be subject to annual re-election, however, and all Directors will stand for re-election at the 2012 AGM.

Directors' indemnities

The Company maintains directors' and officers' liability insurance which gives appropriate cover for any legal action brought against its Directors. In addition, qualifying third party indemnity provisions (as defined by section 234 of the Companies Act 2006) were in force during the course of the financial year ended 31 December 2011 for the benefit of the then Directors and, at the date of this report, are in force for the benefit of the Directors in relation to certain losses and liabilities which they may incur (or have incurred) in connection with their duties, powers or office.

Creditor payment policy

Barclays policy follows the Department for Business, Innovation & Skills' Prompt Payment Code, copies of which can be obtained from the Prompt Payment Code website at www.promptpaymentcode.org.uk. The trade creditor payment days for Barclays Bank PLC for 2011 were 33 days (2010: 27 days). This is an arithmetical calculation based on the Companies Act regulations and does not necessarily reflect our practice, nor the experience of any individual creditor.

Political donations

The Group did not give any money for political purposes in the UK or the rest of the EU nor did it make any political donations to political parties or other political organisations, or to any independent election candidates, or incur any political expenditure during the year. Absa Group Limited, in which the Group has a majority stake, made donations totalling £224,158 in 2011 (2010: £123,295) in accordance with its policy of making political donations to the major South African political parties as part of their Democracy Support Programme. The Group made no other political donations in 2011.

Charitable donations

Barclays provides funding and support to over 8,000 charities and voluntary organisations, ranging from small, local charities, such as the Bromley by Bow Centre, supporting young people in East London with employability and job-readiness programmes, to international organisations such as Unicef. The Group committed £30.3m in support of the community in the UK (2010: 28.6m), including charitable donations of £22.6m (2010: 22.9m). Further information on our community involvement can be found on pages 18 to 19.

Environment

In 2011 we launched the Barclays Climate Action Programme – a four-year plan which focuses on addressing environmental issues where we believe we have the greatest potential to make a difference. The Climate Action Programme focuses on managing our own carbon footprint and reducing our absolute carbon emissions; developing products and services to help enable the transition to a low-carbon economy; and managing the risks of climate change. We invest in improving the energy efficiency of our operations and offset the emissions remaining through the purchase of carbon credits. We also have a long-standing commitment to managing the environmental and social risks associated with lending and a governance structure is in place to facilitate clear dialogue across the business and with suppliers around issues of potential environmental and social risk. More details may be found on our website at www.barclays.com/citizenship.

Essential contracts or arrangements

There are no persons with whom the Group has contractual or other arrangements that are considered essential to the business of the Group.

Contracts of significance

Barclays provided BlackRock, Inc. (BlackRock) with customary warranties and indemnities in connection with the sale of Barclays Global Investors (BGI) to BlackRock in 2009. Barclays will continue to provide support in respect of certain BGI cash funds until December 2013 and indemnities in respect of certain of BGI's fully collateralised securities lending activities until November 2012.

Research and development

In the ordinary course of business the Group develops new products and services in each of its business units.

Share capital

Share capital structure

The Company has Ordinary Shares in issue. The Company's Articles also allow for the issuance of Sterling, Dollar, Euro and Yen preference shares (preference shares). No preference shares have been issued as at 2 March 2012 (the latest practicable date for inclusion in this report). Ordinary shares therefore represent 100% of the total issued share capital as at 31 December 2011 and at 2 March 2012. Details of the movement in Ordinary Share capital during the year can be found on page 254.

On 31 October 2008, Barclays PLC issued, in conjunction with a simultaneous issue of Reserve Capital Instruments issued by Barclays Bank PLC, warrants (the Warrants) to subscribe for up to 1,516.9 million new Ordinary Shares at a price of £1.97775. As at 31 December 2011 there were unexercised Warrants to subscribe for 379.2 million Ordinary Shares. These Warrants may be exercised at any time up to close of business on 31 October 2013.

Exercisability of rights under an employee share scheme

Employee Benefit Trusts (EBTs) operate in connection with certain of the Group's Employee Share Plans (Plans). The trustees of the EBTs may exercise all rights attached to the shares in accordance with their fiduciary duties other than as specifically restricted in the relevant Plan governing documents. The trustees of the EBTs have informed the Company that their normal policy is to abstain from voting in respect of the Barclays shares held in trust. The trustees of the Global and UK Sharepurchase EBTs may vote in respect of Barclays shares held in the Sharepurchase EBT, but only as instructed in those Plans in respect of their Partnership shares and (when vested) Matching and Dividend shares. The trustees will not otherwise vote in respect of shares held in the Sharepurchase EBT.

Special rights

There are no persons holding securities that carry special rights with regard to the control of the Company.

Substantial shareholders

Substantial shareholders do not have different voting rights from those of other shareholders. Information provided to the Company by substantial shareholders pursuant to the Financial Services Authority's (FSA) Disclosure and Transparency Rules (DTR) is published via a Regulatory Information Service and is available on the Company's website. As at 31 December 2011, the Company had been notified under Rule 5 of the DTR of the following holdings of voting rights in its shares:

Holder	Number of Barclays Shares	% of total voting rights attaching to issued share capital	Number of Warrants	% of total voting rights attaching to issued share capital ^a
BlackRock, Inc. ^b	805,969,166	7.06	–	–
Qatar Holding LLC ^c	827,411,735	6.79	379,218,809	1.62
Nexus Capital Investing Ltd ^d	851,584,564	6.98	–	–
Legal & General Group plc	480,805,132	3.99	–	–

Powers of the Directors to issue or buy back the Company's shares

The powers of the Directors are determined by the Companies Act 2006 and the Company's Articles. The Directors are authorised to issue and allot shares, and to repurchase shares subject to annual shareholder approval at the AGM. Such authorities were granted by shareholders at the 2011 AGM. It will be proposed at the 2012 AGM that the Directors be granted new authorities to allot and buy-back shares.

Repurchase of shares

The Company did not repurchase any of its Ordinary Shares during 2011 (2010: none). As at 2 March 2012, the Company had an unexpired authority to repurchase Ordinary Shares up to a maximum of 1,218,343,534 Ordinary Shares.

Change of control

If there is a change of control of Barclays PLC following a takeover bid, Barclays PLC must (so far as legally possible) use all reasonable endeavours to cause the corporation which then controls Barclays PLC to execute a deed poll providing that holders of the Warrants shall have the right (during the period in which the Warrants are exercisable) to exercise the Warrants into the class and amount of shares and other securities and property receivable upon such a takeover by the holders of the number of Ordinary Shares as would have been issued on exercise of the Warrants had such Warrants been exercised immediately prior to the completion of such takeover. The Warrants contain provisions for the adjustment of the gross number of ordinary shares in the event of the occurrence of certain dilutive events including, amongst others, extraordinary dividends, bonus issues, alterations to the nominal value of Ordinary Shares and rights issues.

There are no other significant agreements to which the Company is a party that are affected by a change of control of the Company following a takeover bid. There are no agreements between the Company and its Directors or employees providing for compensation for loss of office or employment that occurs because of a takeover bid.

Notes

a The percentages of voting rights detailed above have been calculated without including the new shares to be issued when the Warrants are exercised. This results in the percentage figures being artificially high.

b The number of Barclays shares includes 8,003,236 contracts for difference to which voting rights are attached.

c Total shown includes 13,447,183 options on ordinary shares.

d Total shown includes 93,146,946 cash-settled options referencing ordinary shares.

Directors' report continued

Risk management and internal control

The Directors have responsibility for ensuring that management maintain an effective system of risk management and internal control and for reviewing its effectiveness. Such a system is designed to manage rather than eliminate the risk of failure to achieve business objectives and can only provide reasonable and not absolute assurance against material misstatement or loss.

Barclays is committed to operating within a strong system of internal control that enables business to be transacted and risk taken without exposing itself to unacceptable potential losses or reputational damage. The Group Internal Control and Assurance Framework (GICAF) is the overarching framework that sets out Barclays approach to internal governance. It establishes the mechanisms and processes by which the Board directs the organisation, through setting the tone and expectations from the top, delegating its authority and monitoring compliance. The purpose of the GICAF is to identify and set minimum requirements in respect of the main risks to achieving the Group's strategic objectives and to provide reasonable assurance that internal controls are effective. The key elements of the Group's system of internal control, which is aligned to the recommendations of The Committee of Sponsoring Organizations of the Treadway Commission (COSO), are set out in the risk control frameworks relating to each of the Group's Key Risks and in the Group operational risk framework. As well as incorporating our internal requirements, these reflect material Group-wide legal and regulatory requirements relating to internal control and assurance. The GICAF is reviewed and approved on behalf of the Chief Executive by the Group Governance and Control Committee at least annually. The Board Risk Committee also reviews the GICAF annually.

Effectiveness of internal controls

The Directors review the effectiveness of the system of internal control semi-annually. An internal control compliance certification process is conducted throughout the Group in support of this review. Key controls are also assessed on a regular basis for both design and operating effectiveness. Issues arising out of business unit risk and control assessments are considered to identify pervasive themes. Where appropriate, issues affecting more than one business unit may be categorised as having Group level significance and are reported to the Board Audit Committee via the Group Governance and Control Committee. The Board Audit Committee monitors resolution of any identified control issues of Group level significance through to a satisfactory conclusion. In addition, regular reports are made to the Board Audit Committee by management, internal audit and the finance, compliance and legal functions covering in particular financial controls, compliance and operational controls.

Risk control framework

Processes are in place for identifying, evaluating and managing the significant risks facing the Group in accordance with the guidance 'Internal Control: Revised Guidance for Directors on the Combined Code' published by the Financial Reporting Council (the Turnbull Guidance). The Board regularly reviews these processes through its principal Board Committees. During 2011, the Principal Risks Policy, a material component of the GICAF, was updated to ensure that governance of non-financial risks was expanded and aligned to the structures already in place for financial risks. Regular risk reports are made to the Board covering risks of Group significance including credit risk, market risk, funding risk, operational risk and legal risk. The Board Risk Committee receives reports covering the Principal Risks as well as reports on risk measurement methodologies and risk appetite. Further details of risk management procedures are given in the Risk Management section on pages 67 to 158.

Legal entity governance

During 2011, the Group developed an enhanced policy for the governance of subsidiary entities, increasing focus on, and ensuring senior management's line of sight to, the legal entity structure of the Group. A framework of varying minimum standards has been introduced, with the most onerous requirements being placed on larger or more complex subsidiaries that are deemed to carry greater risk. Compliance with the enhanced policy is overseen by the Group's Legal Entity Review Committee.

Controls over financial reporting

A framework of disclosure controls and procedures is in place to support the approval of the Group's financial statements. The Legal and Technical Review Committee is responsible for reviewing the Group's financial reports and disclosures to ensure that they have been subject to adequate verification and comply with legal and technical requirements, and reports its conclusions to the Disclosure Committee. The Disclosure Committee, which is chaired by the Group Finance Director, considers the content, accuracy and tone of the disclosures, reporting its conclusions to the Group Executive Committee and the Board Audit Committee, both of which review its conclusions and provide further challenge. Finally, the Board reviews and approves results announcements and the Annual Report for publication and ensures that appropriate disclosures have been made. This governance process is in place to ensure both management and the Board are given sufficient opportunity to review and challenge the Group's financial statements and other significant disclosures before they are made public. It also provides assurance for the Chief Executive and Group Finance Director when providing certifications as required under the Sarbanes-Oxley Act 2002 and recommended by the Turnbull Guidance.

Throughout the year ended 31 December 2011, and to date, the Group has operated a system of risk management and internal control, which provides reasonable assurance of effective and efficient operations covering all controls, including financial and operational controls and compliance with laws and regulations.

Management's report on internal control over financial reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting is a process designed under the supervision of the principal executive and principal financial officers to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external reporting purposes in accordance with International Financial Reporting Standards (IFRS) as adopted by the European Union and the International Accounting Standards Board (IASB).

Internal control over financial reporting includes policies and procedures that pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect transactions and dispositions of assets; provide reasonable assurances that transactions are recorded as necessary to permit preparation of financial statements in accordance with IFRS and that receipts and expenditures are being made only in accordance with authorisations of management and the respective Directors; and provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use or disposition of assets that could have a material effect on the financial statements.

Internal control systems, no matter how well designed, have inherent limitations and may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that internal controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management has assessed the effectiveness of internal control over financial reporting as of 31 December 2011. In making its assessment, Management has utilised the criteria set forth by COSO. Management concluded that, based on its assessment, the internal control over financial reporting was effective as of 31 December 2011. Our independent registered public accounting firm has issued a report on the Group's internal control over financial reporting, which is set out on page 196.

The system of internal financial and operational controls is also subject to regulatory oversight in the United Kingdom and overseas. Further information on supervision by the financial services regulators is provided under Supervision and Regulation in the Risk Management section on pages 154 to 158.

Changes in internal control over financial reporting

There have been no changes in the Group's internal control over financial reporting that occurred during the period covered by this report which have materially affected or are reasonably likely to materially affect the Group's internal control over financial reporting.

Going concern

The Group's business activities and financial position; the factors likely to affect its future development and performance; and its objectives and policies in managing the financial risks to which it is exposed and its capital are discussed in the Business Review and Risk Management section.

The Directors have assessed, in the light of current and anticipated economic conditions, the Group's ability to continue as a going concern. The Directors confirm they are satisfied that the Company and the Group have adequate resources to continue in business for the foreseeable future. For this reason, they continue to adopt the 'going concern' basis for preparing accounts.

Disclosure of information to auditor

Each Director confirms that, so far as he/she is aware, there is no relevant audit information of which the Company's auditors are unaware and that each Director has taken all the steps that he/she ought to have taken as a Director to make himself/herself aware of any relevant audit information and to establish that the Company's auditors are aware of that information.

Directors' Responsibilities

The following statement, which should be read in conjunction with the Auditors' report set out on page 195, is made with a view to distinguishing for shareholders the respective responsibilities of the Directors and of the auditors in relation to the accounts.

The Directors are required by the Companies Act 2006 to prepare accounts for each financial year and, with regards to Group accounts, in accordance with Article 4 of the IAS Regulation. The Directors have prepared individual accounts in accordance with IFRS as adopted by the European Union. The accounts are required by law and IFRS to present fairly the financial position of the Company and the Group and the performance for that period. The Companies Act 2006 provides, in relation to such accounts, that references to accounts giving a true and fair view are references to fair presentation.

The Directors consider that, in preparing the accounts on pages 197 to 274, and the additional information contained on pages 79 to 158, the Group has used appropriate accounting policies, supported by reasonable judgements and estimates, and that all accounting standards which they consider to be applicable have been followed.

The Directors have responsibility for ensuring that the Company and the Group keep accounting records which disclose with reasonable accuracy the financial position of the Company and the Group and which enable them to ensure that the accounts comply with the Companies Act 2006.

The Directors have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the Group and to prevent and detect fraud and other irregularities.

The Directors confirm to the best of their knowledge that:

- (a) The financial statements, prepared in accordance with the applicable set of accounting standards, give a true and fair view of the assets, liabilities, financial position and profit or loss of Barclays PLC and the undertakings included in the consolidation taken as a whole; and
- (b) The management report, which is incorporated into the Directors' Report on pages 46 to 49, includes a fair review of the development and performance of the business and the position of Barclays PLC and the undertakings included in the consolidation taken as a whole, together with a description of the principal risks and uncertainties that they face.

By order of the Board

Lawrence Dickinson
Company Secretary
7 March 2012

Barclays PLC
Registered in England, Company No. 48839

Board of Directors

Marcus Agius, Group Chairman^a (65)

Skills and experience: Marcus joined the Barclays Board in September 2006 as a non-executive Director and was appointed Chairman on 1 January 2007. Marcus has extensive city and commercial experience, having spent over 40 years in the banking sector, holding senior positions such as Chairman of Lazard in London and Deputy Chairman of Lazard LLC. Marcus also has a wealth of non-executive experience that includes a number of non-executive directorships and the chairmanship of BAA plc from 2001 until 2006.

Other principal external appointments: Chairman of the British Bankers' Association since 2010; Senior Independent Director of the BBC since 2006; Member of the Executive Committee of the IEB; Business Ambassador for UK Trade and Investment; Member of the Advisory Council of TheCityUK; Member of the Takeover Panel; Chairman of the Trustees of the Royal Botanic Gardens, Kew; Chairman of The Foundation and Friends of the Royal Botanic Gardens, Kew.

Committee membership: Chairman of the Board Corporate Governance and Nominations Committee since January 2007; Member of the Board Remuneration Committee since January 2007; Chairman of the Board Citizenship Committee since August 2011.

Bob Diamond, Chief Executive; Executive Director (60)

Skills and experience: Bob became Chief Executive on 1 January 2011, having previously held the position of President of Barclays PLC and Chief Executive of Corporate & Investment Banking and Wealth Management, comprising Barclays Capital, Barclays Corporate and Barclays Wealth. Bob became an executive Director in June 2005 and has been a member of the Barclays Executive Committee since September 1997. Bob has a wealth of industry knowledge, with over 30 years of experience in the banking industry. Before joining Barclays, Bob was Vice Chairman and Head of Global Fixed Income and Foreign Exchange at CS First Boston, where he was also a member of the Executive Board and Operating Committee. Prior to this, Bob worked at Morgan Stanley International as Managing Director and Head of Fixed Income Trading, spending 13 years with the firm.

Other principal external appointments: Non-executive Director of BlackRock, Inc.; Chairman, Board of Trustees of Colby College, Waterville, Maine; Chairman, Old Vic Productions, Plc; Trustee, The Mayor's Fund for London; Member of the Advisory Board, Judge Business School at Cambridge University; Member of International Advisory Board, British-American Business Council; Life Member of The Council on Foreign Relations; Member of The International Advisory Board, The Atlantic Council; Director, Imperial War Museum Foundation.

David Booth, Non-executive Director^b (57)

Skills and experience: David joined the Board in May 2007 as a non-executive Director. David has extensive banking industry knowledge and experience, having previously been employed by Morgan Stanley from 1982 to 1992, and again from 1995 to 1997. David held various key positions within the company, including Head of Government Bond Trading, Head of Mortgage Trading, Sales and Finance and Head of Global Operations and Technology. Having retired from the Management Committee of Morgan Stanley in 1997, David now manages his own venture capital investments.

Other principal external appointments: Director of East Ferry Investors, Inc.

Committee membership: Chairman of the Board Risk Committee since January 2010 (member since January 2008); Member of Board Corporate Governance and Nominations Committee since January 2010.

Alison Carnwath, Non-executive Director^b (59)

Skills and experience: Alison joined the Board on 1 August 2010 as a non-executive Director. Alison has extensive experience of the banking industry, having worked in corporate finance and investment banking for 20 years from 1980 to 2000 before pursuing a portfolio career. Alison also has significant board experience, having held a number of non-executive directorships and the chairmanship of a listed company. During her career, Alison was a senior partner of Phoenix Securities and Managing Director, New York at Donaldson, Lufkin & Jenrette. Alison was also a director of J. Henry Schroder Wagg & Co, where she worked for 10 years.

Other principal external appointments: Non-executive Chairman of Land Securities Group PLC since November 2008; Non-executive Director of Malachite Advisors Limited; Non-executive Director of Man Group plc; Independent Director of Paccar Inc; Senior Advisor at Evercore Partners LLP.

Committee membership: Member of the Board Audit Committee since October 2010; Chairman of the Board Remuneration Committee since July 2011 (member since October 2010); Member of the Board Corporate Governance and Nominations Committee since July 2011.

Fulvio Conti, Non-executive Director^b (64)

Skills and experience: Fulvio joined the Board in April 2006 as a non-executive Director. Fulvio has significant financial and business experience from a career spanning over 35 years, and has been CEO of Enel SpA, the Italian energy company, since 2005. During his career, Fulvio has held the role of Chief Financial Officer for various private and government owned entities in Italy, and was in charge of finance at Montedison-Compart, and head of the accounting, finance, and control department of Montecatini. He has also held positions in finance and operations in various affiliates of Mobil Oil Corporation in Italy and Europe.

Other principal external appointments: Director of ENDESA SA since June 2009; Director of AON Corporation since January 2008; Director of Italian Institute of Technology since October 2011; President of Eurelectric since June 2011.

Committee membership: Member of the Board Audit Committee since September 2006.

Notes

a Independent on appointment.

b Independent non-executive Director.

Simon Fraser, Non-executive Director^b (52)

Skills and experience: Simon joined the Board in March 2009 as a non-executive Director. Simon has extensive experience of the fund management industry, having started his career at Fidelity International where he spent 27 years. During this time, Simon was President of the Investment Solutions Group and President of the Retirement Institute. Simon held a number of other positions during his time at Fidelity International, including President, European & UK Institutional Business, Global Chief Investment Officer, Chief Investment Officer for Asia Pacific and Chief Investment Officer of the European Investment Group.

Other principal external appointments: Director of Fidelity European Values PLC since July 2002; Director of Fidelity Japanese Values PLC since May 2000; Chairman of The Merchants Trust PLC since May 2010; Chairman of Foreign & Colonial Investment Trust PLC since May 2010; Non-executive Director of Ashmore Group Plc since February 2012.

Committee membership: Member of the Board Audit Committee since May 2009; Member of the Board Remuneration Committee since May 2009.

Reuben Jeffery III, Non-executive Director^b (58)

Skills and experience: Reuben joined the Board in July 2009 as a non-executive Director. Having held high profile roles in both the public and private financial services sectors, Reuben has been CEO of Rockefeller & Co., Inc. since 2010 and has a broad range of banking and government experience. Reuben is a Senior Adviser at the Center for Strategic & International Studies in Washington, D.C., having previously served in the US government as Under Secretary of State for Economic, Energy and Agricultural Affairs (2007-2009). Prior to this, Reuben was the Chairman of the Commodity Futures Trading Commission. Reuben has a strong investment banking background, having spent eighteen years at Goldman Sachs & Co. between 1983-2001 where he was managing partner of Goldman Sachs in Paris and led the firm's European Financial Institutions Group in London. Prior to joining Goldman Sachs, Reuben was a lawyer with the New York firm of Davis Polk & Wardwell.

Other principal external appointments: Member of the Advisory Board of the International Advisory Council of the China Securities Regulatory Commission; Member of the Advisory Board of TASC Inc.; Member of the Advisory Board of TowerBrook Capital Partners LP.

Committee membership: Member of the Board Risk Committee since January 2010.

Chris Lucas, Group Finance Director; Executive Director (51)

Skills and experience: Chris was appointed Group Finance Director and became a member of the Executive Committee in April 2007. Chris is responsible for a number of Group functions including Finance, Investor Relations, Treasury, Tax, Corporate Development and Corporate Secretariat. Chris joined Barclays from PricewaterhouseCoopers LLP, where he was UK Head of Financial Services and Global Head of Banking and Capital Markets. Chris has an extensive finance and accounting background, having spent most of his career working across financial services, including three years in New York as Head of the US Banking Audit Practice of PricewaterhouseCoopers LLP. He was Global Relationship Partner for Barclays for the 1999-2004 financial years and subsequently held similar roles for other global financial services organisations.

Other principal external appointments: none held

Sir Andrew Likierman, Non-executive Director^b (68)

Skills and experience: Sir Andrew joined the Board in September 2004 as a non-executive Director. Sir Andrew has wide ranging experience within both public and private sectors and academia. He is currently Dean of the London Business School and Chairman of the National Audit Office. Sir Andrew has held a number of high-profile roles, including 10 years spent as Managing Director, Financial Management, Reporting and Audit and Head of the Government Accountancy Service at HM Treasury. Sir Andrew also has a wealth of non-executive experience that includes serving as a non-executive Director of the Bank of England. In his professional capacity, Andrew has held the presidency of the Chartered Institute of Management Accountants, served as a member of the Financial Reporting Council for several years and was a member of the "Cadbury Committee" on UK Corporate Governance.

Other principal external appointments: Trustee of the Institute for Government since September 2008; Chairman of Applied Intellectual Capital Inc. (2006-2008); Non-executive Director of the Bank of England (2004-2008); Non-executive Director and Vice-Chairman of the Tavistock and Portman NHS Trust (2004-2008).

Committee membership: Member of the Board Audit Committee since September 2004; Member of the Board Risk Committee since September 2004.

Board of Directors continued

Dambisa Moyo, Non-executive Director^b (43)

Skills and experience: Dambisa joined the Board on 1 May 2010 as a non-executive Director. Dambisa is an international economist and commentator on the global economy, with a background in financial services. Dambisa worked for the World Bank from 1993 to 1995. After completing a PhD in Economics, she worked for Goldman Sachs for eight years until November 2008 in the debt capital markets, hedge funds coverage and global macroeconomics teams.

Other principal external appointments: Non-executive Director of SABMiller PLC since June 2009; Non-executive Director of Lundin Petroleum AB (publ) since May 2009; Non-executive Director of Barrick Gold Corporation since April 2011.

Committee membership: Member of the Board Risk Committee since October 2010; Member of the Board Citizenship Committee since August 2011.

Sir Michael Rake, Senior Independent Director^b (64)

Skills and experience: Sir Michael joined the Board in January 2008 as a non-executive Director, and was appointed Senior Independent Director in October 2011. Sir Michael has significant non-executive experience, both as a chairman and board member of listed companies. With over 30 years spent with KPMG, Sir Michael has substantial financial and business experience gained in Continental Europe and the Middle East. He was Senior Partner of the UK firm from 1998-2000 and Chairman of KPMG International from 2002-2007.

Other principal external appointments: Chairman of BT Group plc since 2007; Chairman of easyJet Plc since January 2010 (Deputy Chairman June 2009 – December 2009); Director of the Financial Reporting Council (2007-2011); Director of the McGraw-Hill Companies since 2007; Chairman of the UK Commission for Employment and Skills (2007-2010); Chairman of Business in the Community (2004-2007).

Committee membership: Chairman of the Board Audit Committee since March 2009 (member since January 2008); Member of the Board Risk Committee since May 2009; Member of Board Corporate Governance and Nominations Committee since May 2009.

Sir John Sunderland, Non-executive Director^b (66)

Skills and experience: Sir John joined the Board in June 2005 as a non-executive Director. Sir John has extensive business experience and knowledge, having spent forty years with Cadbury Schweppes PLC, where he became Chief Executive in 1996 and subsequently Chairman in 2003. Sir John has significant experience as a Director of UK listed companies, and has also held a number of presidencies of trade and professional bodies, including the Confederation of British Industry and the Chartered Management Institute.

Other principal external appointments: Chairman of Merlin Entertainments Limited since December 2009; Director of the Financial Reporting Council until 2011; Adviser to CVC Capital Partners; Governor of Reading University; Chancellor of Aston University; Deputy President of the Chartered Management Institute until 2009 (President 2007-2008); Deputy President of the CBI until June 2008 (former member and President).

Committee membership: Member of the Board Corporate Governance and Nominations Committee since September 2006; Member of the Board Remuneration Committee since July 2005; Member of the Board Citizenship Committee since August 2011.

People

Global excellence

Our success relies on the valuable skills of our people. We continue to operate to global governance frameworks and standards which regulate how we manage and treat our employees around the world. We are expanding the reach of these frameworks by establishing shared global practices across our businesses. Our key areas of focus are:

Attraction, engagement and performance

We recognise that successful employment relationships rely on mutual benefit. We are, therefore, clear and open about the skills and commitment we look for in new colleagues. We encourage applications from a diverse range of people and use selection techniques that support individuals in showing us what they can bring to Barclays, paying particular regard to the aptitudes of persons with disabilities.

The drive for individuals to be their best continues after joining our team. Our suite of communication channels cover internal and external topics that matter to our people and raise their awareness of the financial and economic factors that affect how Barclays operates now and in the future. These include global and location-specific intranets, news magazines and briefings from Executive and local Leaders to ensure the widest possible reach. Two-way communication is maintained by regular Employee Opinion Surveys with follow-through of the outcomes at all levels of our organisation and by consultation with our recognised unions and work councils internationally. These enable the views of our people to be taken into account in corporate decisions affecting their interests.

Assessment of performance is not only about what is achieved; how it is achieved is equally important. Resources for both personal and professional development are provided to employees in addition to mandatory training on policies and regulatory responsibilities. Employees regularly review, with their managers, their performance and development needs and, typically, twice a year, a performance rating is communicated.

Financial incentives are based on individuals' performance ratings and the performance of their business. As an extra means of encouraging our people to be involved and to share in our success, we regularly invite them to participate in our share options and share purchase schemes. Further details of our approach to remuneration are included in the Remuneration report on pages 54 to 65.

Diversity and inclusion

Our mission is to create an ever more inclusive environment through ensuring that we treat people fairly, with respect and value all aspects of diversity. Strategies to achieve this aim are endorsed at Board level and promulgated throughout our organisation. This is achieved by a range of initiatives and monitoring. These initiatives include training for all employees, workplace and working practice adjustments for persons with disabilities, company sponsored employee resource groups and an annual global scheme celebrating the significant contribution from female colleagues.

We are proud that many of our initiatives have received external recognition around the world, but recognise there is more to be accomplished. For example, we are monitoring diversity and inclusion progress year on year and, by leveraging our merit-based approach to appointments. We aim to ensure that our Board is diverse in every sense of the word with particular aspirations for female representation at this level.

Health and safety

The health and safety of our employees and customers is important to Barclays. It is an integral part of the duties of line managers to manage all health and safety issues within their areas of responsibility. Line managers have access to specialist resources for advice and guidance to support them in discharging their health and safety responsibilities.

We consult with our employees on matters affecting their health and safety. We encourage their involvement and personal commitment, including working closely with employee representatives.

Barclays is committed to promoting a working environment where health and safety is a fundamental part of the culture.

Employees by geographic segment – full time equivalent						
	UK	Europe	Americas	Africa and Middle East	Asia	Total
2011	56,100	11,600	10,900	47,900	14,600	141,100
2010	58,100	13,600	11,500	50,400	13,900	147,500

Remuneration report

Statement from the Chairman of the Board Remuneration Committee

We recognise that executive remuneration generally, and bank remuneration in particular, is an important issue. Barclays needs to work with the acceptance of the communities in which we operate and balance the competing demands of our many stakeholders. This includes a close and continuous engagement with the Financial Services Authority and with our shareholders.

In 2011 Barclays delivered a solid set of results, achieved in challenging market and economic conditions. This included:

- Total income up 3% (adjusted income excluding own credit and debt buy-backs down 8%);
- Profit before tax down 3% (adjusted profit before tax down 2%);
- Credit impairment charge improved 33%, with an annualised loan loss rate of 77bps (2010: 118bps);
- Operating expenses, excluding PPI provision, goodwill impairment and UK bank levy, down 4%. Cost saving targets have been exceeded;
- Core Tier 1 ratio strengthened to 11.0% (2010: 10.8%) and risk weighted assets reduced;
- Liquidity pool remained strong;
- Net asset value per share increased 9% and net tangible asset value per share increased 13%;
- Universal banking model helped to deliver broadly balanced adjusted profit before tax across the retail and investment banking businesses;
- Sovereign exposure to Spain, Italy, Portugal, Ireland and Greece reduced;
- Improving performance against our Citizenship execution priority, including delivery of £43.6bn of gross new lending to UK businesses, including £14.7bn to SMEs, exceeding Project Merlin lending targets; and
- Final dividend of 3.0p per share for the fourth quarter, making 6.0p for the year, an increase of 9%.

The results were reflected in the remuneration decisions across Barclays including those for Bob Diamond and Chris Lucas. 2011 total incentive awards were down 26% across the Group compared with a 3% reduction in profit.

Remuneration decisions for all of our employees, including for Bob Diamond and Chris Lucas, reflect performance and in making these decisions we are mindful of current economic conditions. Bonuses for our executive Directors and our eight highest paid senior executive officers were down 48% versus 2010 on a "like-for-like" basis (being the reduction for individuals in service in both 2010 and 2011).

Barclays needs to operate commercially and that includes setting remuneration for our executive Directors appropriately. Key factors that were taken into account in deciding on Bob Diamond's bonus were Barclays profit before tax and adjusted profit before tax; the relative performance of Barclays versus its peers; progress in delivering the four strategic priorities of capital, returns, income and Citizenship; progress in delivering the £1bn cost reduction target; Bob Diamond's leadership of the Executive Committee; and progress in delivering the return on equity target of 13%. In assessing the return on equity target, the Committee took into account the fall in return on equity during the year and the increased levels of capital being held. Barclays made progress in executing a thorough portfolio review designed to ensure that the business can achieve its return on equity target in the future. The Committee also took into account the PPI redress and progress against the Project Merlin lending targets.

The Board and the Committee recognise that our return on equity has to improve. In order to achieve this, our operating costs need to be reduced. Remuneration has its part to play in that. We fully recognise that higher capital requirements and a challenging economic environment mean that remuneration levels in the industry have to adjust. That journey will take time and we have taken important steps in the right direction in 2011. Total incentive awards for Barclays Capital were down 35% on 2010 with Barclays Capital profit before tax reducing 32%. The Committee will continue to focus on reaching a sustainable balance between shareholder returns and employee remuneration.

In determining 2011 total incentive awards, the Committee made appropriate adjustments to reflect material events in 2011. This included adjusting total incentive awards for the impact of the PPI redress and reviewing financial performance excluding own credit. The Committee also considered material events in 2011 for individual decisions, which resulted in reductions to incentive awards and the clawback of unvested deferred awards in a number of cases.

This report provides the following information:

- Part A (page 55): an overview of executive remuneration for 2011;
- Part B (page 56): details of the total incentive awards for 2011; and
- Part C (pages 57 to 65): additional disclosures to comply with legal and regulatory requirements for remuneration disclosure. Barclays auditors, PricewaterhouseCoopers LLP, have audited the information in Tables 4, 6, 7, 8, 9, 10, 11, 19, 23 and 24.

Additional information on Barclays approach to remuneration can be found at www.barclays.com/investorrelations. This includes:

- Details relating to Barclays Remuneration Policy;
- How regulatory requirements are factored into decision making;
- The key elements of Barclays remuneration arrangements; and
- A summary of the principal share and cash plans and long term incentive plans used for the 2011 performance year.

I trust the remuneration report provides you with a clear picture of how the Committee has discharged its responsibilities in 2011.

On behalf of the Board

Alison Carnwath

Chairman, Board Remuneration Committee
7 March 2012

Part A: Overview of executive remuneration for 2011

Remuneration decisions, including those for executive Directors and Code Staff, are managed on the basis of total remuneration, comprising salaries, bonuses and long term incentive awards. Code Staff are Barclays employees whose professional activities could have a material impact on the Group's risk profile. The Committee reviews each element of remuneration relative to performance and relative to the practice of other comparable organisations. This includes benchmarking against other leading international banks and financial services organisations and other companies of a similar size to Barclays.

Salaries are set at a level consistent with market rates. Bonuses are determined by reference to a qualitative and quantitative assessment of performance. Both financial and non-financial performance is considered. Financial performance is assessed by reference to key financial metrics including profit before tax, return on equity, return on risk weighted assets (RoRWA) and cost control. Non-financial performance is assessed by reference to factors including customer satisfaction and employee opinion surveys.

For the 2011 performance year, the use of deferred bonuses was increased to align better the incentive created by the variable component of remuneration to sustained performance. Deferred bonuses vest over a period of three years, dependent on future service and subject to clawback provisions.

Long term incentive awards reward execution of Barclays strategy and the creation of sustained growth in shareholder value. They are designed to align the executive Directors' and most senior employees' goals with the long term success of Barclays. Long term incentive awards are subject to risk-adjusted performance conditions, measured over a performance period of a minimum of three years. The vesting of awards is subject to the discretion of the Committee to ensure that awards only vest for performance and vesting is also subject to clawback provisions. Vested long term incentive awards are delivered in Barclays shares and cash.

Table 1 shows the details of salary, bonus for 2011 and the value at award of 2012-2014 performance period long term incentive awards for the executive Directors and the eight highest paid senior executive officers (who are Key Management Personnel). No salary increases were made for these individuals during 2011 and the salaries are unchanged for 2012. Bonuses for these individuals were down 48% versus 2010 on a like-for-like basis and are deferred over three years. The bonuses reflect the financial performance of Barclays. They also reflect the return on equity that was delivered. Cost control was disciplined and risk performance was strong, with reduced credit impairment, strong capital and liquidity positions, and reduced exposure to Eurozone sovereign debt. Project Merlin lending targets were also exceeded. Each individual's contribution was reviewed using a formal performance assessment process and by reference to objectives set at the start of the year. The outcome of this process is used to inform remuneration decisions.

Retirement benefits (or cash in lieu of pension) and other benefits (which may include private medical insurance, life and disability cover and car allowance) are provided in addition to the total remuneration package.

Further details on executive Director remuneration are provided in pages 58 to 62 of this report. Further details of the long term incentive plans are provided in the additional material on Barclays approach to remuneration which is available at www.barclays.com/investorrelations.

Table 1: Total remuneration of the executive Directors and eight highest paid senior executive officers

	Executive Directors		Senior executive officers

Remuneration report continued

Part B: Total incentive awards for 2011

We recognise the understandable importance that all stakeholders attach to the judgements that we must apply in managing remuneration. We manage remuneration in a way that is consistent with protecting future revenue flows and our ability to maximise returns to shareholders while enhancing our customer and client service standards.

Ensuring that we have the right people, in the right roles, is vital to our ability to generate shareholder returns by serving our customers and clients effectively, especially in the highly competitive, global markets in which we operate. This requires that we are competitive in the way in which we manage remuneration.

We manage remuneration decisions on the basis of total remuneration. An important tool in ensuring an appropriate balance between competitiveness and responsibility is the mix between the fixed and variable components of remuneration. We set the fixed component of remuneration – which largely comprises salaries – at a level consistent with market rates. We use the variable component of remuneration to create the flexibility that allows our cost base to respond to changes in economic and business conditions and to provide a clear and explicit link between remuneration and current and future performance. That link includes, in particular for senior roles, paying a substantially higher proportion of bonuses in shares, and deferred bonuses being subject to clawback provisions, to help ensure sustained performance over the longer term.

We have increased the use of deferred bonuses to align better the incentive created by the variable component of remuneration to sustained performance. Deferred bonuses are payable only once an employee meets certain conditions, including a specified period of service.

Table 2 sets out details of total incentive awards for 2011, including:

- Total bonus pool down 25% and total incentive awards down 26% versus 2010, with Barclays profit before tax reducing 3%;
- Barclays Capital bonus pool down 32% and total incentive awards down 35% versus 2010, with Barclays Capital profit before tax reducing 32%;
- Total bonus pool as a percentage of profit before tax (pre-bonus) down year on year from 33% to 28%;

- Average value of bonus per Barclays employee down 21% year on year to £15,200; average value of bonus per Barclays Capital employee down 30% to £64,000;
- Current year cash bonus capped at £65,000 for Barclays Capital employees; and
- Proportion of bonus pool that is deferred significantly exceeds the FSA's Remuneration Code requirements and is expected to be amongst the highest deferral levels globally; 75% of the bonus pool in Barclays Capital is deferred.

The balance between shareholder returns and incentive awards for employees is a key consideration for the Committee. The Committee will continue to focus on reaching a sustainable balance.

Table 2: Total incentive awards granted – current year and deferred

	Barclays Group			Barclays Capital		
	Year Ended 31.12.11 £m	Year Ended 31.12.10 £m	% Change	Year Ended 31.12.11 £m	Year Ended 31.12.10 £m	% Change

Part C: Additional disclosure information

Board Remuneration Committee remit and membership

The Committee provides governance and strategic oversight of remuneration. The Committee's terms of reference are available online at www.barclays.com/corporategovernance. The terms of reference were revised in February 2011 to take account of regulatory and corporate governance developments. The Committee met formally eight times during 2011. The Committee Chairman reported to the Board on the substantive issues discussed at each meeting. In addition to the formal meetings, the Committee members frequently consult between meetings and meet informally. The Committee Chairman consulted with shareholders and representative bodies during 2011. This included, in line with our commitments under Project Merlin, engaging with shareholders to ensure that their views and opinions were fully understood ahead of the Committee reaching its decisions.

The members of the Committee during 2011 were Sir Richard Broadbent (Committee Chairman until 30 June 2011), Alison Carnwath (Committee Chairman from 1 July 2011), Marcus Agius (Group Chairman), Simon Fraser and Sir John Sunderland. Details of members' attendance are shown in Table 3. The non-executive Directors who are Committee members are considered by the Board to be independent of management and free from any business or other relationship that could materially affect the exercise of their independent judgement. Marcus Agius was considered independent on appointment to the Board.

The outcome of the 2011 Board Effectiveness Review showed that the Committee operated effectively in 2011. Figure 1 sets out how the Committee's time was allocated in 2011.

Advisors

The Committee's work is supported by independent professional advice. The Committee reviews the appointment of advisors each year. In 2011 Towers Watson was re-appointed by the Committee as its advisor until February 2012. Johnson Associates, Inc. was appointed by the Committee as its advisor from March 2012. Any potential conflicts of interest the advisors may have are disclosed to the Committee. In addition to advising the Committee, Towers Watson provided remuneration benchmarking data to the Group. Towers Watson also provided pension advice as the appointed advisor to the trustee of the UK Retirement Fund. The Chief Executive, the Human Resources Director, the Compensation and Benefits Director and, as necessary, members of the Executive Committee, also advised the Committee, supported by their teams. No Barclays employee is permitted to participate in discussions or decisions of the Committee relating to his or her own remuneration.

Barclays Remuneration Policy

The Remuneration Policy provides a framework for the Committee in carrying out its work, including remuneration decisions for executive Directors and Code Staff. The aims of the Remuneration Policy are to:

1. Attract and retain those people with the ability, experience and skill to deliver Barclays strategy;
2. Create a direct and recognisable alignment between the rewards and risk exposure of shareholders and employees;
3. Incentivise employees to deliver sustained performance consistent with strategic goals and appropriate risk management, and to reward success in this;
4. Deliver remuneration that is affordable and appropriate in terms of value allocated to shareholders and employees; and
5. Encourage behaviour consistent with Barclays guiding principles.

More details on the Remuneration Policy including Barclays guiding principles can be found at www.barclays.com/investorrelations. The Committee reviews the Remuneration Policy to ensure that Barclays remuneration remains competitive and provides appropriate incentive for performance. To ensure appropriate operation of the Remuneration Policy, the Committee has established remuneration governance frameworks for each major business and for the Group. The frameworks are forward looking and are based on financial metrics, including key remuneration ratios, that assess the current and future affordability of remuneration. The frameworks are designed to ensure that remuneration is managed in a way that is consistent with delivering the strategy and performance of Barclays and each of the businesses, whilst maintaining capital strength.

For individual remuneration decisions made by the Committee, including the decisions for executive Directors, the level of remuneration across Barclays and each of the businesses is taken into account. The combined potential remuneration for the executive Directors and for senior employees from bonuses and long term incentive awards outweighs the fixed component of remuneration, and is subject to individual and business performance. This means that the majority of remuneration is risk adjusted.

Remuneration report continued

Remuneration governance

The Committee determines the bonus pool by reference to a number of quantitative and qualitative measures. In doing this the Committee is informed by the remuneration governance frameworks and associated financial metrics and remuneration ratios. The Committee receives input from the Group Finance Director and the Chief Risk Officer on key financial and risk matters. The Committee works closely with the Board Audit Committee and the Board Risk Committee, and receives input on internal audit, compliance and risk matters. This includes the Committee receiving a report from the Board Risk Committee on the risk performance of the businesses in order to ensure that the bonus pool properly reflects this performance.

The Committee reviews individual remuneration recommendations for executive Directors, Code Staff and employees with total remuneration of £1 m or more. Remuneration decisions are directly linked to individual performance, both financial and non-financial. Individual performance is reviewed by line management through a formal assessment process, which includes a review against objectives set at the start of the year. The assessment includes reviewing individual behaviour against Barclays guiding principles and applicable risk and control policies.

Bonuses above a threshold level (set annually by the Committee) include awards in the form of deferred bonuses. The vesting of deferred bonuses is dependent on future service and subject to clawback provisions. The Committee reviews the operation of clawback provisions and may reduce the vesting level of an unvested deferred bonus (including to nil). Events that may lead to the operation of clawback provisions include employee misconduct, harm to Barclays reputation, material restatement of Barclays financial statements, a material failure of risk management or a significant deterioration in the financial health of Barclays. Clawback provisions may also result in suspension of deferred bonuses where an employee is under investigation for a regulatory or disciplinary matter.

The risk and compliance functions play a key role in remuneration governance. The risk function provides regular updates to the Committee on risk adjusted business performance and it also provides input on the remuneration governance frameworks, bonus pool proposals and new incentive plan designs (including risk-adjusted metrics for use in long term incentive plans) from a risk management perspective. The input of the compliance function focuses on the assessment of individual employee behaviour based on the operation of compliance controls. Remuneration decisions for employees working in key control functions, including the risk and compliance functions, are determined independently of the businesses in which they work. The remuneration governance arrangements described above apply to all employees in Barclays, including Code Staff.

Executive Director remuneration

Table 4 shows the total remuneration for the executive Directors and Table 5 shows their salaries.

Salary

The executive Directors' salaries are unchanged for 2012.

Bonus

The maximum bonus opportunity for 2011 for executive Directors was 250% of salary, and it will remain the same for 2012.

The bonuses for 2011 for the executive Directors reflect the results for 2011 which were delivered amidst a challenging economic, market and regulatory environment. The bonuses are deferred over a period of three years in Barclays shares under the Share Value Plan (SVP). No consideration is payable by the executive Directors to receive the award. SVP awards normally vest in equal portions on the first, second and third anniversaries of grant dependent on future service and they are subject to clawback provisions.

Long term incentive awards

The maximum value of long term incentive awards for executive Directors for the 2012-2014 performance period is 500% of salary. Table 4 shows the value at award of the proposed long term incentive awards for the 2012-2014 performance period for the executive Directors (based on 33% of the maximum number of shares subject to the award). The long term incentive awards will be granted under the Barclays Long Term Incentive Plan. No consideration is payable by the executive Directors to receive the awards. The awards are dependent on future service and vest subject to performance conditions and clawback provisions. Further details on the Barclays Long Term Incentive Plan (Barclays LTIP) are provided in the additional material on Barclays approach to remuneration which is available at www.barclays.com/investorrelations.

Table 4: Total remuneration (audited)

	Bob Diamond		Chris Lucas	
	2011 £000	2010 £000	2011 £000	2010 £000

Current year cash bonus	0	0	0	360
Current year share bonus	0	1,800	0	360
Deferred cash bonus	0	2,350	0	540
Deferred share bonus	2,700	2,350	1,800	540
Total of salary and bonus	4,050	6,750	2,600	2,563
Long term incentive award	2,250	2,250	1,333	1,333
Total remuneration	6,300	9,000	3,933	3,896

Table 5: 2011 and 2012 salary

	Salary at 31 December 2011 £000	Salary at 1 April 2012 £000	Date of previous increase
Bob Diamond	1,350	1,350	1 January 2011
Chris Lucas	800	800	1 April 2010

Pension

The executive Directors received an annual cash allowance in lieu of membership of a Barclays pension plan. This was 50% and 25% of salary for Bob Diamond and Chris Lucas respectively. Further details are shown in Table 6. The accrued pension of £60,000 at 31 December 2011 for Bob Diamond relates to US pension plans in which he ceased to be an active member as at 31 December 2010.

Benefits

Executive Directors are provided with benefits including private medical insurance, life and disability cover, accommodation as required for business purposes, tax advice, the use of a company vehicle or the cash equivalent and the use of a company driver when required for business purposes. Table 7 shows the benefits received by the executive Directors.

Tax equalisation

Bob Diamond is a UK taxpayer and paid UK income tax on his employment income (that exceeded the higher rate taxable band) at 50% in 2011. In accordance with his contract, and consistent with arrangements for other senior executives in global companies required to work in multiple locations, he is tax equalised. This tax equalisation is not remuneration for him. Bob Diamond is tax equalised on tax above the UK rate where that cannot be offset by a double tax treaty. The tax equalisation costs in 2011, shown in Table 8, included an amount met by Barclays in respect of taxes that arose as a result of Bob Diamond's relocation from the US to the UK, which was required by the Board for his appointment as Chief Executive. In particular, the difference in treatment of capital gains on historical share awards between the US and UK resulted in a one-off additional tax charge, which could not be offset by a double tax treaty. Because of the one-off nature of a large part of the 2011 cost, the Committee expects the 2012 tax equalisation costs to be significantly reduced.

Table 6: Pension (audited)

	Age at 31 December 2011	Completed years of service	Accrued pension at 31 December 2011 £000	Transfer value of accrued pension at 31 December 2010 £000	Transfer value of accrued pension at 31 December 2011 £000	Increase in transfer value during 2011 £000	2011 cash in lieu of pension £000
Bob Diamond	60	15	60	473	599	126	675
Chris Lucas	51	4	–	–	–	–	200

Note to Table 6: Bob Diamond ceased to be an active member of Barclays US defined benefit and defined contribution plans as at 31 December 2010. The defined benefit plans were the US Staff Pension Plan (funded) and the US Restoration Plan (unfunded). The defined contribution plans were the Barclays Bank PLC 401K Thrift Savings Plan and the Thrift Restoration Plan. The increase in the transfer value of accrued pension for Bob Diamond during 2011 is primarily due to changes in US financial and demographic assumptions.

Table 7: Benefits (audited)

	2011 £000	2010 £000
Bob Diamond	474	268
Chris Lucas	28	25

Table 8: Tax equalisation (audited)

	2011 £000	2010 £000
Bob Diamond	5,745	–
Chris Lucas	–	–

Table 9: Total of salary, current year bonus, cash in lieu of pension and benefits (audited)
(calculated in accordance with Schedule 8 of the Large and Medium-sized Companies and Groups (Accounts and Reports) Regulations 2008)

	2011 £000	2010 £000
Bob Diamond	2,499	2,318
Chris Lucas	1,028	1,699

The total for 2011 for Bob Diamond including tax equalisation is £8.244m (the sum of £2.499m shown above and gross costs of tax equalisation of £5.745m shown in Table 8).

Remuneration report continued

Outstanding long term awards

Barclays operates a number of long term plans to align the interests of executive Directors, Code Staff and other senior employees with the interests of shareholders and with the execution of Barclays strategy over the longer term.

For the Performance Share Plan (PSP) and the Barclays LTIP, independent confirmation is provided to the Committee of the extent to which each performance condition has been met at the end of each performance period. In relation to the 2006-2008 PSP award, the maximum number of shares that could be released was determined in 2009 and fixed as shown in Table 10. The Committee recommended that the number of shares shown in Table 10 be released in March 2011. In relation to the 2007-2009 PSP awards, the

voluntary clawback arrangement will cease in March 2012 at the end of the two year clawback period. The 2007-2009 awards are not shown in Table 10 as the shares were released in 2010.

In relation to the 2008-2010 PSP awards, the total shareholder return (TSR) performance measure was partially met but the economic profit performance measure was not met. As a result, awards vested in March 2011 at 0.5 times the initial award (maximum is 3 times). In relation to the 2009-2011 PSP award, the underpin (as shown in Table 12) was met, the RoRWA performance measure was met and the TSR performance measure was partially met. As a result, the award will vest in 2012 at 2.1 times the initial award (maximum is 3 times). These performance measures were chosen for the reasons set out further in this report.

Table 10: Outstanding share plan and long term incentive plan awards (audited)

	Number of shares under award/option at 1 January 2011 (maximum)	Number of shares awarded in year (maximum)	Market price on award date	Weighted average exercise price	Number of shares released/exercised
Bob Diamond					
PSP 2006-2008	1,164,273	–	£6.75	–	(1,164,273)
PSP 2008-2010	2,031,030	–	£4.25	–	(338,505)

Table 11: Outstanding Contingent Capital Plan awards (audited)

	Value under award at 1 January 2011 (maximum) (£000)	Value awarded in year (maximum) (£000)	Value under award at 31 December 2011 (maximum) (£000)	First scheduled release date	Last scheduled release date
Bob Diamond	–	2,350	2,350	23/05/2012	23/05/2014
Chris Lucas	–	540	540	23/05/2012	23/05/2014

Note to Table 11: Deferred cash bonuses were granted under CCP in 2011. The awards are dependent on future service and vest subject to clawback provisions and subject to the condition that the Core Tier 1 ratio is equal to or exceeds 7%. On vesting, an additional discretionary benefit may be added equivalent to a coupon which for the awards shown is 7% on the award amount (on an annualised and non-compounded basis). Executive Directors do not pay for CCP awards.

Table 12: Performance conditions attaching to the long term incentive plans in which the executive Directors participate

Plan	Performance period	Performance measure	Target
Barclays LTIP	2011-2013	60% of award calibrated against RoRWA	23% of award vests for average annual RoRWA percentage of 1% over the performance period. Maximum of 60% vests for average annual RoRWA of 1.5%. Vesting on a straight line basis in between
		30% of award calibrated against loan loss rate	10% of award vests for average annual loan loss rate of 95bps over the performance period. Maximum of 30% vests for 81 bps or below. Vesting on a straight line basis in between
		10% of award calibrated against sustainability metrics	Performance against the sustainability metrics is assessed by the Committee to determine the percentage of the award that can vest between 0% and 10%
PSP	2010-2012	50% of award calibrated against a relative TSR performance condition	33% of maximum award released for above median performance (6th place) with 100% released in 1st place and a scaled basis in between
		50% average RoRWA	17% of maximum award released for 0.83% scaled to a maximum award at 1.46%
PSP	2009-2011	50% of award calibrated against a relative TSR performance condition	As above (2010-2012)
		50% average RoRWA	17% of maximum award released for 0.83% scaled to a maximum award at 1.34%

For the 2010-2012 PSP awards the performance measures are relative TSR and RoRWA. For the 2011-2013 Barclays LTIP awards the performance measures are RoRWA, loan loss rate and sustainability metrics including customer satisfaction, employee opinion surveys and Barclays relationships with its regulators. TSR was selected to align performance with Barclays shareholders. RoRWA was selected because it is a primary determinant of return on equity, which is closely correlated with the price to book multiple at which Barclays shares trade, but cannot be influenced by leverage. Loan loss rate encourages strong management of credit risk. The sustainability metrics were chosen to align performance to the Citizenship execution priority (sustainability is now referred to as Citizenship).

Calibration of performance measures is agreed ahead of each award by the Committee supported by a working team with representatives from the human resources, strategy, finance and risk functions. This process includes an assessment of relevant data including financial targets, analyst forecasts, internal and external views of comparator future performance levels, shareholder views and broader economic trends. All performance measures are calibrated to include a significant level of stretch to attain maximum payout.

Participants may also receive dividend shares which represent accumulated dividends (net of withholding tax) in respect of the Barclays shares under awards that vest. During 2011 Barclays highest share price was £3.34 and the lowest was £1.39. The Barclays share price on 30 December 2011 was £1.76.

Market price on release/exercise date	Number of shares lapsed in 2011	Number of shares under award/option at 31 December 2011 (maximum)	Vested number of shares under option	Value of release/exercise	End of three-year performance period, or first exercise/scheduled release date	Last exercise/scheduled release date
£3.183	–	–	–	£3.71m	31/12/2008	01/03/2011

£3.183	(451,340)	–	–	£0.29m	31/12/2010	01/03/2011
–	–	1,598,046	–	–	31/12/2011	27/04/2012
–	–	927,318	–	–	31/12/2012	16/03/2013
–	–	3,735	–	–	01/11/2014	30/04/2015
–	–	646,762	40,621	–	20/03/2011	16/03/2015
–	–	195,439	–	–	07/05/2012	06/05/2014
–	–	1,447,701	–	–	31/12/2013	06/05/2014

Note to Table 10: Interests shown are the maximum number of Barclays shares that may be received under each plan. Executive Directors do not pay for any share plan or long term incentive plan awards. Numbers shown for Executive Share Award Scheme (ESAS) represent provisional allocations that have been awarded and may also include shares under option as at 31 December 2011. Nil cost options are normally granted under mandatory ESAS awards at the third anniversary of grant and are exercisable (over initial allocation and two thirds of bonus shares) typically for two years. The aggregate exercise price of a nil cost option is £1. At the fifth anniversary of the provisional allocation the nil cost options normally lapse and the shares (including bonus shares) are released at the discretion of the ESAS trustee. In

2011, nil cost options over 43,077 shares were granted to Chris Lucas. Chris Lucas did not hold any options under ESAS as at 1 January 2011, and held options over 43,077 shares as at 31 December 2011. The first and last exercise dates were 1 March 2011 and 19 March 2013 respectively. Bob Diamond received 160,702 dividend shares from ESAS awards released in 2011 (market price on release date was £3.183). Bob Diamond received 232,702 dividend shares and Chris Lucas received 5,458 dividend shares from PSP awards released in 2011 (market price on release date was £3.183). Share Value Plan (SVP) awards do not have performance conditions as the awards are deferred share bonuses. Vesting of SVP awards is dependent on future service and subject to clawback provisions.

PSP awards: TSR peer group constituents			Actual performance
UK	Mainland Europe	US	Underpin
			Following the determination of the RoRWA To be determined vesting percentage, the Committee may take into account profit before tax over the performance period and may, at its discretion, adjust the percentage of award up or down by up to 5 vesting percentage points (subject to the maximum of 60% for the award calibrated against RoRWA)
HSBC	Banco Santander, BBVA, BNP Paribas, Credit Suisse, Deutsche Bank, Société Générale, Unicredit	Bank of America, JP Morgan Chase, Morgan Stanley	Committee must be satisfied with the underlying financial health of the Group after considering economic profit and profit before tax on a cumulative basis over the three year period
HSBC, Lloyds Banking Group, Royal Bank of Scotland	Banco Santander, BBVA, BNP Paribas, Deutsche Bank, UBS, Unicredit	Citigroup, JP Morgan Chase	As above (2010-12)
			Performance condition partially met

Remuneration report continued

Shareholding guideline

The Committee's shareholding guideline provides that executive Directors should hold Barclays shares worth, as a minimum, the higher of two times salary and the average of total remuneration over the last three years.

Executive Directors have five years from appointment to meet this guideline and a reasonable period to build up to the guideline again if it is not met because of a share price fall. The executive Directors' interests in Barclays shares are set out in Table 13.

Service contracts

Barclays has service contracts with its executive Directors which do not have a fixed term but provide for a notice period of 12 months. The contracts allow for termination with contractual notice from Barclays or, in the alternative,

termination by way of payment in lieu of notice (in phased instalments) which are subject to contractual mitigation. In the event of termination for gross misconduct, neither notice nor a payment in lieu of notice will be given. The Committee's approach when considering payments in the event of termination is to take account of the individual circumstances including the reason for termination, contractual obligations and cash, share and long term incentive plan and pension plan rules. The Committee does not intend to include automatic contractual bonus payments upon termination in relation to executive Director appointments going forward. Automatic contractual bonus payments upon termination are not included in Bob Diamond's contract. Details of the contract terms are shown in Table 14.

Table 13: Interests in Barclays PLC shares

	Number of shares at 1 January 2011		Number of shares at 31 December 2011	
	Beneficial	Non- beneficial	Beneficial	Non- beneficial
Bob Diamond	10,292,671	–	13,197,895	–
Chris Lucas	188,476	–	297,467	–

Note to Table 13: Beneficial interests include shares held either directly or through a nominee, spouse, or children under 18. They include any interests held through Sharepurchase.

Non-beneficial interests include any interests in shares where an executive Director holds the legal, but not beneficial interest. There were no changes in the beneficial and non-beneficial interests in the period from 31 December 2011 to 2 March 2012.

Table 14: Contract terms

	Effective date	Notice period from the Company	Potential compensation for loss of office
Bob Diamond	1 January 2011	12 months	12 months salary and continuation of medical and pension benefits whilst an employee. No automatic contractual entitlement to bonus on termination
Chris Lucas	1 April 2007	12 months	12 months salary, bonus equivalent to the average of the previous three years bonuses (up to 100% of salary) and continuation of medical and pension benefits whilst an employee

Code Staff aggregate remuneration

Code Staff are the members of the Barclays PLC Board and Barclays employees whose professional activities could have a material impact on the Group's risk profile. A total of 238 individuals were Code Staff in 2011.

Table 15: Code Staff aggregate 2011 remuneration by business

						(£m)
Barclays Capital	Barclays Corporate	Barclays Wealth	Retail & Business Banking	Absa	Group Functions	
214	18	30	46	6	43

Current year share bonus		0	22
Deferred cash bonus		10	93
Deferred share bonus		16	97
Total		36	274
Long term incentive award (outcome contingent on future performance)		15	32

Table 17: Code Staff deferred remuneration

			(£m)
		Senior management	Other Code Staff
Deferred unvested remuneration outstanding at 31 December 2010		135	471
Impact of Code Staff leaving during 2010 or joining in 2011		(3)	(29)
Deferred unvested remuneration outstanding at 1 January 2011		132	442
Deferred remuneration awarded in 2011		57	349
Deferred remuneration reduced in 2011 through performance adjustments		(37)	(144)
Deferred remuneration vested in 2011		(23)	(69)
Deferred unvested remuneration outstanding at 31 December 2011		129	578

Table 18: Code Staff joining and severance payments

			(£m)
		Senior management	Other Code Staff
Total sign-on awards (one individual – £0.1m (Other Code Staff))		0	0
Total buy-out awards (eight individuals)		3	3
Total severance awards (eight individuals)		0	5

Note to Tables 16 to 18: "Senior management" means members of the Barclays PLC Board and senior managers as defined in the FSA's Remuneration Code. Highest individual severance payment was £1.8m.

Note to Table 17: There was no deferred vested remuneration outstanding at the end of the year. Code Staff are subject to a minimum shareholding guideline.

Group Chairman and non-executive Directors

The Group Chairman and the non-executive Directors receive fees which reflect individual responsibilities and membership of Board Committees. Fees are reviewed each year by the Board and for non-executive Directors were increased with effect from 1 May 2011. Prior to that, non-executive Director fees were last increased in June 2008. The Group Chairman's fees have not changed since his appointment.

The first £30,000 (2010: first £20,000) of the non-executive Directors' base fees is used to purchase Barclays shares which are retained on the non-executive Directors' behalf until they retire from the Board.

The Group Chairman has a minimum time commitment to Barclays equivalent to 60% of a full-time role. In addition to his fees he receives private medical insurance and he is provided with the use of a company vehicle and company driver when required for business purposes. The Group Chairman is not eligible to receive a bonus, nor to participate in Barclays cash, share or long term incentive plans. The Group Chairman does not participate in Barclays pension plans and he does not receive any pension contributions. No other non-executive Director receives any benefits from Barclays.

Membership and Chairmanship of Board Committees as at 31 December 2011 and details of the fees received during 2011 are set out in Table 19. Details of beneficial interests in Barclays shares are set out in Table 20.

Table 19: 2011 fees for the Group Chairman and non-executive Directors (audited)

	Chairman £000	Senior Independent Director £000	Board Member £000	Board Audit Committee £000	Board Remuneration Committee £000	Board Corporate Governance and Nominations Committee £000	Board Citizenship Committee £000	Board Risk Committee £000	Benefits £000	Total 2011 £000	Total 2010 £000

Sir Richard Broadbent	–	–	–	–	–	–	–	–	–	171	200

Note to Table 19: Alison Carnwath became Chairman of the Board Remuneration Committee and a member of the Board Corporate Governance and Nominations Committee on 1 July 2011. Dambisa Moyo and Sir John Sunderland became members of the Board Citizenship Committee on 1 August 2011. Sir Michael Rake became Senior Independent Director on 1 October 2011. Sir Richard Broadbent resigned as a non-executive Director with effect from 30 September 2011.

Table 20: Interests in Barclays PLC shares

	At 1 January 2011 total beneficial interests	At 31 December 2011 total beneficial interests	At 2 March 2012 total beneficial interests
Group Chairman			
Marcus Agius	115,129	232,244	232,244
Non-executive Directors			
David Booth	77,285	82,867	86,806
Alison Carnwath	40,000	44,738	47,742
Fulvio Conti	42,970	48,500	52,455
Simon Fraser	49,768	79,514	83,144
Reuben Jeffery III	65,244	72,174	77,183
Sir Andrew Likierman	27,031	32,329	35,686
Dambisa Moyo	2,826	7,798	11,429
Sir Michael Rake	18,954	35,213	38,378
Sir John Sunderland	83,277	88,058	91,187

Note to Table 20: Reuben Jeffery's beneficial interest as at 31 December 2011 comprised 15,000 American Depositary Shares and 12,174 Barclays PLC shares, and as at 2 March 2012 comprised 15,000 American Depositary Shares and 17,183 Barclays PLC shares. Except as described in this note, there were no changes to the total beneficial interests of the non-executive Directors in the period from 31 December 2011 to 2 March 2012.

Remuneration report continued

Letters of appointment

The Group Chairman and non-executive Directors have individual letters of appointment. Each non-executive Director appointment is for an initial six year term, renewable for a single term of three years thereafter. For the Group Chairman the notice period from Barclays is 12 months, and potential compensation for loss of office is 12 months fees and contractual benefits. For non-executive Directors, the notice period from Barclays is six months and potential compensation for loss of office is six months fees. The effective dates of the letters of appointment are shown in Table 21. Sir Richard Broadbent resigned as a non-executive Director with effect from 30 September 2011 and did not receive a termination payment. All current non-executive Directors will be standing for re-election at the 2012 Annual General Meeting.

Total Shareholder Return

Figure 2 shows the value, at 31 December 2011, of £100 invested in Barclays on 31 December 2006 compared with the value of £100 invested in the FTSE 100 Index. The other points plotted are the values at intervening financial year ends. The FTSE 100 Index is a widely recognised performance comparison for large UK companies and this is why it has been chosen as a comparator to illustrate Barclays total shareholder return.

Table 21: Effective dates of letters of appointment

	Effective date
Group Chairman	
Marcus Agius	1 January 2007
Non-executive Directors	
David Booth	1 May 2007
Alison Carnwath	1 August 2010
Fulvio Conti	1 April 2006
Simon Fraser	10 March 2009
Reuben Jeffery III	16 July 2009
Sir Andrew Likierman	1 September 2004
Dambisa Moyo	1 May 2010
Sir Michael Rake	1 January 2008
Sir John Sunderland	1 June 2005
Sir Richard Broadbent	16 July 2009

Source: Datastream

Additional information on deferred bonuses

Deferred bonuses are payable only once an employee meets certain conditions, including a specified period of service, such that the related costs are recognised over that period. This creates a timing difference between the communication of the bonus pool (being the total bonus awards granted that are decided upon by management and approved by the Committee) and the charges that appear in the income statement for any year. As such, set out in Tables 22 to 24 are the components of remuneration that relate to management's and the Board's decisions on the bonus pool reconciled to the income statement charge, recognised in accordance with accounting standards.

Table 22: Years in which the income statement charge arises

Bonus Pool Component	Expected Grant Date	Expected Payment Date(s) ¹	Year(s) in which Income Statement Charge Arises ²
Current year cash bonus	• February 2012	• February 2012	• 2011
Current year share bonus	• February/March 2012	• February 2012 to September 2012	• 2011
Deferred cash bonus	• March 2012	• March 2013 (33.3%) • March 2014 (33.3%) • March 2015 (33.3%)	• 2012 (48%) • 2013 (35%) • 2014 (15%) • 2015 (2%)
Deferred share bonus	• March 2012	• March 2013 (33.3%) • March 2014 (33.3%) • March 2015 (33.3%)	• 2012 (48%) • 2013 (35%) • 2014 (15%) • 2015 (2%)

Notes to Table 22:

¹ Payments are subject to all performance conditions being met prior to the expected payment date. In addition, employees receiving a deferred cash bonus may be awarded a service credit of 10% of the initial value of the award at the time that the final instalment is made, subject to continued employment.

² The income statement charge is based on the period over which performance conditions are met.

Table 23: Reconciliation of total incentive awards granted to income statement charge (audited)

	Year Ended 31.12.11 £m	Year Ended 31.12.10 £m
Total incentive awards for 2011	2,578	3,484
Less: deferred bonuses awarded for 2011	(1,252)	(1,177)
Add: current year charges for deferred bonuses from previous years	995	904
Other ¹	206	139
Income statement charge for performance costs	2,527	3,350

Note to Table 23:

1 Difference between incentive awards granted and income statement charge for sales commissions, commitments and other incentives.

Employees only become eligible to receive payment from a deferred bonus once all of the relevant conditions have been fulfilled, including the provision of services to the Group. The income statement charge for performance costs reflects the charge for employees' actual services provided to the Group during the relevant calendar year (including where those services fulfil performance conditions relating to previously deferred bonuses). It does not include charges for deferred bonuses where performance conditions have not been met. As a consequence, while the 2011 incentive awards granted were down 26% compared to 2010, the income statement charge for performance costs was down 25%.

Table 24: Income statement charge – total staff costs (audited)

	Year Ended 31.12.11 £m	Year Ended 31.12.10 £m	% Change
Performance costs	2,527	3,350	(25)
Salaries	6,277	6,151	2
Other share based payments	167	168	(1)
Social security costs	716	719	–
Post retirement benefits	727	528	38
Total compensation costs	10,414	10,916	(5)
Bank payroll tax	76	96	(21)
Other ¹	917	904	1
Non compensation costs	993	1,000	(1)
Total staff costs	11,407	11,916	(4)

Total staff costs reduced 4% to £11,407m, principally reflecting the £823m reduction in performance costs offset by the impact of a £304m pension credit recognised in 2010. Performance costs reduced 25% to £2,527m, principally reflecting reduced charges for current year cash bonuses. It is currently anticipated that deferred bonuses will be charged to the income statement in the following years:

	Actual		Expected	
	Year Ended 31.12.10 £m	Year Ended 31.12.11 £m	Year Ended 31.12.12 £m	2013 and beyond
Year in which income statement charge is expected to be taken for deferred bonuses²				
Deferred bonuses from 2009 and earlier bonus pools	904	405	139	23
Deferred bonuses from 2010 bonus pool	–	590	387	205
Deferred bonuses from 2011 bonus pool	–	–	601	651
Income statement charge for deferred bonuses	904	995	1,127	879

Notes to Table 24:

1 Includes staff training, redundancy and recruitment.

2 The actual amount charged depends upon whether performance conditions have been met and will vary compared with the above expectation.

Salaries increased 2% to £6,277m in line with inflation on a moderately declining average headcount. The post retirement benefits charge increased 38% to £727m reflecting the non-recurrence of a £304m credit in 2010. There have been no material changes or augmentations to any of the post retirement benefit programmes in 2011.

Glossary for Tables 1, 2, 4, 16, 22 and 23

- Bonus pool as % of PBT (pre bonus): Calculated as bonus awards divided by profit before tax excluding the income statement charge for bonus awards.
- Current year cash bonus: Bonus paid in cash on a discretionary basis in respect of performance in the period.
- Current year share bonus: Bonus paid in shares on a discretionary basis in respect of performance in the period. The shares may be subject to a holding period and/or shareholding policy.
- Deferred cash bonus: Award granted on a discretionary basis and paid in cash for, and subject to, future service over a period of three years.
- Deferred share bonus: Award granted on a discretionary basis and paid in shares for, and subject to, future service over a period of three years.
- Sales commissions, commitments and other incentives: Includes commission-based arrangements, guaranteed incentives and long term incentive plan awards.
- Incentive awards: Total of current year and deferred bonus plus sales commissions, guaranteed incentives and long term incentive plan awards.

Risk management

Barclays risk management strategy

Barclays risk management strategy

Barclays has clear risk management objectives and a well-established strategy to deliver them, through core risk management processes.

At a strategic level, our risk management objectives are to:

- Identify the Group's significant risks;
- Formulate the Group's risk appetite and ensure that business profile and plans are consistent with it;
- Optimise risk/return decisions by taking them as closely as possible to the business, while establishing strong and independent review and challenge structures;
- Ensure that business growth plans are properly supported by effective risk infrastructure;
- Manage risk profile to ensure that specific financial deliverables remain possible under a range of adverse business conditions; and
- Help executives improve the control and co-ordination of risk taking across the business.

The Group's approach is to provide direction on: understanding the principal risks to achieving Group strategy; establishing risk appetite; and establishing and communicating the risk management framework. The process is then broken down into five steps: identify, assess, control, report and manage/challenge. Each of these steps is broken down further, to establish end-to-end activities within the risk management process and the infrastructure needed to support it (see panel below). The Group's risk management strategy is broadly unchanged from 2010.

Assigning responsibilities

Responsibility for risk management resides at all levels within the Group, from the Board and the Executive Committee down through the organisation to each business manager and risk specialist. Barclays distributes these responsibilities so that risk/return decisions are taken at the most appropriate level; as close as possible to the business, and subject to robust and effective review and challenge. The responsibilities for effective review and challenges reside with senior managers, risk oversight committees, Barclays Internal Audit, the independent Group Risk function, the Board Risk Committee and, ultimately, the Board.

The *Board* is responsible for approving risk appetite (see page 71), which is the level of risk the Group chooses to take in pursuit of its business objectives. The Chief Risk Officer regularly presents a report to the Board summarising developments in the risk environment and performance trends in the key portfolios. The Board is also responsible for the Internal Control and Assurance Framework (Group Control Framework). It oversees the management of the most significant risks through the regular review of risk exposures and related key controls. Executive management responsibilities relating to this are set via the Group's Principal Risks Policy.

Steps	Activity
Identify	– Establish the process for identifying and understanding business-level risks.
Assess	– Agree and implement measurement and reporting standards and methodologies.
Control	<ul style="list-style-type: none"> – Establish key control processes and practices, including limit structures, impairment allowance criteria and reporting requirements. – Monitor the operation of the controls and adherence to risk direction and limits. – Provide early warning of control or appetite breaches. – Ensure that risk management practices and conditions are appropriate for the business environment.
Report	<ul style="list-style-type: none"> – Interpret and report on risk exposures, concentrations and risk-taking outcomes. – Interpret and report on sensitivities and Key Risk Indicators. – Communicate with external parties.
Manage and Challenge	<ul style="list-style-type: none"> – Review and challenge all aspects of the Group's risk profile. – Assess new risk-return opportunities. – Advise on optimising the Group's risk profile. – Review and challenge risk management practices.

Governance structure at Group level

Board oversight

Board
 – Approves overall Group Risk Appetite.

Governance and Control Committee
 – Reviews the adequacy and effectiveness of the Group Control Framework.
 – Monitors compliance with the Framework including remediation of significant control issues.
 – Reviews reports on control issues of Group-level significance.

Chief Executive Group Executive Committee

Risk management

Barclays risk management strategy continued

The *Board Risk Committee* (BRC) monitors the Group's risk profile against the agreed appetite. Where actual performance differs from expectations, the actions being taken by management are reviewed to ensure that the BRC is comfortable with them. After each meeting, the Chair of the BRC prepares a report for the next meeting of the Board. Barclays first established a separate Board Risk Committee in 1999 and all members are non-executive directors. The Finance Director and the Chief Risk Officer attend each meeting as a matter of course. The BRC receives regular and comprehensive reports on risk methodologies and the Group's risk profile including the key issues affecting each business portfolio and forward risk trends. The Committee also commissions in-depth analyses of significant risk topics, which are presented by the Chief Risk Officer or senior risk managers in the businesses. Further details are provided on pages 43 to 44.

The *Board Audit Committee* receives quarterly reports on control issues of significance and a half-yearly review of the adequacy of impairment allowances, which it reviews relative to the risk inherent in the portfolios, the business environment, the Group's policies and methodologies and the performance trends of peer banks. The Chair of the Board Audit Committee also sits on the BRC. Further details are provided on pages 40 to 42.

The *Board Citizenship Committee* provides oversight of reputational risk management and reviews emerging issues with potentially significant reputational impact. The Committee also reviews performance against Citizenship priorities, looking at the way we do business, how we are contributing to growth in the real economy, and supporting communities through investment programmes and efforts of employees. Further detail is provided on pages 18 and 32.

The *Board Remuneration Committee* receives a detailed report on risk management performance from the BRC which is considered in the setting of performance objectives in the context of incentive packages. Further details are provided on pages 54 to 65.

The *Board Corporate Governance and Nominations Committee* has a key role in reviewing new appointments and succession plans to ensure that we have a Board and an executive management team with the appropriate skills, knowledge and experience to operate effectively in an ever challenging environment. Further details on the Committee are included on pages 38 and 39.

Summaries of the relevant business, professional and risk management experience of the Directors of the Board are given on pages 50 to 52. The terms of reference for each of the principal Board Committees are available from the Corporate Governance section at: <http://group.barclays.com/About-us/Management-structure/Corporate-governance>.

The *Chief Risk Officer* is a member of the Executive Committee and has overall day-to-day accountability for risk management under delegated authority from the Chief Executive. The Chief Executive must consult the Chairman of the Board Risk Committee in respect of the Chief Risk Officer's performance appraisal and compensation as well as all appointments to or departures from the role.

The Chief Risk Officer manages the independent Group Risk function and chairs the Financial Risk Committee and the Operational Risk Committee, which monitor the Group's financial and non-financial risk profile relative to established risk appetite. Reporting to the Chief Risk Officer, and working in the Group Risk function, are risk-type heads for retail credit risk, wholesale credit risk, market risk, operational risk and fraud risk. Along with their teams, the risk-type heads are responsible for establishing a Group-wide framework for oversight of the risks and controls of their risk type. These risk-type teams liaise with each business as part of the monitoring and management processes.

In addition, each business unit has an embedded risk management function, headed by a Business Chief Risk Officer (BCRO). BCROs and their teams are responsible for assisting business heads in the identification

and management of their business risk profiles and for implementing appropriate controls. These teams also assist Group Risk in the formulation of Group policies and their implementation across the businesses. The business risk directors report jointly to their respective business heads and to the Chief Risk Officer.

The risk type heads within the central Group Risk function and the BCROs within the business units report to the Chief Risk Officer and are members of the Financial Risk Committee or Operational Risk Committee as appropriate.

For further details on the management of each of the Principal Risks, see pages 74 to 78.

Internal Audit is responsible for the independent review of risk management and the control environment. Its objective is to provide reliable, valued and timely assurance to the Board and Executive Management over the effectiveness of controls, mitigating current and evolving high risks and in so doing enhancing the controls culture within the Group. The Board Audit Committee reviews and approves Internal Audit's plans and resources, and evaluates the effectiveness of Internal Audit. An assessment by external advisers is also carried out periodically.

Risk management responsibilities are laid out in the Principal Risks Policy, which covers the categories of risk in which Barclays has its most significant actual or potential risk exposures.

The Principal Risks Framework:

- creates clear ownership and accountability;
- ensures the Group's most significant risk exposures are understood and managed in accordance with agreed risk appetite (for financial risks) and risk tolerances (for non-financial risks); and
- ensures regular reporting of both risk exposures and the operating effectiveness of controls.

Each Principal Risk comprises individual Key Risk Types. During 2011, the Principal Risks Policy was updated, resulting in risks being grouped into four categories with no significant change to the underlying risk types. The four Principal Risks are: Credit, Market, Funding and Operational, each owned by a senior individual within the Group Risk function known as the Group Principal Risk Owner. The first three Principal Risks are risks that Barclays actively seeks to manage and have direct income implications. The fourth Principal Risk relates to operational risks, exposure which arises directly from undertaking business processes in support of Barclays activities, which the Group seeks to minimise.

The five steps required by the Principal Risks Policy are: Identify, Assess, Control, Report, and Manage and Challenge (see page 68 for more detail).

Each Key Risk is owned by a senior individual known as the Group Key Risk Owner who is responsible for proposing a risk appetite statement and managing the risk in line with the Principal Risks Policy. This includes the documentation, communication and maintenance of a risk control framework which makes clear, for every business across the firm, the mandated control requirements in managing exposures to that Key Risk.

These control requirements are given further specification, according to the business unit or risk type, to provide a complete and appropriate system of internal control.

Business Unit and Group Centre function heads are responsible for obtaining ongoing assurance that the key controls they have put in place to manage the risks to their business objectives are operating effectively. Six-monthly reviews support the regulatory requirement for Barclays to make its annual external statement about its system of internal controls.

Group Key Risk Owners report their assessments of the risk exposure and control effectiveness to Group-level oversight committees and their assessments form the basis of the reports that go to the Board Risk Committee (see chart on page 69):

- Financial Risk Committee has oversight of Credit and Market Risks;
- Treasury Committee has oversight of Funding Risk; and,
- Operational Risk Committee has oversight of all Operational Risk types, with the exception of Tax Risk, which is overseen by the Tax Risk Committee.

Each Group Key Risk Owner also undertakes an annual programme of risk-based conformance reviews.

Risk management in the setting of strategy

The planning cycle is centred on the medium-term planning (MTP) process, performed once a year. This sets out the Group’s objectives in detailed plans which take account of the likely business environment. The risk functions at Group and business levels are heavily involved in this process.

In addition to supporting transaction decisions, the measurement and control of credit, market, operational and other risks have considerable influence on Barclays strategy. The Board is solely responsible for approving the MTP, the associated risk appetite statement, and the capital plans. As such, the business plans of Barclays must incur a level of risk that falls within the Board’s tolerance, or be modified accordingly. The BRC has been in place since 1999 and is devoted to review the firm’s risk and make appropriate recommendations to the Board. For details of the activities of the Board and the BRC in 2011 see pages 35 and 43 to 44.

The risk appetite and the Group-wide stress testing processes, described below, are closely linked to the MTP process and also support strategic planning and capital adequacy. The risk appetite process ensures that senior management and the Board understand the Plan’s sensitivities to key risk types, and includes a set of mandate and scale limits to ensure the Group stays within appetite. Stress testing informs management on the impact to the business of detailed scenarios. Integral to the Group-wide stress testing process is a set of actions that management would take to mitigate the impact of a stress.

One of the main objectives of managing risk is to ensure that Barclays achieves an adequate balance between capital requirements and resources. The capital planning cycle is fully integrated within strategic planning.

MTP process

The MTP process, performed annually, requires each business unit to present its plans for business performance over the coming three years. Achieving the planned performance in each business is dependent upon the ability of the business to manage its risks. It is an iterative process featuring weekly reviews at the most senior levels as the plan is updated until final agreement. The output includes a detailed statement of the group’s strategy over the medium-term, as well as detailed financial projections.

Risk managers support the MTP by providing robust review and challenge of the business plans to ensure that the financial projections are internally consistent, achievable given risk management capabilities and that they present a suitable balance between risk and reward. This culminates in the Risk Executive Dialogue process in which the Chief Risk Officer and senior management in each of our businesses discuss the findings from the risk reviews, and changes to the business plans are mandated as necessary.

The business plans are prepared with reference to a consistent set of economic assumptions which are reviewed within Group Risk to ensure that they appropriately reflect emerging risk trends. They are used as baseline scenarios in the stress testing and risk appetite processes.

The output from the business plan forms the basis of all strategic processes. In particular, the plans comprise projections of capital resources and requirements given profit generation, dividend policy and capital issuance. Risk variables are also considered, most importantly in the forecasting of the Group’s impairment charge, and in sensitivity analyses of the plans (which include risk appetite and stress testing).

Risk appetite

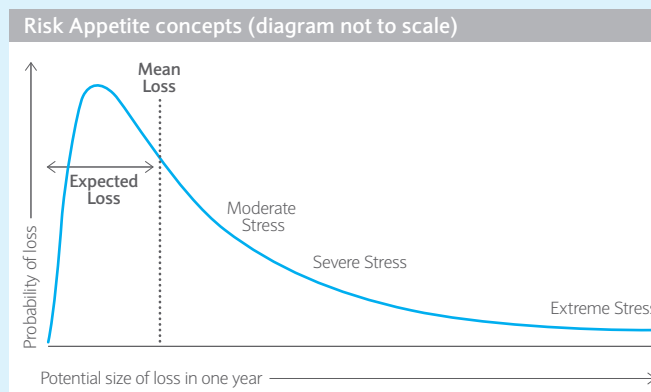

Risk appetite is defined as the level of risk that Barclays is prepared to sustain whilst pursuing its business strategy, recognising a range of possible outcomes as business plans are implemented. Barclays framework combines a top-down view of its capacity to take risk with a bottom-up view of the business risk profile associated with each business area’s medium term plans. The appetite is ultimately approved by the Board.

Taken as a whole, the risk appetite framework provides a basis for the allocation of risk capacity across Barclays Group and consists of two elements: ‘Financial Volatility’ and ‘Mandate & Scale’.

Financial volatility

Financial volatility is defined as the level of potential deviation from expected financial performance that Barclays is prepared to sustain at relevant points on the risk profile. The Board sets the Group’s financial volatility risk appetite in terms of broad, top down, financial objectives for a through-the-cycle, a moderate stress and a severe stress events; these scenarios are defined more generically through a level of probability of occurrence rather than through a specific set of economic variables like in stress tests. Our top-down appetite is quantified through an array of financial performance and capital metrics which are reviewed on an annual basis.

The Group’s risk profile is assessed via a ‘bottom-up’ analysis of the Group’s business plans to establish the volatility of the key metrics. If the projections entail too high a level of risk (i.e. breach the top-down financial objectives at the through-the-cycle, moderate or severe level), management will challenge each area to rebalance the risk profile to bring the bottom-up risk appetite back within top-down appetite. Performance against risk appetite usage is measured and reported to the Executive Committee and the Board regularly throughout the year.

Risk management

Barclays risk management strategy continued

To measure the risk entailed by the business plans, management estimates potential earnings volatility from each business under various scenarios:

- through-the-cycle: the average losses based on measurements over many years;
- 1 in 7 (moderate) loss: the worst level of losses out of a random sample of 7 years; and
- 1 in 25 (severe) loss: the worst level of losses out of a random sample of 25 years.

These potentially larger but increasingly less likely levels of loss are illustrated in the risk appetite concepts chart on page 71. Since the level of loss at any given probability is dependent on the portfolio of exposures in each business, the statistical measurement for each key risk category gives the Group clearer sight and better control of risk-taking throughout the enterprise. Specifically, Barclays believes that this framework enables it to:

- improve management confidence and debate regarding the Group's risk profile;
- re-balance the risk profile of the MTP where breaches are indicated, thereby achieving a superior risk-return profile;
- identify unused risk capacity, and thus highlight the need to identify further profitable opportunities; and
- improve executive management control and co-ordination of risk-taking across businesses.

Mandate & scale

The second element to the setting of risk appetite in Barclays is an extensive system of Mandate & Scale limits, which is a risk management approach that seeks to formally review and control business activities to ensure that they are within Barclays mandate (i.e. aligned to the expectations of external stakeholders), and are of an appropriate scale (relative to the risk and reward of the underlying activities). Barclays achieves this by using limits and triggers to avoid concentrations which would be out of line with external expectations, and which may lead to unexpected losses of a scale that would be detrimental to the stability of the relevant business line or the Group. These limits are set by the independent Risk function, formally monitored each month and subject to Board-level oversight.

For example, in our commercial property finance and construction portfolios, a comprehensive series of limits are in place to control exposure within each business and geographic sector. To ensure that limits are aligned to the underlying risk characteristics, the Mandate & Scale limits differentiate between types of exposure. There are, for example, individual limits for property investment and property development, and for senior and subordinated lending. Property limits have been managed down through the course of 2011, with decreases evident across most businesses and geographic segments, particularly in South Africa and Europe.

Barclays uses the Mandate & Scale framework to:

- limit concentration risk;
- keep business activities within Group and individual business mandate;
- ensure activities remain of an appropriate scale relative to the underlying risk and reward; and
- ensure risk-taking is supported by appropriate expertise and capabilities.

As well as Group-level Mandate & Scale limits, further limits are set by risk managers within each business unit, covering particular portfolios.

Stress testing

Group-wide stress tests are an integral part of the annual MTP process and annual review of Barclays risk appetite and ensure that Barclays financial position and risk profile provide sufficient resilience to withstand the impact of stress.

The BRC agrees the range of scenarios to be tested and the independent Group Risk function leads the process. Barclays macroeconomic stress test scenarios are designed to be both severe and plausible and can include specific ad hoc scenarios, for example, a Euro break-up scenario. Barclays scenarios have been tested against the FSA's scenario framework and were shown to be appropriately conservative.

At the Group level, stress test scenarios capture a wide range of macroeconomic variables that are relevant to the current environment, such as GDP, unemployment, asset prices, foreign exchange rates and interest rates.

The stress testing process is detailed and comprehensive using bottom-up analysis performed by each of Barclays businesses, and includes all aspects of the Group's balance sheet across all risk types and is forward looking over a five year period. The businesses' stress test results are subject to a detailed review and challenge both within the businesses and by Barclays Group Functions. The impact on profitability, capital and liquidity are documented and presented to the Executive Committee, the BRC, the Board and the FSA. Should the BRC find that the impact falls outside of its expectations, the business plans will be appropriately amended.

In addition, the framework also includes reverse stress testing techniques which aim to identify the increased severity that would be needed over and above the stressed scenarios to result in the business model being no longer viable, for example, extreme macroeconomic downturn scenarios or specific idiosyncratic events. This is used to help support ongoing risk management and is fully integrated into the risk appetite framework.

Barclays also uses stress testing techniques at portfolio and product level to support risk management. For example, portfolio management in the US cards business employs stressed assumptions of unemployment to determine profitability hurdles for new accounts. In the UK mortgage business, affordability thresholds incorporate stressed estimates of interest rates. In Barclays Capital, global scenario testing is used to gauge potential losses that could arise in conditions of extreme market stress. Stress testing is also conducted on positions in particular asset classes, including interest rates, commodities, equities, credit and foreign exchange.

During 2011, along with 91 other banks, Barclays was included in the European Banking Authority stress test. The stress test was designed to assess the resilience of the EU banking sector and each of the selected banks' ability to absorb possible shocks on credit and market risks, including sovereign risks. The results supported Barclays own internal view that Barclays is well placed to withstand economic stress.

Information on the Group's stress testing specifically relating to liquidity risk is set out on pages 142 to 143.

Modelling of risk

Barclays makes extensive use of quantitative estimates of the risks it takes in the course of its business. Risk models are used in a wide range of decisions, from credit grading, pricing and approval to portfolio management, risk appetite setting, economic capital allocation and regulatory capital calculations. The types of risks that are covered by such models include credit, market and operational risks.

The Group uses a wide range of models including estimations of Probability of Default (PD), Exposure at Default (EAD) and Loss Given Default (LGD), as well as those covering other types. The models are developed and owned by each business unit. The risk of loss through model failure is minimised through the Group Model Risk Policy (GMRP) which is managed by the independent Group Risk function and is reviewed annually.

The GMRP helps reduce the potential for model failure by setting Group-wide minimum standards for the model development and implementation process. The GMRP also sets the governance processes for models across the Group, which allows model performance and risk to be monitored, and seeks to identify and escalate any potential problems at an early stage.

To ensure that the governance process is focused on the more material models, each model is provided with a materiality rating. The GMRP defines the materiality ranges for all model types, based on an assessment of the impact to the Group in the event of a model error. The final level of model sign-off is based on materiality, with all of a business unit's models initially being approved in business unit committees. The more material models are also approved at the Group Material Models Technical Committee, and the most material models require further approval by the Executive Models Committee. This process ensures that the most significant models are subject to the most rigorous review, and that senior management has a good understanding of the most material models in the Group. Although the final level of model sign-off will vary, depending on model materiality, the standards required by the GMRP do not change with the materiality level.

The GMRP also sets standards that a model must meet during development and subsequent use. For new models, documentation must be sufficiently detailed to allow an expert to understand all aspects of model development, including a description of the data used for model development, the methodology used (and the rationale for choosing such a methodology), a description of any assumptions made and details of the strengths and weaknesses of the model.

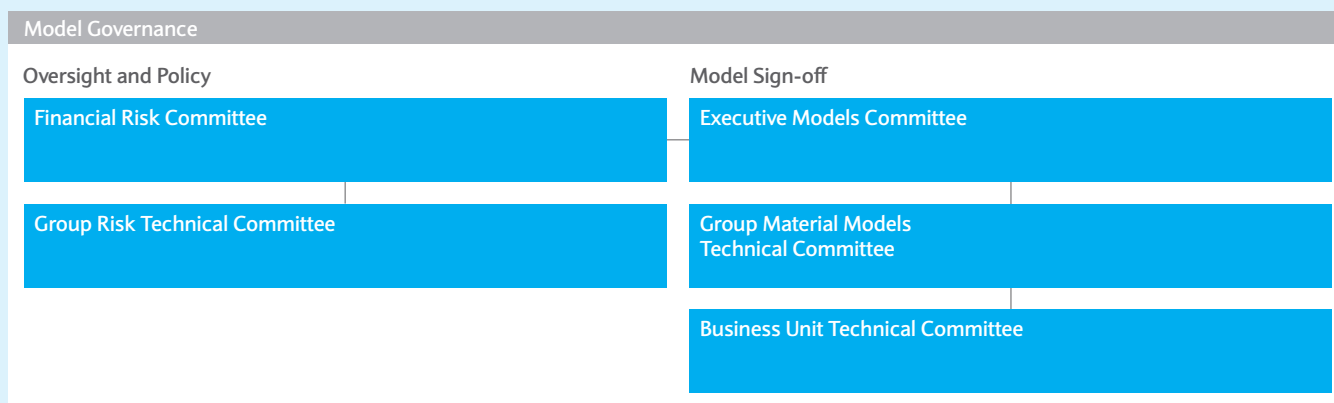

All new models are subject to validation before they can be signed off for implementation. The model validation exercise must demonstrate that the model is fit for purpose and provides accurate estimates. Independent reviews ensure that the model development has followed a robust process and that the standards of the GMRP have been met, as well as ensuring that the model satisfies business and regulatory requirements. In addition, the most material models are subject to independent review by Group Risk. Once implemented, all models are subject to post-implementation review. This confirms that the model has been implemented correctly and behaves as predicted.

The GMRP sets the requirements for ongoing performance monitoring. Once implemented, all models are subject to ongoing performance monitoring to ensure that any deficiencies are identified early, and that remedial action can be taken before the decision-making process is affected. As part of this process, model owners set performance triggers and define appropriate actions in the event that a trigger level is breached.

In addition to regular monitoring, models are subject to an annual validation process to ensure that they will continue to perform as expected, and that assumptions used in model development are still appropriate. In line with initial sign-off requirements, annual validations are also formally reviewed at the appropriate technical committee.

Within Barclays Capital, where models are used to value positions within the trading book, the positions are subject to regular independent price testing, which covers all trading positions. Prices are compared with direct external market data where possible or if not possible, more analytic techniques are used, such as industry consensus pricing services. These services enable peer banks to compare structured products and model input parameters on an anonymous basis. Conclusions and any exceptions to this exercise are communicated to senior business management.

Externally developed models must be approved for use following the validation and independent review and are subject to the same governance standards as internal models, including ongoing monitoring and annual validation requirements.

Risk management

Risk factors

Risk factors

The Group's approach to identifying, assessing, controlling, reporting and managing risks is formalised in its Principal Risks framework and supporting processes.

During 2011, the Principal Risks Policy was updated, resulting in risks being grouped into four categories with no significant change to the underlying risk types. Definitions of the four Principal Risks are provided on pages 75 to 78. This summary also includes discussions of the impact of business conditions and the general economy and regulatory changes which can impact risk factors and so influence the Group's results. The Principal Risks described below can also potentially impact the Group's reputation and brand.

The following information describes the risk factors which the Group believes could cause its future results to differ materially from expectations. However, other factors could also adversely affect the Group's results and so the factors discussed in this report should not be considered to be a complete set of all potential risks and uncertainties.

Business conditions and the general economy

The Group has significant activities in a large number of countries. Consequently there are many ways in which changes in business conditions and the general economy can adversely impact profitability, whether at Group level, the individual business units or specific countries of operation.

During 2011, the economic environment in Barclays main markets was marked by generally weaker than expected growth and the ongoing sovereign debt crisis in the Eurozone. In the UK, the economy recovered slightly during 2011 although GDP declined slightly in the fourth quarter leading to uncertainty in the near term. The potential for persistent unemployment, higher interest rates and rising inflation may increase the pressure on disposable incomes, affecting an individual's debt service ability with the potential to adversely impact performance in the Group's retail sector. US economic conditions were better than the UK in 2011. However, unemployment is still high, which increases uncertainty in the near term. Credit conditions in Europe remain weak and a depressed housing sector and high unemployment may, in the near term, adversely affect Barclays business operations in this region. The global wholesale environment has been affected by the sovereign debt crisis and the business confidence has generally declined. Performance in the near term, therefore, remains uncertain.

The business conditions facing the Group in 2012 globally and in many markets in which the Group operates are subject to significant uncertainties which may in some cases lead to material adverse impacts on the Group's operations, financial condition and prospects including, for example, changes in credit ratings, share price and solvency of counterparties as well as higher levels of impairment, lower revenues or higher costs.

Significant uncertainties by Principal Risk include:

Credit risk

- Impact of potentially deteriorating sovereign credit quality, particularly debt servicing and refinancing capability;
- Extent and sustainability of economic recovery, including impact of austerity measures on the European economies;
- Increase in unemployment due to weaker economies in a number of countries in which the Group operates, fiscal tightening and other measures;
- Impact of rising inflation and potential interest rate rises on consumer debt affordability and corporate profitability;
- Possibility of further falls in residential property prices in the UK, South Africa and Western Europe;
- Potential liquidity shortages increasing counterparty risks;
- Potential for large single name losses and deterioration in specific sectors and geographies;
- Possible deterioration in remaining credit market exposures; and
- Potential exit of one or more countries from the Euro as a result of the European debt crisis.

Market risk

- Reduced client activity leading to lower revenues;
- Decreases in market liquidity due to economic uncertainty;
- Impact on banking book income from uncertain interest and exchange rate environment; and
- Asset returns underperforming pension liabilities.

Funding risk

- Impact of Basel 3 as regulatory rules are finalised;
- Impacts on capital ratios from weak profit performance;
- Availability and volatility in cost of funding due to economic uncertainty; and
- Reduction in available depositor and wholesale funding.

Operational risk

- Implementation of strategic change and integration programmes across the Group;
- Continued regulatory and political focus, driven by the global economic climate;
- Impact of new, wide ranging, legislation in various countries coupled with changing regulatory landscape;
- Increasingly litigious environment; and
- The crisis management agenda and breadth of regulatory change required in global financial institutions.

1. Credit risk

Credit Risk is the risk of the Group suffering financial loss if any of its customers, clients or market counterparties fails to fulfil their contractual obligations to the Group.

The credit risk that the Group faces arises mainly from wholesale and retail loans and advances together with the counterparty credit risk arising from derivative contracts entered into with its clients. Other sources of credit risk arise from trading activities, including debt securities, settlement balances with market counterparties, available for sale assets and reverse repurchase loans. It can also arise when an entity's credit rating is downgraded, leading to a fall in the value of Barclays investment in its issued financial instruments.

Risk management

The Board and management have established a number of key committees to review credit risk management, approve overall Group credit policy and resolve all significant credit policy issues. These comprise: the BRC, the Financial Risk Committee, the Wholesale Credit Risk Management Committee and the Retail Credit Risk Committee.

Barclays constantly reviews its concentration in a number of areas including, for example, portfolio segments, geography, maturity, industry and credit rating.

Diversification is achieved through setting maximum exposure guidelines and mandate and scale limits to portfolio segments, individual counterparties, sectors and countries, with excesses reported to the Financial Risk Committee and the BRC.

For further information see Credit Risk Management (pages 79 to 120).

Key specific risks and mitigation

Specific areas and scenarios where credit risk could lead to higher impairment charges in future years include:

Sovereign risk

Fiscal deficits continue to remain high, leading to high levels of public debt in some countries at a time of modest GDP growth. This has led to a loss of market confidence in certain countries to which the Group is exposed causing deteriorating sovereign credit quality, particularly in relation to debt servicing and refinancing. The Group has put certain countries on watch list status with detailed monthly reporting to the Wholesale Credit Risk Management Committee.

For further information see Group exposures to selected Eurozone countries (pages 112 to 120).

Economic weakness

The implementation of austerity measures to tackle high levels of public debt has negatively impacted economic growth and led to rising unemployment in some European countries and the monetary, interest rate and other policies of central banks and regulatory authorities may also have a significant adverse effect on a number of countries in which the Group operates.

The threat of weaker economies in a number of countries in which the Group operates could lead to even higher increasing levels of unemployment, rising inflation, potentially higher interest rates and falling property prices. For example, the Spanish and Portuguese housing sectors continue to be depressed, impacting the Group's wholesale and retail credit risk exposures.

The Group has experienced elevated impairment across its operations in these two regions, although impairment in Spain decreased in 2011, following a marked reduction in construction activity and shrinking consumer spending. The Group has reduced its credit risk appetite to the most severely affected segments of the economy. In Spain, new lending to the property and construction sector ceased and workout team resources have been increased significantly.

In addition, if funding capacity in either the wholesale markets or central bank operations were to change significantly, liquidity shortages could result which may lead to increased counterparty risk with other financial institutions. This could also have an impact on refinancing risks in the corporate and retail sectors. The Group continues to actively manage this risk including through its extensive system of Mandate and Scale limits.

For further information see Retail Credit Risk and Wholesale Credit Risk (pages 96 to 103).

Eurozone crisis

Concerns about credit risk (including that of sovereigns) and the Eurozone crisis remain very high. The large sovereign debts and/or fiscal deficits of a number of European countries have raised concerns regarding the financial condition of financial institutions, insurers and other corporates (i) located in these countries; (ii) that have direct or indirect exposure to these countries (both to sovereign debt and private sector debt); and/or (iii) whose banks, counterparties, custodians, customers, service providers, sources of funding and/or suppliers have direct or indirect exposure to these countries. The default, or a further decline in the credit rating, of one or more sovereigns or financial institutions could cause severe stress in the financial system generally and could adversely affect the markets in which the Group operates and the businesses, economic condition and prospects of the Group's counterparties, customers, suppliers or creditors, directly or indirectly, in ways which it is difficult to predict.

For further information see Group exposures to selected Eurozone countries (pages 112 to 120).

Credit market exposures

Barclays Capital holds certain exposures to credit markets that became illiquid during 2007. These exposures primarily relate to commercial real estate and leveraged finance loans. The Group continues to actively manage down these exposures.

For further information see Barclays Capital Credit Market Exposures (pages 110 to 111).

Risk management

Risk factors continued

2. Market risk

Market Risk is the risk of the Group suffering financial loss due to the Group being unable to hedge its balance sheet at prevailing market levels.

The Group can be impacted by changes in both the level and volatility of prices e.g. interest rates, credit spreads, commodity prices, equity prices and foreign exchange rates.

The risk is reported as Traded Risk where Barclays supports customer activity primarily via Barclays Capital; Non-Traded Risk to support customer products primarily in the retail bank; and Pension Risk where the investment profile is reviewed versus the defined benefit scheme.

Risk management

The Board approves Market Risk appetite for trading and non-trading activities, with limits set within this context by the Group Market Risk Director.

Group Risk is responsible for the overall Barclays Market Risk Control Framework which implements the five step risk management process.

Business specific Market Risk teams are responsible for implementing the Control Framework. Oversight and challenge is provided by business committees, group committees and the central Group Market Risk team.

For further information see Market Risk (pages 121 to 129).

Key specific risks and mitigation

Specific areas and scenarios where market risk could lead to lower revenues in future years include:

Reduced client activity and decreased market liquidity

While the Group is exposed to continued market volatility, Barclays Capital's trading activities are principally a consequence of supporting customer activity.

The impact of ongoing economic uncertainty on client volumes, reduced market liquidity and higher volatility could lead to lower revenues. The cost base and risk positions are constantly reviewed to ensure that they are calibrated appropriately. The portfolios are constantly reviewed to ensure that inventories are sized appropriately to support customer activity taking into account market volatility.

For further information see Market Risk (pages 121 to 129).

Non-traded interest rate risk

Interest rate volatility can impact the firm's net interest margin. The potential for future volatility and margin changes remain and it is difficult to predict with any accuracy, changes in absolute interest rate levels, yield curves and spread.

For further information see Market Risk (pages 121 to 129).

Pension fund risk

Adverse movements between pension assets and liabilities for defined benefit could contribute to a pension deficit. Barclays and the Pension Trustees dedicated Investment Management team constantly review the asset liability mismatch to ensure appropriate investment strategy.

For further information see Market Risk (pages 121 to 129) and Note 39.

3. Funding risk

Funding Risk is the risk that the Group is unable to achieve its business plans due to liquidity risk and capital risk or the management of structural balance sheet risks.

Liquidity Risk is the risk that the Group is unable to meet its obligations as they fall due resulting in: an inability to support normal business activity; failing to meet liquidity regulatory requirements; or changes to credit ratings.

Capital Risk is the risk that the Group is unable to maintain appropriate capital ratios which could lead to an inability to support business activity; failing to meet regulatory requirements; or changes to credit ratings.

Structural Risk relates to the management of non-contractual risks and predominantly arises from the impact on the Group's balance sheet of changes in primarily interest rates on income or foreign exchange rates on capital ratios.

Risk management

The Board approves the Group's Liquidity Risk Appetite, Capital Plan and approach for Structural Hedging.

Group Risk provides oversight review and challenge to the Liquidity, Capital and Structural Risk Control Frameworks. The Risk function also provides direct input into as well as approval of various aspects of the calibration, calculation and reporting for these key risks.

Group Treasury has responsibility for implementing the Key Risk control frameworks for Liquidity, Capital and Structural Risks at both the Group and Legal Entity level and for ensuring that the firm maintains compliance with all local regulatory minimum limit requirements relating to these key risks.

Oversight and challenge is provided by local and Group Asset Liability Committees all reporting up to Group Treasury Committee which meets at least monthly.

For further information see Funding risk – Capital (pages 130 to 138) and Funding risk – Liquidity (pages 139 to 150).

Key specific risks and mitigation

Specific areas and scenarios where funding risk could lead to higher costs or limit Barclays ability to execute its business plans include:

Increasing capital requirements

There are a number of regulatory developments that impact capital requirements. Most significantly Basel 3 as adopted into EU law through the fourth Capital Requirements Directive (CRD4) and Capital Requirements Regulation which are still going through the EU legislative process. Additional capital requirements may arise from other proposals including the recommendations of the Independent Commission on Banking.

Barclays continues to prepare for the implementation of CRD4 and includes the estimated impact of future regulatory changes in its capital planning framework. Current forecasts already include the impact of Basel 3 as currently understood, and forecasts will be continually updated as CRD4 and other proposals for regulatory developments are finalised. Further detail on the regulatory developments impacting capital is included on pages 137 to 138.

Maintaining capital strength

A material adverse deterioration in the Group's financial performance can affect the capacity to support further capital deployment. The Capital Plan is continually monitored against the internal target capital ratios with Risk, the business and legal entities through a proactive and forward looking approach to capital risk management which ensures that the Plan remains appropriate. The capital management process also includes an internal and regulatory stress testing process which informs the Group capital plan. Further detail on the Group's regulatory capital resources is included on pages 130 to 138.

Changes in funding availability and costs

Market liquidity, the level of customer deposits and the Group's ability to raise wholesale funding impacts both the Group's net interest margin, which is sensitive to volatility in cost of funding, and its ability to both fulfil its obligations and support client lending, trading activities and investments. Large unexpected outflows, for example from customer withdrawals, ratings downgrades or loan drawdowns, could also result in forced reduction in the balance sheet, inability to fulfil lending obligations and regulatory breaches. The Liquidity Profile is monitored constantly and is supported by a range of early warning indicators to ensure the profile remains appropriate and sufficient liquid resources are held to protect against unexpected outflows. Further details are provided in the Funding Risk – Liquidity section on pages 139 to 150.

Local balance sheet management and redenomination risk

The introduction of capital controls or new currencies by countries (for example in the Eurozone) to mitigate current stresses could have an ongoing or point-in-time impact on the performance of local balance sheets of certain Group companies based on the asset quality, types of collateral and mix of liabilities. Local assets and liability positions are carefully monitored by local asset and liability committees with oversight by Group Treasury. For further information see the Group's exposures to selected Eurozone countries (pages 112 to 120).

4. Operational risk

Operational Risk is the risk of direct or indirect impacts resulting from human factors, inadequate or failed internal processes and systems or external events. Operational risks are inherent in the Group's business activities.

The Key Risks that this Principal Risk includes are External Suppliers, Financial Reporting, Fraud, Information, Legal, Product, Payment Process, People, Premises & Security, Regulatory, Taxation, Technology and Transaction operations. For definitions of these key risks see page 151.

Risk management

The Operational risk framework enables Barclays to manage and measure its Operational risk profile and to calculate the amount of Operational risk capital that it needs to hold. The minimum mandatory requirements applicable to all Business Units are set out in the Group Operational risk policies.

Group Key Risk Owners are required to monitor information relevant to their Key Risk from each Operational risk framework element. In addition, each Key Risk Owner mandates control requirements specific to their Key Risk through a Key Risk Control Framework.

For further information see Operational risk management (pages 151 to 153).

Key specific risks and mitigation

Specific areas and scenarios where Operational risk could lead to financial and/or non-financial impacts including legal or regulatory breaches or reputational damage include:

Regulatory risk

Regulatory risk arises from a failure or inability to comply fully with the laws, regulations or codes applicable specifically to the financial services industry which are currently subject to significant changes. Non-compliance could lead to fines, public reprimands, damage to reputation, increased prudential requirements, enforced suspension of operations or, in extreme cases, withdrawal of authorisations to operate.

The regulatory response to the financial crisis has led and will continue to lead to very substantial regulatory changes in the countries in which the Group operates. It has also (amongst other things) led to (i) a more assertive approach being demonstrated by the authorities in many jurisdictions; and (ii) enhanced capital and liquidity requirements (for example pursuant to CRD4). Current examples of specific areas of concern include:

The Independent Commission on Banking (ICB)

The ICB was charged by the UK Government with reviewing the UK banking system and its findings were published on 12 September 2011. The ICB recommended (amongst other things) that: (i) the UK and EEA retail banking activities of a UK bank or building society should be placed in a legally distinct, operationally separate and economically independent entity (so-called "ring-fencing"); and (ii) the loss-absorbing capacity of ring-fenced banks and UK-headquartered global systemically important banks (such as Barclays Bank PLC) should be increased to levels higher than the Basel 3 proposals.

Risk management

Risk factors continued

The UK Government published its response to the ICB recommendations in December 2011 and indicated that primary and secondary legislation relating to the proposed ring-fence will be completed by May 2015, with UK banks and building societies expected to be compliant as soon as practicable thereafter, and the requirements relating to increased loss-absorbing capacity of ring-fenced banks and UK-headquartered global systemically important banks will be applicable from 1 January 2019. Changes to the structure of UK banks and an increase in the amount of loss-absorbing capital issued by UK banks may have a material adverse impact on the Bank's and the Group's results and financial condition. It is also not possible to predict the detail of the implementation legislation or the ultimate consequences to the Group.

The Dodd-Frank Wall Street Reform and Consumer Protection Act (DFA)
DFA will have an impact on the Group and its business. A significant number of rules and draft rules have been issued through 2011. While the impact of this rule-making will be substantial, the full scale of this impact remains unclear as many of the provisions of the Act require rules to be made to give them effect and this process is still underway. Barclays has taken a centralised approach to monitoring this process and to ensuring compliance with the rules that are developed as a result.

Recovery and resolution plans

The strong regulatory focus on resolvability has continued in 2011, both from UK and international regulators. The Group has been engaged, and continues to be engaged, with the authorities on taking forward recovery planning and identifying information that would be required in the event of a resolution. The Group will be required to prepare an initial plan for the UK and US regulators in the first half of 2012.

Any future regulatory changes may restrict the Group's operations, mandate certain lending activity and impose other, significant compliance costs. For further information see Supervision and Regulation (pages 154 to 158).

Legal risk

The Group is subject to a comprehensive range of legal obligations in all countries in which it operates and so is exposed to many forms of legal risk, which may arise in a number of ways: (i) business may not be conducted in accordance with applicable laws around the world; (ii) contractual obligations may either not be enforceable as intended or may be enforced in an adverse way; (iii) intellectual property may not be adequately protected; and (iv) liability for damages may be incurred to third parties harmed by the conduct of the Group's business. The Group also faces risk where legal proceedings are brought against it. The Group is, and may in the future be, involved in various disputes, legal proceedings and regulatory investigations in various jurisdictions, including in the US. Furthermore, the Group, like many other financial institutions, has come under greater regulatory scrutiny in recent years and expects that environment to continue particularly as it relates to compliance with new and existing corporate governance, employee compensation, conduct of business, anti-money laundering and anti-terrorism laws and regulations, as well as applicable international sanctions regimes.

Key legal risks to which the Group was exposed during 2011 have included litigation in relation to:

- Lehman Brothers Holdings Inc;
- American Depository Shares;
- US Federal Housing Finance Agency and Other Residential Mortgage-Backed Securities; and
- Devonshire Trust.

For further information see Legal Proceedings (pages 248 to 249).

Payment protection insurance (PPI)

During 2011 Barclays agreed with the FSA that it would process all on-hold and any new complaints from customers about PPI policies that they hold. Barclays also announced that, as a goodwill gesture, it would pay out compensation to customers who had PPI complaints put on hold during the judicial review. Barclays took a provision of £1bn in the second quarter of 2011 to cover the cost of future redress and administration. For further information see Provisions (pages 246 to 247).

CyberSecurity risk

Barclays recognises the growing threats from cyberspace to its systems, including in respect of customer and its own information held on them and transactions processed through these systems. The implementation of measures to manage the risk is involving increasing investment and use of internal resources. However, given the increasing sophistication and scope of potential attacks from cyberspace, it is possible that in the future such attacks may lead to significant breaches leading to associated costs and reputational damage.

The Group has invested for many years in building defences to counter these threats and continues to do so, recognising that this is an area of risk that changes rapidly and requires continued focus.

To date the Group is not aware of any significant breaches of its systems from cyberspace.

Taxation risk

Taxation risk is the risk that the Group suffers losses arising from additional tax charges, financial penalties or reputational damage associated with failure to comply with procedures required by tax authorities, changes in tax law and the interpretation of tax law. The Group is subject to the tax laws in all countries in which it operates, including tax laws adopted at an EU level, and is impacted by a number of double taxation agreements between countries.

HMRC, being the Group's primary taxation authority, recently took the unusual step of issuing a public statement that the Government was drafting retrospective tax legislation. Such steps add to the need to closely monitor changes in the way in which HMRC approaches the application of its Code of Practice for Taxation of Banks. For all tax jurisdictions, within which the Group operates, we continue to monitor the potential impact of proposed and recently enacted taxes aimed at banks.

In 2011 the Group continued to settle open tax issues in a number of jurisdictions and in meeting its tax obligations made global tax payments totalling £6.4bn. The profit forecasts that support the Group's deferred tax assets, principally in the US and Spain, have been subject to close scrutiny by management. For further information see the Financial review (pages 168 to 169) and Tax (pages 213 to 216).

Risk management

Credit risk

All disclosures in this section (pages 79 to 120) are unaudited unless otherwise stated

Overview of Barclays Group credit risk exposures

Credit risk is the risk of suffering financial loss should the Group's customers, clients or market counterparties fail to fulfil their contractual obligations to the Group. The credit risk that the Group faces arises mainly from wholesale and retail loans and advances, together with the counterparty credit risk arising from derivative contracts entered into with clients.

Other sources of credit risk arise from trading activities, including debt securities, settlement balances with market counterparties, available for sale assets and reverse repurchase agreements.

Losses arising from assets held for trading (derivatives, debt securities) are accounted for as trading losses, rather than impairment charges, even though the fall in value causing the loss may be attributable to credit deterioration.

Analysis of the Group's maximum exposure to credit risk and collateral and other credit enhancements held

The following table presents the Group's maximum exposure to credit risk as at 31 December and the financial effects of collateral, credit enhancements and other actions taken to mitigate the Group's exposure. For financial assets recognised on the balance sheet, maximum exposure to credit risk represents the balance sheet carrying value after allowance for impairment. For off-balance sheet guarantees, the maximum exposure is the maximum amount that Barclays would have to pay if the guarantees were to be called upon. For loan commitments and other credit related commitments that are irrevocable over the life of the respective facilities, the maximum exposure is the full amount of the committed facilities.

This and subsequent analyses of credit risk include only financial assets subject to credit risk. They exclude other financial assets not subject to credit risk, mainly equity securities held in the trading portfolio, as available for sale or designated at fair value, and commodities. Assets designated at fair value in respect of linked liabilities to customers under investment contracts have not been included as the Group is not exposed to credit risk on these assets. Credit losses in these portfolios, if any, would lead to a reduction in the linked liabilities and not result in a loss to the Group.

Risk management

Credit risk continued

Overview

As at 31 December 2011, the Group's net exposure to credit risk after taking into account netting and set-off, collateral and risk transfer remained broadly flat at £794,700m (2010: £766,033m). The extent to which the Group holds mitigation on its assets rose marginally from 55% to 56%.

Of the remaining exposure left unmitigated, a significant portion relates to cash held at central bank, available for sale debt securities issued by governments, cash collateral and settlement balances, all of which are considered lower risk. Trading portfolio liability positions, which to a significant extent economically hedge trading portfolio assets but which are not held specifically for risk management purposes, are excluded from the analysis above. The credit quality of counterparties to derivative, available for sale and wholesale loan assets are predominantly investment grade. Further analysis on the credit quality of assets is presented on pages 104 to 109.

Netting and set-off

The Group has the ability to offset asset and liability positions on default or bankruptcy of the borrower. This includes master netting agreements for loans and advances (whether held at amortised cost or fair value).

Derivatives may also be settled net where there is a master agreement in place providing for this in the event of default, reducing the Group's exposure to counterparties on derivative asset positions. The reduction in risk is the amount of the liability held. The Group offsets asset and liability amounts on the balance sheet when it has both the ability and the intention to settle net. The amounts above represent available netting in the event of default of the counterparty.

Collateral

The Group has the ability to call on collateral in the event of default of the borrower or other counterparty, comprising:

- Home loans: a fixed charge over residential property in the form of houses, flats and other dwellings;
- Wholesale lending: a fixed charge over commercial property and other physical assets, in various forms;
- Credit cards, unsecured and other retail lending: includes charges over motor vehicle and other physical assets; second lien charge over residential property, which is subordinate to first charge held either by the Group or by another party; and finance lease receivables, for which typically the Group retains legal title to the leased asset and has the right to repossess the asset on the default of the borrower;
- Derivatives: cash and non-cash collateral may be held against derivative trades with certain counterparties;
- Reverse repurchase agreements: collateral typically comprises highly liquid securities which have been legally transferred to Barclays subject to an agreement to return them for a fixed price; and
- Financial guarantees and similar off-balance sheet commitments: cash collateral may be held against these arrangements.

The Group may also obtain collateral in the form of floating charges over receivables and inventory of corporate and other business customers. The value of this collateral varies from period to period depending on the level of receivables and inventory. It is impracticable to provide an estimate of the amount (fair value or nominal value) of this collateral. The Group may in some cases obtain collateral and other credit enhancements at a counterparty level, which are not specific to a particular class of financial instrument. The fair value of the credit enhancement gained has been apportioned across the relevant asset classes.

The carrying value of non-cash collateral reflects the fair value of the physical assets limited to the carrying value of the asset where the exposure is over-collateralised. In certain cases where active markets or recent valuations of the assets are not available, estimates are used. For assets collateralised by residential or commercial property (and certain other physical assets), where it is not practicable to assess current market valuations of each underlying property, values reflect historical fair values updated for movements in appropriate external indices.

For assets collateralised by traded financial instruments, values reflect mark to market or mark to model values of those assets, applying a haircut where appropriate. For further information on loan-to-value ratios in principal home loans portfolios and the Group's policy regarding the valuation of wholesale collateral, refer to pages 97 to 98 and 103 respectively.

The net realisable value from a distressed sale of collateral obtained by the Group upon default or insolvency of a counterparty will in some cases be lower than the carrying value recognised above. Assets obtained are normally sold, generally at auction, or realised in an orderly manner for the maximum benefit of the Group, the borrower and the borrower's other creditors in accordance with the relevant insolvency regulations. For business customers, in some circumstances, where excess funds are available after repayment in full of the outstanding loan, they are offered to any other, lower ranked, secured lenders. Any additional funds are returned to the customer. Barclays does not, as a rule, occupy repossessed properties for its business use or use assets obtained in its operations.

Risk transfer

The Group in some cases holds guarantees, letters of credit and similar instruments from third parties which enable it to claim settlement from them in the event of default on the part of the counterparty. The balances shown represent the notional value of the guarantees held by the Group issued by corporate and financial institutional counterparties. In addition, the Group obtains guarantees from customers in respect of personal loans and smaller business loans, which are not reflected in the above table.

Collateral and other credit enhancements obtained

The carrying value of assets held by the Group as at 31 December 2011 as a result of the enforcement of collateral was as follows:

Assets received (audited)	2011 Carrying amount £m	2010 Carrying amount £m
As at 31 December		
Residential property	173	71
Commercial and industrial property	267	14
Other credit enhancements	30	210
Total	470	295

Concentrations of credit risk

A concentration of credit risk exists when a number of counterparties are located in a geographical region, or are engaged in similar activities and have similar economic characteristics that would cause their ability to meet contractual obligations to be similarly affected by changes in economic or other conditions. The analyses of credit risk concentrations presented below are based on the location of the counterparty or customer or the industry in which they are engaged.

Credit risk continued

Impairment charges (audited)

Loan impairment charges reduced 33% to £3,790m, reflecting generally improving underlying trends across the majority of retail and wholesale businesses. Loan impairment included new and increased allowances of £4,962m (2010: £6,939m; 2009: £8,111m), releases of £931m (2010: £1,189m; 2009: £631m), recoveries of £265m (2010: £201m; 2009: £150m) and charges on undrawn facilities and guarantees of £24m (2010: £76m; 2009: £28m). Combined with a 2% increase in loans and advances, this resulted in a lower overall Group loan loss rate of 77bps (2010: 118bps; 2009: 156bps).

Further detail can be found in the Retail Credit Risk and Wholesale Credit Risk sections on pages 96 to 103.

Notes

a Excludes £1,800m impairment of BlackRock, Inc. (2010: nil, 2009: nil) recorded in Investment Management.

b Credit market related impairment charges within Barclays Capital comprised a write back of £14m (2010: £660m charge; 2009: £1,205m charge) against loans and advances and a write back of £35m (2010: £39m writeback; 2009: £464m charge) against available for sale financial investments.

Credit risk management overview

Credit risk is the risk of suffering financial loss should any of the Group's customers, clients or market counterparties fail to fulfil their contractual obligations to the Group. The granting of credit is one of the Group's major sources of income and, as the most significant risk, the Group dedicates considerable resources to its control. Mitigation techniques and measurement and internal ratings are discussed in more detail in the Basel 2 Pillar 3 Disclosures 2011.

A. Overview (audited)

The credit risk that the Group faces arises mainly from wholesale and retail loans and advances together with the counterparty credit risk arising from derivative contracts entered into with our clients. Other sources of credit risk arise from trading activities, including debt securities, settlement balances with market counterparties, available for sale assets and reverse repurchase loans.

Credit risk management objectives are to:

- establish a framework of controls to ensure credit risk-taking is based on sound credit risk management principles;
- identify, assess and measure credit risk clearly and accurately across the Group and within each separate business, from the level of individual facilities up to the total portfolio;
- control and plan credit risk-taking in line with external stakeholder expectations and avoiding undesirable concentrations;
- monitor credit risk and adherence to agreed controls; and
- ensure that risk-reward objectives are met.

B. Organisation and structure

Barclays has structured the responsibilities of credit risk management so that decisions are taken as close as possible to the business, whilst ensuring robust review and challenge of performance, risk infrastructure and strategic plans. The credit risk management teams in each business are accountable to the business risk directors in those businesses who, in turn, report to the heads of their businesses and also to the Chief Risk Officer.

The role of the Group Risk function is to provide Group wide direction, oversight and challenge of credit risk-taking. Group Risk sets the Credit Risk Control Framework, which provides a structure within which credit risk is managed together with supporting Group Credit Risk Policies. Group Risk also provides technical support, review and validation of credit risk measurement models across the Group.

C. Reporting

The Group dedicates considerable resources to gaining a clear and accurate understanding of credit risk across the business and ensuring that its balance sheet correctly reflects the value of the assets in accordance with applicable accounting principles. This process can be summarised in five broad stages:

- measuring exposures and concentrations;
- monitoring weaknesses in portfolios;
- identifying potential problem loans and credit risk loans (collectively known as potential credit risk loans or PCRLs);
- raising allowances for impaired loans; and
- writing off assets when the whole or part of a debt is considered irrecoverable.

D. Measuring exposures and concentrations

Loans and advances to customers provide the principal source of credit risk to the Group although Barclays can also be exposed to other forms of credit risk through, for example, loans to banks, loan commitments and debt securities. Barclays risk management policies and processes are designed to identify and analyse risk, to set appropriate risk appetite, limits and controls, and to monitor the risks and adherence to limits by means of reliable and timely data. One area of particular review is concentration risk. A concentration of credit risk exists when a number of counterparties are engaged in similar activities and have similar economic characteristics that would cause their ability to meet contractual obligations to be similarly affected by changes in economic and other conditions. As a result, Barclays constantly reviews its concentration in a number of areas including, for example, geography, maturity and industry (see pages 83 to 85 and 148 to 149).

Diversification is achieved through setting maximum exposure guidelines to individual counterparties. Excesses are reported to the Financial Risk Committee and the BRC. Mandate & Scale limits are used to limit the stock of current exposures in a loan portfolio and the flow of new exposures into a loan portfolio. Limits are typically based on the nature of the lending and the amount of the portfolio meeting certain standards of underwriting criteria.

Risk management

Credit risk continued

E. Monitoring weaknesses in portfolios

Whilst the basic principles for monitoring weaknesses in wholesale and retail exposures are broadly similar, they will reflect the differing nature of the assets. As a matter of policy all facilities granted to corporate or wholesale customers are subject to a review on, at least, an annual basis, even when they are performing satisfactorily.

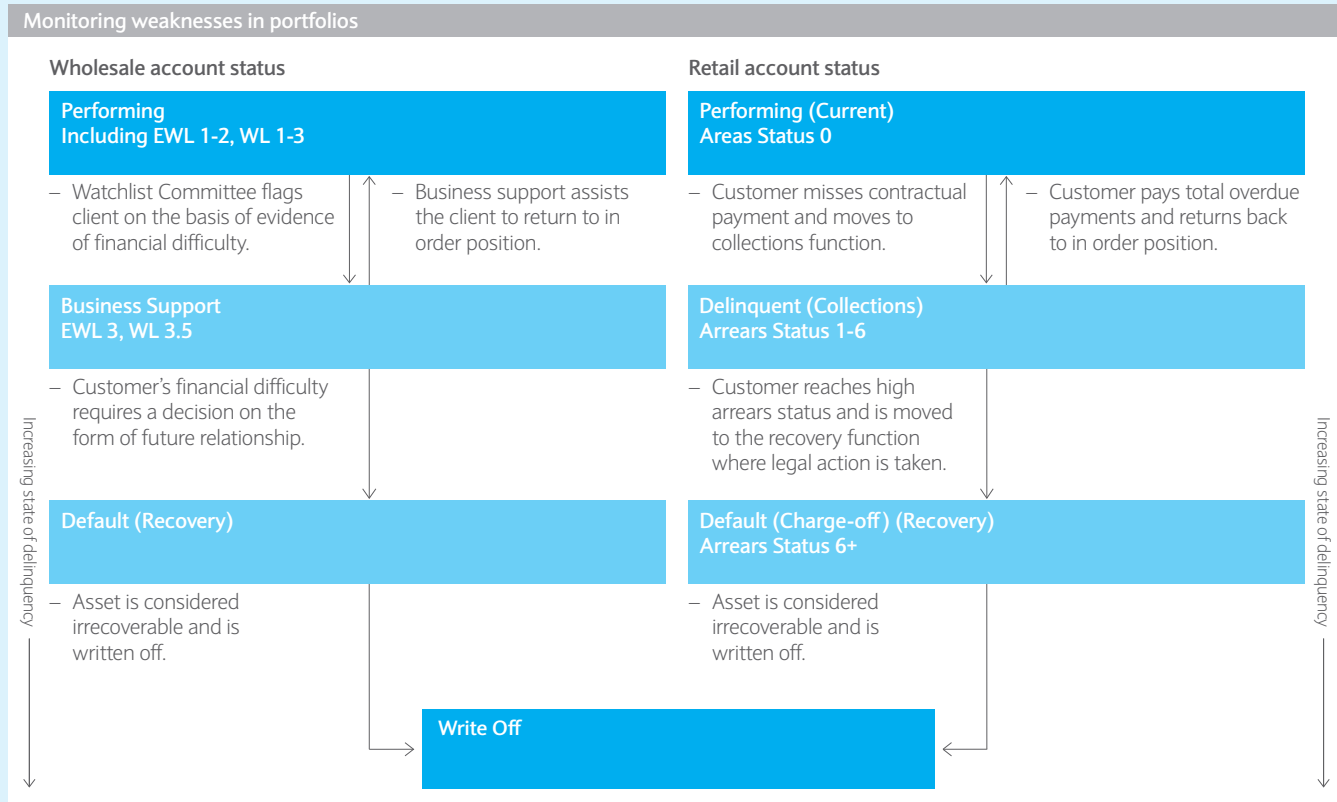

Corporate accounts that are deemed to contain heightened levels of risk are recorded on graded early warning lists (EWLs) or watchlists (WLs) comprising three categories graded in line with the perceived severity of the risk attached to the lending, and its probability of default. Examples of heightened levels of risk may include, for example: a material reduction in profits; a material reduction in the value of collateral held; a decline in net tangible assets in circumstances which are not satisfactorily explained; or periodic waiver requests or changes to the terms of the credit agreement over an extended period of time. These lists are updated monthly and circulated to the relevant risk control points. Once an account has been placed on WL or EWL, the exposure is carefully monitored and, where appropriate, exposure reductions are effected. Should an account become impaired, it will normally, but not necessarily, have passed through each of the three categories, which reflect the need for increasing caution and control. Where an obligor's financial health gives grounds for concern, it is immediately placed into the appropriate category. While all obligors, regardless of financial health, are subject to

a full review of all facilities on, at least, an annual basis, more frequent interim reviews may be undertaken should circumstances dictate. Specialist recovery functions deal with clients in default, collection or insolvency. Their mandate is to maximise shareholder value via the orderly and timely recovery of impaired debts.

Within the retail portfolios, which tend to comprise homogeneous assets, statistical techniques more readily allow potential weaknesses to be monitored on a portfolio basis. The approach is consistent with the Group's policy of raising a collective impairment allowance as soon as objective evidence of impairment is identified. Retail accounts can be classified according to specified categories of arrears status (or cycle), which reflects the level of contractual payments which are overdue on a loan.

The probability of default increases with the number of contractual payments missed, thus raising the associated impairment requirement.

Once a loan has passed through all six cycles it will charge-off and enter recovery status. In most cases, charge-off will result in the account moving to a legal recovery function or debt sale. This will typically occur after an account has been treated by a collections function. However, in certain cases, an account may be charged off directly from a performing (up to date) status, such as in the case of insolvency or death.

As a general principle, charge-off marks the point at which it becomes more economically efficient to treat an account through a recovery function or debt sale rather than a collections function. Economic efficiency includes the (discounted) expected amount recovered and operational and legal costs. Whilst charge-off is considered an irreversible state, in certain cases, it may be acceptable for mortgage and vehicle finance accounts to move back from charge-off to performing or delinquent states. This is only considered acceptable where local legislation requirements are in place, or where it is deemed that the customer has a renewed willingness to pay and there is a strong chance that they will be able to meet their contractual obligations in the foreseeable future.

For the majority of products, the standard period for charging off accounts is 180 days past due of contractual obligation. However, in the case of customer bankruptcy or insolvency, the associated accounts will be charged off within 60 days. Within UK RBB Local Business, accounts that are deemed to have a heightened level of risk, or that exhibit some unsatisfactory features which could affect viability in the short to medium term, are transferred to a separate 'caution' stream. Accounts on the caution stream are reviewed on at least a quarterly basis, at which time consideration is given to continuing with the agreed strategy, returning the customer to a lower risk refer stream, or instigating recovery/exit action.

F. Identifying potential credit risk loans

In line with disclosure requirements from the SEC in the US, the Group reports potentially and actually impaired loans as Potential Credit Risk Loans (PCRLs). PCRLs comprise two categories of loans: Potential Problem Loans (PPLs) and Credit Risk Loans (CRLs).

PPLs are loans that are currently complying with repayment terms but where serious doubt exists as to the ability of the borrower to continue to comply with such terms in the near future. If the credit quality of a loan on an EWL or WL deteriorates to the highest category (wholesale) or deteriorates to delinquency cycle 2 (retail), consideration is given to including it within the PPL category.

Should further evidence of deterioration be observed, a loan may move to the CRL category. Events that would trigger the transfer of a loan from the PPL to the CRL category include a missed payment or a breach of covenant. CRLs comprise three classes of loans:

- 'Impaired loans' comprise loans where an individual identified impairment allowance has been raised and also include loans which are fully collateralised or where indebtedness has already been written down to the expected realisable value. This category includes all retail loans that have been charged off to legal recovery. The impaired loan category may include loans, which, while impaired, are still performing;
- The category 'accruing past due 90 days or more' comprises loans that are 90 days or more past due with respect to principal or interest. An impairment allowance will be raised against these loans if the expected cash flows discounted at the effective interest rate are less than the carrying value; and
- The category 'impaired and restructured loans' comprises loans not included above where, for economic or legal reasons related to the debtor's financial difficulties, a concession has been granted to the debtor that would not otherwise be considered. Where the concession results in the expected cash flows discounted at the effective interest rate being less than the loan's carrying value, an impairment allowance will be raised.

G. Allowances for impairment and other credit provisions

Barclays establishes, through charges against profit, impairment allowances and other credit provisions for the incurred loss inherent in the lending book. Under IFRS, impairment allowances are recognised where there is objective evidence of impairment as a result of one or more loss events that have occurred after initial recognition, and where these events have had an impact on the estimated future cash flows of the financial asset or portfolio of financial assets. Impairment of loans and receivables is measured as the difference between the carrying amount and the present value of estimated future cash flows discounted at the financial asset's original effective interest rate. If the carrying amount is less than the discounted cash flows, then no further allowance is necessary.

Impairment allowances are measured individually for assets that are individually significant, and collectively where a portfolio comprises homogenous assets and where appropriate statistical techniques are available. In terms of individual assessment, the principal trigger point for impairment is the missing of a contractual payment which is evidence that an account is exhibiting serious financial problems, and where any further deterioration is likely to lead to failure. Details of other trigger points can be found on page 210. Two key inputs to the cash flow calculation are the valuation of all security and collateral, as well as the timing of all asset realisations, after allowing for all attendant costs. This method applies mainly in the corporate portfolios.

For collective assessment, the principal trigger point for impairment is the missing of a contractual payment which is the policy consistently adopted across all credit cards, unsecured loans, mortgages and most other retail lending. Details of other trigger points can be found on page 210. The calculation methodology relies on the historical experience of pools of similar assets; hence the impairment allowance is collective. The impairment calculation is based on a roll-rate approach, where the percentage of assets that move from the initial delinquency to default is derived from statistical probabilities based on historical experience. Recovery amounts and contractual interest rates are calculated using a weighted average for the relevant portfolio. This method applies mainly to the Group's retail portfolios and is consistent with Barclays policy of raising an allowance as soon as impairment is identified.

The impairment allowance in the retail portfolios is mainly assessed on a collective basis and is based on the drawn balances adjusted to take into account the likelihood of the customer defaulting at a particular point in time (PDpit) and the amount estimated as not recoverable (LGD). The basic calculation is:

$$\text{Impairment allowance} = \text{Total outstandings} \times \text{Probability of Default (PDpit)} \times \text{Loss Given Default (LGD)}$$

The PDpit increases with the number of contractual payments missed thus raising the associated impairment requirement.

Impairment in the wholesale portfolios is generally calculated by valuing each impaired asset on a case by case basis, i.e. on an individual assessment basis. A relatively small amount of wholesale impairment relates to unidentified or collective impairment; in such cases impairment is calculated using modelled PD x LGD x EAD (Exposure at default) adjusted for an emergence period.

Risk management

Credit risk continued

Unidentified impairment allowances are also raised to cover losses which are judged to be incurred but not yet specifically identified in customer exposures at the balance sheet date, and which, therefore, have not been specifically reported. The incurred but not yet reported calculation is based on the asset's probability of moving from the performing portfolio to being specifically identified as impaired within the given emergence period and then on to default within a specified period. This is calculated on the present value of estimated future cash flows discounted at the financial asset's original effective interest rate. The emergence periods vary across businesses and are based on actual experience and are reviewed on an annual basis. This methodology ensures that the Group captures the loss incurred at the correct balance sheet date. These impairment allowances are reviewed and adjusted at least quarterly by an appropriate charge or release of the stock of impairment allowances based on statistical analysis and management judgement. Where appropriate, the accuracy of this analysis is periodically assessed against actual losses (see modelling of risk on page 73). As one of the controls to ensure that adequate impairment allowances are held, movements in impairment allowances to individual names with total impairment of more than £10m are presented to the Credit Committee for agreement.

The loan loss rate (LLR) provides Barclays with one way of monitoring the trends in the quality of the loan portfolio at the Group, business and product levels. At Barclays, the LLR represents the annualised impairment charges on loans and advances to customers and banks and other credit provisions as a percentage of the total, period-end loans and advances to customers and banks, gross of impairment allowances.

The impairment allowance is the aggregate of the identified and unidentified impairment balances. Impairment allowance coverage, or the coverage ratio, is reported at two levels:

- Credit risk loans coverage ratio (impairment allowances as a percentage of CRL balances); and
- Potential credit risk loans coverage ratio (impairment allowances as a percentage of total CRL and PPL balances).

Appropriate coverage ratios will vary according to the type of product but can be broadly bracketed under three categories: secured retail home loans; credit cards, unsecured and other personal lending products; and corporate facilities. Analysis and experience has indicated that, in general, the severity rates for these types of products are typically within the following ranges:

- Secured retail Home loans: 5%-20%;
- Credit cards, unsecured and other personal lending products: 65%-75%; and
- Corporate facilities: 30%-50%.

CRL coverage ratios would therefore be expected to be at or around these levels over a defined period of time. In principle, a number of factors may affect the Group's coverage ratios, including:

- The mix of products within total CRL balances. Coverage ratios will tend to be lower when there is a high proportion of secured retail and corporate balances within total CRLs. This is due to the fact that the recovery outlook on these types of exposures is typically higher than retail unsecured products with the result that they will have lower impairment requirements;
- The stage in the economic cycle. Coverage ratios will tend to be lower in the earlier stages of deterioration in credit conditions. At this stage, retail delinquent balances will be predominantly in the early delinquency cycles and corporate names will have only recently moved to CRL categories. As such balances attract a lower impairment requirement, the CRL coverage ratio will be lower;
- The balance of PPLs to CRLs. The impairment requirements for PPLs are lower than for CRLs, so the greater the proportion of PPLs, the lower the PCRL coverage ratio; and
- Write off policies. The speed with which defaulted assets are written off will affect coverage ratios. The more quickly assets are written off, the lower the ratios will be, since stock with 100% coverage will tend to roll out of PCRL categories more quickly.

Note
a Loan loss rate for the years prior to 2005 does not reflect the application of IAS 32, IAS 39 and IFRS 4.

H. Writing off of assets

After an advance has been identified as impaired and is subject to an impairment allowance, the stage may be reached whereby it is concluded that there is no realistic prospect of further recovery. Write off will occur when, and to the extent that, the whole or part of a debt is considered irrecoverable. The timing and extent of write offs may involve some element of subjective judgement. Nevertheless, a write off will often be prompted by a specific event, such as the inception of insolvency proceedings or other formal recovery action, which makes it possible to establish that some or the entire advance is beyond realistic prospect of recovery. In any event, the position of impaired loans is reviewed at least quarterly to ensure that irrecoverable advances are being written off in a prompt and orderly manner and in compliance with any local regulations. During 2011 there was a change in the period between charge-off and write off from 18 months to 12 months across the majority of unsecured retail portfolios.

Such assets are only written off once all the necessary procedures have been completed and the amount of the loss has been determined. Subsequent recoveries of amounts previously written off are written back and hence decrease the amount of the reported loan impairment charge in the income statement. In 2011, total write offs of impaired financial assets increased 20% to £5,165m.

I. Forbearance

The Group offers forbearance and similar programmes to assist customers and clients in financial difficulty through agreements to accept less than contractual amounts due where financial distress would otherwise prevent satisfactory repayment within the original terms and conditions of the contract. These agreements may be initiated by the customer, Barclays or a third party. The primary aim of forbearance is to recover the customer into a sustainable position on their obligations.

In the retail portfolios, as part of the Group Risk Forbearance Policy, programmes offered to customers include approved debt counselling plans, minimum due reductions, interest rate concessions, term extensions and switches from capital and interest repayments to interest-only payments either from a position of delinquency or to terms and conditions which are outside current underwriting criteria. The definition also extends to accounts that are partially rehabilitated. For further detail, see pages 99 to 100.

In the wholesale portfolios, Barclays will on occasion participate in debt-for-equity swaps, debt-for-asset swaps, debt standstills or debt restructuring agreements as part of the business support process. Debt restructuring agreements may include actions to improve security; such as changing an overdraft to a factoring or invoice discounting facility or moving debt to asset owning companies. Consideration is also given to the waiving or relaxing of covenants where this is the optimum strategy for the survival of the client's business. For further detail, see page 103.

Impairment of loans under forbearance

Loans in forbearance programmes are subject to impairment in line with normal impairment policy. In both retail and wholesale portfolios, identified impairment is raised for such accounts, recognising the agreement between the bank and customer to pay less than the original contractual payment and is measured using a future discounted cash flow approach comparing the debt outstanding to the expected repayment on the debt. This usually results in higher impairment being held for loans under forbearance than for fully performing assets, reflecting the additional credit risk attached to loans subject to forbearance.

Where a retail account is in forbearance, the additional risk characteristics are reflected by way of a management overlay as the only practical means of factoring certain recent conditions into impairment calculations until the Group's models can be recalibrated. As more comprehensive data on the performance of loans in forbearance is gathered the Group's models will be recalibrated.

Sustainability of loans under forbearance

The Group closely monitors the sustainability of loans for which forbearance has been granted. In the retail portfolios, the Group Risk Forbearance Policy prescribes that when a programme of forbearance is offered to the customer, it is both appropriate and sustainable for that customer. Sustainable terms are defined as revised contractual terms where the asset can be fully serviced over its full life.

This is controlled through qualification criteria, which will include an affordability assessment, minimum payment thresholds and previous forbearance activity. Regular reviews for programmes of a temporary nature are undertaken to reassess the customer's financial circumstances and continued appropriateness

For further detail on the Group's impairment policy and the way loans are separated into pools reflecting similar risk characteristics, see pages 88 to 89.

For disclosure on the Group's accounting policy with respect to impairment, see pages 210 to 211. For further detail on the credit quality of loans under forbearance, see pages 104 to 105.

Risk management

Credit risk continued

Loans and advances to customers and banks

Total gross loans and advances to customers and banks increased 2% to £513,311m. Loans and advances at amortised cost were £489,977m and loans and advances at fair value were £23,334m.

Loans and advances at amortised cost

Gross loans and advances to customers and banks at amortised cost increased 2% to £489,977m with a 2% rise in both the retail and wholesale portfolios. Included in this balance are cash collateral and settlement balances in Barclays Capital of £75,707m. The principal drivers for this increase were:

- Barclays Capital where loans and advances increased 6% to £161,194m driven by an increase in cash collateral balances partially offset by the acquisition of Protium and a reduction in corporate lending;
- UK RBB where loans and advances increased 5% to £123,055m primarily reflecting growth in mortgage balances;
- Barclaycard where loans and advances increased 9% to £32,214m mainly due to the acquisition of credit card portfolios in 2011, partially offset by balance run-offs in FirstPlus; and
- Barclays Wealth where loans and advances increased 17% to £19,255m reflecting growth in collateralised lending to High Net Worth individuals.

These increases were partially offset by a decrease in:

- Africa RBB where loans and advances decreased 19% to £38,361m principally reflecting the depreciation in the value of the Rand against Sterling.

Notes

a 31 December 2010 excludes from credit risk loans (CRLs) the loan to Protium of £7,560m against which an impairment of £532m was held. See page 111 for further information.

b Loan impairment charges, comprising impairment on loans and advances, and charges in respect of undrawn facilities and guarantees, see page 86.

Risk management

Credit risk continued

Group loans and advances held at amortised cost, by industry sector and geography

Total loans and advances held at amortised cost increased by 3% to £479,380m. This movement was primarily driven by lending to banks, with cash collateral balances, principally to European and UK counterparties, comprising the majority of this. Home loans to customers in the UK, and cards, unsecured and other personal lending to customers in the Americas, Africa and Middle East and the UK, also rose in line with business growth. Further detail on movements in loans and advances is presented on pages 96 to 102.

Note

a Within European financial institutions were loans (excluding settlement balances and cash collateral) to French and German counterparties of £3,199m (2010: £2,161m) and £1,474m (2010: £1,621m) respectively.

Group loans and advances held at fair value, by industry sector and geography

Total loans and advances held at fair value reduced 5% to £23,334m, principally reflecting the liquidation of loans to financial institutions in Europe and commercial real estate loans in the Americas and Europe as part of the Group's strategy of winding down Barclays Capital's credit market exposures. This reduction was offset partially by an increase in the fair value of Barclays Corporate lending to UK commercial real estate, government and business and other services counterparties, and the consolidation of Protium assets in the Americas.

Impairment allowances

Impairment allowances decreased £1,835m to £10,597m, driven primarily by a reduction in the retail portfolios due to a change in the write-off policy against most unsecured portfolios, debt sales and lower severity. Wholesale impairment allowances at 31 December 2010 included £532m held against the loan to Protium. Excluding this balance, wholesale impairment allowances increased slightly reflecting higher levels of impairment in Europe, particularly the property sector in Portugal, and some large single names in Barclays Capital. Amounts written off increased £855m to £5,165m driven, in part, by the change in write-off policy.

Group	10,597	12,432	49.7	39.0	45.5	36.0

To facilitate comparison between periods, the analysis below is based on Group (excluding loan to Protium) as the Protium loan was repaid in 2011.

Credit Risk Loans (CRLs)

CRLs fell 12% to £21,342m. CRL balances in the wholesale portfolio decreased 7% primarily due to falls in:

- Barclays Corporate, where lower balances in the UK reflected the high level of write-offs and balance reductions. Balances in Europe remained stable with higher balances in Portugal and Italy reflecting deteriorating credit conditions offset by lower balances in Spain; and
- Africa RBB, principally due to the depreciation in the value of the Rand against Sterling, repayments and a slowdown in new CRLs.

CRL balances in retail portfolios decreased 17%, reflecting the write-off of balances following a reduction in the period between accounting charge-off and write-off from 18 months to 12-months across the majority of unsecured portfolios, as well as lower rate of inflows, debt sales and customer repayments.

The main exception was Europe RBB where the overall balance was largely unchanged as decreases in Spain, principally resulting from a series of unsecured portfolio sales in 2011, were offset by increases, mainly in the mortgage portfolios as a consequence of higher delinquent balances in deteriorating economic conditions.

Potential Problem Loans (PPLs)

PPLs fell 27% to £1,972m. PPL balances in the wholesale portfolio decreased 30% primarily due to improved credit grading of a small number of Barclays Capital customers. PPL balances in the retail portfolio decreased 19% reflecting lower balances in early delinquency arrears across the majority of businesses.

Coverage ratios

The CRL coverage ratio increased slightly to 49.7% (2010: 48.9%) reflecting an increase in the wholesale portfolio ratio to 47.8% (2010: 42.7%) and a decrease in the retail portfolio ratio to 51.6% (2010: 54.8%).

The PCRL coverage ratio increased slightly to 45.5% (2010: 44.0%) reflecting an increase in the wholesale portfolio ratio to 42.4% (2010: 36.6%) and a decrease in the retail portfolio ratio to 48.9% (2010: 51.8%).

Risk management

Credit risk continued

Retail credit risk

Gross loans and advances to customers in the retail portfolios increased 2% to £241,138m. In UK RBB, the increase of 6% to £120,312m primarily reflected growth in mortgage balances. Barclaycard loans and advances increased 8% to £31,738m mainly due to the acquisition of credit card portfolios in 2011, partially offset by balance run-offs in FirstPlus. Barclays Wealth loans and advances increased 24% to £16,784m reflecting growth in collateralised lending to High Net Worth individuals. These increases were partially offset by a 19% decrease in Africa RBB to £26,363m primarily due to the depreciation in the value of the Rand against Sterling and lower originations in South Africa Home Loans. Balances in Europe RBB remained broadly stable at £44,488m as growth in Italian Home Loans was offset by lower balances in Spain as new mortgage business reduced.

Retail impairment allowances decreased 22% to £5,374m principally due to changes in the write-off policy, debt sales and lower severity.

The total loan impairment charge across the retail portfolios reduced 27% to £2,422m as a result of lower charges across all businesses. The loan impairment charge at Barclaycard decreased 26% to £1,232m as a result of reduced delinquency rates and customer balance repayments, principally in the US. The loan impairment charge at UK RBB decreased 34% to £491m mainly reflecting the low interest rate environment, low arrears rates and lower flows in collections in UK personal loans. The Africa RBB loan impairment charge decreased 12% to £386m, mainly reflecting improved economic conditions in South Africa and better recoveries across the continent.

Lower impairment charges coupled with higher loan balances led to a fall in the retail loan loss rate to 100bps (2010: 140bps).

CRLs in the retail portfolios decreased 17% to £10,416m reflecting the write-off of balances following a reduction in the period between accounting charge-off and write-off from 18 months to 12-months across the majority of unsecured portfolios, as well as lower rate of inflows, debt sales and customer repayments. The main exception was Europe RBB where the overall balance was largely unchanged as decreases in Spain, principally resulting from a series of unsecured portfolio sales in 2011, were offset by increases, mainly in the mortgage portfolios as a consequence of higher delinquent balances in deteriorating economic conditions.

Secured home loans

Total home loans to retail customers increased 2% as lending was increased to meet customer demand, whilst maintaining broadly stable lending criteria. Home Loans as a proportion of retail gross loans and advances remained broadly unchanged at 71%. The principal home loan portfolios listed below account for 93% of total home loans in the Group's retail portfolios.

Home loans principal portfolios ^b					
	Gross loans and advances £m	> 90 day arrears %	Gross charge-off rates %	Recoveries proportion of outstanding balances %	Recoveries impairment coverage ratio %

Portugal	3,713	0.4	0.7	1.5	12.6

Notes

a Other Secured Retail Lending includes Absa Vehicle and Auto Finance in Africa RBB, FirstPlus in Barclaycard and Investment Leverage portfolio in Barclays Wealth.

b Excluded from the above analysis are: Wealth Home Loans, which are managed on the basis of individual customer exposures, France Home Loans and other small home loan portfolios.

c South Africa Home Loans recoveries impairment coverage ratio has been revised to exclude interest and fees in suspense.

Risk management

Credit risk continued

Arrears rates remained stable in the UK as targeted balance growth and better customer affordability criteria continued to be supported by the low base rate environment.

Arrears rates for South Africa Home Loans decreased but gross charge-off rates increased as contracts in debt counselling were terminated and legal actions were commenced which resulted in an increase in the recoveries book. The fall in recoveries impairment coverage ratio for South Africa Home Loans reflected, in part, the impact of a revised LGD model implementation in the second half of 2011. The lower LGD reflected higher levels of cash collected in the recoveries portfolio.

Arrears rates in Spain remained broadly stable, but increased in Portugal and Italy due to the deterioration in economic conditions including the impact of austerity measures.

>95%	3.6	3.7	9.0	6.7	11.7	12.8	0.5	0.6	7.7	5.3
Marked to market LTV ^c	44.3	42.6	60.1	57.5	45.2	45.0	46.9	45.3	69.6	68.0
Average LTV on new mortgages	54.0	51.6	61.3	61.1	61.2	61.0	59.6	59.0	67.7	69.0
New mortgages proportion above 85% LTV	0.8	0.5	1.3	0.7	29.9	29.8	–	–	5.5	12.2
New mortgages (£m)	17,202	16,875	502	1,963	1,381	1,593	3,719	3,544	495	633

The risk profile on the principal home loan portfolios is reflected by the moderate average Loan to Value (LTV) of the existing portfolios and range of LTVs of new mortgage lending. Although period end marked to market LTVs have increased marginally across all principal home loan portfolios compared to December 2010, the portfolios continued to remain well secured. The increase in average LTV for new mortgage business in the UK was driven by more tailored lending criteria which allowed for additional business to be written at higher LTVs within the existing underwriting criteria. There was no material impact on impairment as a result, in 2011. Any increase to impairment from the change in risk profile is factored into impairment models. In the UK, buy to let mortgages comprised 6% of the total stock (2010: 6%). The average LTV on new mortgages for Spain remained stable and was within the Group approved risk profile. New lending has primarily been driven by new mortgages for house purchase rather than remortgages, for which the demand contracted significantly.

Notes

a Excluded from the above analysis are: Wealth Home Loans, which are managed on the basis of individual customer exposures, France Home Loans and other small Home Loans portfolios.

b Spain and Portugal marked to market methodology based on balance weighted approach.

c Portfolio marked to market based on current valuations, including recoveries balances.

Credit cards, overdrafts and unsecured loans

The principal portfolios listed below account for 79% of total credit cards, overdrafts and unsecured loans in the Group's retail portfolios. Total credit cards, overdrafts and unsecured loans increased 1% primarily due to increased lending in UK Cards and the acquisitions of credit card portfolios in 2011.

Principal portfolios						
	Gross loans and advances £m	30 day arrears %	90 day arrears %	Gross charge-off rates %	Recoveries proportion of outstanding balances %	Recoveries impairment coverage ratio %

UK overdrafts	1,430	7.2	4.9	10.9	18.2	92.9

30 day arrears rates reduced in 2011 in all the principal portfolios, with 90 day arrears rates reducing in all portfolios except Italy salary advance loans. 90 day arrears reduced to 1.2% (2010: 1.5%) in UK cards and to 1.5% (2010: 2.5%) in US cards, reflecting better, although still subdued, economic conditions during 2011, the impact of customer loan repayments and a continued revision of the credit approval policy in Barclaycard.

Retail forbearance programmes

Retail forbearance is available to customers experiencing financial difficulties. Forbearance solutions take a number of forms depending on individual customer circumstances. Short term solutions focus on temporary reductions to contractual payments and may change from capital and interest payments to interest only. For customers with longer term financial difficulties, term extensions may be offered, which may also include interest rate concessions.

When an account is placed into a programme of forbearance, the asset will be classified as such for the remainder of its term. Accounts may be up to date on a programme of forbearance but will continue to be classified as subject to forbearance and therefore will be included as forborne until the loan is repaid, a programme of rehabilitation is agreed or the loan is written off.

When Barclays agrees to a forbearance programme with a customer, the impairment allowance recognises the impact on cashflows of the agreement to receive less than the original contractual payments. The Group Retail Impairment Policy prescribes the methodology for impairment of forbearance assets, which is measured by comparing the debt outstanding to the revised expected repayment. This results in higher impairment than for fully performing assets, reflecting the additional credit risk attached to loans subject to forbearance.

During 2011, Barclays continued to assist customers in financial difficulty through the use of forbearance programmes. However, the extent of forbearance offered by the Group to customers and clients is immaterial to the size of the loan book.

Forbearance on the Group's principal portfolios in US, UK and Europe are presented below. Additional portfolios will be added to this disclosure should the forbearance in respect of such portfolios become material.

Notes

a UK cards excludes £1.5bn relating to Egg credit card assets, which were recognised on acquisition at fair value (with no related impairment allowance). An impairment allowance of £20m is held on Egg balances post acquisition.

b Risk metrics exclude the impact of the \$1.4bn Upromise portfolio acquired in December 2011.

c Gross loans and advances for UK personal loans as at 31 December 2010 have been revised to exclude £740m of UK smaller specialist loans as they are no longer considered to be principal portfolio.

d South Africa cards 30 and 90 days arrears revised to include approved debt counselling accounts.

e Europe RBB includes Spain, Portugal and Italy card assets.

f The recoveries impairment coverage ratio for Italy salary advance loans is lower than other unsecured portfolios as these loans are extended to customers where the repayment is made via a salary deduction at source by qualifying employers and Barclays is insured in the event of termination of employment or death. Recoveries represent balances where insurance claims are pending that we believe are largely recoverable, hence the lower coverage.

Risk management

Credit risk continued

The level of forbearance extended to customers in other retail portfolios is not material and, typically, does not currently play a significant part in the way customer relationships are managed.

Barclays would not consider a retail loan to be renegotiated where the amendment is at the request of the customer, there is no evidence of actual or imminent financial difficulty and the amendment meets with all Barclays underwriting criteria. In this case it would be treated as a new loan.

In addition Barclays will allow re-ageing of an account once in 12-months or twice in 5 years, providing strict qualification criteria are met including making three consecutive monthly payments. An account so re-aged is not considered to be restructured because the contractual monthly payments remain unchanged.

Principal portfolios

UK personal loans	215	3.7	31.7	n/a
US cards	150	2.1	18.4	n/a

Forbearance in principal home loans portfolios increased 8% to £1,929m (2010: £1,783m), principally in the UK.

Within UK home loans, term extensions accounted for the majority of forbearance balances. Since January 2008 an additional £1.5bn of interest only mortgages have received a term extension, which have not been classified as forbearance as the contractual monthly payments did not alter.

In Spain, forbearance accounts are usually full account restructures. In Italy, the majority of balances relate to specific schemes required by the Government (e.g. debt relief scheme following the earthquake of 2009) and are weighted towards payment holidays and interest suspensions.

Forbearance in principal credit cards, overdrafts and unsecured loans portfolios remains stable at £1,272m (2010: £1,273m). Impairment allowances against UK cards forbearance increased to reflect revised expectations on debt repayment. As a result, the impairment coverage ratio increased to 36.5% (2010: 30.6%).

For detail on how loans are separated into pools reflecting similar risk characteristics, refer to page 89.

Notes

a UK cards excludes £43m relating to credit card assets acquired from Egg UK, which were recognised on acquisition at fair value (with no related impairment allowance).

b UK cards revised to include partnership card assets.

Wholesale credit risk

Gross loans and advances to customers and banks in the wholesale portfolios increased 2% to £248,839m principally as a result of a rise of 6% in Barclays Capital to £161,194m. For more detail, see analysis of Barclays Capital wholesale loans and advances on page 102. This increase was partially offset by an 18% decrease in balances in Africa RBB to £11,998m, primarily due to the depreciation in the value of the Rand against Sterling and from lower demand.

Wholesale impairment allowances at 31 December 2010 included £532m held against the loan to Protium. Excluding this balance, wholesale impairment allowances increased 4% to £5,223m reflecting higher levels of new impairment in Europe, particularly the property sector in Portugal and some large single names in Barclays Capital.

The total loan impairment charge across the wholesale portfolios improved 41% to £1,368m principally reflecting lower charges in Barclays Capital, mainly as a result of charges in leveraged finance being partially offset by a release of £223m relating to the loan to Protium which has now been repaid; and in Barclays Corporate due to lower credit impairment charges in Spain reflecting lower exposure to the property and construction sector. Charges also reduced in the Barclays Corporate UK business, reflecting lower default rates and tightly controlled exposure to commercial real estate loans. However, weak credit conditions in Portugal led to a higher charge in 2011.

The substantial reduction in the impairment charge and higher loan balances led to a lower wholesale loan loss rate of 55bps in 2011 (2010: 96bps).

CRLs in the wholesale portfolio, excluding Protium, decreased 7% to £10,926m primarily due to falls in Barclays Corporate where lower balances in the UK reflected the high level of write-offs and balance reductions; and Africa RBB, principally due to the depreciation in the value of the Rand against Sterling, repayments and a slowdown in new CRLs. Balances in Barclays Corporate Europe remained stable with higher balances in Portugal and Italy reflecting deteriorating credit conditions, offset by lower balances in Spain.

Presented below is further information related to the Group's wholesale lending portfolios by business, with additional analysis of portfolios in Barclays Capital in relation to wholesale credit risk.

Further detail in relation to the Group's wholesale lending is presented as part of geographical and industrial loan concentrations (pages 93 to 94); potential credit risk loans (page 95); forbearance (pages 99 to 100); loan credit quality (pages 104 to 105) and exposures to selected Eurozone countries (pages 112 to 119).

Notes

a Loans and advances to business customers in Europe RBB are included in the retail loans and advances at amortised cost table on page 96.

b Barclaycard wholesale loans and advances represent corporate credit and charge cards.

c Barclays Capital gross loans and advances includes cash collateral and settlement balances of £75,707m as at 31 December 2011 and £56,486m as at 31 December 2010.

d Excluding these balances CRLs as a proportion of gross loans and advances were 6.1% and 5.6% respectively.

e Barclays Capital credit risk loans exclude the loan to Protium of £7,560m held as at 31 December 2010.

Risk management

Credit risk continued

Analysis of Barclays Capital wholesale loans and advances at amortised cost

Barclays Capital wholesale loans and advances increased 6% to £161,194m (2010: £152,711m). This was driven by an increase in cash collateral balances partially offset by the acquisition of Protium and a reduction in corporate lending.

Included within corporate lending and other wholesale lending portfolios are £3,204m (2010: £3,787m) of loans backed by retail mortgage collateral classified as lending to financial institutions.

Note

a Barclays Capital credit risk loans as at 31 December 2010 exclude the loan to Protium. Other wholesale lending CRLs and CRLs % of Gross L&A including the loan to Protium were £7,875m and 29.9% respectively.

Wholesale forbearance programmes

Whilst there are no standardised wholesale forbearance programmes, as part of the ongoing provision of lending facilities to corporates and businesses, credit terms are reviewed and may be revised where this is the optimum strategy for the performance of our customers' businesses and therefore Barclays loans and advances.

Wholesale client relationships are individually managed with lending decisions made with reference to specific circumstances and on bespoke terms. As changes in original terms are made for a variety of reasons and in a variety of ways including those not related to the customer's ability to repay a loan, comprehensive data is not currently compiled to quantify the lending where changes in original terms have been agreed as a result of forbearance.

Impairment is assessed for each individual counterparty and recognised where relevant impairment triggers have been reached, including where customers are in arrears and require renegotiation of terms.

A control framework exists along with regular sampling to ensure watch list and impairment policies are implemented as defined and to ensure that all assets have suitable levels of impairment applied. Portfolios are subject to independent assessment.

Corporate loans modified on a commercial basis in the normal course of business are not considered to be renegotiated or restructured (forborne) loans.

Wholesale collateral

When property is taken as collateral it is monitored to ensure that the current value is not less than its value at origination. Monitoring is undertaken at least once every three years for residential property, and annually for commercial property. More frequent monitoring is carried out where the property sector is subject to significant deterioration.

Deterioration is monitored principally by geography. Specific exercises to monitor property values may be undertaken where the property sector in a given geography has been subject to significant deterioration and where Barclays has a material concentration of property collateral.

Monitoring may be undertaken either at the level of an individual property or at a portfolio level.

Monitoring on a portfolio level refers to a more frequent process of indexing collateral values on each individual loan, using a regional or national index, and updating LGD values. Where an appropriate local index is not available, property values are monitored on an individual basis as part of the annual review process for the loan.

For larger loans property valuation is reviewed by an independent valuer at least every 3 years, and an independent valuer also reviews the property valuation where information indicates that the value of the property may have declined materially relative to general market prices. In addition, trigger points are defined under which property values must be reviewed.

Liens over fluctuating assets of a borrower such as inventory and trade receivables, known as floating charges, are monitored regularly. The valuation of this type of collateral takes into account the ability to establish objectively a price or market value, the frequency with which the value can be obtained (including a professional appraisal or valuation), and the volatility or a proxy for the volatility of the value of the collateral.

Additional revaluations are usually performed when a loan is moved to EWL or WL. More detail of when a corporate account may be moved to an EWL or WL may be found on page 88. Exceptions to this may be considered where it is clear a revaluation is not necessary, for instance where there is a very high margin of security or a recent valuation has been undertaken. Conversely, a material reduction in the value of collateral held represents an increase in credit risk and will often cause a loan to be placed on the EWL or WL.

Any one of these events may also trigger a test for impairment, depending on individual circumstances of the loan. When calculating impairment, the difference between an asset's carrying amount and the present value of all estimated cash flows discounted at the original effective interest rate will be recognised as an impairment. Such cash flows include the estimated fair value of the collateral which reflects the results of the monitoring and review of collateral values as detailed above and valuations undertaken as part of our impairment process.

Whether property values are updated as part of the annual review process, or by indexation of collateral values, the updated collateral values feed into the calculation of risk parameters (for example LGD) which, in turn, feed into identified and unidentified impairment calculations at each balance sheet date. See the impairment allowances section on page 94 for more detail.

Trends in loan loss rates incorporate the impact of any decrease in the fair value of collateral held.

For further information on collateral and other credit enhancements held against the Group's assets, refer to pages 79 to 83.

Risk management

Credit risk continued

Credit quality of loans and advances (audited)

All loans and advances are categorised as neither past due nor impaired, past due but not impaired, or impaired. Impaired loans include restructured loans. For the purposes of these disclosures:

- A loan is considered past due when the borrower has failed to make a payment when due under the terms of the loan contract;
- The impairment allowance includes allowances both against financial assets that have been individually impaired and those subject to collective impairment;
- Loans neither past due nor impaired consist predominantly of wholesale and retail loans that are performing. These loans, although unimpaired, may carry an unidentified impairment allowance;
- Loans that are past due but not impaired consist predominantly of wholesale loans that are past due but individually assessed as not being impaired. These loans, although individually assessed as unimpaired, may carry an unidentified impairment allowance;
- Impaired loans that are individually assessed for impairment consist predominantly of wholesale loans that are past due and for which an individual allowance has been raised; and
- Impaired loans that are collectively assessed for impairment consist predominantly of retail loans that are 1 day or more past due for which a collective allowance is raised. Wholesale loans that are past due, individually assessed as unimpaired, but which carry an unidentified impairment allowance, are excluded from this category. (Refer to pages 89 to 91 for further detail on the Group's impairment policy.)

Home loans and credit cards, unsecured and other retail lending are subject to forbearance in the retail portfolios and are included in the collectively assessed impaired loans column in the table below. Included within wholesale loans that are neither past due nor impaired are a portion of loans that have been subject to forbearance or similar strategies as part of the Group's ongoing relationship with customers. The loans will have an internal rating reflective of the level of risk to which the Group is exposed, bearing in mind the circumstances of the forbearance and the overall performance and prospects of the customer. Loans on forbearance programmes will typically, but not always, attract a higher risk rating than similar loans which are not. A portion of wholesale loans under forbearance is included in the past due but not impaired column, although not all loans subject to forbearance are necessarily impaired or past due. Where wholesale loans under forbearance have been impaired, these form part of individually assessed impaired loans.

Notes

a For 2010, as a result of improvements in data quality, home loans to the value of £40.0bn that were classified as Satisfactory in 2010 have been identified as being Strong.

b For 2011 reporting, loans that were previously classified as past due but not individually impaired have been disaggregated between loans past due but not impaired and collectively assessed impaired loans.

For the purposes of the analysis of credit quality, the following internal measures of credit quality have been used:

Financial statements description	Retail lending	Wholesale lending	Default grade
	Probability of default	Probability of default	
Strong	0.0-0.60%	0.0-0.05%	1-3
		0.05-0.15%	4-5
		0.15-0.30%	6-8
		0.30-0.60%	9-11
Satisfactory	0.60-10.00%	0.60-2.15%	12-14
		2.15-11.35%	15-19
Higher risk	10.00%+	11.35%+	20-21

Financial statement descriptions can be summarised as follows:

- Strong – there is a very high likelihood of the asset being recovered in full.
- Satisfactory – whilst there is a high likelihood that the asset will be recovered and therefore, of no cause for concern to the Group, the asset may not be collateralised, or may relate to retail facilities, such as credit card balances and unsecured loans, which have been classified as satisfactory, regardless of the fact that the output of internal grading models may have indicated a higher classification. At the lower end of this grade there are customers that are being more carefully monitored, for example, corporate customers which are indicating some evidence of some deterioration, mortgages with a high loan to value ratio, and unsecured retail loans operating outside normal product guidelines.
- Higher risk – there is concern over the obligor's ability to make payments when due. However, these have not yet converted to actual delinquency. There may also be doubts over value of collateral or security provided. However, the borrower or counterparty is continuing to make payments when due and is expected to settle all outstanding amounts of principal and interest.

An age analysis of loans and advances that are past due but not impaired is set out below.

Loans and advances past due but not impaired (audited)						
	Past due up to 1 month £m	Past due 1-2 months £m	Past due 2-3 months £m	Past due 3-6 months £m	Past due 6 months and over £m	Total £m

Debt securities

Credit quality of debt securities (audited)

Trading portfolio assets, financial assets designated at fair value and available for sale assets are measured on a fair value basis. The fair value will reflect, among other things, the credit risk of the issuer. Most listed and some unlisted securities are rated by external rating agencies. The Group mainly uses external credit ratings provided by Standard & Poor's or Moody's. Where such ratings are not available or are not current, the Group will use its own internal ratings for the securities.

Included in the table below are impaired available for sale debt securities with a carrying value at 31 December 2011 of £61m (2010: £358m), after a write down of £145m (2010: £583m). Collateral is not generally obtained directly from the issuers of debt securities. Certain debt securities may be collateralised by specifically identified assets that would be obtainable in the event of default.

Debt securities and other bills decreased by £11.7bn, with the most significant decreases relating to investment grade trading portfolio securities, however the overall mix remained stable. This movement reflects the group reducing its exposure to Eurozone countries as well as in the emerging markets business.

Securities rated as investment grade amounted to 92.9% of the portfolio (2010: 93.0%). An analysis of the credit quality of the Group's debt securities is set out below:

Debt securities (audited)	2011				2010

Debt securities include government securities held as part of the Group's treasury management portfolio for asset and liability, liquidity and regulatory purposes and are for use on a continuing basis in the activities of the Group. The Group held the following government securities which exceeded 10% of shareholders' equity in any of the last three years. These securities are held at fair value.

Derivatives (audited)

The Group's use of derivative contracts is outlined in the derivative financial instruments note on pages 220 to 223. The Group is exposed to credit risk on derivative contracts, which arises as a result of counterparty credit risk and movements in the fair value of credit derivatives. The Group's exposure to counterparty risk is affected by the nature of the trades, the credit worthiness of the counterparty, and netting and collateral arrangements.

Nature of derivative trades

The Group buys and sells financial instruments that are traded or cleared on an exchange, including interest rate swaps, futures and options on futures. Holders of exchange traded instruments provide margin daily with cash or other security at the exchange, to which the holders look for ultimate settlement.

The Group also buys and sells financial instruments that are traded over the counter, rather than on a recognised exchange. These instruments range from standardised transactions in derivative markets, to trades where the specific terms are tailored to the requirements of the Group's customers. In many cases, industry standard documentation is used, most commonly in the form of a master agreement, with individual transaction confirmations. The existence of a signed master agreement is intended to give the Group protection in situations where a counterparty is in default.

Counterparty credit quality

The credit quality of the Group's derivative assets according to the credit quality of the counterparty is discussed in the table below.

Credit quality (audited)	2011				2010

% of total	95.6%	3.7%	0.7%	100.0%	95.5%	3.7%	0.8%	100.0%

Netting and collateral arrangements

Credit risk from derivatives is mitigated where possible through netting agreements whereby derivative assets and liabilities with the same counterparty can be offset. Group policy requires all netting arrangements to be legally documented. The ISDA Master Agreement is the Group's preferred agreement for documenting over the counter (OTC) derivatives. It provides the contractual framework within which dealing activities across a full range of OTC products are conducted and contractually binds both parties to apply close-out netting across all outstanding transactions covered by an agreement if either party defaults or other predetermined events occur.

Collateral is obtained against derivative assets, depending on the creditworthiness of the counterparty and/or nature of the transaction. Any collateral taken in respect of OTC trading exposures will be subject to a 'haircut' which is negotiated at the time of signing the collateral agreement. A haircut is the valuation percentage applicable to each type of collateral and will be largely based on liquidity and price volatility of the underlying security. The collateral obtained for derivatives is either cash, direct debt obligation government (G14+) bonds denominated in the domestic currency of the issuing country, debt issued by supranationals or letters of credit issued by an institution with a long-term unsecured debt rating of A+/A3 or better. Where the Group has ISDA master agreements, the collateral document will be the ISDA Credit Support Annex (CSA). The collateral document must give Barclays the power to realise any collateral placed with it in the event of the failure of the counterparty, and to place further collateral when requested or in the event of insolvency, administration or similar processes, as well as in the case of early termination.

Under IFRS, netting is permitted only if both of the following criteria are satisfied:

- the entity has a legally enforceable right to set off the recognised amounts; and
- the entity intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Under US GAAP, netting is also permitted, regardless of the intention, to settle on a net basis, where there is a counterparty master agreement that would be enforceable in the event of bankruptcy.

Risk management

Credit risk continued

The tables below set out the fair values of the derivative assets together with the value of those assets subject to enforceable counterparty netting arrangements for which the Group holds offsetting liabilities and eligible collateral.

Derivative assets (audited)			
	Gross assets £m	Counterparty netting £m	Net exposure £m
As at 31 December 2011			
Foreign exchange	63,886	53,570	10,316
Interest rate	376,162	315,924	60,238
Credit derivatives	63,313	51,930	11,383
Equity and stock index	13,202	8,944	4,258
Commodity derivatives	22,401	10,224	12,177
Total derivative assets	538,964	440,592	98,372
Cash collateral held			51,124
Net exposure less collateral			47,248
As at 31 December 2010			
Foreign exchange	60,494	49,405	11,089
Interest rate	272,386	224,124	48,262
Credit derivatives	47,017	39,786	7,231
Equity and stock index	14,586	10,523	4,063
Commodity derivatives	25,836	16,629	9,207
Total derivative assets	420,319	340,467	79,852
Cash collateral held			37,289
Net exposure less collateral			42,563

Derivative asset exposures would be £492bn (2010: £378bn) lower than reported under IFRS if netting were permitted for assets and liabilities with the same counterparty or for which we hold cash collateral. Derivative liabilities would be £478bn (2010: £362bn) lower reflecting counterparty netting and collateral placed.

Exposure relating to derivatives, repurchase agreements, reverse repurchase agreements, stock borrowing and loan transactions is calculated using internal FSA approved models. These are used as the basis to assess both regulatory capital and capital appetite and are managed on a daily basis. The methodology encompasses all relevant factors to enable the current value to be calculated and the future value to be estimated, for example, current market rates, market volatility and legal documentation (including collateral rights).

Reverse repurchase agreements and other financial assets (audited)

Other financial assets	655	1,079	61	1,795	1,115	1,312	115	2,542
Total reverse repurchase agreements and other financial assets	122,392	37,286	1,561	161,239	188,025	26,384	1,464	215,873
% of total	75.9%	23.1%	1.0%	100.0%	87.1%	12.2%	0.7%	100.0%

No reverse repurchase agreements held by the Group at 31 December 2011 or 2010 were individually impaired, however during the year, the Group wrote back £48m of impairment on reverse repurchase agreements (2010: £4m write back).

Other credit risk assets (audited)

Other assets subject to credit risk included:

- cash and balances at central banks of £106,894m (2010: £97,630m) on which there is a reduced level of credit risk;
- items in the course of collection from other banks were £1,812m (2010: £1,384m), on which there is a reduced credit risk in light of the banking industry clearing system; and
- other financial assets of £2,620m (2010: £2,824m).

Off-balance sheet

The Group applies fundamentally the same risk management policies for off-balance sheet risks as it does for its on-balance sheet risks. In the case of commitments to lend, customers and counterparties will be subject to the same credit management policies as for loans and advances. Collateral may be sought depending on the strength of the counterparty and the nature of the transaction.

Risk features in the portfolio

Risk features in the portfolio are business activities that are considered to be higher risk than the Group's normal activities and are subject to a higher level of scrutiny in our management of credit risk. As at 31 December 2011 these items comprised:

- Barclays Capital credit market exposures; and
- Group exposures to selected Eurozone countries.

Barclays Capital's credit market exposures primarily relate to commercial real estate, leveraged finance, and collateral previously securing the loan to Protium. These exposures arose before the market dislocation in mid-2007.

During 2011, credit market exposures decreased by £8,728m to £15,161m, reflecting net sales and paydowns and other movements of £8,442m, foreign exchange rate movements of £263m and fair value losses and impairment of £23m. The net sales, paydowns and other movements of £8,442m included:

- £4,218m relating to assets formerly held as collateral for the loan to Protium Finance LP, comprising £2,697m net sales, £959m loan and interest repayments and £562m paydowns and other movements;
- £2,141m of commercial real estate loans and properties sales and paydowns; and
- £820m reduction in leveraged loans primarily relating to five counterparties.

In January 2012, Barclays completed the sale of £405m (\$628m) of a commercial real estate equity security at fair value representing 50% of its stake in Archstone.

Notes

a As the majority of exposure is held in US Dollars, the exposures above are shown in both US Dollars and Sterling.

b Prior to 27 April 2011 when Protium was acquired by the Group the exposure was a loan. This was carried at the amount equivalent to the fair value of the underlying collateral from 31 December 2010.

c Includes undrawn commitments of £180m (31 December 2010: £264m).

Loan to Protium	–	–	10,884	–	–	7,028

On 16 September 2009, Barclays Capital sold assets of \$12,285m, including \$8,384m in credit market assets, to Protium Finance LP (Protium). As part of the transaction, Barclays extended a \$12,641m 10 year loan to Protium.

In April 2011, Barclays entered into several agreements to acquire all third party interests in Protium in order to help facilitate the Group's early exit from the underlying exposures. As a result, Protium was then consolidated by the Group. Subsequently, Protium sold its assets to Barclays entities and the loan has been repaid.

As part of this transaction, £459m (\$750m) was invested in Helix, an existing fund managed by Protium's investment manager. The original investment represented 86% of the Helix fund, which has been consolidated by the Group. The fund's investments primarily comprise government and agency securities. As at 31 December 2011, the fair value of Barclays investment in the fund was \$729m.

Risk management

Credit risk continued

Group exposures to selected Eurozone countries (audited)

Overview

Credit conditions will deteriorate in a recessionary environment, such as that recently seen in the UK, US, the Eurozone and other economies. Deteriorating credit conditions will impact exposures to retail and wholesale counterparties, including a country's government or its agencies (via sovereign risk) thus impairing or reducing the value of Barclays credit assets.

The impact of these conditions could adversely affect Barclays and the solvency of its counterparties, custodians, customers and service providers; its credit rating; its share price; the value and liquidity of its assets and liabilities; and the ability of the Group to meet its debt obligations more generally.

The following disclosures present the Group's exposures to selected Eurozone countries, representing Eurozone countries that have a credit rating of AA or below from Standard and Poor's and where the Group has an exposure of over £0.5bn. The Group's exposure to Greece, though under £0.5bn, is also presented due to continuing market focus.

The Group continues to closely monitor its exposure to Eurozone countries:

- Spanish sovereign exposure reduced 45% to £2.5bn due to the disposal of available for sale government bonds, held for the purpose of interest rate hedging and liquidity, that have been replaced by interest rate swaps with alternative counterparties;
- Italian sovereign exposure increased 57% to £3.5bn principally due to the acquisition of government issued bonds reflecting improved yields and holdings as part of the Treasury liquidity management portfolio;
- Italian non-sovereign exposures increased £0.8bn to £21.9bn, principally due to a £2.2bn increase in new mortgage lending (with an average LTV of 59.6%), offset by £1.1bn reduction in exposures to financial institutions;
- Portuguese sovereign exposure reduced 21% to £0.8bn, principally due to a reduction in government bonds held as available for sale;
- Ireland exposures increased 5% to £5.7bn, principally reflecting increased lending to financial institutions of £4.3bn (31 December 2010: £3.8bn), including £0.9bn of trading assets and £1.3bn of loans to entities domiciled in Ireland whose principal business and exposures are outside of Ireland. Exposure to domestic Irish banks remains minimal;
- Exposure to Greece remains minimal and the sovereign exposure is predominantly marked to market on a daily basis through income; and
- Belgium is included in the following disclosures because its credit rating was downgraded to AA in November 2011. Exposure increased marginally to £2.4bn (2010: £2.2bn) principally relating to available for sale holdings of sovereign debt.

Note

a 2010 comparatives have been updated from those reported in the preliminary announcement to include certain additional exposures held at fair value through profit and loss relating to corporates in Spain (£75m), Italy (£110m) and Portugal (£130m), and £184m in relation to financial institutions in Italy.

Management and monitoring of country exposures

The management of country risk forms an integral part of the Group's broader credit risk framework focusing on concentration risk. For further information on the Group's management of concentration risk, and the credit risk management framework more generally, refer to pages 87 to 91.

Stress testing

Barclays has a detailed and comprehensive stress testing framework applicable to both the Barclays Group as well as on individual portfolios and asset classes. The Group's macroeconomic stress test scenarios are designed to be both severe and plausible. Specific scenarios are also considered as part of reverse stress testing, for example, a Euro break-up scenario. Data gained from the tests is used to initiate management actions to mitigate the risks to the Group of a deterioration in economic and trading conditions within the Eurozone. For further information on the Group's stress testing, refer to page 72.

In July 2011 the European Banking Authority (EBA) published the results of their macroeconomic stress scenario for the 90 selected banks who participated in the European stress test which included a Eurozone sovereign specific component. In December 2011, the EBA published the results of the bank recapitalisation plan which included a capital buffer against sovereign debt exposures. Barclays uses stress tests and Mandate and Scale to ensure its risk profile remains appropriate and this was confirmed by passing both EBA tests.

Basis of preparation

The following analysis presents the maximum direct balance sheet exposure to credit risk by selected Eurozone country, with the totals reflecting allowance for impairment, netting and cash collateral held where appropriate, including:

- Trading and derivatives balances relate to investment banking activities, principally as market-maker for government bond positions. Positions are held at fair value, with daily movements taken through profit and loss;
- Available for sale assets are principally investments in government bonds and other debt securities held for the purposes of interest rate hedging and liquidity for local banking activities. Balances are reported on a fair value basis, with movements in fair value going through equity;
- Loans and advances held at amortised cost comprise: (i) retail lending portfolios, predominantly mortgages secured on residential property; and (ii) corporate lending portfolios, largely reflecting established corporate banking businesses in Spain, Italy and Portugal and investment banking services provided to multinational and large national corporate clients. Settlement balances and cash collateral are excluded from this analysis;
- Sovereign exposures reflect direct exposures to central and local governments^a, the majority of which are used for hedging interest rate risk relating to local activities. These positions are being actively replaced by non-government instruments such as interest rate swaps. The remaining portion is actively managed reflecting our role as leading primary dealer, market maker and liquidity provider to our clients;
- Financial institution and corporate exposures reflect the country of operations of the counterparty (including foreign subsidiaries and without reference to cross-border guarantees);
- Retail exposures reflect the country of residence of retail customers; and
- Off-balance sheet exposure consists primarily of undrawn commitments and guarantees issued to third parties on behalf of corporate clients. Information on the terms and potential limitations of such facilities is presented on pages 141 and 248.

The Group enters into credit mitigation arrangements for which the reference asset is government debt. The selected countries pages 114 to 119 include only credit mitigation arrangements with counterparties in the relevant country. The analysis of credit derivatives referencing sovereign debt reflects derivative counterparty netting and includes all credit derivatives, regardless of counterparty location.

Note

a In addition, the Group held cash with the central banks of these countries totalling £0.8bn as at 31 December 2011. Other immaterial balances with central banks are classified within loans to financial institutions.

Risk management

Credit risk continued

Analysis of indirect exposures

Indirect exposure to sovereigns can arise through a number of different sources, including credit derivatives referencing sovereign debt; guarantees to savings and investment funds which hold sovereign risk; lending to financial institutions who themselves hold exposure to sovereigns and guarantees, implicit or explicit, by the sovereign to the Group's counterparties. A geographic and industrial analysis of the Group's loans and advances, including lending to European counterparties by type, is set out on pages 93 to 94.

Credit derivatives referencing sovereign debt

The Group enters into credit mitigation primarily for risk management purposes for which the reference asset is government debt. These have the net effect of reducing the Group's exposure in the event of sovereign default. An analysis of the Group's credit derivatives referencing sovereign debt is presented below.

As at 31 December 2011	Spain £m	Italy £m	Portugal £m	Ireland £m	Greece £m	Belgium £m
Fair value						
– Bought	919	1,934	1,047	538	2,197	223
– Sold	(917)	(1,836)	(1,023)	(538)	(2,257)	(227)
Net derivative fair value	2	98	24	–	(60)	(4)
Contract notional amount						
– Bought	(9,429)	(14,056)	(3,659)	(2,782)	(3,300)	(2,755)
– Sold	9,270	13,584	3,609	2,733	3,379	2,755
Net derivative notional amount	(159)	(472)	(50)	(49)	79	–
Impact of credit derivatives in the event of sovereign default (notional less fair value of protection)	(157)	(374)	(26)	(49)	19	(4)

The fair values and notional amounts of credit derivative assets and liabilities would be lower than reported under IFRS if netting was permitted for assets and liabilities with the same counterparty or for which we hold cash collateral. An analysis of the effects of such netting is presented below.

As at 31 December 2011	Spain £m	Italy £m	Portugal £m	Ireland £m	Greece £m	Belgium £m
Fair value						
– Bought	326	681	346	170	669	69
– Sold	(324)	(583)	(322)	(170)	(729)	(73)
Net derivative fair value	2	98	24	–	(60)	(4)
Contract notional amount						
– Bought	(2,924)	(4,742)	(1,027)	(854)	(1,019)	(859)
– Sold	2,765	4,270	977	805	1,098	859
Net derivative notional amount	(159)	(472)	(50)	(49)	79	–
Impact of credit derivatives in the event of sovereign default (notional less fair value of protection)	(157)	(374)	(26)	(49)	19	(4)

Credit derivatives (principally credit default swaps (CDS) and total return swaps) are arrangements whereby the default risk of an asset (reference asset) is transferred from the buyer to the seller of protection. The majority of credit derivatives referencing sovereign assets are bought and sold to support customer transactions and for risk management purposes. Wherever possible, the Group matches the maturity of derivative protection bought with the maturity of the underlying reference assets to help maximise the effectiveness of the mitigation against the exposure.

The contract notional amount represents the value of the reference asset being insured, while the fair value represents the change in value of the reference asset, adjusted for the creditworthiness of the counterparty providing the protection. The net derivative notional amount, representing a reduction in exposures, is not included in the country tables but should be considered alongside the direct exposures shown.

Sovereign CDS would trigger on the occurrence of a credit event as determined by ISDA's Determination Committee. CDS positions are monitored considering counterparty, country of counterparty and concentration level with respect to counterparties and sovereigns. Further information on the credit quality of the Group's derivative assets is presented on page 107.

Group guarantees relating to savings and investment funds

The Group has indirect sovereign exposure through the guarantee of certain savings and investment funds, which hold a proportion of their assets in sovereign debt. As at 31 December 2011, the recognised liability in respect of these guarantees was £41m, with a £1.5bn gross notional exposure.

In addition, a Group associate, Vida Y Pensiones Compania De Seguros, holds investments with a total fair value of £1.2bn relating to certain customer investment products, of which a proportion are guaranteed and the majority comprise sovereign, financial institution and corporate debt in Eurozone countries.

Risk management

Market risk

All disclosures in this section (pages 121 to 129) are unaudited unless otherwise stated

Market risk

Market risk is the risk of the Group suffering financial loss due to the Group being unable to hedge its balance sheet at prevailing market levels. The Group can be impacted by changes in both the level and volatility of prices e.g. interest rates, credit spreads, commodity prices, equity prices and foreign exchange rates.

Overview (audited)

The main sources of risk are traded market risk, non-traded risk and pension risk. Traded risk in the businesses resides primarily in Barclays Capital while non-traded market risk resides mainly in Retail and Business Banking, Barclays Corporate, Barclays Wealth and Group Treasury. Pensions risk is monitored centrally with the cost borne across businesses.

Barclays market risk objectives are to:

- Understand and control market risk by robust measurement, limit setting, reporting and oversight;
- Facilitate business growth within a controlled and transparent risk management framework;
- Ensure that traded market risk in the businesses resides primarily in Barclays Capital; and
- Minimise non-traded market risk.

Organisation and structure (audited)

The BRC reviews and approves market risk appetite for the group. The Group Market Risk Director is responsible for the Barclays Market Risk Control Framework and, under delegated authority from the Chief Risk Officer, sets a limit framework within the context of the approved market risk appetite. Daily market risk reports summarise Barclays market risk exposures against agreed limits and are distributed to the principal risk owners.

Risk management

Market risk continued

The Market Risk Committee approves, and makes recommendations concerning the market risk profile across Barclays. This includes approving Barclays Market Risk Control Framework and Group Policies; reviewing current and forward issues, limits and utilisation; and proposing risk appetite levels for the Board. The Committee is chaired by the Group Market Risk Director and attendees include the Chief Risk Officer, respective business risk managers, group treasury and senior managers from Group Market Risk as well as Internal Audit.

The head of each business, assisted by market risk management, is accountable for all market risks associated with its activities. The head of each business market risk team is responsible for implementing the risk control framework for non-traded market risk, while Barclays Capital Market Risk implements the risk control framework for traded market risk. The control frameworks for traded, non-traded and pensions risk are all governed by the Barclays Market Risk Control Framework, which sets out how market risk should be identified, measured, controlled, reported and reviewed. The Framework also outlines and references Group Market Risk policies.

Market risk oversight and challenge is provided by business committees, Group committees including the Market Risk Committee and Group Market Risk. The chart above gives an overview of the business control structure.

Traded market risk (audited)

Traded market risk arises primarily as a result of client facilitation in wholesale markets. This involves market making, risk management solutions and execution of syndications. Mismatches between client transactions and hedges result in market risk. In Barclays Capital, trading risk is measured for the trading book, as defined for regulatory purposes, and certain banking books.

Risk measurement

Barclays uses a range of complementary technical approaches to measure and control traded market risk including: Daily Value at Risk (DVaR), Expected Shortfall, 3W, primary and secondary stress testing and combined scenario stress testing.

DVaR is an estimate of the potential loss arising from unfavourable market movements, if the current positions were to be held unchanged for one business day. For management purposes Barclays Capital uses a historical simulation methodology with a two-year equally weighted historical period, at the 95% confidence level for all trading portfolios and certain banking books.

Market volatility in 2011 was heightened, particularly in the second half, by uncertainty on the future economic growth and the sovereign debt crisis. The high volatility observations of early 2009 rolled-out of the two year DVaR historical data set, however new tail points were added in the second half of 2011.

As defined by the FSA, a green model is consistent with a good working DVaR model and is achieved for models that have four or fewer back-testing exceptions in a 12-month period. Back-testing counts the number of days when a loss (as defined by the FSA) exceeds the corresponding DVaR estimate, measured at the 99% confidence level. For Barclays Capital's DVaR model, green model status was maintained for 2011.

The DVaR model is regularly assessed and reviewed internally by Group Executive Models Committee and within Barclays Capital.

When reviewing DVaR estimates the following considerations should be taken into account:

- Historical simulation uses the most recent two years of past data to generate possible future market moves, but the past may not be a good indicator of the future;
- The one day time horizon does not fully capture the market risk of positions that cannot be closed out or hedged within one day;
- DVaR is based on positions as at close of business and consequently intra-day risk, the risk from a position bought and sold on the same day, is not captured; and
- DVaR does not indicate the potential loss beyond the 95th percentile.

In part to mitigate these issues, Barclays also uses Expected Shortfall and 3W metrics which use the same two year historical simulation data set as used to calculate DVaR. Expected Shortfall is the average of all one day hypothetical losses beyond the 95% confidence level DVaR while 3W is the average of the three largest one day estimated losses.

Stress testing provides an estimate of potential significant future losses that might arise from extreme market moves or scenarios. Primary stress tests apply stress moves to key liquid risk factors for each of the major trading asset classes including interest rate, credit, commodity, equity foreign exchange and securitised products. Secondary stress tests apply stress moves to less liquid risks. Combined scenarios apply simultaneous shocks to several risk factors, reflecting defined extraordinary, but plausible macro scenarios. This is assessed by applying respective changes on foreign exchange rates, interest rates, credit spreads, commodities and equities to the portfolio.

In 2011, Barclays Capital implemented new regulatory risk models to comply with the CRD3 revisions to the market risk capital requirement. These were Stressed VaR (SVaR), Incremental Risk Charge (IRC) and the All Price Risk (APR). All three models were approved by the FSA for calculation of regulatory capital for designated trading book portfolios. The SVaR approval matches the scope of the DVaR model as used for regulatory capital calculations.

SVaR is an estimate of the potential loss arising from a 12 month period of significant financial stress. SVaR uses DVaR methodology based on inputs calibrated to historical data from a continuous 12 month period that maximises the DVaR based capital at a 99% one-tailed confidence limit.

IRC is computed on all fixed income positions subject to specific market risk. It calculates the incremental risk arising from rating migrations and defaults, beyond what is already captured in specific market risk, to a 99.9% confidence level over a one year holding period.

APR replaces specific risk for the correlation trading portfolio and is intended to capture all risk factors relevant to corporate nth-to-default and tranching credit derivatives. As for IRC, the capital requirement is based on a 99.9% confidence interval over a one year holding period.

When reviewing estimates produced by the CRD3 models the following considerations should be taken into account:

- SVaR uses the same methodology as the DVaR model and hence is subject to the same considerations as this model. In addition, SVaR is calibrated to a specific 12 month historical stress period which may not reflect a stress period that could arise in the future;
- In common with DVaR, neither IRC nor APR indicate the potential loss beyond the 99th percentile, and they do not measure risk from trades which are bought and sold in between weekly runs; and
- Both IRC and APR are computed to a 1-in-1,000 year confidence level which cannot be meaningfully backtested. This is in contrast to DVaR, which can be meaningfully backtested.

Risk control

Market risk is controlled through the use of an appropriate limit framework. Limits are set at the total Barclays Capital level, risk factor level (e.g. interest rate risk) and business line level (e.g. Emerging Markets). Stress limits and many book limits, such as foreign exchange and interest rate sensitivity limits, are also used to control risk appetite.

The total DVaR limit, risk factor DVaR limits, and 3W limit are approved by BRC. Primary stress limits are approved by the Chief Risk Officer and are tabled for noting by BRC. Compliance with limits is monitored by Barclays Capital Market Risk with oversight provided by Group Market Risk.

In 2011, Group Market Risk continued its ongoing programme of conformance visits to Barclays Capital business areas. These visits review both the current market risk profile and potential market risk developments, as well as verifying conformance with Barclays Market Risk Control Framework.

Risk reporting

Barclays Capital Market Risk produce a number of detailed and summary market risk reports daily, weekly, fortnightly and monthly for business and risk managers. These are also sent to Group Market Risk for review and inclusion in the Group Daily Market Risk Report. A risk summary is presented at the Market Risk Committee and Barclays Capital Traded Positions Risk Review.

Analysis of traded market risk exposures (Audited)

The trading environment in 2011 was characterised by weak underlying economic growth as well as uncertain market direction resulting in lower client activity particularly in the second half of 2011. In this environment, Barclays Capital's market risk exposure, as measured by average total DVaR, increased 8% to £57m (2010: £53m).

The three main risk factors affecting DVaR were spread, interest rate and equity risk. From 2010 levels, average DVaR for spread risk fell by £3m (6%) and interest rate DVaR fell by £16m (48%) reflecting cautious positioning. Equity DVaR increased by £4m (29%) on continued growth of the global equities business and product offerings.

The diversification effect fell 38% to an average of £40m in 2011 due to increasing cross asset correlation as the European crisis worsened. However, the tail risk indicated by the expected shortfall and 3W measures fell 9% to £71m and 16% to £121m respectively from 2010 levels.

The daily average, maximum and minimum values of DVaR, Expected Shortfall and 3W were calculated as below:

The daily average, maximum and minimum values of DVaR, Expected Shortfall and 3W (audited)	Year ended 31 December 2011			Year ended 31 December 2010

Total DVaR	57	88	33	53	75	36
Expected Shortfall	71	113	43	78	147	47
3W	121	202	67	144	311	72

Note

^a The high and low DVaR figures reported for each category did not necessarily occur on the same day as the high and low DVaR reported as a whole. Consequently a diversification effect balance for the high and low DVaR figures would not be meaningful and is therefore omitted from the above table.

Market risk continued

Analysis of trading revenue

The histogram above shows the distribution of daily trading revenue for Barclays Capital in 2011 and 2010. Trading revenue excludes income from Private Equity and Principal Investments.

The average daily revenue in 2011 was £41m, 21% lower than the 2010 average. In 2011, there were more negative days than in 2010, with the majority of these days occurring during the highly volatile second half of 2011.

Non-traded interest rate risk (audited)

Non-traded interest rate risk arises from the provision of retail and wholesale (non-traded) banking products and services, when the interest rate repricing date for loans (assets) is different to the repricing date for deposits (liabilities). This includes current accounts and equity balances which do not have a defined maturity date and an interest rate that does not change in line with Base rate changes. The risk resides mainly in Retail and Business Banking, Barclays Corporate, and Group Treasury. Barclays objective is to minimise non-traded interest rate risk and this is achieved by transferring interest rate risk from the business to a local or Group Treasury, which in turn hedges the net exposure via Barclays Capital with the external market. Limits exist to ensure no material risk is retained within any business or product area. Trading activity is not permitted outside Barclays Capital.

Risk measurement

The risk in each business is measured and controlled using both an income metric (Annual Earnings at Risk) and value metrics (Economic Value of Equity, Economic Capital, DVaR, risk factor stress testing, scenario stress testing).

Annual Earnings at Risk (AEaR) measures the sensitivity of net interest income over the next 12 month period. It is calculated as the difference between the estimated income using the current yield curve and the lowest estimated income following a 100 basis point increase or decrease in interest rates, subject to a minimum interest rate of 0%.

The main model assumptions are:

- The balance sheet is kept at the current level i.e. no growth is assumed; and
- Balances are adjusted for an assumed behavioural profile. This includes the treatment of fixed rate loans including mortgages.

Economic Value of Equity (EVE) calculates the change in the present value of the banking book for a 100 basis point upward and downward rate shock. This calculation is equivalent to that of AEaR except EVE is a present value sensitivity while AEaR is an income sensitivity.

Economic Capital (EC) consistent models are used to measure: recruitment risk, the risk from customers not taking up their fixed rate loan offer; and prepayment risk, the risk of a customer deciding not to carry on with their fixed rate loan. Behavioural profiles are also used when modelling the balance sheet.

A combination of DVaR, stress limits, net open position and specific currency or tenor limits are in place for all local Treasury activities.

Notes

a DVaR continues to fall from 2010 levels reaching a low of £33m for the year.

b A high of £88m was reached in August as the euro sovereign crisis continued to deteriorate, impacting market liquidity.

c Towards the end of 2011, total DVaR remained elevated in part due to decreased cross asset diversification, but remains well within the defined risk appetite.

Risk control

Market risk is controlled through the use of limits on the above risk measures. Limits are set at the total business level and then cascaded down. The total business level limits for AEaR, EVE, EC, DVaR and stress are agreed by the Market Risk Committee. Compliance with limits is monitored by the respective business market risk team with oversight provided by Group Market Risk.

Market risk is also controlled through an ongoing programme of conformance reviews by both the business market risk departments and Group Market Risk. These reviews examine both the current market risk profile and potential market risk developments, as well as verifying adherence with Barclays policies and standards as detailed in the Barclays Market Risk Control Framework.

The interest rate risk for balances with no defined maturity date and an interest rate that is not linked to the base rate is managed by Group Treasury. A series of continuous rolling hedges are used to mitigate the interest rate risk in the banking book. In 2011, the maturity of the rolling hedge programme was extended following a review by Group Treasury Committee of the most appropriate maturity. This revision was agreed by the Group Executive Committee.

Risk reporting

Each business area is responsible for their respective market risk reports. A combination of daily and monthly risk reports are produced and used by the business. These are also sent to Group Market Risk for review and inclusion in the daily market risk report. A risk summary is also presented at the Market Risk Committee and respective Asset and Liability Committees.

Analysis of net interest income sensitivity

The table below shows sensitivity analysis on the pre-tax net interest income for the non-trading financial assets and financial liabilities held at 31 December 2011 and 31 December 2010. The sensitivity has been measured using AEaR methodology as described above. The benchmark interest rate for each currency is set as at 31 December 2011. The figures include the effect of hedging instruments but exclude banking book exposures held or issued by Barclays Capital as these are measured and managed using DVaR.

Net interest income sensitivity (AEaR) by currency (audited)	31 December 2011		31 December 2010	
	+100 basis points	-100 basis points	+100 basis points	-100 basis points
	£m	£m	£m	£m
GBP	68	(321)	297	(377)
US\$	(9)	(11)	(12)	(8)
EUR	(41)	(5)	(16)	12
ZAR	31	(29)	13	(10)
Others	14	(5)	-	-
Total	63	(371)	282	(383)
As percentage of net interest income	0.52%	(3.04%)	2.25%	(3.06%)

Non-traded interest rate risk, as measured by AEaR, was £371m as at 31 December 2011, a decrease of £12m compared to 31 December 2010. The decrease in risk reflects a reduction between Group Equity Balances and associated hedges, partly offset by margin compression in the retail bank. If the interest rate hedges had not been in place the AEaR for 2011 would have been £553m (2010: £601m). AEaR is measured for a reduction in rates for the purposes of this analysis.

Group net interest income	12,201	12,523

Retail and Business Banking, Corporate and Wealth Net Interest Income

Barclays distinguishes the relative net interest contribution from each of customer assets and customer liabilities, and separates this from the contribution delivered by non-customer net interest income, which principally arises from the Group hedging activities.

Customer interest income

Customer net interest income increased 8% to £9,849m, driven by increases in the customer liability margin and growth in average customer asset and liability balances. Retail customer liabilities grew principally due to demand for savings products in the UK.

The customer asset margin declined to 2.20% (2010: 2.25%), reflecting an increase in the cost of funds across each of the individual RBB, Corporate and Wealth businesses. This was partially offset by increased customer pricing across most of the businesses.

The customer liability margin increased to 1.06% (2010: 0.86%) reflecting the increase in the cost of funds and therefore value generated from RBB, Corporate and Wealth customer liabilities.

Non-customer interest income

Non-customer net interest income decreased 5% to £2,140m, reflecting a 7% reduction in the benefits from Group hedging activities to £1,992m. Group hedging activities utilise structural interest rate hedges to mitigate the impact of the low interest rate environment on customer liabilities and the Group's equity.

Product structural hedges generated a lower contribution of £1,168m (2010: £1,403m), as hedges were maintained at lower market interest rates. The extended duration profile constructed in H1 2011 continues to moderate this impact. Based on the market curve as at the end of 2011 and the on-going hedging strategy, fixed rate returns on product structural hedges are expected to continue to make a significant but declining contribution in 2012.

The contribution from equity structural hedges in RBB, Corporate and Wealth increased to £824m (2010: £731m) including a £216m increase in gains on sale of hedging instruments.

Other Group Net Interest Income

Barclays Capital net interest income increased 5% to £1,177m, including a £247m increase in gains on sale of hedging instruments.

Head Office and Investment Management net interest expense of £965m (2010: £29m income) principally reflects a reduction in income which is transferred from trading income within Head Office relating to interest rate swaps used for hedge accounting purposes, together with an increase in amounts transferred to businesses relating to gains arising from the sale of hedging instruments.

Notes

- Product structural hedges convert short term interest margin volatility on product balances (such as non-interest bearing current accounts and managed rate deposits) into a more stable medium term rate and are built on a monthly basis to achieve a targeted maturity profile.
- Equity structural hedges are in place to manage the volatility in net earnings generated by businesses on the Group's equity, with the impact allocated to businesses in line with their economic capital usage.
- Includes contribution from equity structural hedging. Total Group income from equity structural hedges increased to £2,109m (2010: £1,788m) including £1,285m (2010: £1,057m) that was allocated to Barclays Capital and Head Office, primarily due to increased gains on sale of hedging instruments partially offset by a decline in ongoing hedging contribution.

Net Interest Margin

The net interest margin for RBB, Corporate and Wealth remained stable at 2.04% (2010: 2.03%). Consistent with prior periods the net interest margin is expressed as a percentage of the sum of average customer assets and liabilities, to reflect the impact of the margin generated on retail and commercial banking liabilities.

The net interest margin expressed as a percentage of average customer assets only, improved to 3.77% (2010: 3.67%).

An analysis is provided below for RBB, Corporate and Wealth for each of the component parts of net interest income.

	UK RBB %	Europe RBB %	Africa RBB %	Barclaycard %	Barclays Corporate %	Barclays Wealth %	Total RBB, Corporate and Wealth %
2011							
Customer asset margin	1.22	0.87	3.11	9.52	1.35	0.77	2.20
Customer liability margin	0.87	0.65	2.27	–	1.00	0.99	1.06
Non-customer generated margin	0.46	0.47	0.32	(0.08)	0.29	0.36	0.36
Net interest margin	1.51	1.28	3.07	9.44	1.46	1.29	2.04
Average customer assets (£m)	118,503	43,749	38,877	30,289	68,667	17,546	317,631
Average customer liabilities (£m)	107,761	17,702	29,473	–	70,632	44,536	270,104
2010							
Customer asset margin	1.26	1.02	3.12	9.35	1.43	0.81	2.25
Customer liability margin	0.68	0.11	2.25	–	0.76	0.87	0.86
Non-customer generated margin	0.47	0.41	0.18	0.42	0.41	0.37	0.40
Net interest margin	1.45	1.16	2.94	9.77	1.53	1.22	2.03
Average customer assets (£m)	113,713	41,509	41,328	28,811	69,831	14,529	309,721
Average customer liabilities (£m)	104,508	17,263	27,731	–	60,946	40,985	251,433

The customer asset margin is presented as a percentage of interest earned on customer assets (excluding the impact of hedging), relative to the average internal funding rate divided by average customer assets. The customer liability margin is calculated as the interest on customer liabilities (excluding the impact of hedging), relative to the average internal funding rate, divided by average customer liabilities.

The non-customer generated margin is calculated as non-customer interest income (principally comprising the impact of both the product and equity structural hedge) as a percentage of the sum of average customer assets and liabilities, consistent with the presentation of the net interest margin.

The Group's internal funding rate prices intra-group funding and liquidity to appropriately give credit to businesses with net surplus liquidity and to charge those businesses in need of wholesale funding at a rate that is driven by prevailing market rates including a term premium. The objective is to price internal funding for assets and liabilities in line with the cost of alternative funding, which ensures there is consistency between retail and wholesale sources.

Risk management

Market risk continued

Foreign exchange risk (audited)

The Group is exposed to two sources of foreign exchange risk.

a) Transactional foreign currency exposure

Transactional foreign exchange exposures represent exposure on banking assets and liabilities, denominated in currencies other than the functional currency of the transacting entity. The Group's risk management policies prevent the holding of significant open positions in foreign currencies outside the trading portfolio managed by Barclays Capital which is monitored through DVaR.

There were no material net transactional foreign currency exposures outside the trading portfolio at either 31 December 2011 or 2010. Due to the low level of non-trading exposures no reasonably possible change in foreign exchange rates would have a material effect on either the Group's profit or movements in equity for the year ended 31 December 2011 or 2010.

b) Translational foreign exchange exposure

The Group's investments in overseas subsidiaries and branches create capital resources denominated in foreign currencies principally US\$, Euro and South African Rand. Changes in the Sterling value of the investments due to foreign currency movements are captured in the currency translation reserve, resulting in a movement in Core Tier 1 capital.

During 2011, total structural currency exposures net of hedging instruments increased from £15.3bn to £16.7bn, driven by redemption of \$2bn Reserve Capital Instruments that formed part of the economic hedges. Structural currency exposures pre economic hedges remained broadly flat. US\$ exposures increased by \$8bn due to the restructuring of our holding in BlackRock, Inc from a GBP entity to a US\$ entity, offset by the increase in USD derivatives which hedge net investments. South African Rand exposures increased £1.1bn as a result of a reduction in the hedging of the investment in Absa Group. Euro exposures reduced by £0.8bn driven by the Spain goodwill write off, which had no impact on Euro denominated Core Tier 1 capital as goodwill is deducted for regulatory capital purposes.

Functional currency of operations (audited)						
	Foreign currency net investments £m	Borrowings which hedge the net investments £m	Derivatives which hedge the net investments £m	Structural currency exposures pre economic hedges £m	Economic hedges £m	Remaining structural currency exposures £m
As at 31 December 2011						
US Dollar	30,335	7,217	8,094	15,024	5,072	9,952
Euro	6,568	4,096	280	2,192	2,017	175
Rand	4,258	–	–	4,258	–	4,258
Japanese Yen	681	293	336	52	–	52
Other	3,144	–	930	2,214	–	2,214
Total	44,986	11,606	9,640	23,740	7,089	16,651
As at 31 December 2010						
US Dollar	22,646	7,406	–	15,240	6,330	8,910
Euro	7,327	3,072	1,294	2,961	2,069	892
Rand	4,826	–	1,626	3,200	–	3,200
Japanese Yen	5,304	3,603	1,683	18	–	18
Swiss Franc	152	–	157	(5)	–	(5)
Other	3,139	–	824	2,315	–	2,315
Total	43,394	14,081	5,584	23,729	8,399	15,330

The economic hedges primarily represent the US Dollar and Euro Preference Shares and Reserve Capital Instruments in issue that are treated as equity under IFRS, and do not qualify as hedges for accounting purposes. During the year \$2bn Reserve Capital Instruments were redeemed.

The impact of a change in the exchange rate between Sterling and any of the major currencies would be:

- A higher or lower Sterling equivalent value of non-Sterling denominated capital resources and risk weighted assets. This includes a higher or lower currency translation reserve within equity, representing the retranslation of non-Sterling subsidiaries, branches and associated undertakings net of the impact of foreign exchange rate changes on derivatives and borrowings designated as hedges of net investments;
- A higher or lower profit after tax, arising from changes in the exchange rates used to translate items in the consolidated income statement; and
- A higher or lower value of available for sale investments denominated in foreign currencies, impacting the available for sale reserve.

Other market risks

Barclays maintains a number of defined benefit pension schemes for past and current employees. The ability of the pension fund to meet the projected pension payments is maintained through investments and regular bank contributions. Pension risk arises because the estimated market value of the pension fund assets might decline; or their investment returns might reduce; or the estimated value of the pension liabilities might increase. In these circumstances, Barclays could be required or might choose to make extra contributions to the pension fund. Financial details of the pension fund are in Note 39 on page 261.

Asset management structural risk arises where the fee and commission income earned by asset management products is affected by a change in market levels, primarily through the link between income and the value of assets under management. Asset management structural risk mainly resides in Barclays Wealth. It is Barclays policy that businesses monitor and regularly assess potential hedging strategies.

Disclosures about certain trading activities including non-exchange traded commodity contracts

The Group provides a fully integrated service to clients for base metals, precious metals, oil, power, natural gas, coal, freight, emission credits, structured products and other related commodities. This service offering continues to expand, as market conditions allow, through the addition of new products and markets.

The Group offers both OTC and exchange traded derivatives, including swaps, options, forwards and futures and enters into physically settled contracts in base metals, power and gas, oil and related products. Physical commodity positions are held at fair value and reported under the Trading Portfolio in Note 15 on page 219.

The fair values of physical and derivative positions are primarily determined through a combination of recognised market observable prices, exchange prices, and established inter-commodity relationships. Further information on fair value measurement of financial instruments can be found in Note 20 on page 225.

Credit risk exposures are actively managed by the Group. Refer to the Credit Risk section on page 107 for more information on the Group's approach to credit risk management and the credit quality of derivative assets.

The tables below analyse the overall fair value of the OTC commodity derivative contracts by movement over time and contractual maturity. As at 31 December 2011 the fair value of the commodity derivative contracts reflects a gross positive fair value of £20,588m (2010: £22,521m) and a gross negative value of £20,133m (2010: £22,884m).

Movement in fair value of commodity derivative positions	2011 £m	2010 £m
Fair value of contracts outstanding as at 1 January	(363)	907
Contracts realised or otherwise settled during the period	1,494	(3,124)
Fair value of new contracts entered into during the period	(33)	(1,068)
Other changes in fair values	(643)	2,922
Fair value of contracts outstanding as at 31 December	455	(363)

Maturity analysis of commodity derivative fair value	2011 £m	2010 £m
Not more than one year	447	(1,859)
Over one year but not more than five years	35	977
Over five years	(27)	519
Total	455	(363)

On occasion, Barclays will hold dominant positions in base metals on the London Metal Exchange (LME), as per the Exchange's definition. Barclays complies fully with LME's Lending Guidance, which is the Exchange's mechanism for limiting the impact of dominant market positions by prescribing the amount and level at which positions must be lent.

Risk management

Funding risk – Capital

All disclosures in this section (pages 130 to 138) are unaudited unless otherwise stated

Capital risk

Capital risk is the risk that the Group is unable to maintain appropriate capital ratios which could lead to:

- (i) an inability to support business activity;
- (ii) a failure to meet regulatory requirements; or
- (iii) changes to credit ratings.

Capital Management is integral to the Group's approach to financial stability and sustainability management and is therefore embedded in the way our businesses and legal entities operate. Our Capital Management strategy is driven by the strategic aims of the Group and the risk appetite set by the Board.

Our objectives are achieved through well embedded capital management practices:

Primary Objectives	Core Practices
Provide a viable and sustainable business offering by maintaining adequate capital to cover the Group's current and forecast business needs and associated risks	<ul style="list-style-type: none"> – Monitor internal targets for capital demand and ratios – Meet minimum regulatory requirements at all times in the UK and in all other jurisdictions that the Group operates in, such as the United States and South Africa where regulated activities are undertaken
Ensure the Group and legal entities maintain adequate capital to withstand the impact of the risks that may arise under the stressed conditions analysed by the Group	<ul style="list-style-type: none"> – Perform Group-wide internal and regulatory stress tests – Maintain capital buffers over regulatory minima – Develop contingency plans for severe (stress management actions) and extreme stress tests (recovery actions)
Support a strong credit rating	<ul style="list-style-type: none"> – Maintain capital ratios aligned with rating agency expectations – Implementation of the Capital Principal Risk management framework and ensure alignment with leading international and regulatory practices
Support the Group's growth and strategic options	<ul style="list-style-type: none"> – Maintain a capital plan on a short-term and medium term basis aligned with strategic objectives

Our approach to capital risk management

We adopt a forward-looking, risk based approach to Capital Risk Management. Capital demand and supply is actively managed on a centralised basis, at a business level, at a local entity level and on a regional basis taking into account the regulatory, economic and commercial environment in which Barclays operates.

Capital planning

Capital forecasts are managed on a top-down and bottom-up analysis through both Short Term (Year 1 monthly) and Medium Term (3 year) financial planning cycles. The Group capital plan is developed with the objective of maintaining capital that is adequate in quantity and quality to support our risk profile and business needs. As a result the Group holds a diversified pool of capital resources that provides strong loss absorbing capacity and optimised returns.

Local management ensures compliance with an entity's minimum regulatory capital requirements by reporting to local Asset and Liability Committees with oversight by the Treasury Committee, as required.

Capital allocation

Capital allocations are approved by the Group Executive committee and monitored by the Treasury Committee, taking into consideration the risk appetite, growth and strategic aims of the Group. Barclays Bank PLC is the primary source of capital to its legal entities. Regulated legal entities are, at a minimum, allocated adequate capital to meet their current and forecast regulatory and business requirements.

Risk identification

Capital demand is assessed and quantified for credit, market, operational, interest rate risk on the banking book, pension obligation risk and securitisation risks, in line with the FSA's regulatory requirements.

Treasury works closely with Group Risk, businesses and legal entities to support a proactive approach to identifying sources of capital ratio volatilities which are incorporated in the Group's capital plan. We monitor capital risks against firm-specific and macroeconomic early warning indicators and report to the Treasury Committee, associated with clear escalation channels to senior management.

Following the financial crisis, managing for regulatory change has become fundamental to our capital planning process as it provides a forward looking assessment of the impact of mandated changes which allows us to understand the commercial implications.

Stress testing

Internal stress testing is undertaken to quantify and understand the impact of sensitivities on the capital plan and capital ratios, arising from 1 in 7 year and 1 in 25 year stresses. Actual recent economic, market and peer institution stresses are used to inform the assumptions of our stress tests and assess the effectiveness of our mitigation strategies.

Group also undertakes stress tests prescribed by the FSA and EBA. Legal entities undertake stress tests prescribed by their local regulators. These stress tests inform decisions on the size and quality of capital buffers required and the results are incorporated into the Group capital plan to ensure adequacy of capital under normal and severe, but plausible stressed conditions.

Risk mitigation

As part of the stress testing process we identify the actions that should be taken to mitigate the risks that could arise in the event of material adverse changes in the current economic and business outlook.

As an additional layer of protection, the Barclays Recovery Plan also defines the actions and implementation strategies for these actions available for the Group to increase or preserve our capital resources in the event that stress events are more extreme than originally forecast. Barclays has participated in the FSA's Pilot project of developing a Recovery Plan since 2010 and is progressing with compliance by June 2012.

Transferability of capital

The Group's policy is for surplus capital held in Group entities to be repatriated to Barclays Bank PLC in the form of dividends and/or capital repatriation, subject to local regulatory requirements, exchange controls and tax implications. This approach provides optimal flexibility on the re-deployment of capital across legal entities. The Group is not aware of any material impediments to the prompt transfer of capital resources or repayment of intra-group liabilities when due.

Governance

Our capital plans are underpinned by the Capital Management Framework, which includes our capital management policies and practices that are approved by the Capital Committee, implemented consistently and aimed at delivering on our objectives. The Treasury Committee and the Board approve the Group capital plan, stress tests and Recovery Plan. The Group Treasury Committee manages compliance with the Group's capital management objectives. The Committee reviews actual and forecast capital demand and resources on a monthly basis. The BRC annually reviews risk appetite and then analyses the impacts of stress scenarios on the Group capital forecast (see pages 142 and 143) in order to understand and manage the Group's projected capital adequacy, amongst other things.

Resources

Global teams operate in accordance with the Group's policies and procedures, having direct access to local regulators and businesses in order to support individual capital management at a legal entity level.

Senior Management awareness and transparency

Capital ratios, early warning indicators and movements in capital demand and supply are reported to Treasury Committee monthly.

Capital management information is readily available at all times to support the Executive Managements strategic and day-to-day business decision making, as may be required.

The Group submits its Board approved ICAAP document to the FSA on an annual basis, which forms the basis of the Individual Capital Guidance set by the FSA.

Pillar 3 disclosures are publicly available as a separate document in line with the Basel 2 and FSA requirements.

Funding risk – Capital continued

Capital adequacy

Key capital ratios					
	Basel 2 Minimum	Basel 3 Minimum	As at 31.12.11	As at 31.12.10	As at 31.12.09
Core Tier 1	n/a	7.0%	11.0%	10.8%	10.0%
Tier 1	n/a	n/a	12.9%	13.5%	13.0%
Total capital	8.0%	10.0%	16.4%	16.9%	16.6%

Barclays has continued to maintain a capital buffer over the FSA's minimum regulatory capital requirements.

Capital supply

Regulatory capital summary (audited)			
	2011 £m	2010 £m	2009 £m
Core Tier 1 capital	43,066	42,861	38,437
Tier 1 capital	50,473	53,546	49,637
Tier 2 capital	16,063	16,019	14,703
Deductions from total capital	(2,588)	(2,250)	(880)
Total capital resources	63,948	67,315	63,460

Core Tier 1 capital increased by £0.2bn to £43.1bn primarily driven by:

- £2.6bn capital generated from retained profits excluding own credit gain, impairment of investment in BlackRock, Inc. and goodwill impairment, which are added back for regulatory capital purposes;
- £1.1bn reduction in the value of the investment in BlackRock, Inc. prior to impairment;
- £0.5bn net increase from the impact of share awards on shareholders' funds;
- £1.3bn reduction reflecting contributions made to the UK Retirement Fund in 2011;
- £1.3bn reduction due to foreign currency movements, primarily depreciation of the South African Rand and Euro against Sterling; and
- £0.8bn increase resulting from lower regulatory deductions.

Total capital resources decreased by £3.4bn to £63.9bn principally as a result of the debt buy-back in December 2011 of £1.9bn Reserve Capital Instruments and £0.5bn Tier 1 notes that will not qualify as Tier 1 capital under Basel 3 and the further redemption of £1.3bn of Reserve Capital Instruments.

Capital composition

Key capital ratios	2011	2010	2009
Core Tier 1	11.0%	10.8%	10.0%
Tier 1	12.9%	13.5%	13.0%
Total capital	16.4%	16.9%	16.6%
Capital Resources	2011 £m	2010 £m	2009 £m

Total	1,563,527	1,489,645	390,999	398,031

Group risk weighted assets decreased by 2% to £391 bn (2010: £398bn) driven by:

- approximately £30bn increase from implementation of CRD3 incorporating Basel 2.5, predominantly in modelled market risk;
- £26bn reduction across credit, counterparty and market risk in Barclays Capital, due to lower levels of activity combined with risk reduction, offset by a £4bn increase relating to market stress. £11 bn reduction from currency movements, primarily depreciation of the Rand and Euro against Sterling;
- £9bn reduction due to credit market exposure sell down in Barclays Capital; and
- £5bn increase from business growth, £2bn relating to UK RBB and Barclays Corporate, reflecting delivery against Project Merlin targets, and £3bn from Barclaycard acquisitions.

Adjusted gross leverage

Adjusted gross leverage as at 31 December	2011 £m	2010 £m
Total assets ^a	1,563,527	1,489,645
Counterparty net/collateralised derivatives ^b	(491,716)	(377,756)
Assets held in respect of linked liabilities to customers under investment contracts ^c	(1,681)	(1,947)
Net settlement balances and cash collateral	(61,913)	(48,108)
Goodwill and intangible assets	(7,846)	(8,697)
Adjusted total tangible assets	1,000,371	1,053,137
Total qualifying Tier 1 capital	50,473	53,546
Adjusted gross leverage	20	20
Adjusted gross leverage (excluding liquidity pool)	17	17
Ratio of total assets to shareholders' equity	24	24
Ratio of total assets to shareholders' equity (excluding liquidity pool)	22	21

Barclays continues to manage its balance sheet within limits and targets for balance sheet usage. The adjusted gross leverage was 20x as at 31 December 2011 (2010: 20x) principally as a result of a reduction in qualifying Tier 1 capital to £50.5bn (2010: £53.5bn), offset by a reduction in adjusted total tangible assets by 5% to £1,000bn. At month ends during 2011 the ratio moved in a range from 20x to 23x, with fluctuations arising primarily within collateralised reverse repurchase lending and high quality trading portfolio assets. Significant monthly fluctuations comprised:

- an increase from 20x at December 2010 to 22x at February 2011 driven by an increase in reverse repurchase agreements and holdings of trading portfolio assets and a decrease in Tier 1 capital;
- a fall in June 2011 from 22x to 20x driven by an increase in Tier 1 capital, and decreases in holdings of trading portfolio assets, cash balances and reverse repurchase agreements;
- a steady increase to 23x in August 2011, driven by a decrease in Tier 1 capital, and an increase in reverse repurchase agreements as well as an increase in cash balances; and
- a decrease to 20x in December 2011 resulting from decreases in reverse repurchase agreements and holdings of trading portfolio assets.

Adjusted total tangible assets include cash and balances at central banks of £106.9bn (2010: £97.6bn). Excluding these balances, the balance sheet leverage would be 18x (2010: 18x). Excluding the liquidity pool, leverage would be 17x (2010: 17x).

The ratio of total assets to total shareholders' equity was 24x as at 31 December 2011 (2010: 24x). The ratio moved within a month end range of 24x to 28x, driven by trading activity fluctuations noted above and changes in gross interest rate derivatives and settlement balances. Significant drivers of fluctuations other than those noted above comprised:

- the increase from 24x at December 2010 to 26x at April 2011 was affected by increases in settlement balances, offset by decreases in gross derivative balances;
- a further step up in April 2011 from 26x to 28x in October 2011 arose from an increase in gross derivatives balances; and
- a decrease from 28x to 24x in December 2011 as a result of decreases in settlement balances in addition to those movements noted above.

Group Treasury agrees adjusted tangible asset targets at a segment level to manage the Barclays balance sheet and leverage ratio. Barclays Capital's adjusted tangible assets are managed and reviewed monthly by the Corporate and Investment Banking Treasury Committee which includes members of Treasury, Finance and the businesses. The Committee agrees limits with each business across Barclays Capital and monitors balance sheet usage against those limits. Businesses were required to manage the balance sheet to defined limits and were not permitted to exceed them without prior approval by nominated Committee members. Barclays continues to operate within limits and targets for balance sheet usage as part of its balance sheet management activities.

Notes

a Includes Liquidity Pool of £152bn (2010: £154bn).

b Comprising counterparty netting of £440,592m (2010: £340,467m) and collateral held of £51,124m (2010: £37,289m) as disclosed on page 108.

c Comprising financial assets designated at fair value and associated cash balances.

Risk management

Funding risk – Capital continued

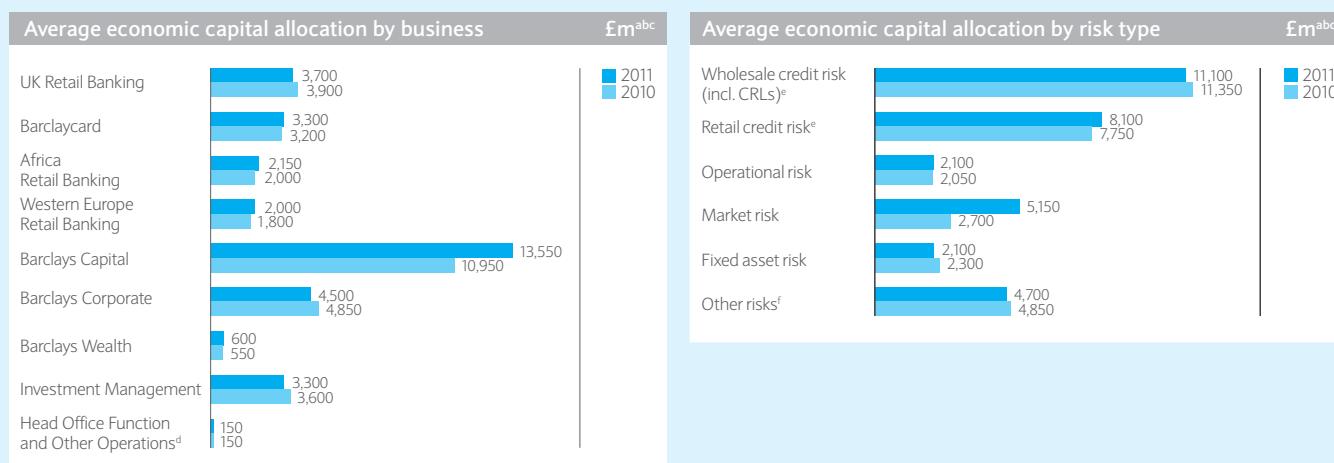

Economic capital

Economic capital is an internal measure of the risk profile of the bank expressed as the estimated stress loss at a 99.98% confidence level. Barclays assesses capital requirements by measuring the Group's risk profile using both internally and externally developed models. The Group assigns economic capital primarily within the following risk categories: credit risk, market risk, operational risk, fixed asset risk (property and equipment) and pension risk.

The Group regularly reviews its economic capital methodology and benchmarks outputs to external reference points. The framework uses default probabilities during average credit conditions, rather than those prevailing at the balance sheet date, thus seeking to remove cyclicality from the economic capital calculation. The economic capital framework takes into consideration time horizon, correlation of risks and risk concentrations. Economic capital is allocated on a consistent basis across all of Barclays businesses and risk activities.

Economic capital is used as part of the Group's Internal Capital Adequacy Assessment Process (ICAAP) and for assessing the Group's Financial Volatility within the Risk Appetite framework.

In January 2011, we implemented a new Market Risk economic capital framework. The new market risk framework calibrates economic capital at the 99.98% confidence level using a consistent stress calibration across all asset classes, rather than the calibration used in the previous model that was based on current market volatility.

The available capital resources to support economic capital comprise adjusted shareholders' equity including preference shares but excluding other non-controlling interests.

The average supply of capital to support the economic capital framework ^a	Average 2011 £m	Average 2010 £m
Shareholders' equity excluding non-controlling interests less goodwill ^g	43,800	41,400
Adjusted for:		
Retirement benefits liability representing a non-cash reduction in shareholders' equity	150	450
Cash flow hedging reserve representing amounts that will be offset against gains and losses on hedged items when recognised in the income statement	(450)	(700)
Unrealised gains and losses on available for sale securities	550	150
Cumulative gains arising on the fair value changes in own credit	(1,300)	(450)
Preference shares included in economic capital supply are issued to optimise the Groups long term capital base	5,850	5,850
Average shareholders' equity for economic purposes excluding goodwill	48,600	46,700

Notes

a Calculated using an adjusted average over the year and rounded to the nearest £50m.

b Total period end average economic capital requirement (including pension risk and excluding goodwill) as at 31 December 2011 stood at £35,800m (2010: £34,750m).

c Average economic capital charts exclude the economic capital calculated for pension risk (average pension risk for 2011 is £2,550m compared with £3,750m in 2010).

d Includes Transition Businesses and capital for central function risks.

e Includes credit risk loans.

f Includes investments in associates, private equity risk, insurance risk, residual value and business risk. Also includes the Group's investment in BlackRock, Inc.

g Total available capital resources for economic capital purposes exclude goodwill and intangible assets related to business acquisitions.

Ongoing Capital Management Risks

Capital ratio sensitivity to foreign exchange rate movements

The Group has capital resources and risk weighted assets (RWAs) denominated in foreign currencies. Changes in foreign exchange rates result in changes in the Sterling equivalent value of foreign currency denominated capital resources and RWAs. As a result, the Group's regulatory capital ratios are sensitive to foreign currency movements.

The Group's capital ratio hedge strategy is to minimise the volatility of the capital ratios caused by foreign exchange rate movements. To achieve this, the Group aims to maintain the ratio of foreign currency Core Tier 1, Tier 1 and Total Capital resources to foreign currency RWAs the same as the Group's consolidated capital ratios.

The Group's investments in foreign currency subsidiaries and branches, to the extent that they are not hedged, translate into Sterling upon consolidation creating Core Tier 1 capital resources sensitive to foreign currency movements. Changes in the Sterling value of the investments due to foreign currency movements are captured in the currency translation reserve, resulting in a movement in Core Tier 1 capital.

To create foreign currency Tier 1 and Total Capital resources additional to the Core Tier 1 capital resources, the Group issues, where possible, debt capital in non-Sterling currencies. This is primarily achieved by the issuance of debt capital from Barclays Bank PLC in US\$ and EUR, but can also be achieved by subsidiaries issuing capital in local currencies, such as South Africa.

Regulatory developments

Regulators assess the Group's capital position and target levels of capital resources on an ongoing basis and there have been a number of recent developments in regulatory capital requirements, including increases, which are likely to have a significant impact on the Group (such as Basel 3 and its proposed implementation in the EU under the Capital Requirements Regulation and CRD4). Increased capital requirements and changes to what is defined to constitute capital may constrain the Group's planned activities and could increase costs and contribute to adverse impacts on the Group's earnings. During periods of market dislocation, increasing the Group's capital resources in order to meet targets may prove more difficult or costly.

The impact of regulatory changes are therefore assessed and monitored by Group Treasury and Group Risk and factored into the capital planning process which ensures that the Group always maintains adequate capital to meet its minimum regulatory capital requirements.

Basel 3 and CRD4 (European Union implementation of Basel 3)

In December 2010, the Basel Committee on Banking Supervision (BCBS), issued the final text of the Basel 3 rules, providing details of the global standards endorsed by the G20 leaders at their November 2010 Seoul summit. In July 2011, the European Commission published proposals to implement the Basel 3 capital and liquidity standards within Europe. The proposals consist of a new Regulation and a Directive, collectively known as 'CRD4'. The measures are subject to agreement by EU member state governments and the European Parliament. The key elements of the Basel 3 Accord that CRD4 is expected to incorporate are as follows:

– Quality of Capital

The proposals bring more stringent requirements for the eligibility of capital instruments with a focus on common equity as the principal component of regulatory Tier 1 Capital, higher minimum capital ratios and changes to the regulatory deductions from shareholders' equity. The proposals recommend a minimum common equity requirement of 4.5% phased in between 2013 and 2015. In addition, new regulatory deductions are to be introduced gradually from 2014-2018 with the concept of grandfathering applied to capital instruments that no longer meet CRD4 requirements over a 10 year period.

– Capital Buffers

To promote the conservation of capital and the build up of adequate buffers that can be drawn down in periods of stress, CRD4 proposes the use of common equity capital buffers, namely; a capital conservation buffer of 2.5% of RWAs to be built up during times of positive growth; and a countercyclical capital buffer of up to an additional 2.5% of RWAs to be built up when credit growth exceeds GDP growth, allowing firms to use this additional buffer in times of stress. These are expected to come into force from 1 January 2016 to 2019.

– Counterparty Credit Risk (CCR)

Whilst the central clearing aspects of these rules remain subject to finalisation, the requirements for managing and capitalising counterparty credit risk are to be strengthened with higher capital requirements primarily on OTC exposures and centrally cleared trades. The increased reliance on observed market data in the capital calculations has the potential to make these charges pro-cyclical. Net CCR RWAs are forecast to increase by £41.7bn. This is already reflected in our capital plans and Barclays continues to maintain adequate capital to absorb this impact.

– Securitisation

The proposal calls for securitisation exposures to be risk weighted at 1250% as opposed to being treated as capital deductions (50% Core Tier 1 and 50% Tier 2) under the current Basel 2 rules. As a result, net RWAs are estimated to increase by £31.7bn. This is already reflected in our capital plans, and Barclays continues to maintain adequate capital to absorb this impact.

Risk management

Funding risk – Capital continued

– Leverage

The CRD4 proposals introduce a non-risk based leverage ratio that is calibrated to act as a supplementary measure to the risk based capital requirements. The calculation determines a ratio based off the relationship between Tier 1 capital and on and off-balance sheet exposures. The Committee will test a minimum Tier 1 leverage ratio of 33x during the parallel run period from 1 January 2013 to 1 January 2017 prior to it potentially becoming a directly applicable prudential requirement from 2018.

Based on our interpretation of the current proposals, the Group's CRD4 Leverage Ratio as at 31 December 2011 would be within the proposed limits.

– Harmonisation of national regulations

In addition to the introduction of new rules, CRD4 attempts to harmonise national regulation across the European Union via the elimination of national discretion and implementation of a common rule book. If applied as drafted, one of the most significant impacts for UK banks with retail portfolios will be the proposed change in the definition of default for portfolios using advanced internal ratings based models, which could result in an increase in minimum credit risk capital requirements.

Independent Commission on Banking (ICB)

The ICB published its final recommendations to the Cabinet Committee on Banking Reform on 12 September 2011 calling for the 'ring-fencing' of primary retail banking operations and an increase in the minimum capital requirements and the use of bail-in instruments to enhance the loss absorbing capacity of financial institutions. Following the UK Government's considerations of these recommendations, the HMT published its response to the ICB's recommendations re-enforcing the principles of legal segregation of retail banking activities from other activities and higher Core Tier 1 and total capital requirements in the ring-fenced entity. Its intention is to complete primary and secondary legislation before the end of the current Parliamentary term in May 2015 and to implement the ring-fencing measures as soon as practicable thereafter and the loss absorbency measures by 2019. Barclays maintains close engagement with the FSA and HMT to support the UK Government and the Group in understanding the practical implications and potential impacts of these proposals.

EU Crisis Management proposals and the FSA's consultation on Recovery and Resolution Plans

The EU Commission issued a consultation on 1 January 2011 on recovery and resolution management tools that should be implemented by institutions and regulators. This proposal will inform EU legislation and contribute to the requirements for additional capital to be retained by global systemically important financial institutions (G-SIFIs).

The FSA has issued its proposal calling on institutions to identify a range of actions that can be implemented by firms and the regulators during stress conditions more severe than originally forecasts (Recovery Plans) and at the point of non-viability (Resolution plans). Barclays has participated in the FSA's Pilot project of developing a Recovery and Resolution Plan since 2010. Board approved Plans have been submitted and discussed with the FSA through the development process and Barclays is progressing well with its compliance by June 2012. Based on the FSA's analysis of Recovery and Resolution Plans, banks could be required to retain additional capital buffers.

Credit Ratings Agency Regulation

The provision of the Credit Ratings Agency Regulation comes into force on 1 May 2012. These provisions restrict the use of ratings for regulatory purposes to those either issued in, or endorsed by the EU. The change potentially impacts the calculation of regulatory capital requirements, although the impact of the change is not yet known as the European Securities and Markets Authority (ESMA) has not yet determined which non-European countries are eligible to be endorsed.

Further details on these and other regulations that may impact the wider operations of the Group are set out in the 'Supervision and regulation' section on page 154 to 158.

Risk management

Funding risk – Liquidity

All disclosures in this section (pages 139 to 150) are unaudited unless otherwise stated

Liquidity risk

The definition of liquidity risk is the risk that the Group is unable to meet its obligations as they fall due as a result of a sudden, and potentially protracted, increase in net cash outflows. Such outflows would deplete available cash resources for client lending, trading activities and investments. These outflows could be principally through customer withdrawals, wholesale counterparties removing financing, collateral posting requirements or loan draw-downs.

This risk is inherent in all banking operations and can be affected by a range of Group-specific and market-wide events which can result in:

- an inability to support normal business activity; and
- a failure to meet liquidity regulatory requirements.

During periods of market dislocation, the Group's ability to manage liquidity requirements may be impacted by a reduction in the availability of wholesale term funding as well as an increase in the cost of raising wholesale funds. Asset sales, balance sheet reductions and the increasing costs of raising funding will affect the earnings of the Group.

In illiquid markets, the Group may decide to hold assets rather than securitising, syndicating or disposing of them. This could affect the Group's ability to originate new loans or support other customer transactions as both capital and liquidity are consumed by existing or legacy assets.

In addition, the introduction of capital controls or new currencies by countries to mitigate current stresses could have a consequential effect on performance of the balance sheets of certain Group companies based on the asset quality, types of collateral and mix of liabilities.

The efficient management of liquidity is essential to the Group in retaining the confidence of the financial markets and ensuring that the business is sustainable. Liquidity risk is managed through the Liquidity Risk Framework, which is designed to meet the following objectives:

- To maintain liquidity resources that are sufficient in amount and quality and a funding profile that is appropriate to meet the liquidity risk framework as expressed by the Board;
- To maintain market confidence in the Group's name;
- To set limits to control liquidity risk within and across lines of business and legal entities;
- To accurately price liquidity costs, benefits and risks and incorporate those into product pricing and performance measurement;
- To set early warning indicators to identify immediately the emergence of increased liquidity risk or vulnerabilities including events that would impair access to liquidity resources;
- To project fully over an appropriate set of time horizons cash flows arising from assets, liabilities and off-balance sheet items; and
- To maintain a contingency funding plan that is comprehensive and proportionate to the nature, scale and complexity of the business and that is regularly tested to ensure that it is operationally robust.

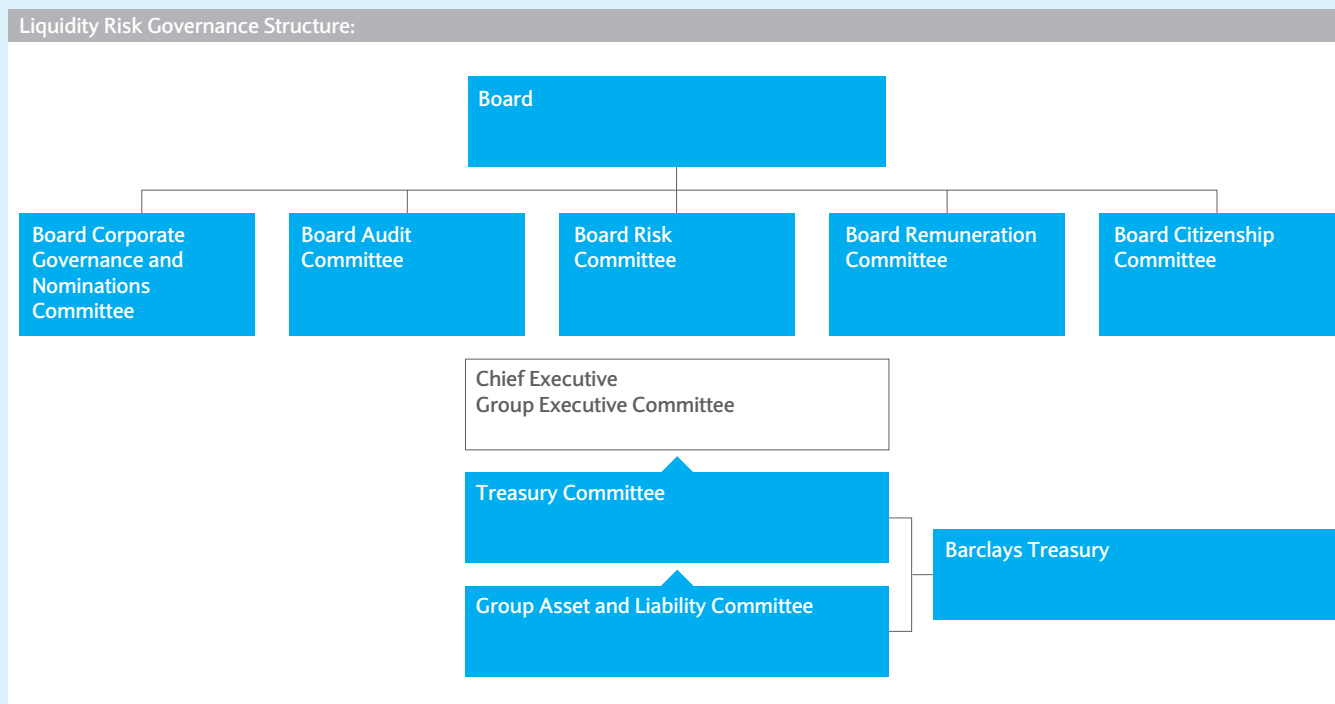

Governance and organisation

Barclays Treasury operates a centralised governance control process that covers all of the Group's liquidity risk management activities. The Barclays Treasurer is responsible for designing the Group Liquidity Risk Management framework (the Liquidity Framework) which is sanctioned by the Board Risk Committee (BRC). The Liquidity Framework incorporates liquidity policies, systems and controls that the Group has implemented to manage liquidity risk within tolerances approved by the Board and regulatory agencies. The Board sets the Group's Liquidity Risk Appetite (LRA), being the level of risk the Group chooses to take in pursuit of its business objectives and in meeting its regulatory obligations. The Treasury Committee is responsible for the management and governance of the mandate defined by the Board. The Group Asset and Liability Committees is a sub-committee of the Treasury Committee with responsibility for review, challenge and approval of the Liquidity Framework. The Liquidity Framework is reviewed regularly at Treasury Committee and BRC.

Liquidity is recognised as a key risk and the Barclays Treasurer is the Group Key Risk owner, supported by Key Risk Owners at regional and country levels. Execution of the Group's liquidity risk management strategy is carried out at country level, with the country Key Risk Owners providing reports to Barclays Treasury to evidence conformance with the agreed risk profile. Further oversight is provided by country, regional and business level Asset and Liability Committees.

Risk management

Funding risk – Liquidity continued

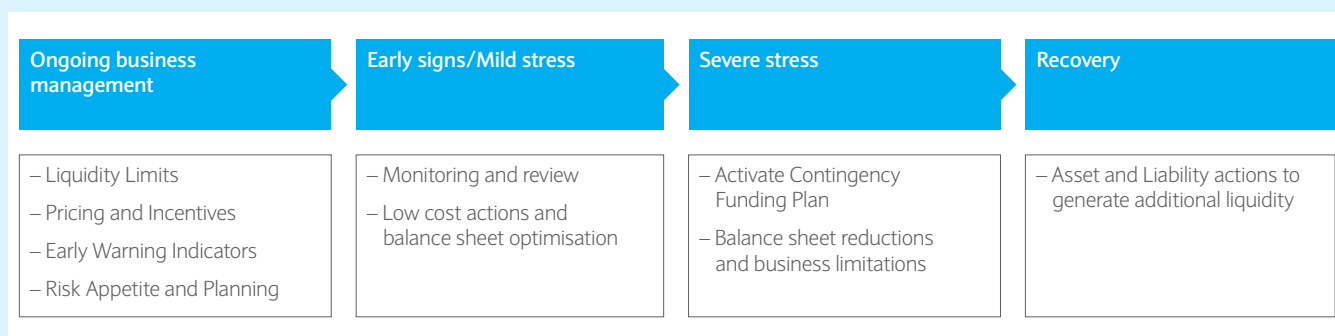

Liquidity risk framework

Barclays has a comprehensive Liquidity Framework for managing the Group's liquidity risk. The Liquidity Framework is designed to deliver the appropriate term and structure of funding consistent with the Liquidity Risk Appetite set by the Board.

The Liquidity Framework incorporates a range of ongoing business management tools to monitor, limit and stress test the Group's balance sheet and contingent liabilities. Limit setting and transfer pricing are tools that are designed to control the level of liquidity risk taken and drive the appropriate mix of funds, which together reduce the likelihood that a liquidity stress event could lead to an inability to meet the Group's obligations as they fall due. The stress tests assess potential contractual and contingent stress outflows under a range of scenarios, which are then used to determine the size of the liquidity buffer that is immediately available to meet anticipated outflows if a stress occurred.

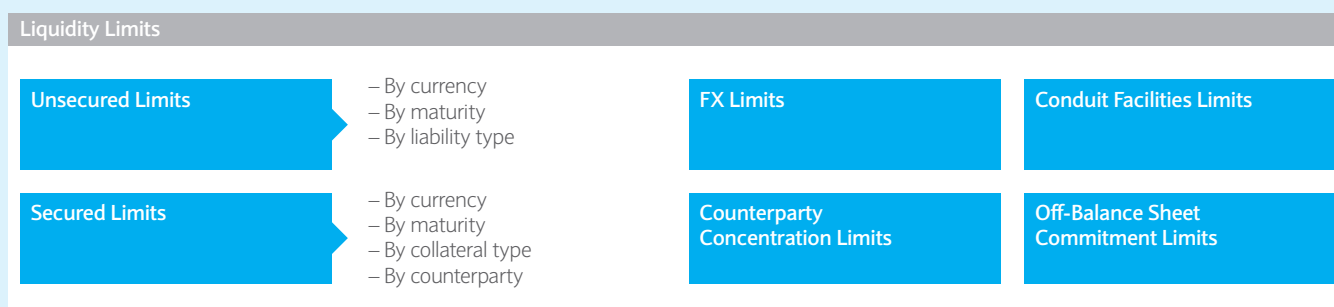

In addition the Group maintains a Contingency Funding Plan which details how liquidity stress events of varying severity would be managed. Since the precise nature of any stress event can not be known in advance, the plans are designed to be flexible to the nature and severity of the stress event and provide a menu of options that could be used as appropriate at the time. Barclays also maintains Recovery Plans which consider actions to generate additional liquidity in order to facilitate recovery in a severe stress and is developing documentation to meet Resolution Planning in line with regulatory requirements. The overall framework therefore provides the necessary tools to manage the continuum of liquidity risk, as summarised below:

Ongoing business management

Liquidity limits

Barclays manages to limits on a variety of on and off-balance sheet exposures a sample of which are shown in the table below. These limits serve to control the overall extent and composition of liquidity risk taken by managing exposure to particular sources of liabilities, asset liability mismatches and counterparty concentrations. Barclays also limits activities permitted at a country level. Businesses are only allowed to have funding exposure to wholesale markets where they can demonstrate that their market is sufficiently deep and liquid and then only relative to the size and complexity of their business.

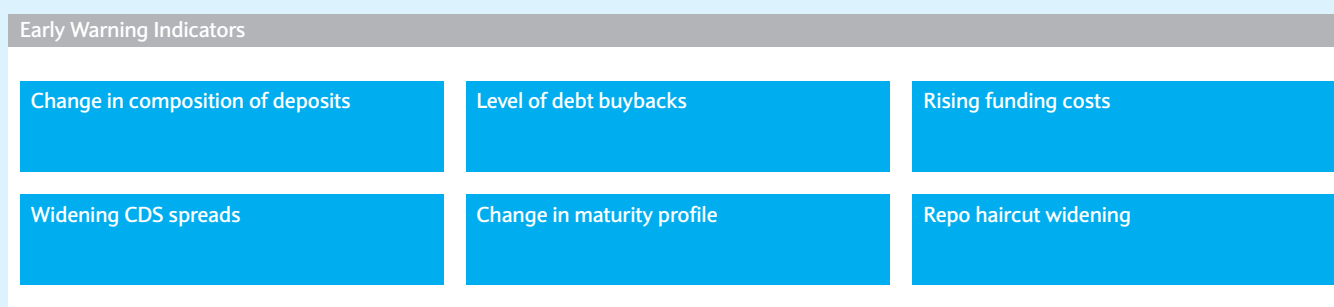

Internal pricing and incentives

Barclays actively manages the composition of the balance sheet and contingent liabilities through the appropriate transfer pricing of liquidity costs and induce the correct behaviour and decision making. These take the form of funds transfer pricing and economic funds allocation of behaviouralised assets and liabilities and contingent liquidity risk charging to the businesses. These transfer pricing mechanisms are designed to ensure that liquidity risk is reflected in product pricing and performance measurement, thereby ensuring that the Liquidity Framework is integrated into business level decision making to drive the appropriate mix of sources and uses of funds.

Early warning indicators

Barclays monitors a range of market indicators for early signs of liquidity risk either in the market or specific to Barclays, a sample of which are shown in the table below. Additionally country and business level Asset and Liability Committees monitor early warning indicators appropriate to their businesses. These are designed to immediately identify the emergence of increased liquidity risk to maximise the time available to execute appropriate mitigating actions. A deterioration in Early Warning Indicators can lead to invocation of the Group's Contingency Funding Plan, which provides a framework for how the liquidity stress would be managed.

Liquidity Risk appetite

Regulatory requirements are complied with at the Group and entity level, with the Liquidity Risk Appetite (LRA) providing a consistent Group wide perspective that supplements these requirements. Under the Liquidity Framework, the Group has established the LRA, which is the level of liquidity risk the Group chooses to take in pursuit of its business objectives and in meeting its regulatory obligations. It is measured with reference to the liquidity pool as a percentage of anticipated stressed net contractual and contingent outflows for each of three stress scenarios.

The stress outflows are used to determine the size of the Group Liquidity Pool, which represents those resources immediately available to meet outflows in a stress. In addition to the Liquidity Pool, the Liquidity Framework provides for other management actions, including generating liquidity from other liquid assets on the Group's balance sheet in order to meet additional stress outflows, or to preserve or restore the Liquidity Pool in the event of a liquidity stress.

Liquidity pool (audited)

The Group liquidity pool is held unencumbered against contractual and contingent stress outflows in the LRA stress tests. The liquidity pool is not used to support payment or clearing requirements. As of 31 December the Group liquidity pool was £152bn (2010: £154bn) and moved within a month-end range of £140bn to £167bn during the year.

Barclays does not include any own-name securities in its liquidity pool.

Risk management

Funding risk – Liquidity continued

Barclays manages the liquidity pool on a centralised basis. As at 31 December 2011, 94% of the liquidity pool was located in Barclays Bank PLC. The residual liquidity pool is held predominantly within Barclays Capital Inc. (BCI) against contractual and contingent stress outflows in the LRA stress test at the legal entity level. The Group does not rely on any excess of liquid assets over outflows in BCI.

Additionally the Absa Group holds a liquidity pool of £2bn, which is managed independently due to local currency and funding requirements

Composition of the group liquidity pool (audited)	Cash and deposits with central banks ^a £bn	Government bonds ^b £bn	Other available liquidity £bn	Total ^c £bn
As at 31 December 2011	105	36	11	152
As at 31 December 2010	96	40	18	154

Liquidity risk stress testing

Under the Liquidity Framework, the Group runs three liquidity stress scenarios, aligned to the FSA's prescribed stresses: a market-wide stress event, a Barclays specific stress event and a combination of the two. Under normal market conditions, the liquidity pool must be in excess of 100% of three months' anticipated outflows for a market-wide stress and one month's anticipated outflows for each of the Barclays specific and combined stresses.

Barclays is primarily focused upon the Barclays specific stress scenario, which also results in the greatest net outflows of each of the liquidity stress tests.

Key Liquidity Risk Appetite assumptions include:

Liquidity Risk Driver	Barclays Specific Stress
Net wholesale funding outflow	<ul style="list-style-type: none"> Outflows at contractual maturity of wholesale funding and conduit commercial paper, with no rollover / new issuance Prime Brokerage: 100% loss of excess client derivative margin and 100% loss of excess client cash
Loss of secured financing & increased haircuts	<ul style="list-style-type: none"> Loss of repo capacity at contractual maturity date and incremental haircut widening, depending upon collateral type
Retail & commercial bank deposit outflows	<ul style="list-style-type: none"> Substantial outflows as Barclays is seen as greater credit risk than competitors
Intra-day risk	<ul style="list-style-type: none"> Liquid collateral held against intra-day requirement at clearing and payment systems is regarded as encumbered with no liquidity value assumed Liquid collateral is held against withdrawal of unsecured intra-day lines provided by third parties
Intra-group risk	<ul style="list-style-type: none"> Risk of cash within subsidiaries becoming unavailable to the wider Group
Funding Concentration risk	<ul style="list-style-type: none"> Additional outflows recognised against concentration of providers of wholesale secured financing
Off-balance sheet risk	<ul style="list-style-type: none"> Collateral outflows due to market movements, taking account of disputes and mismatches between collateralised and uncollateralised OTC and exchange-traded positions Outflow of all collateral owed by Barclays to counterparties but not yet called Anticipated increase in firm's derivative initial margin requirement in a stressed environment Collateral outflows contingent upon a multi-notch credit rating downgrade of Barclays Bank PLC Significant drawdown on committed facilities provided to corporates, based on counterparty type, creditworthiness and facility type Drawdown on retail commitments
Franchise Viability	<ul style="list-style-type: none"> Barclays liquidity stress testing recognises that it will be necessary to hold additional liquidity in order to meet outflows that are non-contractual in nature, but are necessary in order to support the ongoing franchise (for example, market-making activities)
Mitigating actions	<ul style="list-style-type: none"> Unencumbered marketable assets that are held outside of the liquidity pool, and that are of known liquidity value to the firm, are assumed to be monetised (subject to haircut / valuation adjustment)

The market-wide stress scenario allows for a partial roll-over of wholesale funds, maintains repo market capacity (albeit at wider haircuts depending upon collateral type) and includes lower outflows on retail and commercial bank deposits given that Barclays would not be seen as a greater credit risk relative to competitors.

The combined scenario is a combination of the market wide and Barclays specific stress assumptions.

Notes

a Of which over 95% is placed with the Bank of England, US Federal Reserve, European Central Bank, Bank of Japan and Swiss National Bank.

b Of which over 80% are comprised of UK, US, Japanese, French, German and Dutch securities.

c £140bn of which is FSA eligible.

As at 31 December 2011, the Liquidity Pool exceeded net stress outflows under all three stress scenarios. The results of the stress scenarios expressed as the liquidity pool as a percentage of net anticipated stress outflows was:

	Market wide 3 month	Barclays- specific 1 month	Combined 1 month
Liquidity pool as a percentage of anticipated net outflows	127%	107%	118%

Barclays monitors the money markets closely, in particular for early indications of the tightening of available funding. In these conditions, the nature and severity of the stress scenarios are reassessed and appropriate action taken with respect to the liquidity pool. This may include further increasing the size of pool or using the pool to meet stress outflows.

Contingency Funding Plan and Recovery and Resolution Plan

Barclays maintains a Contingency Funding Plan (CFP), which is designed to provide a framework under which a liquidity stress could be effectively managed. The CFP is proportionate to the nature, scale and complexity of the business and is tested to ensure that it is operationally robust. The CFP details the circumstances in which the plan could be invoked, including; as a result of adverse movements in Early Warning Indicators. As part of the plan the Barclays Treasurer has established a Liquidity Management Committee (LMC.) On invocation of the CFP, the LMC would meet to identify the likely impact of the event on the Group and determine the response, which would be proportionate to the nature and severity of the stress.

Barclays also maintains Recovery Plans which consider actions to generate additional liquidity in order to facilitate recovery in a stress.

Liquidity regulation

Since June 2010, the Group has reported its liquidity position against backstop Individual Liquidity Guidance (ILG) provided by the FSA. The FSA defines both eligible liquidity pool assets and stress outflows against reported balances.

Barclays also monitors compliance with BCBS LCR and NSFR. As at 31 December 2011, the Group met 82% of the LCR (2010: 80%) and 97% of the NSFR (2010: 94%) requirements and is on track to meet the 100% compliance under Basel 3 required by 2015 and 2018 respectively.

The LRA stress scenarios, the FSA ILG and BCBS LCR are all broadly comparable short-term stress scenarios in which the adequacy of defined liquidity resources is assessed against contractual and contingent stress outflows. The ILG and LCR stress tests provide an independent assessment of the Group's liquidity risk profile. The BCBS NSFR is a longer-term metric designed to establish a minimum acceptable amount of stable funding based on liquidity characteristics of an institution's assets and activities over a one year time horizon.

Stress Test	Barclays Liquidity Risk Appetite (LRA)	FSA Individual Liquidity Guidance (ILG)	Basel 3 Liquidity Coverage Ratio (LCR)	Basel 3 Net Stable Funding Ratio (NSFR)
Time Horizon	1 – 3 months	3 months	30 days	1 year
Calculation	Liquid assets to net cash outflows	Liquid assets to net cash outflows	Liquid assets to net cash outflows	Stable funding resources to stable funding requirements

Risk management

Funding risk – Liquidity continued

Funding structure

The basis for sound liquidity risk management is a solid funding structure that reduces the probability of a liquidity stress leading to an inability to meet funding obligations as they fall due.

The Group's overall funding strategy is to develop a diversified funding base (both geographically and by depositor type) and maintain access to a variety of alternative funding sources, to minimise the cost of funding while providing protection against unexpected fluctuations. Within this, the Group aims to align the sources and uses of funding. As such, retail and commercial customer loans and advances are largely funded by customer deposits. Other assets together with other loans and advances and unencumbered assets, are funded by long term wholesale debt and equity.

Trading portfolio assets and reverse repurchase agreements are largely funded in the wholesale markets by repurchase agreements and trading portfolio liabilities, whilst derivative assets are largely matched by derivatives liabilities. The liquidity pool is predominantly funded through wholesale markets. These funding relationships are summarised below as of 31 December 2011:

Assets		Liabilities	
Customer Loans and Advances ^a	£379bn	Customer Deposits ^a	£329bn
Group Liquidity Pool	£152bn	<1 year wholesale funding	£130bn
Other Assets ^b	£169bn	>1 year wholesale funding	£135bn
Repo financing and matched assets and liabilities ^c	£328bn	Equity and Other Liabilities ^b	£117bn
Derivatives	£536bn	Repo financing and matched assets and liabilities ^c	£328bn
		Derivatives	£525bn

Deposit funding (audited)

Composition of Loan-to-Deposit Ratios by Business (audited) ^d			
	Loans and Advances to Customers £bn	Customer Deposits £bn	Loan to Deposit Ratio %
As at 31 December 2011			
RBB	231.6	158.7	146
Barclays Corporate ^d	64.6	77.7	83
Barclays Wealth	18.8	46.5	40
Total funding excluding secured	315.0	282.9	111
Secured funding	–	28.7	–
Sub-total including secured funding	315.0	311.6	101
RBB, Corporate and Wealth	315.0	282.9	111
Barclays Capital	63.4	46.0	138
Group Centre	0.9	–	–
Trading settlement balances and cash collateral	52.6	37.1	142
Total	431.9	366.0	118

The Group loan to deposit ratio as at 31 December 2011 was 118% (2010: 124%) and the loan to deposit and long-term funding ratio was 75% (2010: 77%).

RBB, Barclays Corporate and Barclays Wealth activities are largely funded with customer deposits. As at 31 December 2011, the loan to deposit ratio for these businesses was 111% (2010: 114%) and the loan to deposit and secured funding ratio was 101% (2010: 105%). The funding gap for these businesses is met using asset backed securities and covered bonds secured primarily over customer loans and advances such as residential mortgages and credit card receivables.

The excess of Barclays Capital loans and advances over customer deposits is funded with long-term debt and equity.

Notes

a Excluding cash collateral and settlement balances.

b Absa Group balances other than customer loans and advances of £38.0bn and customer deposits of £33.0bn are included in other assets and other liabilities.

c Comprised of reverse repos that provide financing to customers collateralised by highly liquid securities on a short term basis or are used to settle short inventory positions; repo financing of trading portfolio assets and matched cash collateral and settlement balances.

d In addition Barclays Corporate holds £17.2bn (2010: £14.4bn) loans and advances as financial assets held at fair value.

Included within RBB and Barclays Capital are Absa Group related balances totalling £38.0bn of loans and advances to customers funded by £33.0bn of customer deposits and the gap of £5.0bn is funded with wholesale borrowings. This is managed separately by the Absa Group due to local currency and funding requirements. During 2011, the Absa Group has issued additional senior unsecured debt to further extend its funding term and diversify its funding base, reducing its reliance on wholesale money market funding.

Although, contractually, current accounts are repayable on demand and savings accounts at short notice, the Group's broad base of customers – numerically and by depositor type – helps protect against unexpected fluctuations in balances. Such accounts form a stable funding base for the Group's operations and liquidity needs. Barclays models the behaviour of both assets and liabilities on a net cash flow basis using our experience of customer behaviour to assess balance sheet behaviouralised funding gaps under business as usual conditions. These behavioural maturities are used to determine funds transfer pricing interest rates at which businesses are rewarded and charged for sources and uses of funds.

Behavioural Maturity Profile (audited)	Loans and Advances to Customers £bn	Customer Deposits £bn	Customer Funding Surplus/ (Deficit) £bn	Behavioural Maturity Profile Cash Inflow (Outflow)	
				Less than One Year £bn	Greater than One Year £bn
As at 31 December 2011					
RBB	231.6	158.7	(72.9)	13.8	59.1
Barclays Corporate	64.6	77.7	13.1	(1.1)	(12.0)
Barclays Wealth	18.8	46.5	27.7	(4.0)	(23.7)
Total funding excluding secured	315.0	282.9	(32.1)	8.7	23.4
Secured funding	–	28.7	28.7	(10.1)	(18.6)
Total RBB, Corporate and Wealth funding	315.0	311.6	(3.4)	(1.4)	4.8

The relatively low cash outflow within one year demonstrates that customer funding remains broadly matched from a behavioural perspective.

Wholesale funding (audited)

Funding of Other Assets^a as at 31 December 2011:

Assets	£bn	Liabilities	£bn
Trading portfolio assets	104	Repurchase agreements	207
Reverse repurchase agreements	103		
Reverse repurchase agreements	45	Trading portfolio liabilities	45
Derivative financial instruments	536	Derivative financial instruments	525
Liquidity pool	152	Less than 1 year wholesale debt	130
Other unencumbered assets ^b	175	Greater than 1 year wholesale debt and equity	196

Trading portfolio assets are largely funded by repurchase agreements. The majority of reverse repurchase agreements (i.e. secured lending) are matched by repurchase agreements. The remainder of reverse repurchase agreements are used to settle trading portfolio liabilities.

Derivative assets and liabilities are largely matched. A substantial proportion of balance sheet derivative positions qualify for counterparty netting and the remaining portions are largely offset once netted against cash collateral received and paid.

The liquidity pool is largely funded by wholesale debt maturing in less than one year, with a significant portion maturing in more than one year.

Other unencumbered assets (mainly being available for sale investments, trading portfolio assets and loans and advances to banks) are largely matched by wholesale debt maturing over an average of 5 years and equity.

Repurchase agreements and other secured funding are largely collateralised by government issued bonds and other highly liquid securities. The percentage of secured funding using each asset class as collateral is set out below:

Secured Funding by Asset Class (audited)	Govt %	Agency %	MBS %	ABS %	Corporate %	Equity %	Other %
As at 31 December 2011	66	6	9	3	7	7	2
As at 31 December 2010	64	7	9	3	7	7	3

Due to the high quality of collateral provided against secured sources of funds, the liquidity risk associated with these liabilities is significantly lower than unsecured wholesale funds. Nonetheless, Barclays manages a range of secured mismatch limits to limit refinancing risk under a severe stress scenario and a portion of the Group's liquidity pool is held against stress outflows on these positions.

Notes

a Excludes balances relating to the Absa Group, which are managed separately due to local currency and funding requirements.

b Predominantly unencumbered available for sale investments, trading portfolio assets, financial assets designated at fair value and loans and advances to banks funded by greater than one year wholesale debt and equity.

Risk management

Funding risk – Liquidity continued

Composition of wholesale funding^a (audited)

The Group maintains access to a variety of sources of wholesale funds in USD, EUR and GBP, including those available from money markets, repo markets and from term investors, across a variety of distribution channels and geographies. Barclays are an active participant in money markets, have direct access to US, European and Asian capital markets through our global investment banking operations and long-term investors through our global client base. As a result, wholesale funding is well diversified by product, maturity, geography and major currency.

Maturity of wholesale funding (audited)	Not more than three months £bn	Over three months but not more than six months £bn	Over six months but not more than one year £bn	Sub-total less than one year £bn	Over one year but not more than three years £bn	Over three years £bn	Total £bn
As at 31 December 2011

of which unsecured	86.1	12.5	14.8	113.4	33.8	79.3	226.5

The maturity of wholesale funding table includes £27bn of term financing maturing in 2012^c.

The liquidity risk is carefully managed primarily through the LRA stress tests, against which the liquidity pool is held. Although not a requirement, as at 31 December 2011, the liquidity pool was equivalent to more than one year of wholesale debt maturities.

Excluding wholesale funding of the liquidity pool, the average maturity of wholesale funding was at least 58 months.

Term financing (audited)

As outlined above, the Group has £27bn of term debt maturing in 2012 and a further £16bn maturing in 2013.

The Group continues to attract deposits in unsecured money markets and to raise additional secured and unsecured term funding in a variety of markets. During 2011, the Group issued approximately £30bn of term funding, comprising:

- £3.8bn equivalent of public benchmark senior unsecured medium term notes;
- £5.0bn equivalent of privately placed senior unsecured medium term notes;
- £10.1bn equivalent of senior unsecured structured notes;
- £10.3bn equivalent of public covered bonds/ABS; and
- £1.0bn equivalent of public subordinated debt.

This term funding raised during 2011 re-financed all wholesale term debt maturing in 2011, funded strategic balance sheet growth and further strengthened the Group's term liquidity position. In January 2012 £5bn of funding was raised.

Notes

a The composition of wholesale funds is reconciled to the balance sheet reported Deposits from Banks (excluding cash collateral and settlement balances), Financial liabilities at Fair Value and Debt Securities in Issue split by product and Subordinated Liabilities, in all cases excluding Absa Group balances.

b Primarily comprised of Fair Value Deposits and secured financing of physical gold.

c Term funding maturities are maturities of senior unsecured MTNs, structured notes, covered bonds/ABS and subordinated debt where the original maturity of the instrument was more than 1 year. In addition, as at 31 December 2011, £1.2bn of these instruments were not term financing as they had an original maturity of less than 1 year.

Currency composition of wholesale debt

As at 31 December 2011	US\$ %	EUR %	GBP %	Other %
Deposits from Banks	36	27	27	10
CDs and CP	59	25	15	1
ABCP	85	8	7	–
Senior unsecured MTNs	26	40	13	21
Structured Notes	35	21	22	22
Covered bonds/ABS	31	29	39	1
Subordinated Debt	16	52	32	–
Wholesale debt	37	30	22	11
Currency composition of Liquidity Pool	27	42	17	14

To manage cross-currency refinancing risk Barclays manages to FX cash-flow limits, which limit risk at specific maturities. The Group's liquidity pool is also well diversified by major currency and the Group monitors the three LRA stress scenarios for major currencies.

Secured funding against customer loans and advances

Barclays issues asset backed securities (ABS) and covered bonds that are secured primarily over customer loans and advances. As of 31 December 2011, 10% of customer loans and advances were used to secure external sources of funds. This was comprised of external issuances of ABS and covered bonds and repo financing.

The Group currently manages three primary on balance sheet asset backed funding programmes to obtain term financing. The UK regulated covered bond and the residential mortgage master trust securitisation programmes both utilise assets originated by the Group's UK residential mortgage business. The third programme is a credit card master trust securitisation and uses receivables from the Group's UK credit card business. The programmes utilise true sale mechanics to transfer the title of the mortgage loan assets or, as applicable, current and future credit card receivables from Barclays Bank PLC (BBPLC) to insolvency remote special purpose vehicles.

All programmes initially transfer the respective assets by way of a beneficial transfer of the assets. However, should there be a 'perfection' event (including, amongst other things, the insolvency of BBPLC or BBPLC not maintaining the appropriate credit rating required by the relevant rating agency), then legal transfer of the assets would occur.

External funding secured against customer loans and advances		£bn
As at 31 December 2011		
Externally issued ABS		17,090
Externally issued covered bonds		13,791
Repo financing		12,563
Total		43,444
Balance sheet loans and advances to customers		431,934
Group loans and advances used to secure external funding		10%

As at 31 December 2011, Barclays has an additional £16bn loans and advances within its asset backed funding programmes that can readily be used to raise additional secured funding and available to support future issuance.

Credit ratings

In addition to monitoring and managing key metrics related to the financial strength of Barclays, we also subscribe to independent credit rating agency reviews by Standard & Poor's, Moody's and Fitch. These ratings assess the credit worthiness of Barclays and are based on reviews of a broad range of business and financial attributes including risk management processes and procedures, capital strength, earnings, funding, liquidity, accounting and governance.

A credit rating downgrade could result in contractual outflows to meet collateral requirements on existing contracts. Outflows related to a multiple-notch credit rating downgrade are included in the LRA stress scenarios and a portion of the Liquidity Pool is held against this risk. Credit ratings downgrades could also result in increased costs or reduced capacity to raise funding.

Credit Ratings	Standard & Poor's	Moody's	Fitch
Barclays PLC			
Long Term	A(Stable)	A1	A(Stable)
Short Term	A-1	P-1	F1
Bank Financial Strength Rating	N/A	N/A	N/A
Barclays Bank PLC

Risk management

Funding risk – Liquidity continued

Contractual maturity of financial assets and liabilities (audited)

Details of contractual maturities for assets and liabilities form an important source of information for the management of liquidity risk. Such information is used (amongst other things) as the basis for modelling a behavioural balance sheet, for input into the liquidity framework, as discussed above.

The table below provides detail on the contractual maturity of all financial instruments and other assets and liabilities. Derivatives (other than those designated in a hedging relationship) and trading portfolio assets and liabilities are included in the on demand column at their fair value. Liquidity risk on these items is not managed on the basis of contractual maturity since they are not held for settlement according to such maturity and will frequently be settled before contractual maturity at fair value. Derivatives designated in a hedging relationship are included according to their contractual maturity.

Financial assets designated at fair value in respect of linked liabilities to customers under investment contracts have been included in other assets and other liabilities as the Group is not exposed to liquidity risk arising from them; any request for funds from creditors would be met by simultaneously liquidating or transferring the related investment.

Expected maturity dates do not differ significantly from the contract dates, except for:

- Trading portfolio assets and liabilities and derivative financial instruments, which may not be held to maturity as part of the Group's trading strategies. For these instruments, which are mostly held by Barclays Capital, liquidity and repricing risk is managed through the Daily Value at Risk (DVaR) methodology;
- Retail deposits, which are included within customer accounts, are repayable on demand or at short notice on a contractual basis. In practice, these instruments form a stable base for the Group's operations and liquidity needs because of the broad base of customers – both numerically and by depositor type; and
- Financial assets designated at fair value held in respect of linked liabilities, which are managed with the associated liabilities.

Risk management

Funding risk – Liquidity continued

Contractual maturity of financial liabilities on an undiscounted basis (audited)

The table below presents the cash flows payable by the Group under financial liabilities by remaining contractual maturities at the balance sheet date. The amounts disclosed in the table are the contractual undiscounted cash flows of all financial liabilities (i.e. nominal values); whereas the Group manages the inherent liquidity risk based on discounted expected cash inflows.

The balances in the below table do not agree directly to the balances in the consolidated balance sheet as the table incorporates all cash flows, on an undiscounted basis, related to both principal as well as those associated with all future coupon payments.

Derivative financial instruments held for trading and trading portfolio liabilities are included in the on demand column at their fair value.

Financial liabilities designated at fair value in respect of linked liabilities under investment contracts have been excluded from this analysis as the Group is not exposed to liquidity risk arising from them.

Risk management

Operational risk management

All disclosures in this section (pages 151 to 153) are unaudited

Operational risk

Operational risk is defined as the risk of direct or indirect impacts resulting from human factors, inadequate or failed internal processes and systems or external events. Operational risks are inherent in the Group's business activities and are typical of any large enterprise. It is not cost effective to attempt to eliminate all operational risks and in any event it would not be possible to do so. Losses from operational risks of small significance are expected to occur and are accepted as part of the normal course of business. Those of material significance are rare and the Group seeks to reduce the likelihood of these in accordance with its risk appetite.

Overview

The management of operational risk has two key objectives:

- To minimise the impact of losses suffered in the normal course of business (expected losses) and to avoid or reduce the likelihood of suffering a large extreme (or unexpected) loss; and
- To improve the effective management of the Barclays Group and strengthen its brand and external reputation.

Barclays is committed to the management and measurement of operational risk and was granted a waiver to operate an Advanced Measurement Approach (AMA) for operational risk under Basel 2, which commenced in January 2008. The majority of the Group calculates regulatory capital using AMA, however, in specific areas we apply the Basic Indicator Approach. In certain joint ventures and associates, Barclays may not be able to apply the AMA.

Areas where the Group is working towards the rollout of AMA and the Basic Indicator Approach is applied are: the Africa RBB businesses, including Barclays Bank Mozambique and National Bank of Commerce (Tanzania); Barclays Bank PLC Pakistan; Barclays Investment and Loans India Limited; the business activities acquired from Lehman Brothers; and the portfolios of assets purchased from Woolworths Financial Services in South Africa, Citi Cards Portugal and Italy, Standard Life Bank, MBNA Corporate Cards, Upromise and Egg Cards.

Barclays works to benchmark its internal operational risk practices with peer banks and to drive the development of advanced operational risk techniques across the industry.

Organisation and structure

Operational risk is one of four Principal Risks in the Barclays Principal Risks Framework and comprises a number of specific key risks defined as follows:

- *External supplier risk* – Inadequate selection and ongoing management of external suppliers;
- *Financial reporting risk* – Reporting mis-statement or omission within external financial or regulatory reporting;
- *Fraud risk* – Dishonest behaviour with the intent to make a gain or cause a loss to others;
- *Information risk* – Inadequate protection of Barclays information in accordance with its value and sensitivity;
- *Legal risk* – Failure to identify and manage legal risks;
- *Product risk* – Inadequate design, assessment and testing of products/services;
- *Payment process risk* – Failure in operation of payments processes;
- *People risk* – Insufficient people /capabilities and/or inappropriate behaviours and/or unsafe working environments;
- *Premises & security risk* – Unavailability of premises to meet business requirements or inadequate protection of physical assets, employees and customers against criminal, terrorist and adverse political activities;
- *Regulatory risk* – Failure or inability to comply fully with the laws, regulations or codes applicable specifically to the financial services industry;
- *Taxation risk* – Failure to comply with tax laws and practice which could lead to financial penalties, additional tax charges or reputational damage;
- *Technology risk* – Failure to develop and deploy secure, stable and reliable technology solutions; and
- *Transaction operations risk* – Failure in the management of critical transaction processes.

These risks can result in financial and/or non-financial impacts including legal/regulatory breaches or reputational damage.

Risk management

Operational risk management continued

The operational risk framework comprises a number of elements which allow Barclays to manage and measure its Operational risk profile and to calculate the amount of operational risk capital that Barclays needs to hold to absorb potential losses. The minimum, mandatory requirements for each of these elements are set out in the Group Operational risk policies. This framework is implemented across the Group: vertically, through the organisational structure with all Business Units required to implement and operate an operational risk framework that meets, as a minimum, the requirements detailed in these operational risk policies; and horizontally, with the Group Key Risk Owners required to monitor information relevant to their key risk from each Operational Risk Framework element.

Barclays operates within a robust system of internal control that enables business to be transacted and risk taken without exposure to unacceptable potential losses or reputational damage. To this end, Barclays has implemented the Group Internal Control and Assurance Framework (GICAF) which is aligned with the internationally recognised Committee of Sponsoring Organisations of the Treadway Commission Framework (COSO).

The prime responsibility for the management of operational risk and the compliance with control requirements rests with the business and functional units where the risk arises. Operational risk managers are widely distributed throughout the Group and support these areas, assisting line managers in understanding and managing their risks.

The Operational Risk Director (or equivalent) for each Business Unit is responsible for ensuring the implementation of and compliance with Group Operational Risk policies.

The Group Operational Risk Director is responsible for establishing, owning and maintaining an appropriate Group-wide Operational Risk Framework and for overseeing the portfolio of operational risk across the Group.

The Operational Risk Committee (ORC) is the senior executive body responsible for the oversight and challenge of operational risk in Barclays. The Group Operational Risk Executive Committee (GOREC) assists with this oversight. GOREC is a sub-committee of the ORC, the output of which is presented to the BRC.

In addition, Governance and Control Committees (G&CCs) in each business monitor control effectiveness. The Group G&CC receives reports from these committees and considers Group-significant control issues and their remediation. The Group G&CC presents to the Board Audit Committee (BAC).

Business units are required to report their operational risks on both a regular and an event-driven basis. The reports include a profile of the material risks to their business objectives and the effectiveness of key controls, control issues of Group-level significance, operational risk events and a review of scenarios and capital. Specific reports are prepared on a regular basis for GOREC, ORC, BRC and BAC.

The Internal Audit function provides further independent review and challenge of the Group's operational risk management controls, processes and systems and reports to the Board and senior management.

Operational risk management

The Barclays Operational Risk Framework is a key component of GICAF and has been designed to meet a number of external governance requirements including Basel, the Capital Requirements Directive and Turnbull. It also supports the Sarbanes-Oxley requirements.

The Operational Risk framework includes the following elements:

Risk assessments

Barclays identifies and assesses all material risks within each business unit and evaluates the key controls in place to mitigate those risks. Managers in the business units use self-assessment techniques to identify risks, evaluate the effectiveness of key controls in place and assess whether the risks are effectively managed within business risk appetite. The businesses are then able to make decisions on what, if any, action is required to reduce the level of risk to Barclays. These risk assessments are monitored on a regular basis to ensure that each business continually understands the risks it faces.

Risk events

An operational risk event is any circumstance where, through the lack or failure of a control, Barclays has actually, or could have, made a loss. The definition includes situations in which Barclays could have made a loss, but in fact made a gain, as well as incidents resulting in reputational damage or regulatory impact only.

A standard threshold is used across the Group for reporting risk events and as part of our analysis we seek to identify where improvements are needed to processes or controls, to reduce the recurrence and/or magnitude of risk events.

Barclays also uses a database of external risk events which are publicly available and is a member of the operational risk data eXchange (ORX), a not-for-profit association of international banks formed to share anonymous loss data information. Barclays uses this external loss information to support and inform risk identification, assessment and measurement.

Key indicators

Key Indicators (KIs) are metrics which allow Barclays to monitor its operational risk profile. KIs include measurable thresholds that reflect the risk appetite of the business. KIs are monitored to alert management when risk levels exceed acceptable ranges or risk appetite levels and drive timely decision making and actions.

Key risk scenarios

By combining data from risk events, risk assessments and key indicators with that from audit findings, expert management judgement and other internal data sources, Barclays is able to generate Key Risk Scenarios (KRSs). These scenarios identify the most significant operational risks across the Group. The KRSs are validated at business unit and Group level to ensure that they appropriately reflect the level of operational risk the business faces.

Barclays shares and receives an anonymous sub-set of KRS information with the ORX community in order to compare and contrast scenario analysis with peers.

Insurance

As part of its risk management approach, the Group also uses insurance to mitigate the impact of some operational risks.

Operational risk appetite

Barclays approach to determining appetite for operational risk combines both quantitative measures and qualitative judgement, in order to best reflect the nature of non financial risks. This approach is applied at both an overall operational risk level and for individual key risks.

The monitoring and tracking of operational risk measures is supplemented with qualitative review and discussion at senior management executive committees on the action being taken to improve controls and reduce risk to an acceptable level.

Operational risk appetite is aligned to the Group's Risk Appetite Framework.

Reporting

The ongoing monitoring and reporting of operational risk is a key component of an effective Operational Risk Framework. Reports are used by the Operational Risk function and by business management to understand, monitor, manage and control operational risks and losses.

Operational risk measurement

The Operational Risk capital model uses the outputs of the risk management tools to measure Barclays operational risk exposure. KRSs are the main input to the model, which also uses the frequency and severity of operational risk losses to provide a distribution of potential losses over a year for Barclays as a whole. This process takes into account the possibility of correlations i.e. the likelihood of two key risks occurring within the same year. The model generates a regulatory capital requirement, which is determined to a level of 99.9% confidence. Once the overall level of regulatory capital for the Group has been established it is allocated, on a risk sensitive basis, to business units. This provides an incentive for the business to manage its risks within appetite levels.

Operational risk profile

A high proportion of Barclays operational risk events have a low associated financial cost and a very small proportion of operational risk events have a material impact. In 2011, 70.4% of operational losses had a value of £50,000 or less (2010: 75.0%) and accounted for 1.9% of the overall impact (2010: 3.7%). In contrast, 4.1% of the operational risk events had a value of £1m or greater (2010: 2.5%) and accounted for 91.1% of the overall impact (2010: 86.5%).

The Group monitors trends in operational risk events by size, business unit and internal risk categories (including Key Risk). For comparative purposes, the analysis below presents Barclays operational risk events by Basel 2 category. In 2011, the highest frequency of events occurred in External Fraud (42.5%) and Execution, Delivery and Process Management (36.9%). Clients, Products and Business Practices accounted for the highest proportion of losses by value, with 66% (2010: 67.9%). The continued high impact in this category was driven by the £1bn provision for PPI which was announced in May 2011. The volume of external fraud events remained broadly stable in 2011, although there was an increase in value due to a small number of high value fraud events.

Risk management

Supervision and regulation

All disclosures in this section (pages 154 to 158) are unaudited

The Group's operations, including its overseas offices, subsidiaries and associates, are subject to a significant body of rules and regulations that are a condition for authorisation to conduct banking and financial services business. These apply to business operations and affect financial returns and include reserve and reporting requirements and prudential and conduct of business regulations. These requirements are set by the relevant central banks and regulatory authorities that supervise the Group in the jurisdictions in which it operates. The requirements reflect global standards developed by, among others, the Basel Committee on Banking Supervision and the International Organisation of Securities Commissions. They also reflect requirements derived from EU directives.

In the UK, the Financial Services Authority (FSA) remains, pending the reorganisation of the UK regulatory regime (see below), the independent body responsible for the regulation and supervision of deposit taking, life insurance, home mortgages, general insurance and investment business. Barclays Bank PLC is authorised by the FSA under the Financial Services and Markets Act 2000 to carry on a range of regulated activities within the UK and is subject to consolidated supervision by the FSA. In its role as supervisor, the FSA seeks to maintain the safety and soundness of financial institutions with the aim of strengthening, but not guaranteeing, the protection of customers and the financial system. The FSA's continuing supervision of financial institutions is conducted through a variety of regulatory tools, including the collection of information from statistical and prudential returns, reports obtained from skilled persons, visits to firms and regular meetings with management to discuss issues such as performance, risk management and strategy.

The starting point for supervision of all financial institutions is a systematic analysis of the risk profile of each authorised firm. The FSA has adopted a homogeneous risk, processes and resourcing model in its approach to its supervisory responsibilities (known as the ARROW model) and the results of the risk assessment are used by the FSA to develop a risk mitigation programme for a firm. This is supplemented with a rolling programme of continuous intensive and intrusive engagement on prudential and conduct matters with high impact firms, such as Barclays. The FSA also promulgates requirements that banks and other financial institutions are required to meet on matters such as capital adequacy, limits on large exposures to individual entities and groups of closely connected entities, liquidity and rules of business conduct.

The Banking Act 2009 (the Banking Act) provides a regime to allow the FSA, the UK Treasury and the Bank of England to resolve failing banks in the UK. Under the Banking Act, these authorities are given powers, including (a) the power to issue share transfer orders pursuant to which all or some of the securities issued by a bank may be transferred to a commercial purchaser or Bank of England entity and (b) the power to transfer all or some of the property, rights and liabilities of the UK bank to a purchaser or Bank of England entity. A share transfer order can extend to a wide range of securities including shares and bonds issued by a UK bank (including Barclays Bank PLC) or its holding company (Barclays PLC) and warrants for such shares and bonds. The Banking Act powers apply regardless of any contractual restrictions and compensation may be payable in the context of both share transfer orders and property appropriation.

The Banking Act also gives the Bank of England the power to override, vary or impose contractual obligations between a UK bank or its holding company and its former group undertakings for reasonable consideration, in order to enable any transferee or successor bank of the UK bank to operate effectively. There is also power for the Treasury to amend the law (excluding provisions made by or under the Banking Act) for the purpose of enabling it to use the regime powers effectively, potentially with retrospective effect. In addition, the Banking Act gives the Bank of England statutory responsibility for financial stability in the UK and for the oversight of payment systems.

The Financial Services Act 2010, among other things, requires the FSA to make rules about remuneration and to require regulated firms to have a remuneration policy that is consistent with both effective risk management and the standards issued by the Financial Stability Board. The FSA is mandated to make rules that require authorised firms (or a subset of authorised firms) to draw up recovery and resolution plans and to consult with the Treasury and the Bank of England on the adequacy of firms' plans. This Act also allows the FSA to make rules requiring firms to operate a collective consumer redress scheme to deal with cases of widespread failure by regulated firms to meet regulatory requirements that may have created consumer detriment.

Banks, insurance companies and other financial institutions in the UK are subject to a single financial services compensation scheme (the Financial Services Compensation Scheme – FSCS) which operates when an authorised firm is unable or is likely to be unable to meet claims made against it because of its financial circumstances. Most deposits made with branches of Barclays Bank PLC within the European Economic Area (EEA) which are denominated in Sterling or other currencies are covered by the FSCS. Most claims made in respect of investment business will also be protected claims if the business was carried on from the UK or from a branch of the bank or investment firm in another EEA member state. The FSCS is funded by levies on authorised UK firms such as Barclays Bank PLC. In the event that the FSCS raises those funds more frequently or significantly increases the levies to be paid by firms, the associated costs to the Group may have a material impact on the Group's results. Further details can be found in Note 28 on page 245.

Outside the UK, the Group has operations (and main regulators) located in continental Europe, in particular France, Germany, Spain, Switzerland, Portugal and Italy (local central banks and other regulatory authorities); Asia Pacific (various regulatory authorities including the Hong Kong Monetary Authority, the Financial Services Agency of Japan, the Australian Securities and Investments Commission, the Monetary Authority of Singapore, the China Banking Regulatory Commission and the Reserve Bank of India); Africa and the Middle East (various regulatory authorities including the South African Reserve Bank) and the United States of America (including the Board of Governors of the Federal Reserve System (FRB), the Office of the Comptroller of the Currency (OCC), the Securities and Exchange Commission (SEC) and the Commodity Futures Trading Commission (CFTC).

Regulation in the UK is considerably shaped and influenced by EU directives and regulations. These provide the structure of the European Single Market, an important feature of which is the framework for the regulation of authorised firms. This framework is designed to enable a credit institution or investment firm authorised in one EU member state to conduct banking or investment business through the establishment of branches or by the provision of services on a cross-border basis in other member states without the need for local authorisation. Barclays operations in Europe are authorised and regulated by a combination of both home (the FSA) and host regulators.

Barclays operations in South Africa, including Absa Group Limited, are supervised and regulated by the South African Reserve Bank (SARB) and the Financial Services Board (FSB). SARB oversees the banking industry and follows a risk-based approach to supervision whilst the FSB oversees the non-banking financial services industry and focuses on enhancing consumer protection and regulating market conduct.

In the United States, Barclays PLC, Barclays Bank PLC and Barclays US banking subsidiaries are subject to a comprehensive regulatory structure involving numerous statutes, rules and regulations, including the International Banking Act of 1978, the Bank Holding Company Act of 1956, as amended (BHC Act), the Foreign Bank Supervision Enhancement Act of 1991, the Financial Services Modernization Act of 1999, the USA PATRIOT Act of 2001 and the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010. Such laws cover the activities of Barclays, including its US banking subsidiaries and the Bank's US branches, as well as prudential restrictions, such as limits on extensions of credit by the Bank's US branches and the US banking subsidiaries to affiliates. The New York and Florida branches of Barclays Bank PLC are subject to extensive federal and state supervision and regulation by the FRB and the New York and Florida banking supervisors. Barclays Bank Delaware, a Delaware chartered commercial bank, is subject to supervision and regulation by the Federal Deposit Insurance Corporation (FDIC), the Delaware State Bank Commissioner and the Bureau of Consumer Financial Protection. Only the deposits of Barclays Bank Delaware are insured by the FDIC. Barclays Wealth Trustees (US) NA is an uninsured non-depository trust company chartered and supervised by the OCC.

Barclays PLC and Barclays Bank PLC are bank holding companies registered with the FRB, which exercises umbrella authority over Barclays US operations. Barclays PLC and Barclays Bank PLC have each elected to be treated as a financial holding company under the BHC Act. Financial holding companies may engage in a broader range of financial and related activities than are permitted to registered bank holding companies that do not maintain financial holding company status, including underwriting and dealing in all types of securities. Financial holding companies such as Barclays PLC and Barclays Bank PLC are required to meet or exceed certain capital ratios and be deemed to be 'well managed,' and Barclays Bank Delaware and Barclays Wealth Trustees (US) NA are each required to meet certain capital requirements, be deemed to be 'well managed' and must have at least a 'satisfactory' rating under the Community Reinvestment Act of 1977 (CRA). Entities ceasing to meet any of these requirements, are allotted a period of time in which to restore capital levels or the management or CRA rating. If the capital level or rating is not restored, the Group may be required by the FRB to cease certain activities in the United States.

Barclays US securities broker/dealer, investment advisory and Investment banking operations are subject to ongoing supervision and regulation by the SEC, the Financial Industry Regulatory Authority (FINRA), the CFTC and other government agencies and self-regulatory organisations (SROs) as part of a comprehensive scheme of regulation of all aspects of the securities and commodities business under the US federal and state securities laws. Similarly, Barclays US commodity futures and options-related operations are subject to ongoing supervision and regulation by the CFTC, the National Futures Association and other SROs.

The credit card-related activities of the Group in the US are subject to the Credit Card Accountability, Responsibility and Disclosure Act of 2009 (Credit CARD Act) which was enacted by Congress in May 2009 to prohibit certain credit card pricing and marketing practices for consumer credit card accounts. Among the numerous provisions, which came into effect at various times through October 2011, are those that prohibit increasing rates on existing balances and over limit fees in most instances, restrict increasing fees and rates prospectively, restrict what penalty fees can be assessed, regulate how payments are to be allocated to different balances and how the billing process is to work, and revises all communications to cardholders.

Regulatory developments

The financial crisis has generated regulatory change that, is having and will continue to have a substantial impact on all financial institutions, including the Group. While some of the broad lines of change and some of the impacts of these changes are becoming clearer, a significant amount remains to be determined. Regulatory change is being pursued at a number of levels, globally notably through the G20, Financial Stability Board (FSB) and BCBS, regionally through the European Union and nationally, especially in the UK and US. It is of importance to the Group and to the banking industry generally that the various bodies work harmoniously and that a globally consistent approach is taken to banking regulation. Increased prudential requirements and changes to what is defined to constitute capital may affect the Group's planned activities and could increase costs and contribute to adverse impacts on the Group's earnings. Similarly, increased requirements in relation to capital markets activities and to market conduct requirements may affect the Group's planned activities and could increase costs and thereby contribute to adverse impacts on the Group's earnings.

Global

The programme of reform of the global regulatory framework that was agreed by G20 Heads of Government in April 2009 has continued to advance substantially during 2011.

The FSB has been designated by the G20 as the body responsible for co-ordinating the delivery of the global reform programme. It has focused particularly on the risks posed by systemically important financial institutions (SIFI). At the Cannes summit in November 2011, G20 Heads of Government adopted FSB proposals for a programme to reform the regulation of globally systemically important financial institutions (G-SIFIs). A key element of this programme is that systemic institutions, including G-SIFIs should be capable of being resolved without recourse to taxpayer support. Barclays has been designated a G-SIFI by the FSB. G-SIFIs will be subject to:

- A new international standard for national resolution regimes. Among other things, this seeks to give resolution authorities powers to intervene in and resolve a financial institution that is no longer viable, including through the transfers of business and creditor financed recapitalisation (bail-in within resolution) that allocates losses to shareholders and unsecured and uninsured creditors in their order of seniority, at a regulator-determined point of non-viability that may precede insolvency.
- Requirements for resolvability assessments and for recovery and resolution planning.
- Requirements for banks determined to be globally systemically important to have additional loss absorption capacity above that required by Basel 3 standards (see below). These surcharges have been tailored to the impact of the default of the G-SIFI using a methodology developed in 2011 by the BCBS. The surcharges rise in increments from 1% to 2.5% of risk-weighted assets (with an empty bucket of 3.5% to discourage institutions from developing their business in a way that heightens their systemic nature). This additional buffer must be met with common equity.
- More intensive supervision, including through stronger supervisory mandates, resources and powers, and higher supervisory expectations for risk management functions, data aggregation capabilities, risk governance and internal controls.

G-SIFIs will be subject to enhanced supervision and a comprehensive crisis management framework within supervisory colleges. The concept of bail-in may affect the rights of senior unsecured creditors subject to any bail-in in the event of a resolution of a failing bank.

Risk management

Supervision and regulation continued

G-SIFIs will need to meet the resolution planning requirements by the end of 2012. The additional loss absorbency requirements will initially apply to those banks identified in November 2014 as globally systemically important. The loss absorbency requirements will be phased in starting in January 2016 with full implementation by January 2019. G-SIFIs must also meet the higher supervisory expectations for data aggregation capabilities by January 2016.

The BCBS issued the final guidelines on Basel 3 capital and liquidity standards in December 2010. It has continued to refine elements of this package, notably in relation to counterparty credit risk where revisions were made in July and November 2011. The requirements of Basel 3 will be applicable from 1 January 2013 with a number of transitional provisions that run to the end of 2018. An assessment of the likely impact of the Basel 3 capital, leverage and liquidity requirements and the Group response can be found on pages 23, 137-138 and 143.

The BCBS also maintains a number of active work streams that will affect the Group. These include a fundamental review of the trading book whose results are expected to be published in 2012. The BCBS is also understood to be examining a regime for large exposures. These developments may further increase the capital required by the Group to transact affected business and/or affect the ability of the Group to undertake certain transactions.

European Union

The EU has amended its regulatory structure as part of its response to the financial crisis. On 1 January 2011, a number of new bodies came into being, including the European Systemic Risk Board to monitor the financial system and advise on macro-prudential actions and the European Banking Authority charged with the development of a single rulebook for banks in the EU and with enhancing co-operation between national supervisory authorities, especially in the context of the supervision of banks that operate across borders within the EU. The European Securities Markets Authority has a similar role in relation to the capital markets and to banks and other firms doing investment and capital markets business. The European Banking Authority and the European Securities Markets Authority each have the power to mediate between and override national authorities under certain circumstances. National authorities, however, remain responsible for the day-to-day supervision of financial institutions.

Basel 3 will be implemented in the EU by amendment to the Capital Requirements Directive (CRD). Formal proposals to amend the CRD were adopted by the European Commission in July 2011. These take the form of a regulation and a directive which are currently going through the EU legislative process. Much of the detailed implementation is expected to be done through binding technical standards to be adopted by the European Banking Authority, that are intended to ensure a harmonised application of rules through the EU but which have yet to be developed. While there may be some differences of detail between CRD 4 and Basel 3, the current expectation is that the overall impact will be similar.

In addition, other amendments are being made to the EU framework of directives, including to the Directive on Deposit Guarantee Schemes. This may affect the amounts to which the Group may be liable to fund the compensation of depositors of failed banks. The proposal also envisages that national schemes should be pre-funded, with a fund to be raised over a number of years. This would be a significant change for UK banks where levies are currently raised as needed after failure. The proposals remain under debate and the financial impact on the Group is not yet clear.

As anticipated, the European Commission has adopted proposals to amend the Markets in Financial Instruments Directive. This will affect many of the investment markets in which the Group operates and the instruments in which it trades, and how it transacts with market counterparties and other customers. These proposals are at a very early stage of their consideration by the EU institutions and the overall impact of them on the Group is not yet clear.

Other EU developments of note include consideration of European arrangements in respect of crisis management and the resolution of financial institutions. The European Commission issued a discussion paper in January 2011 and proposals for legislation which were expected in 2011 are now expected later in 2012. These are likely to include provisions on bail-in within resolution and other matters that may have an impact on the rights of shareholders and creditors of failing institutions. The Commission has also announced in November 2011 the creation of an expert group on the structural aspects of the EU banking sector. The group was due to start work in February 2012 and finish during the course of summer. Its mandate will be to determine whether, in addition to ongoing regulatory reforms, structural reforms of EU banks would strengthen financial stability and improve efficiency and consumer protection, and if that is the case make any relevant proposals as appropriate.

United Kingdom

The Government is reforming the structure of regulation to replace the FSA and the tripartite system that also involved the Bank of England and HM Treasury. This is intended to promote financial stability and to increase the intensity of supervisory scrutiny of the financial sector, including the Group. The Government has tabled a Bill that proposes that a Financial Policy Committee should be established in the Bank of England with responsibility for the monitoring and control of systemic risk, including the deployment of macro-prudential tools of supervision, which, while still to be determined, may include the imposition of additional capital and liquidity buffers and interventions in the terms of transactions in particular markets. Responsibility for prudential regulation will pass to a Prudential Regulation Authority to be established as a subsidiary of the Bank of England, while a Financial Conduct Authority (FCA), as a successor body to the FSA, will be responsible for issues of business and market conduct and market regulation. The FCA will also be the UK listing authority. This process is not expected to be complete before early 2013. In anticipation of the new regulatory structure, an interim Financial Policy Committee has been created and the FSA reorganised itself into separate Prudential and Consumer and Markets business units on 4 April 2011. In April 2012, the two business units will begin to shadow the forthcoming regime and operate as if they were the PRA and FCA to the extent permitted by existing law.

The ICB issued its final report in September 2011. Among other things, the recommendations included that: (i) the UK and EEA retail banking activities of a UK bank or building society should be placed in a legally distinct, operationally separate and economically independent entity ("ring-fencing"); and (ii) the loss-absorbing capacity of ring-fenced banks and UK-headquartered global systemically important banks (such as Barclays Bank PLC) should be increased to levels higher than the Basel 3 proposals. The UK Government published its response to the ICB recommendations in December 2011 and indicated that primary and secondary legislation relating to the proposed ring-fence will be completed by May 2015, with UK banks and building societies expected to be compliant as soon as practicable thereafter, and the requirements relating to increased loss-absorbing capacity of ring-fenced banks and UK-headquartered global systemically important banks will be applicable from 1 January 2019. The Government will publish a White Paper in late spring 2012 with further details on how the recommendations will be implemented.

The FSA continues to develop and apply its more intrusive and assertive approach to supervision and its policy of credible deterrence in relation to enforcement that has continued to see significant growth in the size of regulatory fines. In anticipation of international agreement, the FSA has established and implemented capital and liquidity requirements that are substantially increased from pre-crisis levels, and has, together with the Bank of England, proceeded to establish Recovery and Resolution Planning requirements. In keeping with the requirements of the FSB, the Group is required to submit a Recovery and Resolution Plan by 30 June 2012. The Retail Distribution Review and the Mortgage Market Review will affect the economics of investment advice and home finance provision respectively. The FSA, following consultation, has also made clear its intention to take a more interventionist approach to the design of financial products and to the governance processes around product design. This approach will be carried through into the FCA when it is established.

United States

The Dodd-Frank Wall Street Reform and Consumer Protection Act (DFA) became law in July 2010. The full scale of the DFA's impact on the Group remains unclear because the rules required to implement many of the provisions of DFA have not been implemented and, in some areas, have yet to be proposed by the responsible agencies. In addition, market practices and structures may change in response to the requirements of the DFA in ways that are difficult to predict but that could impact Barclays business. Nonetheless, certain provisions of the DFA are particularly likely to have an effect on the Group, including in the following:

- **Systemic risk:** The DFA created the Financial Stability Oversight Council (FSOC) and empowered it to make recommendations to the FRB to apply heightened supervisory requirements and prudential standards applicable to "systematically important" entities and activities and to work with all primary financial regulatory agencies to establish regulations, as necessary, to address financial stability concerns. In December 2011, the FRB issued proposed rules that bank holding companies with total consolidated assets of over \$50 billion, and other financial companies designated by the FSOC as systemically important, be subject to enhanced prudential standards, including (i) capital requirements and leverage limits, (ii) mandatory stress testing of capital levels, (iii) liquidity requirements, (iv) overall risk management

requirements, and (v) concentration and credit exposure limits. However, as drafted, these would not currently affect the Group. Although the relevant sections of DFA apply both to domestic US bank holding companies with total consolidated assets of over \$50 billion and non-US banking organisations with US operations that have total consolidated assets of over \$50 billion, such as the Group, the FRB has deferred proposing rules to cover such non-US organisations. Instead, the proposed rules would apply only to a subsidiary of a foreign-owned US bank holding company if the subsidiary itself has \$50 billion or more in total consolidated assets. The Group's only US-domiciled subsidiary bank holding company, Barclays Delaware Holdings, LLC, has total assets under this threshold. Nonetheless, it is possible that the FRB could propose additional rules that would apply similar enhanced prudential requirements to all non-US banking organisations with US operations that have total consolidated assets of over \$50 billion, or to any other non-US banking organisation that the FSOC designates as systemically important. In this regard, it is potentially relevant that in November 2011 Barclays was listed by the FSB as a global systemically important bank. It is not yet clear what regard the FSOC or the other agencies will have to the home country prudential regulators of non-US organisations when considering the imposition of heightened prudential requirements on such organisations pursuant to the DFA.

- **Other enhanced prudential requirements:** In addition to the ability of the FSOC to recommend heightened prudential standards for specific institutions, the DFA, separate and apart from Basel 3, also imposes higher capital, liquidity and leverage requirements on US banks and bank holding companies generally.
- **Restrictions on proprietary trading and fund-related activities:** The so-called "Volcker Rule," which will, once effective, significantly restrict the ability of US bank holding companies and their affiliates, and the US branches of foreign banks, to conduct proprietary trading in securities and derivatives as well as certain activities related to hedge funds and private equity funds. In October 2011, US regulators consulted on rules to implement the Volcker Rule. The proposed rules are highly complex and many aspects remain unclear, including the exemption from the proprietary trading and fund-related activity prohibitions for activities conducted by non-US organisations "solely outside the United States." The agencies appeared to construe this exemption very narrowly in the proposed rules. Analysis continues of the proposals, but it is clear that compliance with them would entail significant effort by the Group. Although the Volcker Rule is likely to impose significant additional compliance and operational costs on the Group, the full impact will not be known with certainty until the rules have been finalised. Whilst the Group has identified that its private equity fund, hedge fund and trading operations may be affected by the Volcker Rule, until the final regulations are adopted, the impact on the Group's ability to engage in these activities will be affected continues to remain uncertain. As such, it cannot currently be determined whether the restrictions will have a material effect on the Group. The statutory Volcker Rule provisions are scheduled to take effect in July 2012, regardless of whether the implementing rules have been finalised, and companies will have two years from that time to come into full compliance with them, subject to possible extensions.

Risk management

Supervision and regulation continued

-
- **Resolution plans:** The DFA requires bank holding companies with total consolidated assets of US\$50 billion or more to submit to the FRB and the FDIC, and regularly update, a plan for “rapid and orderly” resolution to be used if the company experiences material financial distress or failure. Non-US banking organisations that are treated as bank holding companies under US law, such as Barclays, are required to submit such plans with respect to their US operations if they have more than US\$50 billion in US assets. Barclays US assets exceed US\$250 billion, and as a result Barclays is required to submit a resolution plan by 1 July 2012.
 - **Regulation of derivatives markets:** Among the changes mandated by the DFA are that many types of derivatives now traded in the over-the-counter markets be traded on an exchange or swap execution facility and centrally cleared through a regulated clearing house. In addition, many participants in these markets will be required to register with the CFTC as “swap dealers” or “major swap participants” and/or with the US SEC as “securities swap dealers” or “major securities swap dealers” and be subject to CFTC and SEC regulation and oversight. Barclays Bank PLC and, potentially, one or more of its US subsidiaries may be subjected to these requirements. Entities required to register will also be subject to business conduct, capital, margin, recordkeeping and reporting requirements. In addition, the CFTC, pursuant to the DFA, has adopted rules on position limits on derivatives on physical commodities. It is possible that additional regulation, and the related expenses and requirements, will restrict participation in the derivative markets, thereby increasing the costs of engaging in hedging or other transactions and reducing liquidity and the use of the derivative markets. Barclays Bank PLC and its subsidiaries and affiliates may be exposed to these effects whether or not they are required to register in the capacities described. The new regulation of the derivative markets could adversely affect the business of Barclays Bank PLC and its affiliates in these markets and could make it more difficult and expensive to conduct hedging and trading activities. The DFA also contains a “derivatives push-out” requirement that, as early as 2013, could prevent the Group from conducting certain swaps-related activities in the US branches of Barclays Bank PLC.
 - **Risk retention requirements for securitisations:** The US federal banking agencies are required by the DFA to develop rules whereby anyone who organises or initiates an asset-backed security transaction must retain a portion (generally, at least five percent) of any credit risk that the person conveys to a third party. This may impact the participation by the Group’s US operations in such transactions.
 - **Creation of the Bureau of Consumer Financial Protection (CFPB):** The CFPB is empowered to regulate the credit card industry, including the terms of credit card agreements with consumers, disclosures, and fees. Actions by the CFPB in this area are likely to impact the Group’s US credit card business. The CFPB became operational in July 2011, and is soliciting public comment on a model credit card disclosure form and accepting consumer credit card complaints. More broadly, the CFPB has the authority to examine and take enforcement action against any US bank with over US\$10 billion in total assets, such as Barclays Bank Delaware, with respect to its compliance with Federal laws regulating the provision of consumer financial services.

Capital KPIs

Definition	Why is it important to the business and management	
<p>Core Tier 1 ratio</p> <p>Capital requirements are part of the regulatory framework governing how banks and depository institutions are managed. Capital ratios express a bank's capital as a percentage of its risk weighted assets as defined by the UK FSA. Core Tier 1 is broadly tangible shareholders' funds less certain capital deductions.</p>	<p>The Group's capital management activities seek to maximise shareholders' value by prudently optimising the level and mix of its capital resources. The Group's capital management objectives are to maintain sufficient capital resources to: ensure the financial holding company is well capitalised relative to the minimum regulatory capital requirements set by the UK FSA and US Federal Reserve; ensure locally regulated subsidiaries can meet their minimum regulatory capital requirements; support the Group's risk appetite and economic capital requirements; and support the Group's credit rating.</p> <p>During 2011, the Group's Core Tier 1 ratio strengthened to 11%, after absorbing the impact of CRD3.</p>	<p>11 – 11.0%</p> <p>10 – 10.8%</p> <p>09 – 10.0%</p>
<p>Adjusted gross leverage</p> <p>Adjusted gross leverage is the adjusted total tangible assets divided by total qualifying Tier 1 capital. Adjusted total tangible assets are total assets less derivative counterparty netting, assets under management on the balance sheet, settlement balances, and cash collateral on derivative liabilities, goodwill and intangible assets. Tier 1 capital is defined by the UK FSA.</p>	<p>Barclays recognises that there will be more capital and less leverage in the banking system and that lower levels of leverage are regarded as a key measure of stability going forward. This is consistent with the views of our regulators and investors.</p> <p>In 2011, adjusted gross leverage remained stable at 20 times principally as the reduction in qualifying Tier 1 capital to £50.5bn (2010: £53.5bn) was offset by the 5% reduction in adjusted total tangible assets to £1 trillion.</p>	<p>11 – 20X</p> <p>10 – 20X</p> <p>09 – 20X</p>

Returns KPIs

Definition	Why is it important to the business and management	
<p>Return on average shareholders' equity (RoE)</p> <p>RoE is calculated as profit for the year attributable to equity holders of the parent divided by average shareholders' equity excluding non-controlling interests. Shareholders' equity is made up of share capital, retained earnings and other reserves. At a business level, equity is allocated to businesses based on an assumed Core Tier 1 ratio of 10% and any excess capital is retained at Group Centre as a buffer.</p>	<p>These measures indicate the returns generated based on the risk weighted assets and shareholders equity. Achieving target returns is a key driver for total shareholder return and demonstrates the organisation's ability to execute its strategy and align interests of management and shareholders.</p>	<p>RoE</p> <p>11 – 5.8%</p> <p>10 – 7.2%</p> <p>09 – 6.7%</p> <p>Adjusted RoE</p> <p>11 – 6.6%</p> <p>10 – 6.8%</p> <p>09 – 6.9%</p>
<p>Return on average tangible shareholders' equity (RoTE)</p> <p>RoTE is calculated as profit for the year attributable to equity holders of the parent divided by average shareholders' equity, excluding non-controlling interests, goodwill and intangible assets.</p>	<p>In targeting these return measures on a sustainable basis, the Group also closely monitors its position against other key measures of financial stability including capital, leverage and liquidity.</p> <p>Returns lie at the heart of our capital allocation and performance management process. All of our businesses except Europe Retail and Business Banking, Barclays Capital and Barclays Corporate had adjusted returns on average tangible equity in excess of the 2011 cost of equity of 11.5%.</p>	<p>RoTE</p> <p>11 – 6.9%</p> <p>10 – 8.7%</p> <p>09 – 9.0%</p> <p>Adjusted RoTE</p> <p>11 – 7.9%</p> <p>10 – 8.2%</p> <p>09 – 9.3%</p>

Returns KPIs continued

Definition	Why is it important to the business and management	
Return on average risk weighted assets (RoRWA)		RoRWA
RoRWA is calculated as profit after tax for the year divided by average risk weighted assets, which is a risk based measure of assets defined by the UK Financial Services Authority.		11 – 1.0% 10 – 1.1% 09 – 0.9%
		Adjusted RoRWA
		11 – 1.1% 10 – 1.1% 09 – 0.9%
Profit before tax (PBT)		PBT
PBT is stated in accordance with IFRS and represents total income less impairment charges and operating expenses. Adjusted PBT represents PBT adjusted to exclude the impact of own credit, gains on debt buy-backs, loss on disposal of a portion of, and impairment of the remainder of the Group's investment in, BlackRock, Inc., the provision for Payment Protection Insurance (PPI) redress, goodwill impairments, and gains and losses on acquisitions and disposals of subsidiaries, associates and joint ventures.	PBT and adjusted PBT are the two primary profitability measures used by management to assess performance. PBT is a key indicator of financial performance to many of our stakeholders. Adjusted PBT is presented to provide a more consistent basis for comparing business performance between periods.	11 – £5,879m 10 – £6,065m 09 – £4,585m
		Adjusted PBT
		11 – £5,590m 10 – £5,707m 09 – £4,942m
Cost income ratio		
Cost: income ratio is defined as operating expenses compared to total income net of insurance claims.	This is a measure management uses to assess the productivity of the business operations. Restructuring the cost base is a key execution priority for management and includes a review of all categories of discretionary spending and an analysis of how we can run the business to ensure that costs increase at a slower rate than income. In 2011 we set a target to take £1bn off our run-rate cost base on a full year basis by 2013. We have now increased the target to £2bn.	11 – 64% 10 – 64% 09 – 57%
Loan loss rate		
The loan loss rate is quoted in basis points and represents the impairment charge on loans and advances divided by gross loans and advances held at amortised cost at the balance sheet date.	The granting of credit is one of Barclays major sources of income and its most significant risk. The loan loss rate is an indicator of the cost of granting credit. During 2011 impairment continued to improve across all our businesses and a 2% increase in loans and advances resulted in a lower overall Group loan loss rate of 77bps (2010: 118bps).	11 – 77bps 10 – 118 bps 09 – 156 bps
Dividend per share		
It is the Group's policy to declare and pay dividends on a quarterly basis. In a normal year there will be three equal payments in June, September and December and a final variable payment in March.	The ability to pay dividends demonstrates the financial strength of the Group. Whilst recognising the market's desire for us to maintain strong capital ratios, in light of the regulatory and economic uncertainty, we have taken a prudent approach of prioritising capital retention and significantly reducing the distribution through dividends from historical levels of 50% whilst seeking to ensure that pay-outs also increase progressively from their low point in 2009.	11 – 6.0p 10 – 5.5p 09 – 2.5p

Citizenship KPIs

Definition	Why is it important to the business and management	
Gross new lending to UK households and businesses		
Defined as lending to UK households and businesses with UK based activities.	We have a clear sense of our business purpose – to help individuals, businesses and economies progress and grow. We clearly demonstrated this in 2011 by delivering £45.0bn gross new lending to UK households and businesses. We exceeded Project Merlin targets by 13% in providing £43.6bn to UK businesses, including £14.7bn to SMEs. We also supported 10,000 first time buyers and the formation of over 100,000 new businesses.	11 – £45.0bn 10 – £43.5bn 09 – £35.0bn
Global investment in our communities		
Defined as Barclays total contribution to supporting the communities where we operate.	The success and competitiveness of a business and the extent to which it contributes to and is integrated in the communities in which it operates are closely related. We are committed to maintaining investment in our communities for the long-term both in good times and in bad. This performance metric demonstrates the consistency of our commitment over time.	11 – £63.5m 10 – £55.3m 09 – £54.9m
Colleagues involved in volunteering, regular giving and fundraising initiatives		
Defined as the total number of Barclays employees taking part in volunteering, giving or fundraising activities.	Barclays community investment programme aims to engage and support colleagues around the world to get involved with our main partnerships, as well as the local causes they care about. Harnessing their energy, time and skills delivers real benefit to local communities, to their own personal development and to their engagement with Barclays.	11 – 73,000 10 – 62,000 09 – 58,000
Group Employee Opinion Survey (EOS)^a – Proud to be Barclays		
EOS are used across the organisation to understand our employees' views and prioritise management actions in order to meet employee needs. This KPI is a calibration of different survey scores across Barclays for a question measuring sense of pride in being associated with or working for Barclays. The average scores for each year are given.	Understanding levels of employee engagement and sense of commitment to Barclays is important as there is a strong correlation between these factors and our employees' commitment to serving the needs of our customers and clients.	11 – 81% 10 – 83% 09 – 81%
Percentage of senior managers who are female		
The number of female colleagues who are working across all Barclays businesses at the senior management level as a percentage of the total senior manager population.	Diversity is important to Barclays as we believe that only through access to the most diverse pool of talent will we recruit and retain the most talented individuals to serve our customers and clients.	11 – 22% 10 – 24% 09 – 24%

Note

^a EOS figure excludes Absa and Barclays Capital for 2011 as surveys conducted in Absa and Barclays Capital were designed to span a two-year cycle. Taking their 2010 survey findings into account, the group-wide rate for 2011 is 82%.

Notes

a Return on average shareholders equity represents profit attributable to the equity holders of the parent as a percentage of average shareholders' equity.

b Return on average total assets represents profit attributable to the equity holders of the parent as a percentage of average total assets.

c The average rates are derived from daily spot rates during the year used to convert foreign currency transactions into Sterling for accounting purposes.

Financial review

Income statement commentary

2011

Barclays delivered profit before tax of £5,879m in 2011, a decrease of 3%. Excluding movements on own credit, gains on debt buy-backs, loss/gains on acquisitions and disposals, impairment of investment in BlackRock Inc, provision for PPI and goodwill impairment Group profit before tax decreased 2% to £5,590m.

Income increased 3% to £32,292m. Income excluding own credit and debt buy backs decreased 8% to £28,512m principally reflecting a decrease in income at Barclays Capital. Income increased in most other businesses despite continued low interest rates and difficult macroeconomic conditions. The RBB, Corporate and Wealth net interest margin remained stable at 204bps (2010: 203bps). Net interest income from RBB, Corporate, Wealth and Barclays Capital increased 5% to £13.2bn, of which the contribution from hedging (including £463m of increased gains from the disposal of hedging instruments) increased by 3%.

Credit impairment charges and other provisions decreased 33% to £3,802m reflecting significant improvements across all businesses. Impairment charges as a proportion of Group loans and advances as at 31 December 2011 improved to 77bps, compared to 118bps for 2010. In addition, impairment of £1,800m was taken against the investment in BlackRock, Inc.

As a result, net operating income for the Group after impairment charges increased 4% to £26,690m.

Operating expenses increased 4% to £20,777m in 2011. Operating expenses, excluding £1,000m provision for PPI redress, £597m (2010: £243m) goodwill impairment, and the UK bank levy of £325m, were down 4% to £18,855m, which included £408m (2010: £330m) of restructuring charges. Despite cost savings, the cost: income ratio remained stable at 64% (2010: 64%).

The effective tax rate increased to 32.8% (2010: 25.0%), principally due to non-deductible charges arising on the impairment of BlackRock, Inc. and goodwill, and the UK bank levy.

2010

Profit before tax increased 32% to £6,065m in 2010. Excluding movements on own credit, gains on debt buy-backs, gains on acquisitions and disposals and goodwill impairment Group profit before tax increased 15% to £5,707m.

Income increased 8% to £31,440m, principally reflecting a substantial reduction in losses taken through income relating to credit market exposures at Barclays Capital.

Credit impairment charges and other provisions improved 30% to £5,672m. This was after an increase of £630m in impairment on the Spanish loan book in Barclays Corporate and impairment of £532m relating to the Protium loan in Barclays Capital. All businesses other than Barclays Corporate reported improvements in impairment charges. Overall impairment charges as a proportion of Group loans and advances as at 31 December 2010 was 118bps, compared to 156bps for 2009.

Net operating income for the Group after impairment charges increased 22% to £25,768m.

Operating expenses increased £3,256m to £19,971m, a 19% rise compared to the 22% growth in net operating income. Across the Group, restructuring charges totalled £330m (2009: £87m) focusing on delivering future cost and business efficiencies. Goodwill of £243m was written off to reflect impairment to the carrying value of Barclays Bank Russia business as our activities there are refocused. As a result, the Group's cost: income ratio increased to 64% (2009: 57%). The cost: net operating income ratio improved from 79% to 78%, reflecting the reduced impairment charges compared with 2009.

Net interest income

	2011 £m	2010 £m	2009 £m
RBB, Corporate and Wealth customer interest income			
– Customer assets	6,983	6,956	7,110
– Customer liabilities	2,866	2,167	1,407
	9,849	9,123	8,517
RBB, Corporate and Wealth non-customer interest income			
– Product structural hedge	1,168	1,403	1,364
– Equity structural hedge	824	731	537
– Other	148	116	399
Total RBB, Corporate and Wealth net interest income	11,989	11,373	10,817
Barclays Capital	1,177	1,121	1,598
Head Office and Investment Management	(965)	29	(497)
Group net interest income	12,201	12,523	11,918

2011

Group net interest income decreased £322m to £12,201m reflecting an increase in customer net interest income, more than offset by a reduction in benefits from Group hedging activities and reduced income transferred from trading income within Head Office relating to interest rate swaps used for hedge accounting purposes. The net interest margin for RBB, Corporate and Wealth remained stable at 2.04% (2010: 2.03%).

Group net interest income includes the impact of economic equity structural hedges used to manage the volatility in earnings on the Group's equity. Equity structural hedges generated a gain of £2,109m in 2011 (2010: gain £1,788m), of which £824m (2010: £731m) related to RBB, Corporate and Wealth.

2010

Group net interest income increased £605m to £12,523m and included the impact of the acquisitions of Standard Life Bank and the Portuguese and Italian credit card businesses of Citigroup in Europe RBB, and currency translation gains in Absa. These impacts have been partly off-set by the continued effects of liability margin compression being felt across the Group. Equity structural hedges generated a gain of £1,788m in 2010 (2009: gain £1,162m).

Further discussion of margins is included in the analysis of results by business and on page 126.

Financial review

Income statement commentary continued

Non-interest income

	2011 £m	2010 £m	2009 £m
Net fee and commission income	8,622	8,871	8,418
Net trading income	7,660	8,078	7,001
Net investment income	2,305	1,477	56
Net premiums from insurance contracts	1,076	1,137	1,172
Gains on debt buy-backs and extinguishments	1,130	–	1,249
Other income	39	118	140
Net claims and benefits incurred on insurance contracts	(741)	(764)	(831)
Non-interest income	20,091	18,917	17,205

2011

Net fee and commission income declined £249m to £8,622m, primarily due to financial advisory and debt underwriting income within Barclays Capital being impacted by lower deal activity.

Net trading income decreased £418m to £7,660m. Trading income, which principally arises in Barclays Capital decreased 36% to £4,952m reflecting lower contributions from Commodities and Fixed Income Rates and Credit, partially offset by an increase in currency benefiting from market volatility and strong client volumes. The impact from difficult trading conditions was partially offset by a gain on own credit of £2,708m (2010: £391m).

Net investment income increased £828m to £2,305m driven by the gains on the sale of hedging instruments held as part of the economic structural hedge portfolio together with gains on disposals of other available for sale assets and increases in other investment income.

Net premiums from insurance contracts less claims and benefits received reduced 10% to £335m.

Gains on debt buy-backs and extinguishments were £1,130m (2010: £nil) resulting from the retirement of Tier 1 capital, which will not qualify as Tier 1 capital under Basel 3.

2010

Net fee and commission income increased £453m to £8,871m, primarily due to Barclays Capital performance across Investment Banking and Equities.

Net trading income increased £1,077m to £8,078m. Trading income decreased 13% to £7,687m reflecting a more challenging market environment compared with the very strong prior year. The impact from difficult trading conditions was more than offset by a £4,293m reduction in credit market fair value losses to £124m (2009: £4,417m) and a gain on own credit of £391m (2009: £1,820m loss).

Net investment income increased £1,421m to £1,477m driven by the gains on the sale of hedging instruments held as part of the economic structural hedge portfolio together with realised gains on principal investments, the disposal of available for sale assets and a reduction in fair value losses within Barclays Capital.

Net premiums from insurance contracts less claims and benefits incurred increased 9% to £373m.

Gains on debt buy-backs and extinguishments were £nil (2009: £1,249m).

Credit impairment charges and impairment on available for sale assets

	2011 £m	2010 £m	2009 £m
Loan impairment	3,790	5,625	7,358
Impairment charges on available for sale assets (excluding BlackRock, Inc.)	60	51	670
Impairment charges/(writebacks) on reverse repurchase agreements	(48)	(4)	43
Credit impairment charges and other provisions	3,802	5,672	8,071
Impairment of investment in BlackRock, Inc.	1,800	–	–

2011

Loan impairment fell 33% to £3,790m, reflecting generally improving underlying trends across the majority of retail and wholesale businesses. Retail impairment charges reduced 27%, principally relating to Barclaycard, UKRBB and Africa RBB. Wholesale impairment charges reduced 41%, principally reflecting lower charges in Spain and in Barclays Capital, including a release of £223m relating to the loan to Protium which has now been repaid.

As at 30 September 2011, an impairment charge of £1,800m was recognised resulting from an assessment that there was objective evidence that the Group's investment in BlackRock, Inc. was impaired. The impairment reflects the recycling through the income statement of the cumulative reduction in market value previously recognised in the available for sale reserve since the Group's acquisition of its holding in BlackRock, Inc. as part of the sale of Barclays Global Investors on 1 December 2009.

2010

Loan impairment fell 24% to £5,625m, reflecting improving credit conditions in the main sectors and geographies in which Barclays lends, which led to lower charges across the majority of businesses. The largest reduction was in the wholesale portfolios, due to lower charges against credit market exposures and fewer large single name charges. In the retail portfolios, impairment performance improved as delinquency rates fell across Barclays businesses, most notably the UK, US, Spanish, Indian and African portfolios.

The impairment charges against available for sale assets and reverse repurchase agreements fell by 93% to £47m, principally driven by lower impairment against credit market exposures.

Operating expenses

	2011 £m	2010 £m	2009 £m
Staff costs	11,407	11,916	9,948
Administration and general expenses	6,356	6,585	5,560
Depreciation	673	790	759
Amortisation of intangible assets	419	437	447
Impairment of goodwill	597	243	1
Provision for PPI redress	1,000	–	–
Bank levy	325	–	–
Operating expenses	20,777	19,971	16,715

2011

Operating expenses increased 4% to £20,777m driven by the £1,000m provision for PPI redress and the £325m UK bank levy, which came into effect during the year. The impairment of goodwill includes the write off of £550m Spanish goodwill, following the annual impairment assessment. The depreciation charge reduced 15% to £673m, principally reflecting the extended period over which certain categories of fixed assets are utilised.

2010

Operating expenses increased 19% to £19,971m driven by increases in staff costs, administration and general expenses and impairment of goodwill. The impairment of goodwill reflected the write off of the goodwill relating to Barclays Bank Russia of £243m.

Staff costs

	2011 £m	2010 £m	2009 £m
Performance costs	2,527	3,350	3,055
Salaries	6,277	6,151	4,893
Other share based payments	167	168	133
Social security costs	716	719	606
Post-retirement benefits	727	528	207
Total compensation costs	10,414	10,916	8,894
Bank payroll tax	76	96	225
Other	917	904	829
Non compensation costs	993	1,000	1,054
Staff costs	11,407	11,916	9,948

2011

Staff costs decreased 4% to £11,407m, largely due to a 25% reduction in performance costs partially offset by the non-recurrence of a £304m credit in 2010 relating to post retirement benefits. Charges relating to prior year deferrals were £1bn. The Group incentive awards granted (which exclude charges relating to prior year deferrals but include current year awards vesting in future years) were down 26% to £2.6bn. Barclays Capital incentive awards were down 35% to £1.7bn.

Salaries increased 2% to £6,277m against a moderately declining average headcount. As at 31 December, staff numbers decreased 4% year on year primarily due to restructuring activities across the businesses.

The UK Government applied a bank payroll tax of 50% to all discretionary bonuses over £25,000 awarded to UK bank employees between 9 December 2009 and 5 April 2010. The total bank payroll tax paid was

£437m, of which £321m was recognised between 2009 and 2010. For 2011, a charge of £76m has been recognised in relation to prior year deferrals, with the remaining £40m to be recognised over the period 2012 to 2013.

2010

Staff costs increased 20% to £11,916m largely due to a £1,258m increase in salaries and a £295m increase in performance costs. These increases primarily relate to charges for prior year awards, the build-out in Equities and Investment Banking at Barclays Capital in 2010 and strategic growth initiatives at Barclays Wealth. Charges relating to prior year deferrals were £0.9bn. The Group performance awards granted (which exclude charges relating to prior year deferrals but include current year awards vesting in future years) were down 6% to £3.5bn. Barclays Capital incentive awards were down 10% to £2.7bn.

The post retirement benefit charge increased by £321m reflecting the non-recurrence of the £371m one-off credit arising on closure of the final salary scheme in 2009 offset by the credit in 2010 of £250m resulting from amendments to the treatment of minimum defined benefits and £54m relating to the Group's recognition of a surplus in Absa, as well as favourable investment returns over the period.

Administration and general expenses

	2011 £m	2010 £m	2009 £m
Property and equipment	1,763	1,813	1,641
Outsourcing and professional services	1,869	1,705	1,496
Operating lease rentals	659	637	639
Marketing, advertising and sponsorship	585	631	492
Communications, subscriptions, publications and stationery	740	750	695
Travel and accommodation	328	358	273
Other administration and general expenses	400	566	263
Impairment of property, equipment and intangible assets	12	125	61
Administration and general expenses	6,356	6,585	5,560

2011

Administration and general expenses decreased £229m to £6,356m, principally reflecting the benefits of restructuring and the non-recurrence of the one-off provision in respect of the resolution of a review of Barclays compliance with US economic sanctions that occurred in 2010. These reductions have been offset by an increase in outsourcing and professional services as a result of Barclaycard acquisitions, restructuring charges and increased regulatory costs.

2010

Administration and general expenses increased £1,025m to £6,585m. The increase was principally due to greater regulatory related costs across the Group, investment in technology and infrastructure, acquisitions and adverse impacts of foreign currency movements. Impairment charges on property, equipment and intangible assets of £125m (2009: £61m) were principally driven by restructuring.

Financial review

Income statement commentary continued

Other net income

	2011 £m	2010 £m	2009 £m
Profit from associates	20	19	19
Profit from joint ventures	40	39	15
Share of post-tax results of associates and joint ventures (Loss)/profit on disposal of subsidiaries, associates and joint ventures	(94)	81	188
Gain on acquisitions	–	129	26
Other net income	(34)	268	248

2011

The share of post-tax results of associates and joint ventures was stable at £60m. The loss on disposal was largely attributable to the £96m loss arising from disposal of Barclays Bank Russia.

2010

The share of post-tax results of associates and joint ventures increased £24m to £58m largely relating to Barclaycard and Absa. The profit on disposal was largely attributable to the £77m profit arising from sale of Barclays Africa custody business to Standard Chartered Bank.

On 1 January 2010, the Group acquired 100% of Standard Life Bank PLC realising a gain on acquisition of £100m. On 31 March 2010, the Group acquired 100% of the Italian credit card business of Citibank International PLC realising a gain of £29m.

Tax

The table below shows the reconciliation between the actual tax charge and the tax charge that would result from applying the standard UK corporation tax rate to the Group's profit before tax.

	2011 £m	2010 £m	2009 £m
Profit before tax from continuing operations	5,879	6,065	4,585
Tax charge based on the standard UK corporation tax rate of 26.5% (2010: 28%, 2009: 28%)	1,558	1,698	1,284
Effect of non-UK profits or losses at different local statutory tax rates	190	108	(27)
Non-creditable taxes	567	454	175
Non-taxable gains and income	(494)	(572)	(287)
Impact of share price movements on share-based payments	147	41	(38)
Deferred tax assets (previously not recognised) / not recognised	(816)	(160)	27
Change in tax rates	17	34	(12)
Non-deductible impairment charges, loss on disposals and UK bank levy	770	68	19
Other items including non-deductible expenses	120	(140)	153
Adjustments in respect of prior years	(131)	(15)	(220)
Tax charge	1,928	1,516	1,074
Effective tax rate	32.8%	25.0%	23.4%

2011

The tax charge for continuing operations for 2011 was £1,928m (2010: £1,516m) on profit before tax of £5,879m (2010: £6,065m), representing an effective tax rate of 32.8% (2010: 25.0%). The effective tax rate reflects the non-deductible charges for the impairment of the investment in BlackRock, Inc. of £1,800m (2010: nil), goodwill impairment of £597m (2010: £243m) and the UK bank levy of £325m (2010: nil).

On 27 February 2012, HMRC announced its intention to implement new tax legislation, to apply retrospectively from 1 December 2011 that would result in the £1,130m gains on debt buy-backs being subject to different tax treatment to that currently allowed under UK tax law. Barclays voluntarily disclosed the transaction to HMRC and, as at 31 December 2011, held a provision for the potential tax payable in relation to the transaction. If the legislation had been enacted as at 31 December 2011, any additional tax charge would not have had a material impact on the Group's 2011 results.

Deferred tax assets, which principally relate to Barclays businesses in the US and Spain, increased by 20% to £3,010m (2010: £2,517) largely due to improved financial performance in the US supporting additional deferred tax assets not previously recognised.

2010

The tax charge for continuing operations for 2010 was £1,516m (2009: £1,074m) representing an effective tax rate of 25% (2009: 23.4%). The effective tax rate differs from the UK tax rate of 28% (2009: 28%) because of non-taxable gains and income, different tax rates that are applied to the profits and losses outside of the UK and deferred tax assets previously not recognised.

Total tax contribution

In 2011, we made global tax payments of £6,419m (2010: £6,149m), made up of £3,341m (2010: £3,138m) of taxes borne by Barclays and £3,078m (2010: £3,011m) of taxes collected from employees and customers on behalf of governments, £2,866m (2010: £2,776m) being employee income taxes which arise through Barclays economic activity. Barclays paid corporate income tax of £1,686m (2010: £1,458m) in 2011 as shown in the cash flow statement and Note 11 to the financial statements.

The total tax paid to the UK Exchequer in 2011, was £2,891m (2010: £2,827m), made up of £1,400m (2010: £1,381m) of taxes borne by Barclays and £1,491m (2010: £1,446m) of taxes collected on behalf of the government which includes £1,464m (2010: £1,347m) of tax payments made on behalf of employees.

Financial review

Balance sheet commentary

Total assets

Total assets increased £74bn to £1,564bn principally due to an increase in the fair value of interest rate derivatives partially offset by a decrease in reverse repurchase agreements.

Cash, balances at central banks and items in the course of collection increased £9.7bn contributing to the Group liquidity pool. Trading portfolio assets decreased £16.7bn, and reverse repurchase and other similar secured lending decreased £52.1bn.

Derivative financial assets increased £118.6bn principally reflecting increases in the mark-to-market positions in interest rate derivatives due to movements in forward interest rate curves.

Loans and advances to banks and customers increased £13.6bn principally due to an increase in lending to retail customers and market volatility resulting in a rise in cash collateral balances.

Available for sale financial investments increased £3.4bn primarily driven by purchase of government bonds increasing the Group's liquid assets. This was partially offset by a £0.5bn reduction in the fair value of the Group's investment in BlackRock, Inc.

Total liabilities

Total liabilities increased £71bn to £1,498bn.

Deposits and items in the course of collection and customer accounts increased £33bn reflecting customer deposit growth across the Group as well as market volatility resulting in a rise in cash collateral balances. Financial liabilities designated at fair value decreased £9.7bn and debt securities in issue decreased £26.9bn due to managed changes in the funding composition.

Trading portfolio liabilities decreased £26.8bn, and repurchase agreements and other similar secured borrowing decreased £18.2bn. Derivative financial liabilities increased £122.4bn broadly in line with the increase in derivative assets.

Subordinated liabilities decreased £3.6bn primarily reflecting the early retirement of capital that does not qualify under Basel 3.

Shareholders' equity

Total shareholders' equity increased £2.9bn to £65.2bn. Share capital and share premium remained relatively stable at £12.4bn. Retained earnings increased £2.6bn to £39.4bn with profit attributable to the equity holders of the Parent of £3bn partially offset by dividends paid of £0.7bn.

Available for sale reserve increased £1.4bn, largely driven by £2.7bn gains from changes in fair value, offset by £1.6bn of net gains transferred to the income statement after recognition of £1.8bn impairment on the Group's investment in BlackRock, Inc. Currency translation reserve movements of £1bn were largely due to the appreciation in the US Dollar, offset by the depreciation in the Euro, Rand and Indian Rupee.

Non-controlling interests decreased £1.8bn to £9.6bn, primarily reflecting currency translation movements of £0.6bn relating to the Rand, and the redemption of £1.5bn reserve capital instruments.

Net asset value per share increased 9% to 456p and net tangible asset value per share increased 13% to 391p.

Balance sheet leverage

Barclays continues to operate within limits and targets for balance sheet usage as part of its balance sheet management activities.

The adjusted gross leverage was 20x (2010: 20x) principally reflecting a £3.1bn decrease in Tier 1 capital offset by a £52.8bn decrease in adjusted total tangible assets. At month ends during 2011 the ratio moved in a range from 20x to 23x, with fluctuations arising primarily within collateralised reverse repurchase lending and high quality trading portfolio assets.

The ratio of total assets to total shareholders' equity was 24x as at 31 December 2011 (2010: 24x). The ratio moved within a month end range of 24x to 28x, driven by trading activity fluctuations including changes in derivatives and settlement balances.

Financial review

Balance sheet commentary continued

Capital management

The Core Tier 1 ratio remained robust at 11.0% (2010: 10.8%) and the Tier 1 ratio was 12.9% (2010: 13.5%).

Risk weighted assets decreased 2% from £398bn to £391bn in 2011. This was largely driven by a reduction across credit, counterparty and market risk in Barclays Capital, due to lower levels of activity, risk reduction and sell down of credit market exposures. In addition, there was a reduction from foreign currency movements, primarily depreciation of the Rand and Euro against Sterling. These decreases more than outweighed the approximate £30bn increase resulting from the implementation of CRD3 in December 2011.

Core Tier 1 capital increased by £0.2bn to £43.1bn. £2.6bn of capital generated from retained profits was offset by reduction in the value of the investment in Blackrock Inc. to September 2011, contributions made to the UK Retirement fund and foreign currency movements. Total capital resources decreased by £3.4bn to £63.9bn mainly as a result of the buy back and redemption of Tier 1 instruments which will not qualify under Basel 3.

Liquidity and Funding

The Group's overall funding strategy is to develop a diversified funding base and maintain access to a variety of funding sources, minimising the cost of funding and providing protection against unexpected fluctuations. The Group aims to align the sources and uses of funding.

Customer loans and advances are largely funded by deposits, with any excess funded by long-term secured debt and equity. The total loan to deposit ratio was 118% (2010: 124%) and the loan to deposit and long-term funding ratio was 75% (2010: 77%).

Wholesale funding is well managed with trading portfolio assets being largely funded by repurchase agreements and the majority of reverse repurchase agreements being matched by repurchase financing. Derivative assets and liabilities are also largely matched.

As at 31 December 2011, the Group had £265bn of wholesale debt diversified across currencies, of which £39bn was secured. Term funding raised in 2011 was £30bn (2010: £35bn) compared maturities of £25bn.

Approximately 10% of customer loans and advances were secured against external funding, leaving significant headroom for further secured issuance.

At 31 December 2011 the liquidity pool was £152bn (2010: £154bn) and moved within a month-end range of £140bn to £167bn. The liquidity pool comprises high quality, liquid unencumbered assets, diversified across currencies broadly in line with wholesale debt requirements, with 93% (2010: 88%) comprising cash and deposits with central banks and government bonds.

Notes

a The impact of own credit movements in the fair value of structured note issuance of £2,708m (2010: £391m; 2009: loss of £1,820m) is now included within the results of Head Office Functions and Other Operations, rather than Barclays Capital. This reflects the fact that these fair value movements relate to the credit worthiness of the issuer as a whole, rather than Barclays Capital in particular, and are not included within any assessment of Barclays Capital's underlying performance. Furthermore, delays to planned changes in accounting standards will mean own credit movements are likely to continue to be reflected in the income statement for the foreseeable future.

b The UK bank levy of £325m (2010: £nil, 2009: £nil) is reported under Head Office and Other Operations.

c The provision for PPI redress of £1,000m is reported under UK RBB £400m (2010: £nil, 2009: £nil) and Barclaycard £600m (2010: £nil, 2009: £nil).

d The impairment of goodwill of £597m (2010: £243m, 2009: £1m) relates to Europe RBB £427m (2010: £nil, 2009: £nil), Barclays Corporate £123m (2010: £243m, 2009: £1m) and Barclaycard £47m (2010: £nil, 2009: £nil).

e Other income/(losses) represents: share of post-tax results of associates and joint ventures; profit or (loss) on disposal of subsidiaries, associates and joint ventures; and gains on acquisitions.

Financial review

Analysis of results by business continued

Since 1 January 2011 the Group's activities have been organised under the following business groupings:

- UK Retail and Business Banking (UK RBB) is a leading UK high street bank providing current account and savings products and Woolwich branded mortgages. UK RBB also provides unsecured loans and general insurance as well as banking and money transmission services to small and medium sized businesses. UK RBB was previously named UK Retail Banking;
- Europe Retail and Business Banking (Europe RBB) provides retail services, including credit cards in Spain, Italy, Portugal and France, as well as business lending to small and medium sized enterprises, through a variety of distribution channels. Europe RBB was previously named Western Europe Retail Banking;
- Africa Retail and Business Banking (Africa RBB) provides retail, corporate and credit card services across Africa and the Indian Ocean. Africa RBB combines the operations previously reported as Barclays Africa and Absa;
- Barclaycard is an international payments services provider for consumer and business customers including credit cards and consumer lending;
- Barclays Capital is the investment banking division of Barclays providing large corporate, government and institutional clients with a full spectrum of solutions to meet their strategic advisory, financing and risk management needs;
- Barclays Corporate provides integrated banking solutions to large corporates, financial institutions and multinationals in the UK and internationally;
- Barclays Wealth is the wealth management division of Barclays. It focuses on private and intermediary clients worldwide, providing international and private banking, investment management, fiduciary services and brokerage;
- Investment Management manages the Group's economic interest in BlackRock, Inc. and the residual elements relating to Barclays Global Investors, which was sold on 1 December 2009; and
- Head Office Functions and Other Operations comprise head office and central support functions, businesses in transition and consolidation adjustments.

Income by Geographic Region ^{a,b} (audited)	2011 £m	2010 £m	2009 £m
UK	15,819	12,714	12,850
Europe	4,207	4,828	4,455
Americas	6,025	7,742	6,531
Africa and Middle East	4,967	4,997	4,390
Asia	1,274	1,159	897
Total	32,292	31,440	29,123

In 2009, discontinued operations of the Barclays Global Investors business included £432m relating to UK, £1,084m relating to the Americas and £347m relating to other geographic segments.

Income from individual countries which represent more than 5% of total income ^a (audited)	2011 £m	2010 £m	2009 £m
UK	15,819	12,714	12,850
US	5,802	7,172	5,547
South Africa	3,942	3,684	2,980

Notes

a Total income net of insurance claims based on counterparty location.

b The geographical regions have been revised since January 2011, Ireland is now included within the Europe and Middle East is now reported with Africa. Comparatives have been updated to reflect these changes.

Returns and equity by business

Returns on average equity and average tangible equity are calculated using profit after tax and non-controlling interests for the period, divided by average allocated equity or tangible equity as appropriate.

Average allocated equity has been calculated as 10% (previously 9% in 2010 and 8% in 2009) of average risk weighted assets for each business, reflecting the planning assumptions the Group uses for capital purposes, adjusted for capital deductions, including goodwill and intangible assets. The higher level of capital currently held, reflecting the current Core Tier 1

capital ratio of 11.0%, is allocated to Head Office Functions and Other Operations. The Group return on average risk weighted assets was 1.0% (2010: 1.1%, 2009: 0.9%). Average allocated tangible equity is calculated using the same method as average allocated equity but excludes goodwill and intangible assets.

Comparatives throughout this document have been calculated based on 10% of risk weighted assets.

Return on Average Equity	Adjusted ^a			Statutory

Group	51,813	49,837	39,445	43,451	40,983	29,342

Notes

a Adjusted performance measures exclude the impact of own credit gains, gains on debt buy-backs, loss on disposal of a portion of the Group's strategic investment in BlackRock, Inc., impairment of investment in BlackRock, Inc., provision for PPI redress, goodwill impairment and loss/gain on acquisitions and disposals.

b The return on average tangible equity for Africa RBB is calculated based on average tangible equity including amounts relating to Absa Group's non-controlling interests.

c Includes risk weighted assets and capital deductions in Head Office Functions and Other Operations, plus the residual balance of average shareholders' equity and tangible equity.

Financial review

Analysis of results by business continued

Retail and Business Banking

UK Retail and Business Banking

2011

UK Retail and Business Banking adjusted profit before tax improved 60% to £1,420m. Including £400m provision for PPI redress and £100m gain on acquisition of Standard Life Bank in 2010 profit before tax improved 3% to £1,020m.

Income increased 3% to £4,656m driven by mortgages and personal savings.

Net interest income increased 8% to £3,413m with the net interest margin rising to 151bps (2010: 145bps) and risk adjusted net interest margin up to 127bps (2010: 108bps). Customer asset margin declined to 122bps (2010: 126bps) with average customer assets increasing 4% to £118.5bn. Customer liability margin improved to 87bps (2010: 68bps) reflecting the increase in the cost of funds and therefore the value generated from customer liabilities with average customer liabilities increasing 3% to £107.8bn.

Net fee and commission income decreased 8% to £1,157m following closure of the branch-based element of the financial planning business.

Credit impairment charges decreased 35% to £536m with annualised loan loss rate of 44bps (2010: 70bps), Personal unsecured lending impairment improved 44% to £311m with 90 day arrears rates on UK personal loans improving to 1.7% (2010: 2.6%).

Operating expenses decreased 8% to £2,702m, excluding £400m provision for PPI redress in 2011 and £123m one-off pension credit in 2010. Including these items, operating expenses increased 10% to £3,102m.

Total loans and advances to customers increased 5% to £121.2bn driven by growth in mortgage balances. Average mortgage balances increased 6% reflecting strong positive net lending. Mortgage balances at 31 December 2011 were £107.8bn, a share by value of 9% (2010: 8%).

Notes

a Adjusted profit before tax excludes the impact of the provision for PPI redress of £400m (2010: £nil; 2009: £nil) and gains on acquisitions of £nil (2010: £100m; 2009: £nil).

b In 2010 the acquisition of Standard Life Bank contributed £5.9bn loans and advances and £5.2bn customer accounts.

£4,656m
total income net of insurance claims

£1,020m
profit before tax

Gross new mortgage lending increased to £17.2bn (2010: £16.9bn), with a share by value of 12% (2010: 13%). Mortgage redemptions decreased to £10.7bn (2010: £11.0bn), resulting in net new mortgage lending of £6.5bn (2010: £5.9bn). Average Loan to Value (LTV) ratio on the mortgage portfolio (including buy to let) on a current valuation basis was 44% (2010: 43%). Average LTV of new mortgage lending was 54% (2010: 52%).

Risk weighted assets decreased 4% to £34.0bn reflecting a decrease in unsecured lending balances partially offset by the growth in mortgage balances.

Adjusted return on average equity improved to 14.9% (2010: 9.9%) and adjusted return on average tangible equity improved to 28.6% (2010: 18.7%).

2010

UK Retail and Business Banking profit before tax increased 39% to £989m, driven by good income growth and lower impairment charges, more than offsetting an increase in operating expenses. The 2010 results also reflected a gain of £100m on the acquisition of Standard Life Bank.

Income increased 6% to £4,518m reflecting strong balance sheet growth.

Net interest income increased 11% to £3,165m reflecting business growth. The net interest margin for UK RBB remained stable at 145bps (2009: 145bps) with the risk adjusted net interest margin increasing to 108bps (2009: 93bps).

Total average customer asset balances increased 11% to £113.7bn reflecting good growth in Home Finance mortgage balances and the acquisition of Standard Life Bank. The customer asset margin decreased to 126bps (2009: 145bps) reflecting the impact of the revised internal funds pricing mechanism. Total average customer deposit balances increased 12% to £104.5bn, reflecting good growth in personal customer balances and the impact of Standard Life Bank. The customer liability margin increased to 68bps (2009: 42bps) reflecting the impact of the revised internal funds pricing mechanism. Total customer account balances increased to £108.4bn (2009: £96.8bn).

Credit impairment charges represented 70bps (2009: 98bps) of total gross loans and advances to customers and banks. This translates to a reduction in impairment charges of 21% to £819m, reflecting focused risk management and improved economic conditions. Impairment charges within Consumer Lending and Current Accounts decreased 29% to £418m (2009: £592m), and 27% to £134m (2009: £183m) respectively. Home Finance impairment charges remained low at £29m (2009: £26m). As a percentage of the portfolio, three-month arrears rates for the UK loans improved to 2.6% (2009: 3.8%).

Operating expenses increased 11% to £2,809m, reflecting higher pension costs, increased regulatory-related costs and the impact of the acquisition of Standard Life Bank. Excluding these items operating expenses were in line with prior year.

Total loans and advances to customers increased to £115.6bn Average mortgage balances grew 16%, reflecting strongly positive net lending and the acquisition of Standard Life Bank. As at 31 December 2010 mortgage balances were £101.2bn, a share by value of 8% (2009: 7%). Gross new mortgage lending increased to £16.9bn (2009: £14.2bn), a share by value of 13% (2009: 10%). Mortgage redemptions increased to £11.0bn (2009: £8.5bn), resulting in net new mortgage lending of £5.9bn (2009: £5.7bn). The average loan to value ratio of the mortgage portfolio (including buy-to-let) on a current valuation basis was 43% (2009: 43%). The average loan to value ratio of new mortgage lending was 52% (2009: 48%).

Total assets increased 11% to £121.6bn driven by growth in Home Finance. Risk weighted assets remained broadly flat at £35.3bn with growth in Home Finance offset by a decline in Consumer Lending balances and improvements in operational risk weighted assets.

Improvements in the adjusted return on average equity to 9.9% (2009: 7.5%) and adjusted return on average tangible equity to 18.7% (2009: 14.1%) reflected the increase in profit after tax which more than offset the growth in average equity that was driven by growth in average risk weighted assets.

Analysis of results by business continued

Retail and Business Banking

Europe Retail and Business Banking

2011

Europe Retail and Business Banking adjusted loss before tax increased to £234m (2010: £168m) reflecting repositioning of the business due to the deteriorating economic environment and restructuring charges of £189m (2010: £22m). Loss before tax of £661m (2010: £139m) reflecting £427m of Spanish goodwill impairment and restructuring charges of £189m. Spanish goodwill was fully impaired due to the deteriorating economic environment in Spain in the fourth quarter of 2011 and ongoing economic uncertainty.

Income improved 5% to £1,226m reflecting higher average asset and liability volumes, improved margins and the appreciation of the average value of the Euro against Sterling.

Net interest income improved 16% to £786m with the net interest margin up to 128bps (2010: 116bps). Average customer assets increased 5% to £43.7bn despite customer asset margin reduction to 87bps (2010: 102bps) due to increased funding costs. Average customer liabilities increased 3% to £17.7bn with customer liability margin up to 65bps (2010: 11bps) mainly due to re-pricing.

Net premiums from insurance contracts declined 3% to £463m, with a corresponding decline in net claims and benefits of £503m (2010: £511m).

Credit impairment charges and other provisions decreased 17% to £261m principally due to lower charges in the cards portfolios reflecting lower 30 and 90 day arrears rates and lower recovery balances. The lower impairment was the main driver for the loan loss rate decreasing to 54bps (2010: 71bps).

£1,226m
total income net of insurance claims

£661m
loss before tax

Operating expenses excluding the £427m Spanish goodwill impairment increased 17% to £1,211m, primarily due to restructuring charges of £189m. 142 branches, largely in Spain, have been closed and the number of employees reduced by 900 during 2011.

Loans and advances to customers remained stable. Customer deposits decreased 13% to £16.4bn, reflecting the competitive environment.

Adjusted return on average equity of negative 6.0% (2010: negative 1.0%) reflecting the repositioning of the business during 2011.

2010

Europe RBB incurred a loss before tax of £139m (2009: profit of £280m). The deterioration in performance was largely driven by the challenging economic environment and continued investment in the franchise. In addition, the 2009 result benefited notably from a £157m gain on the sale of 50% of Barclays Iberian life insurance and pensions business.

Income fell 12% to £1,164m, due to lower net interest income and the 3% decline in the average value of the Euro against Sterling, partially offset by higher net fee and commission income.

Net interest income fell 22% to £679m, mainly reflecting a decline in treasury interest income and continued underlying liability margin compression due to the highly competitive market, partially offset by the benefit from growth in credit cards. As a result, the net interest margin reduced to 116bps (2009: 166bps). The risk adjusted net interest margin fell to 62bps (2009: 102bps).

Net fee and commission income increased 20% to £421m. The growth reflects the investment in the network in previous years and the growth in the credit card business.

Despite the challenging economic conditions, impairment charges improved 7% to £314m reflecting focused credit risk management. Delinquency trends improved with the overall 30-day delinquency rate falling to 1.8% (2009: 2.1%).

Operating expenses increased 16% to £1,033m due to investment in developing the franchise, in Portugal and Italy in particular, with a net increase of 101 distribution points in 2010, and costs associated with the expansion of the credit card businesses in these countries. The £29m gain on acquisition was generated on the purchase of Citigroup's Italian card business in March 2010. This resulted in the addition of approximately 200,000 customers and loans and advances to customers of £0.2bn. The £26m gain in 2009 arose on the acquisition of Citigroup's Portuguese card business.

Loans and advances to customers increased 6% to £43.4bn and customer accounts increased 7% to £18.9bn due to continued growth in the businesses more than offsetting the negative impact of the value of the Euro against Sterling. Risk weighted assets increased 3% to £17.3bn (2009: £16.8bn) in line with the growth in loans and advances to customers.

Negative returns on average equity and average tangible equity in 2010 were the result of the deterioration in profitability.

Customer numbers increased 13% to 2.7 million (2009: 2.4 million) reflecting the growth in the underlying business and the benefit of the purchase of Citigroup's Italian cards business.

c 2010 return on average equity, return on average tangible equity and return on average risk weighted assets reflect a deferred tax benefit of £205m.

Financial review

Analysis of results by business continued

Retail and Business Banking

Africa Retail and Business Banking

2011

Africa Retail and Business Banking adjusted profit before tax improved 26% to £908m reflecting business growth in South Africa and a significant improvement in credit impairments across the African continent offset by non-recurrence of a pension credit of £54m in 2010. Profit before tax improved 13% to £910m, with 2010 including a gain of £77m from the sale of the custody business.

Income improved 2% to £3,767m with good underlying growth offset by currency movements.

Net interest income improved 3% to £2,096m with the net interest margin up to 307bps (2010: 294bps). South Africa improved 9% to £1,628m due to strong liability growth and margin improvements, partially offset by the depreciation in the average value of the Rand against Sterling and a reduction in total advances to customers. The rest of the African businesses declined 12% to £468m due to Sterling appreciation and the impact of margin compression in both retail and corporate portfolios.

Average customer assets decreased 6% to £38.9bn, driven by depreciation of major African currencies against Sterling and lower volumes. Customer asset margin remained stable at 311bps (2010: 312bps). Improvement in South Africa driven by strong liability growth and margin improvements, partially offset by the depreciation in the average value of the Rand against Sterling and a reduction in total advances to customers.

Average customer liabilities increased 6% to £29.5bn driven by underlying growth in retail and commercial deposits of 13% in South Africa partially offset by depreciation of the Rand against Sterling. Customer liability margin remained stable at 227bps (2010: 225bps) as growth in high margin products within retail was offset by pressures on commercial margins.

Net fee and commission income declined 4% to £1,271m reflecting the impact of currency movements partially offset by the impact of volume growth and selected pricing increases.

	2011 £m	2010 £m	2009 £m

Note

a Adjusted profit before tax and adjusted performance measures excludes the impact of gains on acquisitions and disposals of £2m (2010: £81m; 2009: £21m).

£3,767m
total income net of insurance claims

£910m
profit before tax

Credit impairment charges decreased 17% to £464m reflecting improved economic conditions in South Africa and better recoveries across the continent, together with currency movements.

Operating expenses decreased 1% to £2,399m, primarily driven by strong cost management, currency movements and restructuring benefits partially offset by a one-off pension credit in 2010 and inflationary pressures.

Total loans and advances to customers decreased 19% to £36.7bn primarily reflecting a 16% impact from currency movements.

2010

Africa RBB profit before tax increased 27% to £804m mainly as a result of the 16% appreciation in the average value of the Rand against Sterling. Excluding one-off gains on disposal of £81m profit before tax increased 18% to £723m.

Income increased 12% to £3,700m primarily reflecting the impact of currency movements.

Net interest income improved 13% to £2,033m with the net interest margin up to 294bps. South Africa improved 15% to £1,500m reflecting the appreciation in the average value of the Rand against Sterling.

Average customer assets increased 12% to £41.3bn primarily driven by the appreciation of the Rand. In Rand terms, retail loans and commercial mortgages remained stable as personal loans increased while cheque, instalment finance and commercial property finance balances showed a decline as a result of a slower take up of new loans by customers.

Customer asset margin increased to 312bps (2009: 304bps) primarily as a result of the pricing of new loans and a change in the product mix as higher margin products grew faster than low margin combined with a reduction in funding costs.

Average customer liabilities increased 17% to £27.7bn primarily driven by the appreciation of the Rand. Customer liability margin decreased to 225bps (2009: 250bps) due to significant competition for deposits in South Africa and margin compression in the rest of the continent. Absa's hedging programme partly offset the impact of lower interest rates.

Net fee and commission income increased 18% to £1,318m mainly reflecting the impact of exchange rate movements and volume growth within South Africa.

Credit impairment charges decreased 18% to £562m primarily due to lower impairment charges on the retail portfolio as a result of a better economic environment and improved collections.

Operating expenses increased 22% to £2,418m reflecting exchange rate movements and continued investment in growth initiatives and £40m restructuring costs, partially offset by a one-off credit of £54m relating to the Group's recognition of a pension fund surplus.

Total assets increased 12% to £60.3bn mostly due to the impact of exchange rate movements. Risk weighted assets increased 32% to £38.4bn primarily due to the impact of exchange rate movements, enhancements to the retail model and wholesale credit remediation plan.

Retail and Business Banking

Barclaycard

2011

Barclaycard adjusted profit before tax improved 53% to £1,208m. Profit before tax declined 29% to £561m after £600m provision for PPI redress and £47m goodwill impairment in the FirstPlus secured lending portfolio. Barclaycard's international businesses profit increased driven by significant improvements in the US and South Africa. Both the Egg consumer card assets and the MBNA corporate card portfolio acquired during the first half of 2011 delivered profits.

Income improved 2% to £4,095m, with growth in balances driven by UK Cards partially offset by higher customer balance repayments in the US and depreciation of US Dollar against Sterling. Barclaycard's UK businesses income improved 8% to £2,639m including contribution from Egg and MBNA portfolios, partially offset by continued run-off of the FirstPlus portfolio. Barclaycard's International businesses income declined 7% to £1,456m due to customer balance repayments in the US and depreciation of the US Dollar against Sterling.

Net interest income improved 2% to £2,860m. Average customer assets increased 5% to £30.3bn. UK Cards average extended card balances increased 27% to £11.2bn due to acquisitions and balance transfers, partially offset by higher customer balance repayments in the US and continued run-off of the FirstPlus portfolio. Customer asset margin was up 17bps to 952bps, with net interest margin down 33bps to 944bps due to hedge impact.

Credit impairment charges decreased 25% to £1,259m principally driven by lower charges in the cards portfolios, reflecting improved underlying delinquency performance, lower bankruptcies and charge-offs.

Operating expenses increased 47% to £2,306m, reflecting the provision for PPI redress, FirstPlus goodwill impairment and the impact of the Egg and MBNA acquisitions. Excluding these items, operating expenses were flat on prior year.

a Adjusted profit before tax and adjusted performance measures excludes the impact of the provision for PPI redress of £600m (2010: £nil; 2009: £nil), £47m goodwill impairment in Firstplus secured lending portfolio (2010: £nil; 2009: £nil) and profit on disposal of £nil (2010: £nil; 2009: £3m).

£4,095m

total income net of insurance claims

£561m

profit before tax

Total assets increased 12% to £33.8bn and risk weighted assets increased 7% to £34.2bn reflecting acquired portfolios and organic growth in the UK. These were partially offset by continued run-off of the FirstPlus portfolio.

Adjusted return on average equity increased to 17.4% (2010: 12.5%) and adjusted return on average tangible equity increased to 23.0% (2010: 16.9%), reflecting increased profit after tax.

2010

Barclaycard profit before tax increased 9% to £791m. Barclaycard's international businesses reported strong growth in profit before tax, particularly in South Africa and the US. South Africa card increased 85% to £176m (2009: £95m) primarily through lower underlying impairment. The US business was profitable following adoption of the requirements of the Credit Card Accountability, Responsibility and Disclosure Act in the US (US Credit CARD Act).

Income was £4,024m (2009:£4,041m) with the impact of the US Credit CARD Act broadly offset by balanced growth across the business. Over 20% of income was generated from products other than consumer credit cards. Barclaycard's UK businesses reported income at £2,453m (2009: £2,493m) reflecting the continued run-off of the FirstPlus secured lending portfolio and lower insurance-related income. International income increased 1% to £1,571m (2009: £1,548m) despite the impact of the US Credit CARD Act.

Net interest income increased 3% to £2,814m reflecting growth in UK consumer card extended credit balances, up 4% to £8.8bn (2009: £8.5bn), and the appreciation of the average value of the Rand against Sterling, partially offset by lower net interest income due to the impact of the US Credit CARD Act and the continued run-off of the FirstPlus portfolio. The customer asset margin improved to 935bps (2009: 934bps), with the net interest margin at 977bps (2009: 969bps).

Net fee and commission income decreased 11% to £1,136m primarily due to the impact of the US Credit CARD Act. Investment income of £39m included a gain of £38m from the sale of Visa shares and MasterCard shares (2009: £20m).

Credit impairment charges reduced 6% to £1,688m reflecting focused risk management and improving economic conditions. As a result, loan loss rates improved to 570bps (2009: 604bps). In addition, the 30-day delinquency rates for consumer card portfolios in the UK of 3.4% (2009: 4.2%), in the US of 4.6% (2009: 6.1%) and in South Africa cards of 7.2% (2009: 8.9%) all reduced compared to 2009.

Operating expenses increased 3% to £1,570m. Excluding increased pension costs and the appreciation of the average value of the Rand against Sterling, operating expenses decreased compared to the prior year.

Total assets were flat at £30.3bn reflecting the appreciation of the US Dollar and the Rand against Sterling offset by the continued run-off of the First Plus portfolio.

Risk weighted assets increased 4% to £31.9bn (2009: £30.6bn), reflecting securitisation redemptions and the appreciation of the US Dollar and the Rand against Sterling.

Adjusted return on average equity of 12.5% (2009: 11.9%) and adjusted return on average tangible equity of 16.9% (2009: 16.5%) increased reflecting increased profit after tax.

Average outstanding balances – Loans				£5.0bn	£5.5bn	£6.0bn
Number of retailer relationships				87,000	87,000	87,000
Number of employees (full time equivalent)				10,400	9,900	10,100

Notes

a Adjusted profit before tax and adjusted performance measures excludes the impact of the provision for PPI redress of £600m (2010: £nil; 2009: £nil), £47m goodwill impairment in Firstplus secured lending portfolio (2010: £nil; 2009: £nil) and profit on disposal of £nil (2010: £nil; 2009: £3m).

b Return on average equity and return on average tangible equity comparatives have been revised to use 10% of average risk weighted assets (previously 2010: 9%; 2009: 8%) in the calculation of average equity and average tangible equity.

c South Africa cards 30 day arrears rates revised to include approved debt counselling accounts.

Financial review

Analysis of results by business continued

Barclays Capital

2011

Barclays Capital profit before tax declined to £2,965m (2010: £4,389) driven by a 22% reduction in income to £10,335m in a challenging market environment, partially offset by reduced credit impairment charges and operating expenses, including compensation costs.

Fixed Income, Currency and Commodities (FICC) declined 27% to £6,325m, reflecting lower contributions from Rates, Credit, and Commodities in a challenging trading environment. Currency improved 27% on 2010, benefiting from market volatility and strong client volumes.

Equities and Prime Services declined 14%, with reduced performance in cash equities and equity derivatives offset by improved client flow in equity financing.

Investment Banking reduced 10%. Equity underwriting was in line with the prior year, while financial advisory and debt underwriting were impacted by lower deal activity.

Credit impairment charge of £93m reflecting charges primarily relating to leveraged finance, offset by a release of £223m of the impairment allowance relating to the Protium loan.

Operating expenses reduced 12% to £7,289m, reflecting a decrease in both non-compensation and compensation costs. The 2011 bonus pool decreased 32% to £1.5bn compared to a decrease in headcount of 3%.

Assets contributing to adjusted gross leverage decreased 10% to £604bn primarily due to a reduction in reverse repurchase transactions. Total assets increased 6% to £1,158bn, reflecting increases in the fair value of gross interest rate derivative assets offset by a reduction in reverse repurchase agreements.

Credit market exposures of £15.2bn, reduced by £8.7bn primarily driven by sale of assets formerly held as Protium collateral and commercial real estate loans and properties.

Note

a The impact of own credit movements in the fair value of structured note issuance of £2,708m (2010: £391m; 2009: loss of £1,820m) is now included within the results of Head Office Functions and Other Operations, rather than Barclays Capital. This reflects the fact that these fair value movements relate to the credit worthiness of the issuer as a whole, rather than Barclays Capital in particular, and are not included within any assessment of Barclays Capital's underlying performance. Furthermore, delays to planned changes in accounting standards will mean own credit movements are likely to continue to be reflected in the income statement for the foreseeable future.

£10,335m
total income

£2,965m
profit before tax

Risk weighted assets down 2% to £187bn, reflecting lower levels of client activity, risk reduction and reduction in credit market exposures, more than offsetting the impact of CRD3.

Return on average equity decreased to 10.4% (2010: 13.5%) and return on average risk weighted assets to 1.2% (2010: 1.5%), reflecting difficult market conditions.

2010

Barclays Capital profit before tax increased 2% to £4,389m.

Net operating income for 2010 increased 17% to £12,666m reflecting significant reduction both in credit market losses taken through income to £124m (2009: £4,417m) and in impairment charges to £543m (2009: £2,591m).

Fixed Income, Currency and Commodities income declined 6% to £8,687m, reflecting lower contributions particularly from Rates and Commodities despite significant reductions in credit market losses.

Higher funding costs also led to a reduction in net interest income. Equities and Prime Services decreased 6% to £2,040m due to the subdued market activity in European equity derivatives, partially offset by improved client flow in cash equities and equity financing, as the benefits of the build-out of the cash equities business started to come through. Investment Banking, which comprises advisory businesses and equity and debt underwriting, increased 3% to £2,243m as a result of continued growth in banking activities.

Fee and commission income increased 12% to £3,347m across Investment Banking and Equities with a higher contribution from Asia. Principal Investments generated income of £239m which contributed to

the increase in net investment income to £752m in addition to an increase in income from the disposal of available for sale assets and a reduction in fair value losses on assets held at fair value.

Credit impairment charges of £543m included credit market impairment of £621m (2009: £1,669m) primarily relating to the difference between the carrying value of the Protium loan and the fair value of the underlying assets supporting the loan which followed a reassessment of the expected realisation period. Non-credit market related impairment was a release of £78m (2009: charge of £922m).

Operating expenses increased 26% to £8,295m which largely reflected investment in our sales, origination, trading and research activities, increased charges relating to prior year compensation deferrals and restructuring costs. The cost: net operating income ratio was 65% (2009: 61%).

Total assets increased 7% to £1,095bn. The increase reflected the net depreciation in the value of Sterling relative to other currencies in which our assets are denominated, growth in reverse repurchase trading and an increase in the liquidity pool to £154bn (2009: £127bn).

Assets contributing to adjusted gross leverage increased 8% to £668bn. Risk weighted assets increased 6% to £191bn due to changes in methodology and the impact of foreign exchange rate movements, offset by reductions resulting from capital management efficiencies.

Return on average equity increased to 13.5% (2009: 13.3%), return on average tangible equity increased to 14.1% (2009: 14.0%) and return on average risk weighted assets increased to 1.5% (2009: 1.4%) reflecting increased profit after tax.

Financial review

Analysis of results by business continued

Barclays Corporate

2011

Barclays Corporate adjusted profit before tax improved to £126m (2010: loss of £388m), reflecting significant progress in restructuring overseas operations and improved credit impairment in Europe. Loss before tax improved to £70m (2010: £631m loss), including £123m impairment of Spanish goodwill and £73m loss on the disposal of Barclays Bank Russia (BBR).

UK profit before tax declined £87m to £747m including a decline in the net valuation of fair value loans. Excluding this item, underlying UK performance improved, reflecting increased net investment and fee and commission income and improving credit impairment, partially offset by an increase in costs mainly from the non-recurrence of a prior year pension credit and continued investment in infrastructure. Europe loss before tax reduced 24% to £647m, reflecting lower credit impairment partially offset by the goodwill impairment in Spain. Rest of the World loss before tax reduced 72% to £170m, principally due to the non-recurrence of a prior year goodwill impairment in BBR, lower operating expenses and an improvement in loan loss rates, partially offset by the loss on disposal of BBR.

Net interest income improved 2% to £2,036m driven by increases in UK customer liabilities and customer liability margins. Net interest margin decreased to 146bps (2010: 153bps), with average customer assets decreasing 2% to £68.7bn and average customer liabilities increasing 16% to £70.6bn.

Credit impairment charges reduced 32% to £1,149m, as overall loan loss rates improved to 162bps (2010: 226bps). UK reduced 23% to £355m, benefiting from lower default rates and tightly controlled exposure to commercial real estate loans. Europe reduced 33% to £716m primarily due to lower impairment charges in Spain of £480m (2010: £898m), reflecting proactive risk management action to reduce exposure to the property and construction sector. Rest of the World reduced 53% to £78m, primarily as a result of management action to reduce risk profile of portfolios.

Operating expenses reduced by 2% to £1,639m, excluding the impact of goodwill impairment. A decrease in restructuring charges and benefits from streamlining operations more than offset the impact of the non-recurrence of the prior year pension credit.

Note

a Adjusted profit before tax and performance measures exclude the impact of loss on disposal of Barclays Bank Russia of £73m (2010: £nil; 2009: £nil) and £123m of Spain goodwill impairment (2010: £243m; 2009: £nil). 2010 adjusted loss before tax has been revised to exclude goodwill impairment of £243m on Barclays Bank Russia. 2009 adjusted profit before tax has been revised to exclude gains on debt buy-backs and extinguishments of £85m.

£2,912m
total income

£70m
loss before tax

Total assets increased to £88.7bn (2010: £85.7bn) mainly driven by higher balances in the UK. There was good growth in customer deposits to £77.7bn (2010: £71.0bn), largely within the UK, benefiting from product innovation.

Risk weighted assets decreased 2% to £69.7bn reflecting reductions in net exposures in Europe and Rest of the World, partially offset by higher net balances in the UK.

2010

Barclays Corporate recorded a loss before tax of £631m (2009: profit of £157m). An improvement in the result of the profitable UK business was more than offset by increased losses in Europe, notably Spain, and Rest of the World.

Profit before tax in the UK increased 13% to £834m. Performance was primarily driven by significantly reduced impairment. Loss before tax in Europe increased to a loss of £853m mainly due to impairments on property and construction exposures in Spain. Rest of the World recorded a loss before tax of £612m reflecting the write down of the £243m goodwill relating to Barclays Bank Russia (BBR) and restructuring costs totalling £119m, including £25m relating to restructuring of the Russian business. These were partially offset by a substantial reduction in impairment charges and tight control of operating expenses.

Total income decreased 7% to £2,974m mainly as a result of lower treasury management income and reduced risk appetite outside the UK. Excluding the 2009 gains on buy-backs of securitised debt of £85m and fair value adjustments in 2010, UK income remained resilient.

Net interest income fell 4% to £2,004m reflecting lower treasury management income and higher funding charges in Europe and reduced average asset balances in Rest of the World. UK net interest income increased 2% (£29m), with higher deposit income reflecting strong growth in balances, offset by reduced demand for lending and higher funding costs. Barclays Corporate net interest margin decreased 12bps to 153bps (2009: 165bps).

Net fees and commissions fell 9% to £910m driven by lower debt fees and treasury income. Net trading income increased to £80m mainly as a result of loan fair value adjustments in the UK. Net investment loss decreased to £32m reflecting reduced write downs in venture capital investments.

Credit impairment charges increased to £1,696m, primarily in Spain where a £630m increase to £898m was driven by depressed market conditions in the property and construction sector, including some significant single name cases. This was partly offset by an improvement of £290m in UK reflecting lower default rates and fewer insolvencies; and an improvement in Rest of the World of £206m, including £130m in the retail book. Loan loss rates increased to 226bps (2009: 211bps).

Operating expenses grew 30% to £1,907m, reflecting the write down of the £243m of goodwill relating to BBR and associated restructuring costs of £25m, as well as previously announced restructuring costs of £94m in other geographies within Rest of the World (predominantly relating to Indonesia), higher pension costs in the UK, and increased investment spend as Barclays Corporate continued to invest in its infrastructure to deliver leading product and superior client service capabilities.

There was strong growth in total average customer accounts which grew 21% to £60.9bn, mostly within the UK, as a result of significant increases in current account balances and deposits benefiting from product innovation. As a result, the balance between loans and deposits, including banks, in the UK moved by £8bn to surplus deposits of £1.8bn.

Risk weighted assets fell 8% to £70.8bn (2009: £76.9bn) reflecting lower levels of customer assets across the business and improvements in the credit quality of the UK portfolio. Negative returns on average equity, average tangible equity and average risk weighted assets in 2010 were the result of the increased losses in Europe and Rest of the World, which more than offset the improved profitability of UK.

b Return on average equity and return on average tangible equity comparatives have been revised to use 10% of average risk weighted assets (previously 2010: 9%; 2009: 8%) in the calculation of average equity and average tangible equity.

Financial review

Analysis of results by business continued

Barclays Wealth

2011

Barclays Wealth profit before tax increased 27% to £207m driven by strong income growth partly offset by increased investment in the growth of the business.

Income improved 12% to £1,744m reflecting strong income growth in the High Net Worth businesses. Net operating income improved 13% to £1,703m with the loan loss rate reducing to 21bps (2010: 29bps).

Net interest income improved 18% to £798m as customer deposit and loan balances have increased reflecting growth in High Net Worth client balances and an increase in margins on deposits. Net interest margin

increased to 129bps from 122bps with average customer deposits up £3.6bn to £44.5bn and average loans up £3.0bn to £17.5bn.

Net fee and commission income improved 9% to £943m driven by higher transactional activity in the High Net Worth businesses.

Operating expenses increased 11% to £1,493m reflecting increase in investment spend and related restructuring costs to support the strategic investment programme. Includes the cost of increase in the client facing staff and infrastructure to support the High Net Worth businesses.

£1,744m
total income

£207m
profit before tax

Risk weighted assets increased 6% to £13.1bn. This compares to growth in lending of 17%, with an increased level of collateral in the lending portfolio.

Client assets increased marginally to £164.2bn (2010: £163.9bn) with strong net new asset growth in the High Net Worth businesses offset by market, foreign exchange and other movements.

Return on average equity increased to 10.9% (2010: 8.8%) and return on average tangible equity up to 15.0% (2010: 12.3%) with growth in income and profit before tax significantly higher than increased equity.

2010

Barclays Wealth profit before tax increased 14% to £163m.

Income increased 18% to £1,560m principally from growth in the High Net Worth businesses and higher attributable net interest income from the revised internal funds pricing mechanism.

Net interest income increased 35% to £678m, mostly due to changes in internal funds pricing which gives credit for the behaviourally long-term deposits held by Barclays Wealth. The net interest margin increased to 122bps (2009: 102bps). This reflects the increase in the customer liability

margin from 53bps to 87bps as well as the reduction in the customer asset margin from 101bps to 81bps. Customer accounts grew 17% to £44.8bn and loans and advances to customers grew 24% to £16.1bn.

Net fee and commission income increased 10% to £869m primarily driven by higher transactional activity with High Net Worth clients.

Operating expenses increased 19% to £1,349m, principally due to the impact of the growth in High Net Worth business revenues on staff and infrastructure costs and the start of Barclays Wealth's strategic investment programme.

Total client assets, comprising customer deposits and client investments, were £163.9bn (2009: £151.2bn) with underlying net new asset inflows of £6bn. Risk weighted assets increased 9% to £12.4bn reflecting growth in loans and advances, impact of exchange rate movements and collateral management.

Stable returns on average equity and average tangible equity, reflected the strong performance of the business offset by the cost of strategic investment and the increase in capital allocation.

Financial review

Analysis of results by business continued

Investment Management

2011

Investment Management profit before tax of £96m (2010: £67m), principally reflecting dividend income of £123m (2010: £100m) from the Group's available for sale holding in BlackRock, Inc. which represents a 19.7% (2010: 19.9%) interest.

The loss before tax of £1,762m (2010: profit of £67m) resulted from the £1,800m impairment of the Group's investment in BlackRock, Inc. The impairment reflects the recycling through the income statement of the cumulative reduction in market value of the Group's investment in BlackRock, Inc. as at 30 September 2011 previously recognised in equity.

The fair value of the holding as at 31 December 2011 was £4.1bn (2010: £4.6bn). Since 30 September 2011, the value of the holding has increased by £0.7bn, which has been taken to equity. For regulatory capital purposes, the increase is deducted from the Group's Core Tier 1. If the increase had been included in Core Tier 1 Capital, the Group's Core Tier 1 Capital ratio would have been 0.2% higher.

2010

Investment Management profit before tax of £67m (2009: £22m) principally reflected dividend income from the 19.9% holding in BlackRock, Inc., which was acquired as part of the consideration for the sale of Barclays Global Investors on 1 December 2009.

Total assets as at 31 December 2010 of £4.6bn (2009: £5.4bn) reflected the fair value of the Group's investment in 37.567 million BlackRock, Inc. shares.

The available for sale reserve impact of £1.1bn relating to this investment as at 31 December 2010 resulted in an adverse impact of approximately 20bps in the Core Tier 1 ratio over the year. The offsetting appreciation in the shares' US Dollar value against Sterling of £0.3bn was hedged by foreign exchange instruments.

The holding was assessed for impairment by the Group as at 31 December 2010. This analysis identified that the reduction in fair value from the original acquisition value was not significant or prolonged in the light of an increase in share price through the second half of the year and ongoing price volatility and, as such, no impairment was recognised.

Balance Sheet Information			
Total assets	£4.1bn	£4.6bn	£5.4bn
Risk weighted assets	£0.1bn	£0.1bn	£0.1bn

Note

a Adjusted profit before tax excludes £1,800m impairment of investment in BlackRock, Inc. (2010:£nil; 2009: £nil) and a £58m loss (2010: £nil; 2009:£nil) on disposal of a portion of the Group's strategic investment in BlackRock, Inc. recycled through investment income. 2009 adjusted profit before tax excludes £1m loss on disposal of subsidiaries, associates and joint ventures.

Head Office Functions and Other Operations

2011

Head Office Functions and Other Operations adjusted loss before tax increased 46% to £1,106m, principally as a result of a £325m charge arising from the UK bank levy that came into force during 2011. Profit before tax improved significantly to £2,709m (2010: loss of £368m), reflecting own credit gains and gains on debt buy-backs.

Total income improved to £3,504m (2010: £213m). Own credit gains, increased to £2,708m (2010: £391m) and gains on debt buy-backs of £1,130m (2010: £nil) were recognised resulting from the retirement of Tier 1 capital, which will not qualify as Tier 1 capital under Basel 3. This was partially offset by the non-recurrence in 2011 of £265m income from currency translation reserves following the repatriation of capital from overseas operations that was recognised in 2010.

Operating expenses increased to £773m (2010: £579m) principally due to the UK bank levy of £325m and higher Financial Services Compensation Scheme (FSCS) costs, partially offset by non recurrence of a 2010 provision of £194m in relation to resolution of the investigation into Barclays compliance with US economic sanctions. The loss on disposal of £23m reflects losses from currency translation reserves recognised in the income statement following the disposal of Barclays Bank Russia.

Total assets increased 33% to £27.8bn due to purchases of government bonds to support the Group's hedging and liquidity management activities.

2010

Head Office Functions and Other Operations adjusted loss before tax decreased £962m to a loss of £759m. The results for 2009 reflected a net gain on debt buy-backs of £1,164m, while 2010 benefited notably from a significant decrease in the costs of the central funding activity and a reclassification of profit from the currency translation reserve. Loss before tax reduced significantly to £368m (2010: loss of £2,370m), primarily due to own credit gains of £391m (2009: loss of £1,820m).

Net operating income increased to £211m (2009: loss of £1,808m) principally reflecting own credit movements, significant decrease in the costs of the central funding activity as the money market dislocations eased and recognition in the income statement of £265m of profit from the currency translation reserve, offset by increases in fees for structured capital market activities.

Operating expenses increased to £579m (2009: £570m) principally due to payment of a £194m settlement to US regulators in resolution of the investigation into Barclays compliance with US economic sanctions, partially offset by a reduction in the bank payroll tax charge to £96m (2009: £225m) and a reduction of £59m in Financial Services Compensation Scheme charges.

Total assets increased to £20.9bn (2009: £6.4bn), largely due to a £7.4bn net increase in gilts held for the equity structural hedge and £6.8bn of covered bonds and other notes.

	2011 £m	2010 £m	2009 £m
Total income net of insurance claims (excluding own credit and gains on debt buy-backs)	(334)	(178)	(1,136)
Own credit	2,708	391	(1,820)
Gains on debt buy-backs and extinguishments	1,130	–	1,164

Balance Sheet Information and key facts			
Total assets	£27.8bn	£20.9bn	£6.4bn
Risk weighted assets	£2.4bn	£0.6bn	£0.9bn
Number of employees (full time equivalent) ^c	1,400	1,400	1,500

Notes

a The impact of own credit movements in the fair value of structured note issuance of £2,708m (2010: £391m; 2009: loss of £1,820m) is now included within the results of Head Office Functions and Other Operations, rather than Barclays Capital. This reflects the fact that these fair value movements relate to the credit worthiness of the Group as a whole, rather than Barclays Capital in particular, and are not included within any assessment of Barclays Capital's underlying performance. Furthermore, delays to planned changes in accounting standards will mean own credit movements are likely to continue to be reflected in the income statement for the foreseeable future.

b Adjusted loss before tax excludes the impact of own credit gains of £2,708m (2010: £391m; 2009: loss of £1,820m); gains on debt buybacks of £1,130m (2010: £nil; 2009: £1,164m) and £23m (2010: £nil; 2009: gain £7m) loss on disposal of subsidiaries associates and joint ventures.

c The number of employees for 2010 has been revised to exclude 100 employees transferred to Africa RBB.

Presentation of information

BBA Code for Financial Reporting Disclosure

In September 2010, the British Bankers' Association published a Code for Financial Reporting Disclosure (the Code). The Code sets out five disclosure principles together with supporting guidance. The principles are that UK banks will:

- provide high quality, meaningful and decision-useful disclosures;
- review and enhance their financial instrument disclosures for key areas of interest;
- assess the applicability and relevance of good practice recommendations to their disclosures acknowledging the importance of such guidance;
- seek to enhance the comparability of financial statement disclosures across the UK banking sector; and
- clearly differentiate in their annual reports between information that is audited and information that is unaudited.

Barclays has adopted the BBA Code for Financial Reporting Disclosure and has prepared the 2011 Annual Report and Accounts in compliance with the Code.

The Group aims to continually enhance its disclosures and their usefulness to the readers of the financial statements in the light of developing market practice and areas of focus. In 2011 we have:

- continued to streamline disclosure to focus on significant decision-useful information, for example providing detailed disclosure on individual employee share schemes only where material in the context of the income statement charge, dilution of capital or Executive remuneration;
- included certain more detailed or static information in other published documents with clear references to where these may be found, for example risk management methodologies (included in Pillar 3 reporting) and the glossary (published separately on-line);
- reorganised the information in the Notes to the Accounts under common topics to facilitate readers' understanding;
- included descriptions of significant accounting policies, critical accounting estimates and future accounting developments within the note to which they relate, thereby including related information in one place;
- continued to enhance our disclosures, with specific focus on:
 - the effects of collateral on our maximum exposure to credit risk following amendments to IFRS 7 Financial Instruments (page 80);
 - exposures to selected countries (page 112);
 - liquidity disclosures including information on funding structure and secured funding (page 139);
 - credit risk and loans subject to forbearance (pages 99 and 103);
 - provisions relating to PPI redress (page 246);
 - reconciliation of balance sheet figures to regulatory capital resources (page 133);
 - accounting for deferred employee remuneration and the reconciliation of awards to performance costs (page 65); and
 - accounting for deferred tax assets (page 213).

Statutory Accounts

The consolidated accounts of Barclays PLC and its subsidiaries are set out on pages 197 to 201 along with the accounts of Barclays PLC itself on pages 202 to 203. The accounting policies and the notes commencing on page 204 apply equally to both sets of accounts unless otherwise stated.

Independent Auditors' report

Independent Auditors' report to the members of Barclays PLC

We have audited the financial statements of Barclays PLC for the year ended 31 December 2011 which comprise: the Consolidated and Parent income statements and the related Consolidated statement of comprehensive income, Consolidated and Parent balance sheets, Consolidated and Parent statements of changes in equity and Consolidated and Parent cash flow statements, the related notes and the parts of the Risk Management and Financial review sections that are referenced as audited. The financial reporting framework that has been applied in their preparation is applicable law and International Financial Reporting Standards (IFRSs) as adopted by the European Union.

Respective responsibilities of Directors and Auditors

As explained more fully in the Directors' Responsibilities Statement, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view. Our responsibility is to audit and express an opinion on the financial statements in accordance with applicable law and International Standards on Auditing (UK and Ireland). Those standards require us to comply with the Auditing Practices Board's Ethical Standards for Auditors.

This report, including the opinions, has been prepared for and only for the company's members as a body in accordance with Chapter 3 of Part 16 of the Companies Act 2006 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

Scope of the audit of the financial statements

An audit involves obtaining evidence about the amounts and disclosures in the financial statements sufficient to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or error. This includes an assessment of: whether the accounting policies are appropriate to the group's and the parent company's circumstances and have been consistently applied and adequately disclosed; the reasonableness of significant accounting estimates made by the directors; and the overall presentation of the financial statements. In addition, we read all the financial and non-financial information in the annual report to identify material inconsistencies with the audited financial statements. If we become aware of any apparent material misstatements or inconsistencies we consider the implications for our report.

Opinion on the financial statements

In our opinion, the financial statements:

- give a true and fair view of the state of the group's and of the parent company's affairs as at 31 December 2011 and of the group's and the parent company's profit and cash flows for the year then ended;
- have been properly prepared in accordance with IFRSs as adopted by the European Union; and
- have been prepared in accordance with the requirements of the Companies Act 2006 and, as regards the group financial statements, Article 4 of the IAS Regulation.

Opinion on other matters prescribed by the Companies Act 2006

In our opinion:

- the part of the Directors' Remuneration Report to be audited has been properly prepared in accordance with the Companies Act 2006;
- the information given in the Directors' Report for the financial year for which the financial statements are prepared is consistent with the financial statements; and
- the information given in the Corporate Governance Statement with respect to internal control and risk management systems and about share capital structures is consistent with the financial statements.

Matters on which we are required to report by exception

We have nothing to report in respect of the following:

Under the Companies Act 2006 we are required to report to you if, in our opinion:

- adequate accounting records have not been kept by the parent company, or returns adequate for our audit have not been received from branches not visited by us; or
- the parent company financial statements and the part of the Directors' Remuneration Report to be audited are not in agreement with the accounting records and returns; or
- certain disclosures of directors' remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit; or
- a corporate governance statement has not been prepared by the parent company.

Under the Listing Rules we are required to review:

- the directors' statement, set out in the Corporate Governance section, in relation to going concern;
- the parts of the Corporate Governance Statement relating to the company's compliance with the nine provisions of the UK Combined Code on Corporate Governance specified for our review; and
- certain elements of the report to shareholders by the Board on directors' remuneration.

Notes

a The maintenance and integrity of Barclays website is the responsibility of the Directors; the work carried out by the Auditors does not involve consideration of these matters and, accordingly, the Auditors accept no responsibility for any changes that may have occurred to the financial statements since they were initially presented on the website.

b Legislation in the United Kingdom governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

Independent Registered Public Accounting Firm's report

Report of Independent Registered Public Accounting Firm To the Board of Directors and Shareholders of Barclays PLC

In our opinion, the accompanying Consolidated income statements and the related Consolidated balance sheets, Consolidated cash flow statements and, Consolidated statements of comprehensive income and Consolidated statements of changes in equity present fairly, in all material respects, the financial position of Barclays PLC (the 'Company') and its subsidiaries at 31 December 2011 and 31 December 2010 and the results of their operations and cash flows for each of the three years in the period ended 31 December 2011, in conformity with International Financial Reporting Standards (IFRSs) as issued by the International Accounting Standards Board. Also, in our opinion the Company maintained, in all material respects, effective internal control over financial reporting as of 31 December 2011, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's report on internal control over financial reporting as it pertains to Barclays PLC in the Directors' report. Our responsibility is to express opinions on these financial statements and on the Company's internal control over financial reporting based on our integrated audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation.

Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that: (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

For the year ended 31 December	2011 £m	2010 £m	2009 £m
Continuing operations			
Reconciliation of profit before tax to net cash flows from operating activities:			
Profit before tax	5,879	6,065	4,585
Adjustment for non-cash items:			
Allowance for impairment	5,602	5,672	8,071
Depreciation, amortisation and impairment of property, plant, equipment and intangibles	1,104	1,346	1,196
Other provisions, including pensions	1,787	914	428
Net profit on disposal of investments and property, plant and equipment	(1,645)	(1,057)	(383)
Other non-cash movements	1,345	(5,904)	4,325
Changes in operating assets and liabilities			
Net decrease/(increase) in loans and advances to banks and customers	38,340	(63,212)	25,482
Net (decrease)/increase in deposits and debt securities in issue	(11,554)	63,711	(49,203)
Net decrease/(increase) in derivative financial instruments	3,730	(1,298)	3,321
Net decrease/(increase) in trading assets	21,360	(17,505)	34,334
Net (decrease)/increase in trading liabilities	(26,899)	21,441	(8,222)
Net (increase)/decrease in financial investments	(4,255)	11,126	20,459
Net decrease/(increase) in other assets	119	1,366	(465)
Net decrease in other liabilities	(4,148)	(2,521)	(907)
Corporate income tax paid	(1,686)	(1,458)	(1,177)
Net cash from operating activities	29,079	18,686	41,844
Purchase of available for sale investments	(67,525)	(76,418)	(78,420)
Proceeds from sale or redemption of available for sale investments	66,941	71,251	88,559
Purchase of property, plant and equipment	(1,454)	(1,767)	(1,150)
Disposal of discontinued operation, net of cash disposed	–	–	2,469
Other cash flows associated with investing activities	126	1,307	430
Net cash from investing activities	(1,912)	(5,627)	11,888
Dividends paid	(1,387)	(1,307)	(633)
Proceeds of borrowings and issuance of subordinated debt	880	2,131	3,549
Repayments of borrowings and redemption of subordinated debt	(4,003)	(1,211)	(4,383)
Net issue of shares and other equity instruments	41	1,535	773
Net (purchase)/disposal of treasury shares	(235)	(989)	33
Net redemption of shares issued to non-controlling interests	(1,257)	–	–
Net cash from financing activities	(5,961)	159	(661)
Effect of exchange rates on cash and cash equivalents	(2,933)	3,842	(2,864)
Net cash from discontinued operations	–	–	(376)
Net increase in cash and cash equivalents	18,273	17,060	49,831
Cash and cash equivalents at beginning of year	131,400	114,340	64,509
Cash and cash equivalents at end of year	149,673	131,400	114,340
Cash and cash equivalents comprise:			
Cash and balances at central banks	106,894	97,630	81,483
Loans and advances to banks with original maturity less than three months	40,481	31,934	30,461
Available for sale treasury and other eligible bills with original maturity less than three months	2,209	1,667	2,244
Trading portfolio assets with original maturity less than three months	89	169	152
	149,673	131,400	114,340

Interest received in 2011 was £28,673m (2010: £28,631m, 2009: £32,437m) and interest paid in 2011 was £20,106m (2010: £20,759m, 2009: £20,889m).

The Group is required to maintain balances with central banks and other regulatory authorities and these amounted to £2,500m at 31 December 2011 (2010: £2,310m, 2009: £2,470m).

For the purposes of the cash flow statement, cash comprises cash on hand and demand deposits, and cash equivalents comprise highly liquid investments that are convertible into cash with an insignificant risk of changes in value with original maturities of three months or less. Repurchase and reverse repurchase agreements are not considered to be part of cash equivalents.

The Parent Company's principal activity is to hold the investment in its wholly-owned subsidiary, Barclays Bank PLC. Dividends received are treated as operating income.

The Company was not exposed at 31 December 2011 or 2010 to significant risks arising from the financial instruments it holds, which comprised cash, balances with central banks and other assets which had no credit or market risk.

Notes

a Details of share capital and share premium are shown in Note 34.

b Comprising cash and balances at central banks.

Notes to the financial statements

For the year ended 31 December 2011

1 Significant accounting policies

This section describes Barclays' significant accounting policies and critical accounting estimates that relate to the financial statements and notes as a whole. If an accounting policy or a critical accounting estimate relates to a specific note, the applicable accounting policy and/or critical accounting estimate is contained within the relevant note.

1. Reporting entity

These financial statements are prepared for Barclays PLC and its subsidiaries (the Barclays PLC Group or the Group) under Section 399 of the Companies Act 2006. The Group is a major global financial services provider engaged in retail banking, credit cards, wholesale banking, investment banking, wealth management and investment management services. In addition, individual financial statements have been presented for the holding company, Barclays PLC (the Company). Barclays PLC is a public limited company, incorporated and domiciled in England and Wales having a registered office in England and is the holding company of the Group.

2. Compliance with International Financial Reporting Standards

The consolidated financial statements of the Group, and the individual financial statements of Barclays PLC, have been prepared in accordance with International Financial Reporting Standards (IFRS) and interpretations (IFRICs) issued by the Interpretations Committee, as published by the International Accounting Standards Board (IASB). They are also in accordance with IFRS and IFRIC interpretations endorsed by the European Union. The principal accounting policies applied in the preparation of the consolidated and individual financial statements are set out below, and in the relevant notes to the financial statements. These policies have been consistently applied. There were no changes in accounting policy in the year.

3. Basis of preparation

The consolidated and individual financial statements have been prepared under the historical cost convention modified to include the fair valuation of investment property and particular financial instruments to the extent required or permitted under IFRS as set out in the relevant accounting policies. They are stated in millions of pounds Sterling (£m), the functional currency of Barclays PLC.

4. Accounting policies

Barclays prepares financial statements in accordance with IFRS. The Group's significant accounting policies relating to specific financial statement items, together with a description of the accounting estimates and judgements that were critical to preparing them, are set out under the relevant notes. Accounting policies that affect the financial statements as a whole are set out below.

(i) Consolidation

Barclays applies IAS 27 *Consolidated and Separate Financial Statements* and SIC 12 *Consolidation – Special Purpose Entities (SPEs)*.

The consolidated financial statements combine the financial statements of Barclays PLC and all its subsidiaries. Subsidiaries are entities over which it has control of the financial and operating policies through its holdings of voting shares and SPEs, which are consolidated when the substance of the relationship between the Group and the entity indicates control. The control assessment for special purpose entities includes an assessment of the Group's exposure to the risks and benefits of the entity. The consolidation of SPEs is considered at inception, based on the arrangements in place and the assessed risk exposures at that time. The initial consolidation analysis is revisited at a later date if:

- the Group acquires additional interests in the entity;
- the contractual arrangements of the entity are amended such that the relative exposures to risks and rewards change; and
- the Group acquires control over the main operating and financial decisions of the entity.

Intra-group transactions and balances are eliminated on consolidation and consistent accounting policies are used throughout the Group for the purposes of the consolidation.

Changes in ownership interests in subsidiaries are accounted for as equity transactions if they occur after control has already been obtained and they do not result in loss of control.

Details of the principal subsidiaries are given in Note 40.

1 Significant accounting policies continued

(ii) Foreign currency translation

The Group applies IAS 21 *The Effects of Changes in Foreign Exchange Rates*. Transactions in foreign currencies are translated into Sterling or the relevant functional currency of foreign operations at the rate ruling on the date of the transaction. Foreign currency balances are translated at the period end exchange rates. Exchange gains and losses on such balances are taken to the income statement.

The Group's foreign operations (including subsidiaries, joint ventures, associates and branches) based mainly outside the UK may have other functional currencies than Sterling. The functional currency of an operation is the currency of the main economy to which it is exposed.

Prior to consolidation (or equity accounting) the assets and liabilities of non-Sterling operations are translated at the closing rate and items of income, expense and other comprehensive income are translated into Sterling at the rate on the date of the transactions. Exchange differences arising on the translation of foreign operations are included in currency translation reserves within equity. These are transferred to the income statement when the Group loses control, joint control or significant influence over the foreign operation or on partial disposal of the operation.

(iii) Financial assets and liabilities

The Group applies IAS 39 *Financial Instruments: Recognition and Measurement (IAS 39)* for the recognition, classification and measurement and derecognition of financial assets and financial liabilities, for the impairment of financial assets, and for hedge accounting.

Recognition

The Group recognises financial assets and liabilities when it becomes a party to the terms of the contract, which is the trade date or the settlement date.

Classification and measurement

Financial assets and liabilities are initially recognised at fair value and may be held at fair value or amortised cost depending on the Group's intention toward the assets and the nature of the assets and liabilities, mainly determined by their contractual terms.

The accounting policy for each type of financial asset or liability is included within the relevant note for the item. The Group's policies for determining the fair values of the assets and liabilities are set out in Note 20.

Derecognition

The Group derecognises a financial asset, or a portion of a financial asset, from its balance sheet where the contractual rights to cash flows from the asset have expired, or have been transferred, usually by sale, and with them either substantially all the risks and rewards of the asset or significant risks and rewards, along with the unconditional ability to sell or pledge the asset.

Financial liabilities are de-recognised when the liability has been settled, has expired or has been extinguished. An exchange of an existing financial liability for a new liability with the same lender on substantially different terms – generally a difference of 10% in the present value of the cash flows – is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability.

Transactions in which the Group transfers assets and liabilities, portions of them, or financial risks associated with them can be complex and it may not be obvious whether substantially all of the risks and rewards have been transferred. It is often necessary to perform a quantitative analysis. Such an analysis compares the Group's exposure to variability in asset cash flows before the transfer with its retained exposure after the transfer.

A cash flow analysis of this nature may require judgement. In particular, it is necessary to estimate the asset's expected future cash flows as well as potential variability around this expectation. The method of estimating expected future cash flows depends on the nature of the asset, with market and market-implied data used to the greatest extent possible. The potential variability around this expectation is typically determined by stressing underlying parameters to create reasonable alternative upside and downside scenarios. Probabilities are then assigned to each scenario. Stressed parameters may include default rates, loss severity or prepayment rates.

(iv) Issued debt and equity instruments

The Group applies IAS 32, *Financial Instruments: Presentation*, to determine whether funding is either a financial liability (debt) or equity.

Issued financial instruments or their components are classified as liabilities if the contractual arrangement results in the Group having a present obligation to either deliver cash or another financial asset, or a variable number of equity shares, to the holder of the instrument, if this is not the case, the instrument is generally an equity instrument and the proceeds included in equity, net of transaction costs. Dividends and other returns to equity holders are recognised when paid or declared by the members at the annual general meeting and treated as a deduction from equity.

Where issued financial instruments contain both liability and equity components, these are accounted for separately. The fair value of the debt is estimated first and the balance of the proceeds is included within equity.

Notes to the financial statements

For the year ended 31 December 2011 continued

1 Significant accounting policies continued

5. Future accounting developments

As at 31 December 2011 the IASB had issued the following accounting standards. These are effective on 1 January 2013, subject to EU endorsement, unless otherwise indicated:

- IFRS 10 *Consolidated Financial Statements* which replaces requirements in IAS 27 *Consolidated and Separate Financial Statements* and SIC 12 *Consolidation – Special Purpose Entities*. This introduces new criteria to determine whether entities in which the Group has interests should be consolidated. The Group is considering the impact of the new standard and is currently unable to provide an estimate of the financial effects of its adoption;
- IFRS 11 *Joint Arrangements*, which replaces IAS 31 *Interests in Joint Ventures*. This specifies the accounting for joint arrangements whether these are joint operations or joint ventures. It is not expected to have a material impact on the Group;
- IFRS 12 *Disclosures of Interests in Other Entities* This specifies the required disclosures in respect of interests in, and risks arising, from subsidiaries, joint ventures, associates and structured entities whether consolidated or not. As a disclosure only standard it will have no financial impact;
- IFRS 13 *Fair Value Measurement*. This provides comprehensive guidance on how to calculate the fair value of financial and non-financial assets and liabilities. It is not expected to have a material impact on the Group financial statements;
- IAS 19 *Employee Benefits (Revised 2011)*. This requires that actuarial gains and losses arising from defined benefit pension schemes are recognised in full. Previously the Group deferred these over the remaining average service lives of the employees (the 'corridor' approach). See Note 39 for more information and an estimate of the financial effects of adoption; and
- IAS 32 and IFRS 7 Amendments *Offsetting Financial Assets and Financial Liabilities*. The circumstances in which netting is permitted have been clarified and disclosures on offsetting have been considerably expanded. The amendments on offsetting are effective from 1 January 2014 and those on disclosures from 1 January 2013.

In 2009 and 2010, the IASB issued IFRS 9 *Financial Instruments* which contains new requirements for accounting for financial assets and liabilities, and will contain new requirements for impairment and hedge accounting, replacing the corresponding requirements in IAS 39. It will lead to significant changes in the way that the Group accounts for financial instruments. The key changes issued and proposed relate to:

- Financial assets. Financial assets will be held at either fair value or amortised cost, except for equity investments not held for trading, which may be held at fair value through other comprehensive income;
- Financial liabilities. Gains and losses on fair value changes in own credit arising on non-derivative financial liabilities designated at fair value through profit or loss will be excluded from the Income Statement and instead taken to other comprehensive income;
- Impairment. Expected losses (rather than only incurred losses) will be reflected in impairment allowances for financial assets that are not classified as fair value through profit or loss; and
- Hedge accounting. Hedge accounting will be more closely aligned with financial risk management.

Adoption is not mandatory until periods beginning on or after 1 January 2015, subject to EU endorsement. Earlier adoption is possible, subject to endorsement and finalisation of the standard. At this stage, it is not possible to fully determine the potential financial impacts of adoption of IFRS 9 on the Group.

In addition, the IASB has indicated that it will issue a new standard on accounting for leases. Under the proposals, lessees would be required to recognise assets and liabilities arising from both operating and finance leases on the balance sheet. The IASB also plans to issue new standards on insurance contracts and revenue recognition. The Group will consider the financial impacts of these new standards as they are finalised.

Critical accounting estimates and judgements

The preparation of financial statements in accordance with IFRS requires the use of estimates. It also requires management to exercise judgement in applying the accounting policies. The key areas involving a higher degree of judgement or complexity, or areas where assumptions are significant to the consolidated and individual financial statements are highlighted under the relevant note. Critical accounting estimates and judgements are disclosed in:

	Page		Page
Credit in charges and impairment on available for sale assets	210	Goodwill and intangible assets	242
Tax	213	Provisions	246
Available for sale assets	224	Retirement benefit obligations	263
Fair value of financial instruments	225		

1 Significant accounting policies *continued***6. Other disclosures**

To improve transparency and ease of reference, by concentrating related information in one place, and to reduce duplication, certain disclosures required under IFRS have been included within the Risk management and Financial review sections as follows:

- segmental reporting on pages 173 to 174 and 208;
- credit risk management on pages 79 to 120 including exposures to selected countries;
- market risk on pages 121 to 129;
- funding risk – capital on pages 130 to 138; and
- funding risk – liquidity on pages 139 to 150.

These are covered by the Audit opinion included on page 195.

Notes to the financial statements

For the year ended 31 December 2011 continued

Performance

The notes included in this section focus on the results and performance of Barclays. Information on the income generated, expenditure incurred, segmental performance, tax, earnings per share and dividends are included here.

2 Segmental reporting

Presentation of segmental reporting

The Group's segmental reporting is in accordance with IFRS 8 *Operating Segments*. Operating segments are reported in a manner consistent with the internal reporting provided to the Executive Committee, which is responsible for allocating resources and assessing performance of the operating segments and has been identified as the chief operating decision maker. All transactions between business segments are conducted on an arm's length basis, with intra-segment revenue and costs being eliminated in Head Office. Income and expenses directly associated with each segment are included in determining business segment performance.

An analysis of the Group's performance by business segment and income by geographic segment is included on pages 173 and 174.

3 Net interest income

Accounting for interest income and expense

The Group applies IAS 39 *Financial Instruments: Recognition and Measurement*. Interest income on loans and advances at amortised cost, available for sale debt investments, and interest expense on financial liabilities held at amortised cost, are calculated using the effective interest method which allocates interest, and direct and incremental fees and costs, over the expected lives of the assets and liabilities.

The effective interest method requires the Group to estimate future cash flows, in some cases based on its experience of customers' behaviour, considering all contractual terms of the financial instrument, as well as the expected lives of the assets and liabilities. Due to the large number of products and types (both assets and liabilities), there are no individual estimates that are material to the results or financial position.

	2011 £m	2010 £m	2009 £m
Cash and balances with central banks	392	271	131
Available for sale investments	2,137	1,483	1,937
Loans and advances to banks	350	440	513
Loans and advances to customers	17,271	17,677	18,456
Other	439	164	199
Interest income	20,589	20,035	21,236
Deposits from banks	(366)	(370)	(634)
Customer accounts	(2,526)	(1,410)	(2,716)
Debt securities in issue	(3,524)	(3,632)	(3,889)
Subordinated liabilities	(1,813)	(1,778)	(1,718)
Other	(159)	(322)	(361)
Interest expense	(8,388)	(7,512)	(9,318)
Net interest income	12,201	12,523	11,918

Interest income includes £243m (2010: £213m, 2009: £185m) accrued on impaired loans.

Other interest income principally includes interest income relating to reverse repurchase agreements and hedging activity. Similarly, other interest expense principally includes interest expense relating to repurchase agreements and hedging activity.

Included in net interest income is hedge ineffectiveness as detailed on page 223.

4 Net fee and commission income

Accounting for net fee and commission income

The Group applies IAS 18 *Revenue*. Fees and commissions charged for services provided or received by the Group are recognised as the services are provided, for example on completion of the underlying transaction.

	2011 £m	2010 £m	2009 £m
Banking, investment management and credit related fees and commissions	9,958	10,142	9,711
Brokerage fees	87	77	88
Foreign exchange commission	163	149	147
Fee and commission income	10,208	10,368	9,946
Fee and commission expense	(1,586)	(1,497)	(1,528)
Net fee and commission income	8,622	8,871	8,418

5 Net trading income

Accounting for net trading income

In accordance with IAS 39, trading positions are held at fair value and the resulting gains and losses are included in the income statement, together with interest and dividends arising from long and short positions and funding costs relating to trading activities.

Income arises from the sale and purchase of trading positions, margins which are achieved through market-making and customer business, and from changes in fair value caused by movements in interest and exchange rates, equity prices and other market variables.

Own credit gains/(losses) arise from the fair valuation of financial liabilities designated at fair value through profit or loss. See Note 19 Financial liabilities designated at fair value.

	2011 £m	2010 £m	2009 £m
Trading income	4,952	7,687	8,821
Own credit gains/(losses)	2,708	391	(1,820)
Net trading income	7,660	8,078	7,001

Included within net trading income were losses of £16m (2010: £32m gain, 2009: £2,349m loss) on financial assets designated at fair value and gains of £3,850m (2010: £903m loss, 2009: £3,158m loss) on financial liabilities designated at fair value.

6 Net investment income

Accounting for net investment income

Dividends are recognised when the right to receive the dividend has been established. Other accounting policies relating to net investment income are set out in Note 18, Available for sale financial assets, and Note 16, Financial assets designated at fair value.

	2011 £m	2010 £m	2009 £m
Net gain from disposal of available for sale assets	1,645	1,027	349
Dividend income	129	116	6
Net gain/(loss) from financial instruments designated at fair value	287	274	(208)
Other investment income/(losses)	244	60	(91)
Net investment income	2,305	1,477	56

Notes to the financial statements

For the year ended 31 December 2011 continued

7 Credit impairment charges and impairment on available for sale assets

Accounting for the impairment of financial assets

Loans and other assets held at amortised cost

In accordance with IAS 39, the Group assesses at each balance sheet date whether there is objective evidence that loan assets or available for sale financial investments (debt or equity) will not be recovered in full and, wherever necessary, recognises an impairment loss in the income statement.

An impairment loss is recognised if there is objective evidence of impairment as a result of events that have occurred and these have adversely impacted the estimated future cash flows from the assets. These events include:

- becoming aware of significant financial difficulty of the issuer or obligor;
- a breach of contract, such as a default or delinquency in interest or principal payments;
- the Group, for economic or legal reasons relating to the borrower's financial difficulty, grants a concession that it would not otherwise consider;
- it becomes probable that the borrower will enter bankruptcy or other financial reorganisation;
- the disappearance of an active market for that financial asset because of financial difficulties; and
- observable data at a portfolio level indicating that there is a measurable decrease in the estimated future cash flows, although the decrease cannot yet be ascribed to individual financial assets in the portfolio – such as adverse changes in the payment status of borrowers in the portfolio or national or local economic conditions that correlate with defaults on the assets in the portfolio.

Impairment assessments are conducted individually for significant assets, which comprise all wholesale customer loans and larger retail business loans and collectively for smaller loans and for portfolio level risks, such as country or sectoral risks. For the purposes of the assessment, loans with similar credit risk characteristics are grouped together – generally on the basis of their product type, industry, geographical location, collateral type, past due status and other factors relevant to the evaluation of expected future cash flows.

The impairment assessment includes estimating the expected future cash flows from the asset or the group of assets, which are then discounted using the original effective interest rate calculated for the asset. If this is lower than the carrying value of the asset or the portfolio, an impairment allowance is raised.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed by adjusting the allowance account. The amount of the reversal is recognised in the income statement.

Following impairment, interest income continues to be recognised at the original effective interest rate on the restated carrying amount.

Uncollectable loans are written off against the related allowance for loan impairment on completion of the Group's internal processes and all recoverable amounts have been collected. Subsequent recoveries of amounts previously written off are credited to the income statement.

Available for sale financial assets

Impairment of available for sale debt instruments

Debt instruments are assessed for impairment in the same way as loans. If impairment is deemed to have accrued, the cumulative decline in the fair value of the instrument that has previously been recognised in equity is removed from equity and recognised in the income statement. This may be reversed if there is evidence that the circumstances of the issuer have improved.

Impairment of available for sale equity instruments

Where there has been a prolonged or significant decline in the fair value of an equity instrument below its acquisition cost, it is deemed to be impaired. The cumulative net loss that has been previously recognised directly in equity is removed from equity and recognised in the income statement.

Increases in the fair value of equity instruments after impairment are recognised directly in other comprehensive income. Further declines in the fair value of equity instruments after impairment are recognised in the income statement.

	2011 £m	2010 £m	2009 £m
Loan impairment	3,790	5,625	7,358
Available for sale assets (excluding BlackRock, Inc.)	60	51	670
Reverse repurchase agreements	(48)	(4)	43
Credit impairment charges and other provisions	3,802	5,672	8,071
Impairment of investment in BlackRock, Inc.	1,800	–	–

More information on the impairment assessment and the measurement of credit losses is included on page 89-91. The movements on the impairment allowance and the charge for the year is shown on page 94.

7 Credit impairment charges and impairment on available for sale assets continued

As at 30 September 2011, an impairment charge of £1,800m was recognised resulting from an assessment that there was objective evidence that the Group's available for sale equity investment in BlackRock, Inc. was impaired. The impairment reflects the recycling through the income statement of the cumulative reduction in market value previously recognised in the available for sale reserve, since the Group's acquisition of its holding in BlackRock, Inc. as part of the sale of Barclays Global Investors on 1 December 2009. The fair value of the holding at 31 December 2011 was £4.1bn and the £0.7bn increase in the value of the investment since 30 September 2011 has been recognised in the available for sale reserve.

Critical accounting estimates and judgements

The calculation of the impairment allowance involves the use of judgement, based on the Group's experience of managing credit risk.

Within the retail and small businesses portfolios, which comprise large numbers of small homogeneous assets with similar risk characteristics where credit scoring techniques are generally used, statistical techniques are used to calculate impairment allowances on a portfolio basis, based on historical recovery rates and assumed emergence periods. These statistical analyses use as primary inputs the extent to which accounts in the portfolio are in arrears and historical information on the eventual losses encountered from such delinquent portfolios. There are many such models in use, each tailored to a product, line of business or customer category. Judgement and knowledge is needed in selecting the statistical methods to use when the models are developed or revised. The impairment allowance reflected in the financial statements for these portfolios is therefore considered to be reasonable and supportable. The impairment charge reflected in the income statement for these retail portfolios is £2,422m (2010: £3,296m; 2009: £3,919m) and amounts to 64% (2010: 59%; 2009: 53%) of the total impairment charge on loans and advances in 2011.

For individually significant assets, impairment allowances are calculated on an individual basis and all relevant considerations that have a bearing on the expected future cash flows are taken into account (for example, the business prospects for the customer, the realisable value of collateral, the Group's position relative to other claimants, the reliability of customer information and the likely cost and duration of the work-out process). The level of the impairment allowance is the difference between the value of the discounted expected future cash flows (discounted at the loan's original effective interest rate), and its carrying amount. Subjective judgements are made in the calculation of future cash flows. Furthermore, judgements change with time as new information becomes available or as work-out strategies evolve, resulting in frequent revisions to the impairment allowance as individual decisions are taken. Changes in these estimates would result in a change in the allowances and have a direct impact on the impairment charge. The impairment charge reflected in the financial statements in relation to wholesale portfolios is £1,368m (2010: £2,329m; 2009: £3,439m) and amounts to 36% (2010: 41%; 2009: 47%) of the total impairment charge on loans and advances. Further information on impairment allowances and related credit information is set out within the Credit Risk Management section.

8 Administration and general expenses

	2011 £m	2010 £m	2009 £m
Property and equipment	1,763	1,813	1,641
Outsourcing and professional services	1,869	1,705	1,496

The figures shown in the above table relate to fees paid to PricewaterhouseCoopers LLP and its associates for continuing operations of business. Fees paid to other auditors not associated with PricewaterhouseCoopers LLP in respect of the audit of the Company's subsidiaries were £6m (2010: £4m, 2009: £3m). Excluded from the total auditors' remuneration above are fees paid to PricewaterhouseCoopers LLP and associates relating to Barclays Global Investors, the Group's discontinued operations, of £nil (2010: £nil; 2009: £4m).

Notes

a Comprises the fees for the statutory audit of the subsidiaries and associated pension schemes both inside and outside Great Britain and fees for the work performed by associates of PricewaterhouseCoopers LLP in respect of the consolidated financial statements of the Company. Fees relating to the audit of the associated pension schemes were £0.2m (2010: £0.4m, 2009: £0.5m).

b Comprises services in relation to statutory and regulatory filings. These include audit services for the review of the interim financial information under the Listing Rules of the UK listing authority.

c Includes consultation on tax matters, tax advice relating to transactions and other tax planning and advice.

d Comprises due diligence related to transactions and other work in connection with such transactions.

9 UK bank levy

UK legislation was enacted in July 2011 to introduce an annual bank levy, which applies to elements of the Group's consolidated liabilities and equity held as at the year end. The levy has resulted in an additional charge to the income statement of £325m, which was recognised as at 31 December 2011 and is presented within operating expenses. The IFRS Interpretations Committee is considering the timing of recognition of the levy going forward.

10 Loss on disposal of subsidiaries, associates and joint ventures

On 25 October 2011, Barclays completed the disposal of Barclays Bank Russia as part of refocusing its Russian activities. A loss on disposal of £73m has been recognised in the income statement within Barclays Corporate and the accumulated foreign exchange losses of £23m, previously recognised directly in equity, have been recycled through the income statement within Head Office Functions.

11 Tax

Accounting for income taxes

Barclays applies IAS 12 *Income Taxes* in accounting for taxes on income. Income tax payable on taxable profits ('Current Tax') is recognised as an expense in the period in which the profits arise. Withholding taxes are also treated as income taxes. Income tax recoverable on tax allowable losses is recognised as a current tax asset only to the extent that it is regarded as recoverable by offset against taxable profits arising in the current or prior period. Current tax is measured using tax rates and tax laws that have been enacted or substantively enacted at the balance sheet date.

Deferred tax is provided in full, using the liability method, on temporary differences arising from the differences between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. Deferred tax is determined using tax rates and legislation enacted or substantively enacted by the balance sheet date which are expected to apply when the deferred tax asset is realised or the deferred tax liability is settled. Deferred tax assets and liabilities are only offset when there is both a legal right to set-off and an intention to settle on a net basis.

	2011 £m	2010 £m	2009 £m
Current tax charge			
Current year	2,690	1,413	1,249
Adjustment for prior years	(61)	(20)	(118)
	2,629	1,393	1,131
Deferred tax (credit)/charge			
Current year	(631)	118	45
Adjustment for prior years	(70)	5	(102)
	(701)	123	(57)
Tax charge	1,928	1,516	1,074

On 27 February 2012, the UK tax authority, HMRC announced its intention to implement new tax legislation, to apply retrospectively from 1 December 2011, that would result in the £1,130m gains on debt buy-backs becoming fully taxable. Barclays voluntarily disclosed the transaction to HMRC and, as at 31 December 2011, held a provision for the potential tax payable in relation to the debt buy-back. If the legislation had been enacted as at 31 December 2011 it would not have had a material impact on the Group's 2011 results.

Tax relating to each component of other comprehensive income can be found in the consolidated statement of comprehensive income, which includes within Other a tax credit of £74m (2010: £59m; 2009: £218m), principally relating to share based payments.

Notes to the financial statements

For the year ended 31 December 2011 continued

11 Tax continued

The table below shows the reconciliation between the actual tax charge and the tax charge that would result from applying the standard UK corporation tax rate to the Group's profit before tax.

	2011 £m	2010 £m	2009 £m
Profit before tax from continuing operations	5,879	6,065	4,585
Tax charge based on the standard UK corporation tax rate of 26.5% (2010: 28%, 2009: 28%)	1,558	1,698	1,284
Effect of non-UK profits or losses at local statutory tax rates different from the UK statutory tax rate ^a	190	108	(27)
Non-creditable taxes ^b	567	454	175
Non-taxable gains and income	(494)	(572)	(287)
Impact of share price movements on share-based payments	147	41	(38)
Deferred tax assets (previously not recognised) / not recognised	(816)	(160)	27
Change in tax rates	17	34	(12)
Non-deductible impairment charges, loss on disposals and UK bank levy ^c	770	68	19
Other items including non-deductible expenses	120	(140)	153
Adjustments in respect of prior years	(131)	(15)	(220)
Tax charge	1,928	1,516	1,074
Effective tax rate	32.8%	25.0%	23.4%

Current tax assets and liabilities

Movements on current tax assets and liabilities were as follows:

	2011 £m	2010 £m
Assets	196	349
Liabilities	(646)	(992)
As at 1 January 2011	(450)	(643)
Income statement	(2,629)	(1,393)
Equity	104	180
Corporate income tax paid	1,686	1,458
Other movements	266	(52)
	(1,023)	(450)
Assets	374	196
Liabilities	(1,397)	(646)
As at 31 December 2011	(1,023)	(450)

Other movements include current tax amounts relating to acquisitions, disposals and exchange.

Deferred tax assets and liabilities

The deferred tax amounts on the balance sheet, after offsetting asset and liability balances where there is a legal right to set-off and an intention to settle on a net basis, were as follows:

	2011 £m	2010 £m
Barclays Group US Inc. tax group (BGUS)	1,039	875
US Branch of Barclays Bank PLC (US Branch)	704	197
Spanish tax group	696	496
Other	571	949
Deferred tax asset	3,010	2,517
Deferred tax liability	(695)	(514)
Net deferred tax	2,315	2,003

The deferred tax asset increased by 20% in 2011 largely due to the improved financial performance in the US Branch resulting in a deferred tax asset in 2011 not previously recognised. There is no net deferred tax asset in the UK.

Notes

- a In 2010 £205m (2009: £nil) was previously included in the effect of non-UK profits or losses at local statutory rates that differ from the UK rate and related to a deferred tax benefit on the reorganisation of Spanish securitisation financing. This benefit is now included in other items including non-deductible expenses.
- b This is a new item in the reconciliation to show the impact of non-creditable taxes mainly relating to the impact of withholding taxes. In 2010 £420m (2009: £175m) was previously included in non-taxable gains and income, £72m (2009: £nil) was previously included in other items including non-deductible expenses and £(38)m (2009: £nil) was previously included in the effect of non-UK profits or losses at local statutory rates that differ from the UK rate.
- c This is a new item in the reconciliation to show the impact of non-deductible impairment charges, loss on disposals and the UK bank levy. In 2010 non-deductible impairment charges of £68m (2009: £19m) was previously included in other items including non-deductible expenses.

11 Tax continued

US deferred tax assets in BGUS and the US Branch

The deferred tax asset in BGUS and the US Branch includes amounts relating to tax losses of £329m and £603m respectively, which first arose in 2007. In accordance with US tax rules tax losses can be carried forward and offset against profits for a period of 20 years and therefore any unused tax losses may begin to expire in 2028. The remaining balance primarily relates to temporary differences which are not time limited. The deferred tax asset for the US Branch has been measured using a marginal tax rate being the excess of the US tax rate (a combination of Federal, City and State taxes) over the UK statutory rate.

BGUS is forecast to return to profitability in 2012, primarily driven by BCI, its US Broker Dealer, with tax losses expected to be fully utilised by 2014. 2011 losses were driven in a large part by macroeconomic conditions, affected by the European sovereign debt crisis and regulatory uncertainty, as opposed to underlying business strategy. A significant proportion of prior period losses related to real estate portfolios and businesses that have now been sold or liquidated.

Profit forecasts reflect the continued focus on operating as a premier full service global investment bank. They also reflect markets re-stabilising and returning to conditions similar to those in 2010. Included in these projections are revenue assumptions based on maintaining our current share in FICC and certain growth prospects that exist in IBD and Equities. Cost projections reflect savings based on continuing initiatives in this area as well as further costs associated with increased levels of liquidity for the US business. As with any current forecast, there are significant uncertainties in relation to macroeconomic conditions and regulatory requirements. A 20% reduction in forecasted profit would not extend the recovery period. The assumptions used in the profit forecasts do not include any incremental tax planning strategies.

The tax losses in the US Branch primarily relate to losses on legacy credit market exposures, the majority of which the US Branch no longer holds. The tax losses are projected to be fully utilised by 2016, based on profit forecasts covering the period from 2012 to 2014, with no profit growth assumed after 2014. The underlying assumptions used in the forecast are consistent with those used for BGUS. A 20% reduction in forecasted profit would extend the recovery period by 1 year to 2017. The assumptions used in the profit forecasts do not include any incremental tax planning strategies.

Spain deferred tax asset

The deferred tax asset in Spain includes £417m relating to tax losses incurred in 2010 and 2011. In accordance with Spanish tax rules tax losses can be carried forward and offset against profits for a period of 18 years. The remaining balance primarily relates to temporary differences which are not time limited.

The 2010 losses are expected to be fully utilised by 2021 and the 2011 losses by 2024. Additional tax losses are anticipated to arise in 2012 and 2013. The recoverability of the deferred tax asset has been determined using business profit forecasts covering the period from 2012 to 2015, with a subsequent annual growth rate of 1% p.a. The forecasts are consistent with those used for the purposes of the goodwill impairment assessment. They reflect the expected benefits from changes in product mix and improved product pricing following the restructuring of the business during 2011, as well as impairment levels coming back into line with historical loan loss rates.

A 20% reduction in forecasted profits from 2015 would extend the recovery period of the 2010 and 2011 losses by 2 years to 2023 and 2026, respectively. A reduction in profits of more than this may result in a partial impairment of the deferred tax asset, depending upon the timing of the reversal of deductible temporary differences. The forecast assumptions do not include any incremental tax planning strategies.

Notes to the financial statements

For the year ended 31 December 2011 continued

11 Tax continued

Other deferred tax assets

The deferred tax asset of £571m (2010: £949m) in other entities includes £144m (2010: £700m) relating to tax losses carried forward. Entities which have suffered a loss in either the current or prior year have a total deferred tax asset of £189m (2010: £344m) relating to tax losses carried forward and temporary differences. Recognition is based on profit forecasts which indicate that it is probable that the entities will have future taxable profits against which the losses and temporary differences can be utilised.

The table below shows movements on deferred tax assets and liabilities during the year. The amounts are different from those disclosed in the balance sheet as they are presented before offsetting asset and liability balances where there is a legal right to set-off and an intention to settle on a net basis.

	Fixed asset timing differences £m	Available for sale investments £m	Cash flow hedges £m	Retirement benefit obligations £m	Loan impairment allowance £m	Other provisions £m	Tax losses carried forward £m	Share based payments £m	Other £m	Total £m

At 31 December 2010	(424)	33	(109)	118	345	162	1,558	372	(52)	2,003

Other movements include deferred tax amounts relating to acquisitions, disposals and exchange.

The amount of deferred tax liability expected to be settled after more than 12 months is £1,044m (2010: £911m). The amount of deferred tax asset expected to be recovered after more than 12 months is £2,050m (2010: £1,645m). These amounts are before offsetting asset and liability balances where there is a legal right to set-off and an intention to settle on a net basis.

Unrecognised deferred tax

Deferred tax assets have not been recognised in respect of gross deductible temporary differences of £1,163m (2010: £506m), and gross tax losses of £2,299m (2010: £6,178m) which includes capital losses of £2,034m (2010: £1,607m). Tax losses of £97m (2010: £70m) expire within 5 years, £101m (2010: £239m) expire within 6 to 10 years, £5m (2010: £4,262m) expire within 11 to 20 years and £2,096m (2010: £1,607m) can be carried forward indefinitely. Unrecognised losses that expire within 11 to 20 years have decreased because of an increased recognition of the deferred tax asset in the US Branch as a result of improved financial performance. Deferred tax assets have not been recognised in respect of these items because it is not probable that future taxable profits and gains will be available against which the Group can utilise benefits.

Deferred tax is not recognised in respect of the Group's investments in subsidiaries and branches where remittance is not contemplated and for those associates and interests in joint ventures where it has been determined that no additional tax will arise. The aggregate amount of temporary differences for which deferred tax liabilities have not been recognised is £703m (2010: £530m).

Critical accounting estimates and judgements

The Group is subject to income taxes in numerous jurisdictions and the calculation of the Group's tax charge and worldwide provisions for income taxes necessarily involves a degree of estimation and judgement. There are many transactions and calculations for which the ultimate tax treatment is uncertain and cannot be determined until resolution has been reached with the relevant tax authority. The Group recognises liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due after taking into account external advice where appropriate. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the current and deferred income tax assets and liabilities in the period in which such determination is made. These risks are managed in accordance with the Group's Tax Risk Framework.

Deferred tax assets have been recognised based on business profit forecasts. Further detail on the recognition of deferred tax assets are provided on page 213.

12 Earnings per share

	2011 £m	2010 £m	2009 £m
Profit attributable to equity holders of parent from continuing operations	3,007	3,564	2,628
Dilutive impact of convertible options	–	(10)	(17)
Profit attributable to equity holders of parent from continuing operations including dilutive impact of convertible options	3,007	3,554	2,611
Profit attributable to equity holders of the parent from discontinued operations	–	–	6,765

	2011 million	2010 million	2009 million
Basic weighted average number of shares in issue	11,988	11,719	10,890
Number of potential ordinary shares	538	733	594
Diluted weighted average number of shares	12,526	12,452	11,484

	Basic earnings per share			Diluted earnings per share		
	2011 p	2010 p	2009 p	2011 p	2010 p	2009 p
Earnings per ordinary share from continuing operations	25.1	30.4	24.1	24.0	28.5	22.7
Earnings per ordinary share from discontinued operations	–	–	62.1	–	–	58.9
Earnings per ordinary share	25.1	30.4	86.2	24.0	28.5	81.6

The calculation of basic earnings per share is based on the profit attributable to equity holders of the parent and the number of basic weighted average number of shares excluding treasury shares held in employee benefit trusts or held for trading. The basic weighted average number of shares in issue for 2011 reflects the full year impact of the exercise of 758 million warrants in 2010. No warrants were exercised in 2011.

When calculating the diluted earnings per share, the weighted average number of shares in issue is adjusted for the effects of all dilutive potential ordinary shares held in respect of Barclays PLC, totalling 538 million (2010: 733 million) shares. In addition, the profit attributable to equity holders of the parent is adjusted for the dilutive impact of the potential conversion of outstanding options held in respect of Absa Group Limited. The decrease in the number of potential ordinary shares is primarily driven by the impact of the decrease in the average share price to £2.34 (2010: £3.06) on both the 379 million (2010: 379 million) unexercised warrants and the 867 million (2010: 795 million) outstanding options granted under employee share schemes, which have strike prices ranging from £1.41 to £5.49 with an average of £3.71 (2010: £4.01).

Of the total number of employee share options and share awards at 31 December 2011, 248 million were anti-dilutive (2010: 59 million).

13 Dividends on ordinary shares

The Directors have approved a final dividend in respect of 2011 of 3.0p per ordinary share of 25p each, amounting to £366m (2010: £298m), which will be paid on 16 March 2012. The financial statements for the year ended 31 December 2011 do not reflect this dividend, which will be accounted for in shareholders' equity as an appropriation of retained profits in the year ending 31 December 2012. The 2011 financial statements include the 2011 interim dividends of £362m (2010: £355m) and final dividend declared in relation to 2010 of £298m (2009: £176m).

14 Discontinued operations

On 1 December 2009 the Group completed the sale of BGI to BlackRock, Inc. recognising a profit on disposal before tax of £6,331m. The tax charge on the profit on disposal was £43m reflecting the application of UK substantial shareholdings relief in accordance with UK tax law.

The consideration at completion was \$15.2bn (£9.5bn), including 37.567 million new BlackRock, Inc. shares. Under the terms of the transaction Bob Diamond and John Varley were appointed to the BlackRock, Inc. Board, which comprises 17 directors. As at 31 December 2011 the Group held an economic interest of 19.7% of BlackRock, Inc. and 2.2% of the voting rights. Barclays may not acquire additional voting rights and must vote in accordance with the recommendations of the BlackRock, Inc. Board of Directors. The Group is not deemed to exercise significant influence and the investment has been accounted for as an available for sale equity investment.

The Group has provided BlackRock, Inc. with customary warranties and indemnities in connection with the sale. Barclays will also continue to indemnify securities lending arrangements until 30 November 2012 (included within contingent liabilities in Note 30) and provide support to certain BGI cash funds until December 2013 in the form of credit derivatives (included within derivative liabilities in Note 17) and financial guarantees (included within provisions in Note 29). In addition, Barclays, BlackRock, Inc. and their respective affiliates also enter into agreements and transactions with one another in the ordinary course of their respective businesses and on an arm's length commercial basis, subject to applicable regulation and agreements with relevant regulators.

Notes to the financial statements

For the year ended 31 December 2011 continued

14 Discontinued operations continued

The disposed BGI business was treated as a discontinued operation. The results for the 11 month period up to the date of disposal (1 December 2009) are set out below:

	2009 £m
Net fee and commission income	1,759
Other income	104
Total income	1,863
Operating expenses	(1,137)
Profit before tax from discontinued operations	726
Tax on discontinued operations	(237)
Profit after tax from discontinued operations	489
Net profit on the disposal of the discontinued operation	6,288
Profit after tax from discontinued operations, including gain on disposal	6,777

	2009 £m
Available for sale assets	10
Currency translation reserve	(85)
Tax relating to components of other comprehensive income	17
Other comprehensive income, net of tax from discontinued operations	(58)

	2009 £m
Cash flows from discontinued operations	
Net cash flows from operating activities	333
Net cash flows from investing activities	(25)
Net cash flows from financing activities	(550)
Effect of exchange rates on cash and cash equivalents	(134)
Net cash flows from discontinued operations	(376)

Assets and liabilities held at fair value

This section presents information regarding assets and liabilities the Group holds and recognises at fair value. Fair value refers to the price that would be received to sell an asset or the price that would be paid to transfer a liability in an arms length transaction with a willing counterparty which may be an observable market price or, where there is no quoted price for the instrument, may be estimated based on available market data. Detail regarding the Group's approach to managing market risk can be found on pages 121 to 129.

15 Trading portfolio

Accounting for trading portfolio assets and liabilities

In accordance with IAS 39, all assets and liabilities held for trading purposes are held at fair value with gains and losses arising from changes in fair value taken to the income statement in net trading income (Note 5).

	2011 £m	2010 £m
Debt securities and other eligible bills	123,364	139,240
Equity securities	24,861	25,613
Traded loans	1,374	2,170
Commodities	2,584	1,844
Trading portfolio assets	152,183	168,867
Debt securities and other eligible bills	(35,063)	(64,607)
Equity Securities	(10,741)	(7,568)
Commodities	(83)	(518)
Trading portfolio liabilities	(45,887)	(72,693)

16 Financial assets designated at fair value

Accounting for financial assets designated at fair value

In accordance with IAS 39, financial assets may be designated at fair value, with gains and losses taken to the income statement in net trading income (Note 5) and net investment income (Note 6). The Group has the ability to do this when holding the instruments at fair value reduces an accounting mismatch (caused by an offsetting liability or asset being held at fair value), is managed by the Group on the basis of its fair value, or includes terms that have substantive derivative characteristics (Note 17 Derivative financial instruments).

	2011 £m	2010 £m
Loans and advances	21,960	22,352
Debt securities	2,095	1,918
Equity securities	4,018	5,685
Reverse repurchase agreements	5,779	7,559
Customers' assets held under investment contracts	1,302	1,429
Other financial assets	1,795	2,542
Financial assets designated at fair value	36,949	41,485

The total portfolio of linked liabilities to customers under investment contracts also includes £379m (2010: £518m) reported within cash and balances at central banks. The carrying value of the total portfolio assets equals the carrying value of liabilities to customers under investment contracts shown in Note 19. Any change in the value of assets results in an equal but opposite change in the value of amounts due to the policyholders. Therefore, the Group is not exposed to the financial risks inherent in the investments.

Notes to the financial statements

For the year ended 31 December 2011 continued

16 Financial assets designated at fair value continued

Credit risk of loans and advances designated at fair value and related credit derivatives

The following table shows the maximum exposure to credit risk, the changes in fair value attributable to changes in credit risk and the cumulative changes in fair value since initial recognition together with the amount by which related credit derivatives mitigate this risk:

	Maximum exposure as at 31 December		Changes in fair value during the year ended		Cumulative changes in fair value from inception	
	2011	2010	2011	2010	2011	2010
Loans and advances designated at fair value, attributable to credit risk	21,960	22,352	(75)	326	(5,070)	(4,995)
Fair value of related credit derivatives	1,198	2,206	138	(481)	401	263

17 Derivative financial instruments

Derivative instruments are contracts whose value is derived from one or more underlying financial instruments or indices defined in the contract. They include swaps, forward rate agreements, futures, options and combinations of these instruments and primarily affect the Group's net interest income, net trading income, net fee and commission income and derivative assets and liabilities. Notional amounts of the contracts are not recorded on the balance sheet. The Group's objectives and policies on managing the risks that arise in connection with derivatives, including the policies for hedging, are discussed in the Risk Management section on pages 67 to 158. Trading derivatives are managed within the Group's market risk management policies, which are outlined on pages 121 to 129.

The Group's exposure to credit risk arising from derivative contracts, as well as the Group's participation in exchange traded and over the counter derivatives markets are outlined in the Credit Risk section on page 107.

Accounting for derivatives

The Group applies IAS 39. All derivative instruments are held at fair value through profit or loss, except for derivatives held for risk management purposes in an effective hedge relationship (see hedge accounting below). This includes terms included in a contract or other financial asset or liability (the host), which, had it been a standalone contract, would have had met the definition of a derivative. These are separated from the host and accounted for in the same way as a derivative.

Hedge accounting

The Group applies hedge accounting to represent, to the maximum possible extent permitted under accounting standards, the economic effects of its interest and currency risk management strategies. Derivatives are used to hedge interest rate, exchange rate, commodity, and equity exposures and exposures to certain indices such as house price indices and retail price indices related to non-trading positions. Where derivatives are held for risk management purposes, and when transactions meet the required criteria for documentation and hedge effectiveness, the Group applies fair value hedge accounting, cash flow hedge accounting, or hedging of a net investment in a foreign operation, as appropriate to the risks being hedged.

Fair value hedge accounting

Changes in fair value of derivatives that qualify and are designated as fair value hedges are recorded in the income statement, together with changes in the fair value of the hedged asset or liability that are attributable to the hedged risk. The fair value changes adjust the carrying value of the hedged asset or liability held at amortised cost.

If hedge relationships no longer meet the criteria for hedge accounting, hedge accounting is discontinued. For fair value hedges of interest rate risk, the fair value adjustment to the hedged item is amortised to the income statement over the period to maturity of the previously designated hedge relationship using the effective interest method. If the hedged item is sold or repaid, the unamortised fair value adjustment is recognised immediately in the income statement.

Cash flow hedge accounting

For qualifying cash flow hedges, the fair value gain or loss associated with the effective portion of the cash flow hedge is recognised initially in other comprehensive income, and then recycled to the income statement in the periods when the hedged item will affect profit or loss. Any ineffective portion of the gain or loss on the hedging instrument is recognised in the income statement immediately.

When a hedging instrument expires or is sold, or when a hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss existing in equity at that time remains in equity and is recognised when the hedged item is ultimately recognised in the income statement. When a forecast transaction is no longer expected to occur, the cumulative gain or loss that was recognised in equity is immediately transferred to the income statement.

Hedges of net investments

The Group's net investments in foreign operations, including monetary items accounted for as part of the net investment, are hedged for foreign currency risks using both derivatives and foreign currency borrowings. Hedges of net investments are accounted for similarly to cash flow hedges; the effective portion of the gain or loss on the hedging instrument is being recognised directly in other comprehensive income and the ineffective portion being recognised immediately in the income statement. The cumulative gain or loss recognised in other comprehensive income is recognised in the income statement on the disposal or partial disposal of the foreign operation, or other reductions in the Group's investment in the operation.

17 Derivative financial instruments continued

Types of derivatives held

Foreign exchange derivatives

The Group's principal exchange rate related contracts are forward foreign exchange contracts, currency swaps and currency options. Forward foreign exchange contracts are agreements to buy or sell a specified quantity of foreign currency, usually on a specified future date at an agreed rate. A currency swap generally involves the exchange, or notional exchange, of equivalent amounts of two currencies and a commitment to exchange interest periodically until the principal amounts are re-exchanged on a future date.

Currency options provide the buyer with the right, but not the obligation, either to purchase or sell a fixed amount of a currency at a specified exchange rate on or before a future date. As compensation for assuming the option risk, the option writer generally receives a premium at the start of the option period.

Currency derivatives are primarily designated as hedges of the foreign currency risk of net investments in foreign operations.

Interest rate derivatives

The Group's principal interest rate related contracts are interest rate swaps, forward rate agreements, basis swaps, caps, floors and swaptions. Included in this product category are transactions that include combinations of these features. An interest rate swap is an agreement between two parties to exchange fixed rate and floating rate interest by means of periodic payments based upon a notional principal amount and the interest rates defined in the contract. Certain agreements combine interest rate and foreign currency swap transactions, which may or may not include the exchange of principal amounts. A basis swap is a form of interest rate swap, in which both parties exchange interest payments based on floating rates, where the floating rates are based upon different underlying reference indices. In a forward rate agreement, two parties agree a future settlement of the difference between an agreed rate and a future interest rate, applied to a notional principal amount. The settlement, which generally occurs at the start of the contract period, is the discounted present value of the payment that would otherwise be made at the end of that period.

Interest rate derivatives, designated as cash flow hedges, primarily hedge the exposure to cash flow variability from interest rates of variable rate loans to banks and customers, variable rate debt securities held and highly probable forecast financing transactions and reinvestments.

Interest rate derivatives designated as fair value hedges primarily hedge the interest rate risk of fixed rate borrowings in issue, fixed rate loans to banks and customers and investments in fixed rate debt securities held.

Credit derivatives

The Group's principal credit derivative-related contracts include credit default swaps and total return swaps. A credit derivative is an arrangement whereby the credit risk of an asset (the reference asset) is transferred to the seller of protection. A credit default swap is a contract where the protection seller receives premium or interest-related payments in return for contracting to make payments to the protection buyer upon a defined credit event. Credit events normally include bankruptcy, payment default on a reference asset or assets, or downgrades by a rating agency. A total return swap is an instrument whereby the seller of protection receives the full return of the asset, including both the income and change in the capital value of the asset. The buyer of the protection in return receives a predetermined amount.

Equity derivatives

The Group's principal equity-related contracts are equity and stock index swaps and options (including warrants, which are equity options listed on an exchange). An equity swap is an agreement between two parties to exchange periodic payments, based upon a notional principal amount, with one side paying fixed or floating interest and the other side paying based on the actual return of the stock or stock index. An equity option provides the buyer with the right, but not the obligation, either to purchase or sell a specified stock, basket of stocks or stock index at a specified price or level on or before a specified date. The Group also enters into fund-linked derivatives, being swaps and options whose underlings include mutual funds, hedge funds, indices and multi-asset portfolios.

Commodity derivatives

The Group's principal commodity-related derivative contracts are swaps, options, forwards and futures. The main commodities transacted are base metals, precious metals, oil and oil-related products, power and natural gas.

The Group's total derivative asset and liability position as reported on the balance sheet is as follows:

Total derivatives	2011			2010		
	Notional contract amount £m	Fair value		Notional contract amount £m	Fair value	
		Assets £m	Liabilities £m		Assets £m	Liabilities £m
Total derivative assets/(liabilities) held for trading	43,095,991	535,306	(524,552)	48,517,204	418,586	(403,163)
Total derivative assets/(liabilities) held for risk management	243,534	3,658	(3,358)	240,353	1,733	(2,353)
Derivative assets/(liabilities)	43,339,525	538,964	(527,910)	48,757,557	420,319	(405,516)

Notes to the financial statements

For the year ended 31 December 2011 continued

17 Derivative financial instruments continued

The fair value of gross derivative assets increased by 28% to £539bn (2010: £420bn) reflecting decreases in the major forward curves, offset by the impact of optimisation initiatives. Derivative asset exposures would be £492bn (2010: £378bn) lower than reported under IFRS if netting were permitted for assets and liabilities with the same counterparty or for which we hold cash collateral. Derivative liabilities would be £478bn (2010: £362bn) lower, reflecting counterparty netting and collateral placed.

The fair values and notional amounts of derivative instruments held for trading are set out in the following table:

Derivatives held for trading	2011			2010

Derivatives designated as hedges of net investments						
Forward foreign exchange	11,391	61	(388)	5,870	28	(199)
Currency swaps	619	–	(6)	752	21	(217)
Derivatives designated as hedges of net investment	12,010	61	(394)	6,622	49	(416)
Derivatives held for risk management	243,534	3,658	(3,358)	240,353	1,733	(2,353)

The Group has hedged the following forecast cash flows, which primarily vary with interest rates. These cash flows are expected to impact the income statement in the following periods, excluding any hedge adjustments that may be applied:

	Total £m	Up to one year £m	Between one to two years £m	Between two to three years £m	Between three to four years £m	Between four to five years £m	More than five years £m
2011							
Forecast receivable cash flows	3,818	700	582	597	612	596	731
Forecast payable cash flows	177	108	28	24	9	–	8
2010							
Forecast receivable cash flows	2,861	440	570	625	526	291	409
Forecast payable cash flows	307	69	52	76	82	22	6

The maximum length of time over which the Group hedges exposure to the variability in future cash flows for forecast transactions, excluding those forecast transactions related to the payment of variable interest on existing financial instruments, is 9 years (2010: 14 years).

Amounts recognised in net interest income	2011 £m	2010 £m
Losses on the hedged items attributable to the hedged risk	(765)	(1,172)
Gains on the hedging instruments	683	1,286
Fair value ineffectiveness	(82)	114
Cash flow hedging ineffectiveness	8	138
Net investment hedging ineffectiveness	(1)	(10)

All gains or losses on hedging derivatives relating to forecast transactions, which are no longer expected to occur, have been recycled to the income statement.

Gains and losses transferred from the cash flow hedging reserve in the current year to: interest income was a £86m gain (2010: £88m gain); interest expense a £732m gain (2010: £515m gain); net trading income a £157m loss (2010: £148m loss); and administration and general expenses a £2m gain (2010: £99m gain).

Notes to the financial statements

For the year ended 31 December 2011 continued

18 Available for sale financial assets

Accounting for available for sale financial assets

Available for sale financial assets are held at fair value with gains and losses being included in other comprehensive income. The Group uses this classification for assets that are not derivatives and are not held for trading purposes or otherwise designated at fair value through profit or loss, or at amortised cost. Dividends and interest (calculated using the effective interest method) are recognised in the income statement in net interest income (Note 3) or, net investment income (Note 6). On disposal, the cumulative gain or loss recognised in other comprehensive income is also included in net investment income.

For impairment of available for sale debt and equity investments, see Note 7, Credit impairment charges and impairment on available for sale assets.

	2011 £m	2010 £m
Debt securities and other eligible bills	63,610	59,629
Equity securities	4,881	5,481
Available for sale financial investments	68,491	65,110

Critical accounting estimates and judgements

Approximately US\$4.2bn (£2.7bn) of the assets acquired as part of the 2008 acquisition of the North American business of Lehman Brothers had not been received by 31 December 2011. Approximately US\$3.0bn (£2.0bn) of this amount was recognised as part of the acquisition accounting and is included as an available for sale asset in the balance sheet. As discussed in Note 31, Barclays entitlement to these assets was the subject of legal proceedings in the United States Bankruptcy Court for the Southern District of New York (the Court) between the SIPA Trustee for Lehman Brothers Inc. (the Trustee) and Barclays. On 22 February 2011, the Court issued its Opinion in relation to the legal proceedings deciding some of the claims in the Trustee's favour and some in favour of Barclays. On 15 July 2011, the Court entered final Orders implementing its Opinion. The final Orders provide that Barclays is not entitled to receive approximately US\$2.4bn (£1.6bn), and is only conditionally entitled to receive approximately US\$0.8bn (£0.5bn), of the undelivered assets. In addition, the final Orders provide that Barclays is not entitled to approximately US\$2.1bn (£1.3bn) of assets it had already received.

Barclays and the Trustee have each filed a notice of appeal from the Court's adverse rulings. There continues to be significant judgement involved in the valuation of this asset and uncertainty relating to the outcome of the appeal process. The Group takes the view that the effective provision of US\$1.2bn (£0.8bn) that is reflected in its estimate of fair value is appropriate. If the final Orders were to be unaffected by the appeals, Barclays estimates that after taking into account the US\$1.2bn (£0.8bn) effective provision, its loss would be approximately US\$4.3bn (£2.8bn). The valuation of this asset will be kept under review as legal proceedings progress.

19 Financial liabilities designated at fair value

Accounting for liabilities designated at fair value through profit and loss

In accordance with IAS 39, financial liabilities may be designated at fair value, with gains and losses taken to the income statement within net trading income (Note 5) and net investment income (Note 6). The Group has the ability to do this when holding the instruments at fair value reduces an accounting mismatch (caused by an offsetting liability or asset being held at fair value), is managed by the Group on the basis of its fair value, or includes terms that have substantive derivative characteristics (Note 17, Derivative financial instruments).

	2011		2010	
	Fair value £m	Contractual amount due on maturity £m	Fair value £m	Contractual amount due on maturity £m
Debt securities	66,565	70,787	76,907	81,589
Deposits	10,755	11,422	10,243	10,950
Liabilities to customers under investment contracts	1,681	–	1,947	–
Other financial liabilities	8,996	9,561	8,632	9,533
Financial liabilities designated at fair value	87,997	91,770	97,729	102,072

The cumulative own credit net gain that has been recognised is £3,600m at 31 December 2011 (2010: £892m).

20 Fair value of financial instruments

Accounting for financial assets and liabilities – fair values

The Group applies IAS 39. All financial instruments are initially recognised at fair value on the date of initial recognition and, depending on the classification of the asset, may continue to be held at fair value either through profit or loss or other comprehensive income.

The fair value of a financial instrument is the amount for which an asset could be exchanged, or a liability settled, in an arm's length transaction between knowledgeable willing parties.

Wherever possible, fair value is determined by reference to a quoted market price for that instrument. For many of the Group's financial assets and liabilities, especially derivatives, quoted prices are not available, and valuation models are used to estimate fair value. The models calculate the expected cash flows under the terms of each specific contract and then discount these values back to a present value. These models use as their basis independently sourced market parameters including, for example, interest rate yield curves, equities and commodities prices, option volatilities and currency rates.

For financial liabilities measured at fair value, the carrying amount reflects the effect on fair value of changes in own credit spreads derived from observable market data, such as spreads on Barclays issued bonds or credit default swaps. Most market parameters are either directly observable or are implied from instrument prices. The model may perform numerical procedures in the pricing such as interpolation when input values do not directly correspond to the most actively traded market trade parameters.

On initial recognition, it is presumed that the transaction price is the fair value unless there is observable information available in an active market to the contrary.

For valuations that have made use of significant unobservable inputs, the difference between the model valuation and the initial transaction price ('Day One profit') is recognised in profit or loss either:

- on a straight-line basis over the term of the transaction, or over the period until all model inputs will become observable where appropriate; or
- released in full when previously unobservable inputs become observable.

Various factors influence the availability of observable inputs and these may vary from product to product and change over time. Factors include the depth of activity in the relevant market, the type of product, whether the product is new and not widely traded in the marketplace, the maturity of market modelling and the nature of the transaction (bespoke or generic). To the extent that valuation is based on models or inputs that are not observable in the market, the determination of fair value can be more subjective, dependant on the significance of the unobservable input to the overall valuation. Unobservable inputs are determined based on the best information available, for example by reference to similar assets, similar maturities or other analytical techniques.

The sensitivity of valuations used in the financial statements to reasonably possible changes in variables is shown on page 236.

Notes to the financial statements

Subordinated liabilities	24,870	20,745	28,499	27,183

Valuation inputs

IFRS 7 *Financial Instruments: Disclosure* requires an entity to classify its financial instruments held at fair value according to a hierarchy that reflects the significance of observable market inputs. The classification of a financial instrument is based on the lowest level input that is significant to the fair value measurement in its entirety. The three levels of the fair value hierarchy are defined below.

Quoted market prices – Level 1

Financial instruments are classified as Level 1 if their value is observable in an active market. Such instruments are valued by reference to unadjusted quoted prices for identical assets or liabilities in active markets where the quoted price is readily available, and the price represents actual and regularly occurring market transactions on an arm's length basis. An active market is one in which transactions occur with sufficient volume and frequency to provide pricing information on an ongoing basis.

This category includes liquid government bonds actively traded through an exchange or clearing house, actively traded listed equities and actively exchange-traded derivatives.

Valuation technique using observable inputs – Level 2

Financial instruments classified as Level 2 have been valued using models whose inputs are observable in an active market. Valuations based on observable inputs include financial instruments such as swaps and forwards which are valued using market standard pricing techniques, and options that are commonly traded in markets where all the inputs to the market standard pricing models are observable.

This category includes most investment grade and liquid high yield bonds, certain asset backed securities, US agency securities, government bonds, less actively traded listed equities, bank, corporate and municipal obligations, certain OTC derivatives, certain convertible bonds, certificates of deposit, commercial paper, collateralised loan obligations (CLOs), most commodities based derivatives, credit derivatives, certain credit default swaps (CDSs), most fund units, certain loans, foreign exchange spot and forward transactions and certain issued notes.

Notes

- a The carrying value of financial assets measured at amortised cost (including loans and advances, and other lending such as reverse repurchase agreements and cash collateral on securities borrowed) is determined in accordance with the accounting policy noted on pages 238 to 239. Fair value is determined using discounted cash flows, applying market derived interest rates. Alternatively, the fair value is determined by applying an average of available regional and industry segmental credit spreads to the loan portfolio, taking the contractual maturity of the loan facilities into consideration.
- b The carrying value of financial liabilities measured at amortised cost (including customer accounts and other deposits such as repurchase agreements and cash collateral on securities lent, debt securities in issue and subordinated liabilities) is determined in accordance with the accounting policy noted on page 238. Fair values of other debt securities in issue are based on quoted prices where available, or where these are unavailable, are estimated using a valuation model. Fair values for dated and undated convertible and non convertible loan capital are based on quoted market rates for the issue concerned or similar issues with terms and conditions.

20 Fair value of financial instruments continued

Valuation technique using significant unobservable inputs – Level 3

Financial instruments are classified as Level 3 if their valuation incorporates significant inputs that are not based on observable market data (unobservable inputs). Such inputs are generally determined based on observable inputs of a similar nature, historical observations on the level of the input or other analytical techniques.

This category includes certain corporate debt securities, distressed debt, private equity investments, commercial real estate loans, certain OTC derivatives (requiring complex and unobservable inputs such as correlations and long dated volatilities), certain convertible bonds, certain CDS, derivative exposures to monoline insurers, certain fund units, certain asset backed securities, certain issued notes, certain CDOs (synthetic and some cash underlyings), certain CLOs and certain loans.

The following table shows the Group's financial assets and liabilities that are measured at fair value analysed by level within the fair value hierarchy.

Financial assets and liabilities measured at fair value	Valuation technique using			Total £m
	Quoted market prices (Level 1) £m	Observable inputs (Level 2) £m	Significant unobservable inputs (Level 3) £m	
As at 31 December 2011				
Trading portfolio assets	61,530	81,449	9,204	152,183
Financial assets designated at fair value	4,179	24,091	8,679	36,949
Derivative financial assets	2,550	525,147	11,267	538,964

As at 31 December 2010	5,741	10,904	3,290	(101)	(3,637)	2,828	19,025

The significant movements in the Level 3 positions during the year ended 31 December 2011 are as follows:

- Purchases of £9.0bn, primarily comprising £5.1bn of assets acquired as part of the acquisition of Protium, £2.1bn of other non-asset backed debt instruments, £0.6bn of asset backed products and £0.4bn of derivative products;
- Sales of £7.8bn including the sale of £2.8bn Protium assets post acquisition, the sale of £1.9bn of non-asset backed debt instruments, £1.0bn of asset backed products, £1.0bn of legacy commercial real estate loans and £0.3bn of private equity investments;
- Settlements of £1.8bn including the £0.8bn Baubecon debt restructuring and repayments received on other legacy commercial real estate loans. For further details, on Baubecon, refer to Note 41;
- Net transfers into Level 3 of £2.6bn primarily comprised transfers of inflation linked bond trading portfolio assets, for which fair values have become less observable in the market; and
- Issuances of £1.0bn, comprising £0.4bn of derivatives products, £0.3bn of structured notes and £0.3bn of non-asset backed products.

Movements on the fair value of Level 3 assets recognised in the income statement totalled £0.3bn (2010: £0.2bn).

Note

a The derivative financial instruments in the tables above are represented on a net basis. On a gross basis derivative financial assets as at 31 December 2011 totalled £11,267m (2010: £9,082m) and derivative financial liabilities totalled £8,581m (2010: £6,254m).

Valuation control framework

The Independent Valuation Control function is responsible for independent price verification, oversight of fair value adjustments and escalation of valuation issues. This process covers all fair value positions and is a key control in ensuring the material accuracy of valuations.

Price verification uses independently sourced data that is deemed most representative of the market. The characteristics against which the data source is assessed are independence, reliability, consistency with other sources and evidence that the data represents an executable price. The most current data available at balance sheet date is used. Where significant variances are noted in the independent price verification process, an adjustment is taken to the fair value position. Additional fair value adjustments may be taken to reflect such factors as bid-offer spreads, market data uncertainty, model limitations and counterparty risk.

Independent price verification results and fair value adjustments are reported on a monthly basis to the Valuation Committee. This committee is responsible for overseeing valuation and fair value adjustment policy within Corporate and Investment Banking and this is the forum to which valuation issues are escalated. The Valuation Committee delegates more detailed review to the following five Sub-Committees: Independent Valuations, Legacy and Other Assets, Litigation Risk, Models, and Governance.

The Independent Valuations Sub-Committee reviews the results of the independent price verification and fair value adjustments process on a monthly basis. This includes, but is not limited to, reviewing fair value adjustments and methodologies, independent price verification results, limits and valuation uncertainty. The Legacy and Other Assets Sub-Committee is responsible for overseeing the valuation and measurement issues arising in legacy assets, certain AFS positions and other assets as delegated by the Valuation Committee. The Litigation Risk Sub-Committee is responsible for overseeing the valuation and measurement issues arising from legal risks within Barclays Corporate and Investment Banking.

The Models Sub-Committee is responsible for overseeing policies and controls related to the use of valuation models. This includes but is not limited to review of global model risk reports, the trade approval process and model validation, model-related fair value adjustments, and independent price verification variances or collateral disputes relating to model usage.

The Governance Sub-Committee is responsible for overseeing the governance of valuation processes, policies and procedures. This Sub-Committee monitors the development of the Valuation control framework, completeness of balance sheet oversight and appropriate representation of Senior Management at the Valuation Committee and each of the above referenced Sub-Committees. Regulatory and accounting issues related to fair value are assessed by the Governance Sub-Committee.

Notes to the financial statements

For the year ended 31 December 2011 continued

20 Fair value of financial instruments continued

Valuation techniques

Current year valuation methodologies were consistent with the prior year unless otherwise noted below. These methodologies are commonly used by market participants. The valuation techniques used for the main products that are not determined by reference to unadjusted quoted prices (Level 1), are described below.

Commercial real estate loans

This category includes lending on a range of commercial property types including retail, hotel, office, multi-family and industrial properties.

Performing loans are valued using a spread-based approach, with consideration of characteristics such as property type, geographic location, yields, credit quality and property performance reviews. Where there is significant uncertainty regarding loan performance, valuation is based on the underlying collateral, whose value is determined through property-specific information such as third party valuation reports and bids for the underlying properties.

Since each commercial real estate loan is unique in nature and the secondary commercial loan market is relatively illiquid, valuation inputs are generally considered unobservable.

Asset backed products

These are debt and derivative products that are linked to the cash flows of a pool of referenced assets via securitisation. This category includes residential mortgage backed securities, commercial mortgage backed securities, asset backed securities, CDOs (collateralised debt obligations), CLOs (collateralised loan obligations) and derivatives with cash flows linked to securitisations.

Where available, valuations are based on observable market prices which are sourced from broker quotes and inter-dealer prices. Otherwise, valuations are determined using industry standard cash flow models that calculate fair value based on loss projections, prepayment, recovery and discount rates.

These inputs are determined by reference to a number of sources including proxying to observed transactions, market indices or market research, and by assessing underlying collateral performance.

Proxying to observed transactions, indices or research requires an assessment and comparison of the relevant securities' underlying attributes including collateral, tranche, vintage, underlying asset composition (historical losses, borrower characteristics, and loan attributes such as loan-to-value ratio and geographic concentration) and credit ratings (original and current).

Other credit products

These products are linked to the credit spread of a referenced entity, index or basket of referenced entities. This category includes synthetic CDOs, single name and index CDS and Nth to default basket swaps. Within this population, valuation inputs are unobservable for CDS with illiquid reference assets and certain synthetic CDOs.

CDS are valued using a market standard model that incorporates the credit curve as its principal input. Credit spreads are observed directly from broker data, third party vendors or priced to proxies. Where credit spreads are unobservable, they are determined with reference to recent transactions or bond spreads from observable issuances of the same issuer or other similar entities as a proxy.

Synthetic CDOs are valued using a model that calculates fair value based on observable and unobservable parameters including credit spreads, recovery rates, correlations and interest rates and is calibrated daily. For index and bespoke synthetic CDOs with unobservable inputs, correlation is set with reference to the index tranche market.

Derivative exposure to monoline insurers

These products are derivatives through which credit protection has been purchased on structured debt instruments (primarily CLOs) from monoline insurers.

The value of the CDS is derived from the value of the cash instrument that it protects. A valuation adjustment is then applied to reflect the counterparty credit risk associated with the relevant monoline. This adjustment is calculated using an assessment of the likely recovery of the protected cash security, which is derived from a scenario-based calculation of the mark-to-market of the instrument using an appropriate valuation model; and the probability of default and loss given default of the monoline counterparty, as estimated from independent fundamental credit analysis. Due to the counterparty credit risk associated with these insurers, derivative exposure to monoline counterparty insurers is generally considered unobservable.

20 Fair value of financial instruments continued

Non-asset backed debt instruments

These are government bonds, US agency bonds, corporate bonds, commercial paper, certificates of deposit, convertible bonds, notes and other non-asset backed bonds. Within this population, valuation inputs are unobservable for certain convertible bonds and corporate bonds.

Liquid government bonds actively traded through an exchange or clearing house are marked to the closing levels observed in these markets. Less liquid government bonds, US agency bonds, corporate bonds, commercial paper and certificates of deposit are valued using observable market prices which are sourced from broker quotes, inter-dealer prices or other reliable pricing services. Where there are no observable market prices, fair value is determined by reference to either issuances or CDS spreads of the same issuer as proxy inputs to obtain discounted cash flow amounts. In the absence of observable bond or CDS spreads for the respective issuer, similar reference assets or sector averages are applied as a proxy (the appropriateness of proxies being assessed based on issuer, coupon, maturity and industry).

Convertible bonds are valued using prices observed through broker sources, market data services and trading activity. Where reliable external sources are not available, fair value is determined using a spread to the equity conversion value or the value of the bond without the additional equity conversion. The spread level is determined with reference to similar proxy assets.

Fair valued issued notes are valued using discounted cash flow techniques and industry standard models incorporating various observable input parameters depending on the terms of the instrument. Any unobservable inputs generally have insignificant impact on the overall valuation.

Equity products

This category includes listed equities, exchange traded equity derivatives, OTC equity derivatives, preference shares and contracts for difference.

OTC equity derivatives valuations are determined using industry standard models. The models calculate fair value based on input parameters such as stock prices, dividends, volatilities, interest rates, equity repo curves and, for multi-asset products, correlations. In general, input parameters are deemed observable up to liquid maturities which are determined separately for each parameter and underlying instrument. Unobservable model inputs are determined by reference to liquid market instruments and applying extrapolation techniques to match the appropriate risk profile.

Private equity

Private equity investments are valued in accordance with the 'International Private Equity and Venture Capital Valuation Guidelines'. This requires the use of a number of individual pricing benchmarks such as the prices of recent transactions in the same or similar entities, discounted cash flow analysis, and comparison with the earnings multiples of listed comparative companies. Unobservable inputs include earnings estimates, multiples of comparative companies, marketability discounts and discount rates. Model inputs are based on market conditions at the reporting date. The valuation of unquoted equity instruments is subjective by nature. However, the relevant methodologies are commonly applied by other market participants and have been consistently applied over time. Full valuations are performed at least bi-annually, with the portfolio reviewed on a monthly basis for material events that might impact upon fair value.

Funds and fund-linked products

This category includes holdings in hedge funds, funds of funds, and fund derivatives. Fund derivatives are derivatives whose underlyings include mutual funds, hedge funds, fund indices and multi-asset portfolios. They are valued using underlying fund prices, yield curves and other available market information.

In general, fund holdings are valued based on the latest available valuation received from the fund administrator. Funds are deemed unobservable where the fund is either suspended, in wind-down, has a redemption restriction that severely affects liquidity, or where the latest net asset value from the fund administrators is more than three months old. In the case of illiquid fund holdings the valuation will take account of all available information in relation to the underlying fund or collection of funds and maybe adjusted relative to the performance of relevant index benchmarks.

Foreign exchange products

These products are derivatives linked to the foreign exchange market. This category includes forward contracts, FX swaps and FX options. Exotic derivatives are valued using industry standard and bespoke models.

Input parameters include FX rates, interest rates, FX volatilities, interest rate volatilities, FX interest rate correlations and others as appropriate. Certain correlations and long dated forward and volatilities are unobservable. Unobservable model inputs are set by referencing liquid market instruments and applying extrapolation techniques to match the appropriate risk profile.

Notes to the financial statements

For the year ended 31 December 2011 continued

20 Fair value of financial instruments continued

Interest rate products

These are products linked to interest rates or inflation indices. This category includes interest rate and inflation swaps, swaptions, caps, floors, inflation options, balance guaranteed swaps and other exotic interest rate derivatives. Interest rate products are valued using standard discounted cash flow techniques.

Interest rate derivative cash flows are valued using interest rate yield curves whereby observable market data is used to construct the term structure of forward rates. This is then used to project and discount future cash flows based on the parameters of the trade. Instruments with optionality are valued using a volatility surface constructed from market observable inputs. Exotic interest rate derivatives are valued using industry standard and bespoke models based on observable market parameters which are determined separately for each parameter and underlying instrument. Where unobservable, a parameter will be set with reference to an observable proxy. Inflation forward curves and interest rate yield curves are extrapolated beyond observable tenors.

Balance guaranteed swaps are valued using cash flow models that calculate fair value based on loss projections, prepayment, recovery and discount rates. These parameters are determined by reference to underlying asset performance, independent research, ABX indices, broker quotes, observable trades on similar securities and third party pricing sources. Prepayment is projected based on observing historic prepayment.

During 2010, in line with changes in market practice, the methodology for valuing certain collateralised interest rate products was updated to make use of more relevant interest rate yield curves to discount cash flows. For certain collateralised derivatives, Overnight Indexed Swap (OIS) rates were used rather than other market reference rates such as LIBOR. During 2011, in line with market practice, the methodology for valuing certain collateralised interest rate products was further amended to reflect the impact of "cheapest to deliver" collateral on discounting curves, where counterparty CSA (Credit Support Annex) agreements specify the right of the counterparty to choose the currency of collateral posted.

Commodity products

These products are exchange traded and OTC derivatives based on underlying commodities such as metals, crude oil and refined products, agricultural, power and natural gas.

The valuations of certain commodity swaps and options are determined using models incorporating discounting of cash flows and other industry standard modelling techniques. Valuation inputs include forward curves, volatility surfaces and tenor correlation. Within this population, certain forward curves and volatility surfaces for longer dated exposures are unobservable. These unobservable inputs are set with reference to similar observable products or by applying extrapolation techniques from the observable market.

Other

This category is largely made up of fixed rate loans, which are valued using models that discount expected future cash flows. These models calculate fair value based on observable interest rates and unobservable credit spreads. Unobservable credit spreads are determined by extrapolating observable spreads.

The receivables resulting from the acquisition of the North American businesses of Lehman Brothers is included within 'Other'. For more details, refer to Note 31 Legal Proceedings.

Complex derivative instruments

Valuation estimates made by counterparties with respect to complex derivative instruments, for the purpose of determining the amount of collateral to be posted, often differ, sometimes significantly, from Barclays' own estimates. In almost all cases, Barclays has been able to successfully resolve such differences or otherwise reach an accommodation with respect to collateral posting levels, including in certain cases by entering into compromise collateral arrangements. Due to the ongoing nature of collateral calls, Barclays will often be engaged in discussions with one or more counterparties in respect of such differences at any given time. Valuation estimates made by counterparties for collateral purposes are, like any other third-party valuation, considered when determining Barclays' own fair value estimates.

Fair value adjustments

The main valuation adjustments required to arrive at a fair value are described below:

Bid-Offer valuation adjustments

For assets and liabilities where the firm is not a market maker, mid prices are adjusted to bid and offer prices respectively. Bid-offer adjustments reflect expected close out strategy and, for derivatives, the fact that they are managed on a portfolio basis. The methodology for determining the bid-offer adjustment for a derivative portfolio will generally involve netting between long and short positions and the bucketing of risk by strike and term in accordance with hedging strategy. Bid-offer levels are derived from market sources, such as broker data. For those assets and liabilities where the firm is a market maker and has the ability to transact at, or better than, mid price (which is the case for certain equity, bond and vanilla derivative markets), the mid price is used, since the bid-offer spread does not represent a transaction cost.

Uncertainty adjustments

Market data input for exotic derivatives may not have a directly observable bid offer spread. In such instances, an uncertainty adjustment is applied as a proxy for the bid offer adjustment. An example of this is correlation risk where an adjustment is required to reflect the possible range of values that market participants apply. The uncertainty adjustment may be determined by calibrating to derivative prices, or by scenario analysis or historical analysis.

20 Fair value of financial instruments continued

Model valuation adjustments

New valuation models are reviewed under the firm's model governance framework. This process identifies the assumptions used and any model limitations (for example, if the model does not incorporate volatility skew). Where necessary, fair value adjustments will be applied to take these factors into account. Model valuation adjustments are dependant on the size of portfolio, complexity of the model, whether the model is market standard and to what extent it incorporates all known risk factors. All models and model valuation adjustments are subject to review on at least an annual basis.

Credit and debit valuation adjustments

Credit valuation adjustments (CVAs) and debit valuation adjustments (DVAs) are incorporated into derivative valuations to reflect the impact on fair value of counterparty credit risk and Barclays' own credit quality respectively. These adjustments are modelled for OTC derivatives across all asset classes. Calculations are derived from estimates of exposure at default, probability of default and recovery rates, on a counterparty basis. Counterparties include (but are not limited to) corporates, monolines, sovereigns and sovereign agencies, supranationals, and special-purpose vehicles.

Whereas in 2010 certain highly-rated sovereigns, supra-nationals and government agencies were excluded from the CVA calculation, following the sovereign debt crisis it has been considered appropriate to include these entities, for which the impact of doing so was a £79m increase in the CVA.

Exposure at default is generally based on expected positive exposure, estimated through the simulation of underlying risk factors. For some complex products, where this approach is not feasible, simplifying assumptions are made, either through proxying with a more vanilla structure, or using current or scenario-based mark-to-market as an estimate of future exposure. Where strong collateralisation agreement exists as a mitigant to counterparty risk, the exposure is set to zero.

Probability of default and recovery rate information is generally sourced from the CDS markets. For counterparties where this information is not available, or considered unreliable due to the nature of the exposure, alternative approaches are taken based on mapping internal counterparty ratings onto historical or market-based default and recovery information. In particular, this applies to sovereign related names where the effect of using the recovery assumptions implied in CDS levels would imply a £300m increase in CVA.

Correlation between counterparty credit and underlying derivative risk factors may lead to a systematic bias in the valuation of counterparty credit risk, termed "wrong-way" or "right-way" risk. This is not incorporated into the CVA calculation, but is monitored regularly via scenario analysis and has been found to be immaterial.

Own credit adjustments

The carrying amount of issued notes that are designated under the IAS 39 fair value option is adjusted to reflect the effect of changes in own credit spreads. The resulting gain or loss is recognised in the income statement. For funded instruments such as issued notes, mid-level credit spreads on Barclays issued bonds are the basis for this adjustment.

At 31 December 2011, the own credit adjustment arose from the fair valuation of Barclays financial liabilities designated at fair value. Barclays credit spreads widened during 2011, leading to a profit of £2,708m (2010: £391m) from the fair value of changes primarily in own credit itself but also reflecting the effects of foreign exchange rates, time decay and trade activity.

Unrecognised gains as a result of the use of valuation models using unobservable inputs

The amount that has yet to be recognised in income that relates to the difference between the transaction price (the fair value at initial recognition) and the amount that would have arisen had valuation models using unobservable inputs been used on initial recognition, less amounts subsequently recognised, is as follows:

Year ended 31 December	2011 £m	2010 £m
Opening balance	137	99
Additions	93	56
Amortisation and releases	(113)	(18)
Closing balance	117	137

Critical accounting estimates and judgements

Quoted market prices are not available for many of the financial assets and liabilities that are held at fair value and the Group uses a variety of techniques to estimate the fair value. The above note describes the more judgemental aspects of valuation in the period, including: credit valuation adjustments on monoline exposures, commercial real estate loans, private equity investments, and fair value loans to government and business and other services. The following sensitivity analysis is performed on products with significant unobservable parameters (Level 3) to generate a range of reasonably possible alternative valuations. These numbers are calculated before taking advantage of any diversification in the portfolio.

Total	29,017	(9,992)	1,552	130	(1,730)	(88)

An analysis is performed on products with significant unobservable parameters (Level 3) to generate a range of reasonably possible alternative valuations. The methodologies applied take account of the nature of valuation techniques used, as well as the availability and reliability of observable proxy and historical data. Sensitivities are calculated without reflecting the impact of any diversification in the portfolio.

The effect of stressing unobservable inputs to a range of reasonably possible alternatives would be to increase fair values by up to £2.0bn (2010: £1.7bn) or to decrease fair values by up to £2.1bn (2010: £1.8bn) with substantially all the potential effect impacting profit and loss rather than equity.

Sensitivities are dynamically calculated on a monthly basis. The calculation is based on a range, standard deviation or spread data of a reliable reference source or a scenario based on alternative market views. The level of shift or scenarios applied is considered for each product and varied according to the quality of the data and variability of underlying market. The approach adopted in determining these sensitivities has continued to evolve during the year, in the context of changing market conditions.

Commercial real estate loans

Sensitivity is determined by applying an adjusted spread of 15% for each loan (both up and down). The adjusted spread is derived from loan origination spreads provided by independent market research. For non-performing loans, a plausible worst-case valuation is determined from the history of third-party valuation reports or bids received.

Asset backed products

The sensitivity analysis for asset backed products is based on bid offer ranges defined at the asset class level which take into account security level liquidity. Half of the observed bid offer range is multiplied by the market value of the position to calculate the valuation sensitivity. Where there is no observable bid offer data, price movements on appropriate indices are used. Sensitivity is based on the average of the largest upward and downward price movement in the preceding 12 month period.

20 Fair value of financial instruments continued

Other credit products

The sensitivity of valuations of the illiquid CDS portfolio is determined by applying a shift to each underlying reference asset. The shift is based upon the average bid offer spreads observed in the market for similar CDS.

Bespoke Collateralised Synthetic Obligation (CSO) sensitivity is calculated using correlation levels derived from the range of contributors to a consensus bespoke service.

Derivative exposure to monoline insurers

Sensitivity is measured by stressing inputs to the counterparty valuation adjustment including our expected exposures and the probability of default of the monoline derivative counterparty. The modelled expected exposures are stressed by shifting the recovery rate assumptions on the underlying protected assets. The probability of default of the monoline derivative counterparty is stressed by shifting the internal default curve, which is generated through the analysis performed by credit risk management.

Non-asset backed debt instruments

The sensitivity for convertible bonds is determined by applying a shift to each underlying position based upon the bid offer spreads observed in the market for similar bonds.

The sensitivity for corporate bonds portfolio is determined by applying a shift to each underlying position driven by average bid offer spreads observed in the market for similar bonds.

Equity products

Sensitivity is estimated based on the dispersion of consensus data services either directly or through proxies.

Private equity

The relevant valuation models are each sensitive to a number of key assumptions, such as projected future earnings, comparator multiples, marketability discounts and discount rates. Valuation sensitivity is estimated by flexing such assumptions to reasonable alternative levels and determining the impact on the resulting valuation.

Funds and fund-linked products

Sensitivity is calculated on an individual fund basis using a loss based scenario approach which factors in the underlying assets of the specific fund and assumed recovery rates.

Foreign exchange products

Sensitivity relating to unobservable valuation inputs is based on the dispersion of consensus data services.

Interest rate products

Sensitivity relating to the valuation of the products is mainly driven from the dispersion of the consensus data.

Commodity products

Sensitivity is determined primarily by measuring historical variability over two years. The estimate is calculated using data for short dated parameter curves to generate best and worst case scenarios. Where historical data is unavailable or uncertainty is due to volumetric risk, sensitivity is measured by applying appropriate stress scenarios or using proxy bid-offer spread levels.

Other

The sensitivity for fixed rate loans is calculated by applying a 25% shift in borrower credit spreads.

No stress has been applied to the receivables relating to the Lehman acquisition (refer to Note 18). Due to the uncertainty inherent in legal proceedings, it is not possible to identify reasonable upside and downside stresses on a basis comparable with the other assets analysed.

The sensitivity for credit valuation adjustments is calculated by assessing the impact on the counterparty credit spreads of stressing their credit ratings by two ratings notches.

Notes to the financial statements

For the year ended 31 December 2011 continued

Financial instruments held at amortised cost

This section contains information about assets that are held at amortised cost arising from the Group's retail and wholesale lending including loans and advances, finance leases, repurchase and reverse repurchase agreements and similar secured lending. For more information about the Group's funding and liquidity position, see Liquidity risk and Capital risk on pages 139 to 150 and pages 130 to 138.

Accounting for financial instruments held at amortised cost

Loans and advances to customers and banks, customer accounts, debt securities and the majority of other financial liabilities, are held at amortised cost. That is, the initial fair value (which is normally the amount advanced or borrowed) is adjusted for repayments and the amortisation of coupon, fees and expenses to represent the effective interest rate of the asset or liability.

21 Loans and advances to banks and customers

As at 31 December	2011 £m	2010 £m
Gross loans and advances to banks	47,491	37,847
Less: allowance for impairment	(45)	(48)
Loans and advances to banks	47,446	37,799
Gross loans and advances to customers	442,486	440,326
Less: allowance for impairment	(10,552)	(12,384)
Loans and advances to customers	431,934	427,942

Further disclosures relevant to the Group's loans and advances to banks and customers are included on pages 79 to 120.

22 Finance leases

Accounting for finance leases

The Group applies IAS 17 *Leases* in accounting for finance leases, both where it is the lessor or the lessee. A finance lease is a lease which confers substantially all the risks and rewards of the leased asset on the lessee. Where the Group is the lessor, the leased asset is not held on the balance sheet; instead a finance lease receivable is recognised representing the minimum lease payments receivable under the terms of the lease, discounted at the rate of interest implicit in the lease. Where the Group is the lessee, the leased asset is recognised in property, plant and equipment and a finance lease liability is recognised, representing the minimum lease payments payable under the lease, discounted at the rate of interest implicit in the lease.

Interest income or expense is recognised in interest receivable or payable, allocated to accounting periods to reflect a constant periodic rate of return.

Finance lease receivables

Finance lease receivables are included within loans and advances to customers. The Group specialises in asset-based lending and works with a broad range of international technology, industrial equipment and commercial companies to provide customised finance programmes to assist manufacturers, dealers and distributors of assets.

Investment in finance lease receivables	2011				2010			
	Gross investment in finance lease receivables £m	Future finance income £m	Present value of minimum lease payments receivable £m	Un-guaranteed residual values £m	Gross investment in finance lease receivables £m	Future finance income £m	Present value of minimum lease payments receivable £m	Un-guaranteed residual values £m
Not more than one year	2,977	(437)	2,540	71	3,440	(479)	2,961	60
Over one year but not more than five years	6,333	(934)	5,399	122	7,200	(1,058)	6,142	123
Over five years	1,379	(320)	1,059	395	1,591	(340)	1,251	560
Total	10,689	(1,691)	8,998	588	12,231	(1,877)	10,354	743

The impairment allowance for uncollectable finance lease receivables amounted to £290m at 31 December 2011 (2010: £351m).

22 Finance leases continued

Finance lease liabilities

The Group leases items of property, plant and equipment on terms that meet the definition of finance leases. Finance lease liabilities are included within accruals, deferred income and other liabilities (see Note 28).

As at 31 December 2011, the total future minimum payments under finance leases were £64m (2010: £87m), of which £10m (2010: £16m) was due within one year. As at 31 December 2011, the carrying amount of assets held under finance leases was £28m (2010: £29m).

23 Reclassification of financial assets held for trading

Accounting for the reclassification of financial assets held for trading

In accordance with IAS 39, where the Group no longer intends to trade in financial assets it may transfer them out of the held for trading classification and measure them at amortised cost if they meet the definition of a loan. The initial value used for the purposes of establishing amortised cost is fair value on the date of the transfer.

Prior to 2010, the Group reclassified certain financial assets, originally classified as held for trading that were deemed to be not held for trading purposes to loans and receivables. There were no reclassifications of financial assets during 2011 or 2010.

The carrying value of the securities previously reclassified into loans and receivables has decreased from £8,625m to £7,652m primarily as a result of sales, paydowns and maturities of the underlying securities, and increases due to the reversal of the discount on reclassification. Sales of securities from the 16 December 2008 reclassification totalled £91m (31 December 2010: £390m) and sales of securities from the 25 November 2009 reclassification totalled £482m (31 December 2010: £178m).

The following table provides a summary of the assets reclassified from held for trading to loans and receivables.

	2011		2010	
	Carrying value £m	Fair value £m	Carrying value £m	Fair value £m
As at 31 December				
Trading assets reclassified to loans and receivables				
Reclassification 25 November 2009	7,434	7,045	8,081	7,842
Reclassification 16 December 2008	218	217	544	545
Total financial assets reclassified to loans and receivables	7,652	7,262	8,625	8,387

If the reclassifications had not been made, the Group's income statement for 2011 would have included a net loss on the reclassified trading assets of £152m (2010: loss of 189m). The reclassified financial assets contributed £396m (2010: £359m) to interest income.

24 Reverse repurchase and repurchase agreements including other similar lending and borrowing

Reverse repurchase agreements (and stock borrowing or similar transaction) are a form of secured lending whereby the Group provides a loan or cash collateral in exchange for the transfer of collateral, generally in the form of marketable securities subject to an agreement to transfer the securities back at a fixed price in the future. Repurchase agreements are where the Group obtains such loans or cash collateral, in exchange for the transfer of collateral.

Accounting for reverse repurchase and repurchase agreements including other similar lending and borrowing

The Group purchases (a reverse repurchase agreement) or borrows securities subject to a commitment to resell or return them. The securities are not included in the balance sheet as the Group does not acquire the risks and rewards of ownership. Consideration paid (or cash collateral provided) is accounted for as a loan asset at amortised cost.

The Group may also sell (a repurchase agreement) or lend securities subject to a commitment to repurchase or redeem them. The securities are retained on the balance sheet as the Group retains substantially all the risks and rewards of ownership. Consideration received (or cash collateral provided) is accounted for as a financial liability at amortised cost.

	2011 £m	2010 £m
Assets		
Banks	64,470	104,233
Customers	89,195	101,539
Reverse repurchase agreements and other similar secured lending	153,665	205,772
Liabilities		
Banks	69,544	99,997
Customers	137,748	125,537
Repurchase agreements and other similar secured borrowing	207,292	225,534

Notes to the financial statements

For the year ended 31 December 2011 continued

Fixed assets and investments

This section details the Group's tangible and intangible assets, property plant and equipment and investments, which it utilises to generate profit for the business.

25 Property, plant and equipment

Accounting for property, plant and equipment

The Group applies IAS 16 *Property Plant and Equipment* and IAS 40 *Investment Properties*.

Property, plant and equipment is stated at cost, which includes direct and incremental acquisition costs less accumulated depreciation and provisions for impairment, if required. Subsequent costs are capitalised if these result in the enhancement to the asset.

Depreciation is provided on the depreciable amount of items of property, plant and equipment on a straight-line basis over their estimated useful economic lives. Depreciation rates, methods and the residual values underlying the calculation of depreciation of items of property, plant and equipment are kept under review to take account of any change in circumstances. Following a review in 2011, the depreciation rates for certain categories of fixed assets were revised to reflect their currently expected useful lives. The impact of the change was not material. The Group uses the following annual rates in calculating depreciation:

Annual rates in calculating depreciation	Depreciation rate
Freehold land	Not depreciated
Freehold buildings and long-leasehold property (more than 50 years to run)	2-3.3%
Leasehold property over the remaining life of the lease (less than 50 years to run)	Over the remaining life of the lease
Costs of adaptation of freehold and leasehold property ^a	6-10%
Equipment installed in freehold and leasehold property ^a	6-10%
Computers and similar equipment	17-33%
Fixtures and fittings and other equipment	9-20%

Investment property

The Group initially recognises investment property at cost, and subsequently at their fair value at each balance sheet date reflecting market conditions at the reporting date. Gains and losses on remeasurement are included in the income statement.

Note

a Where leasehold property has a remaining useful life of less than 15 years, costs of adaptation and installed equipment are depreciated over the remaining life of the lease.

Net book value	1,570	2,903	1,616	51	6,140

Property rentals of £94m (2010: £105m) and £61m (2010: £48m) have been included in net investment income and other income respectively and gains on property disposals of £13m (2010: £29m) have been included in administration and general expenses.

The fair value of investment property is determined by reference to current market prices for similar properties, adjusted as necessary for condition and location, or by reference to recent transactions updated to reflect current economic conditions. Discounted cash flow techniques may be employed to calculate fair value where there have been no recent transactions, using current external market inputs such as market rents and interest rates. Valuations are carried out by management with the support of appropriately qualified independent valuers.

Notes to the financial statements

For the year ended 31 December 2011 continued

26 Goodwill and intangible assets

Accounting for goodwill and other intangible assets

Goodwill

The carrying value of goodwill is determined in accordance with IFRS 3 *Business Combinations* and IAS 36 *Impairment of Assets*.

Goodwill arises on the acquisition of subsidiaries, associates and joint ventures, and represents the excess of the fair value of the purchase consideration over the fair value of the Group's share of the assets acquired and the liabilities and contingent liabilities assumed on the date of the acquisition.

Goodwill is reviewed annually for impairment, or more frequently when there are indications that impairment may have occurred. The test involves comparing the carrying value of goodwill with the present value of the pre-tax cash flows, discounted at a rate of interest that reflects the inherent risks, of the cash generating unit to which the goodwill relates, or the cash generating unit's fair value if this is higher.

Intangible assets

The accounting standard that the Group applies in accounting for intangible assets other than goodwill is IAS 38 *Intangible Assets*.

Intangible assets include brands, customer lists, licences and other contracts, core deposit intangibles and mortgage servicing rights. They are initially recognised when they are separable or arise from contractual or other legal rights, the cost can be measured reliably and, in the case of intangible assets not acquired in a business combination, where it is probable that future economic benefits attributable to the assets will flow from their use.

Intangible assets are reviewed for impairment when there are indications that impairment may have incurred.

They are stated at cost (which is, in the case of assets acquired in a business combination, the acquisition date fair value) less amortisation and provisions for impairment, if any, and are amortised over their useful lives in a manner that reflects the pattern to which they contribute to future cash flows, generally over 4-25 years.

26 Goodwill and intangible assets continued

Goodwill

Goodwill is allocated to business operations according to business segments as follows:

	2011 £m	2010 £m
UK RBB	3,145	3,148
Europe RBB	64	505
Africa RBB	1,078	1,307
Barclaycard	505	585
Barclays Capital	102	133
Barclays Corporate	20	150
Barclays Wealth	391	391
Total net book value of goodwill	5,305	6,219

Impairment testing of goodwill

Total impairment charges of £597m (2010: £243m charge relating to Barclays Bank Russia) have been recognised during the year as the recoverable amount of goodwill in FirstPlus and Spain was not supported based on the value-in-use calculations. The impairment charge of £47m (2010: nil) in respect of all of the goodwill held by Barclaycard arising from the acquisition of FirstPlus reflected the continued run-off of the loan portfolio and the impact of the payment protection insurance redress. Further details on the impairment of Spain goodwill are set out below.

Key assumptions

The key assumptions used for impairment testing are set out below for each significant goodwill balance. Other goodwill of £1,133m (2010: £1,253m) was allocated to multiple cash-generating units which are not considered individually significant.

UK RBB

At 31 December 2011, goodwill relating to Woolwich was £3,130m (2010: £3,130m) of the total UK RBB balance. The recoverable amount of Woolwich has been determined using cash flow predictions based on financial budgets approved by management and covering a five year period, with a terminal growth rate of 3% (2010: 2%) applied thereafter. The forecast cash flows have been discounted at a pre-tax rate of 13% (2010: 13%). Based on these assumptions, the recoverable amount exceeded the carrying amount including goodwill by £8.7bn (2010: £4.0bn). A one percentage point change in the discount rate or the terminal growth rate would reduce the recoverable amount by £1.4bn (2010: £1.0bn) and £0.9bn (2010: £0.8bn) respectively. A reduction in the forecast cash flows of 10% per annum would reduce the recoverable amount by £1.5bn (2010: £1.1bn).

Africa RBB

At 31 December 2011, goodwill relating to the Absa Group was £1,042m (2010: £1,271m) of the total Africa RBB balance. The recoverable amount of the Absa Group has been determined using cash flow predictions based on financial budgets approved by management and covering a five year period, with a terminal growth rate of 6% (2010: 6%) applied thereafter. The forecast cash flows have been discounted at a pre-tax rate of 14% (2010: 14%). The recoverable amount calculated based on value in use exceeded the carrying amount including goodwill by £4.7bn (2010: £5.0bn). A one percentage point change in the discount rate or the terminal growth rate would reduce the recoverable amount by £0.9bn (2010: £1.0bn) and £0.7bn (2010: £0.8bn) respectively. A reduction in the forecast cash flows of 10% per annum would reduce the recoverable amount by £0.8bn (2010: £0.9bn).

Spain

At 31 December 2011, Barclays recognised an impairment charge of £550m (2010: nil) in respect of the whole goodwill balance held by Barclays Corporate (£123m) and Europe RBB (£427m) arising from the acquisitions of the Iberia Woolwich business in 2000 and Zaragoza in 2003. The cashflow forecasts were reassessed during the fourth quarter as a result of uncertainty in economic conditions in Spain and increased risk associated with the future cash flows. The pre-tax discount rate was increased to 16% (2010: 12%) and the long term growth rate was reduced to 1% (2010: 2%). Based on these assumptions the value-in-use was no longer able to support the recognition of the goodwill and it was fully impaired as at 31 December 2011.

Critical accounting estimates and judgements

Goodwill

Testing goodwill for impairment involves a significant amount of estimation. This includes the identification of independent cash generating units and the allocation of goodwill to these units based on which units are expected to benefit from the acquisition. The allocation is reviewed following business reorganisation. Cash flow projections necessarily take into account changes in the market in which a business operates including the level of growth, competitive activity and the impacts of regulatory change. Determining both the expected pre-tax cash flows and the risk adjusted interest rate appropriate to the operating unit require the exercise of judgement. The estimation of pre-tax cash flows is sensitive to the periods for which detailed forecasts are available and to assumptions regarding the long-term sustainable cash flows.

Other intangible assets

Determining the estimated useful lives of intangible assets (such as those arising from contractual relationships) requires an analysis of circumstances and judgement. The assessment of whether an asset is exhibiting indicators of impairment as well as the calculation of impairment, which requires the estimation of future cash flows and fair values less costs to sell, also requires the preparation of cash flow forecasts and fair values for assets that may not be regularly bought and sold. The most significant amounts of intangible assets relate to Absa and Lehman Brothers North American businesses.

Notes to the financial statements

For the year ended 31 December 2011 continued

27 Operating leases

Accounting for operating leases

The Group applies IAS 17 *Leases*, for operating leases. An operating lease is a lease where substantially all of the risks and rewards of the leased assets remain with the lessor. Where the Group is the lessor, lease income is recognised on a straight-line basis over the period of the lease unless another systematic basis is more appropriate. The Group holds the leased assets on balance sheet within property, plant and equipment.

Where the Group is the lessee, rentals payable are recognised as an expense in the income statement on a straight-line basis over the lease term unless another systematic basis is more appropriate.

Operating lease receivables

The Group acts as lessor, whereby items of plant and equipment are purchased and then leased to third parties under arrangements qualifying as operating leases. The future minimum lease payments expected to be received under non-cancellable operating leases as at 31 December 2011 was £14m (2010: £43m).

Operating lease commitments

The Group leases various offices, branches and other premises under non-cancellable operating lease arrangements. With such operating lease arrangements, the asset is kept on the lessor's balance sheet and the Group reports the future minimum lease payments as an expense over the lease term. The leases have various terms, escalation and renewal rights. There are no contingent rents payable.

Operating lease rentals of £659m (2010: £637m) have been included in administration and general expenses.

The future minimum lease payments by the Group under non-cancellable operating leases are as follows:

	2011		2010	
	Property £m	Equipment £m	Property £m	Equipment £m
Not more than one year	585	12	628	7
Over one year but not more than five years	1,673	2	1,477	2
Over five years	2,830	–	3,146	–
Total	5,088	14	5,251	9

Total future minimum sublease payments to be received under non-cancellable subleases as at 31 December 2011 was £121m (2010: £111m).

Accruals, provisions and contingent liabilities

The section describes the Group's accruals, provisions and contingent liabilities arising from its banking and insurance businesses. Provisions are recognised for present obligations arising as consequences of past events where it is probable that a transfer of economic benefit will be necessary to settle the obligation, and it can be reliably estimated. Contingent liabilities reflect potential liabilities that are not recognised on the balance sheet.

28 Accruals, deferred income and other liabilities

	2011 £m	2010 £m
Accruals and deferred income	4,959	5,539
Other creditors	5,171	5,198
Obligations under finance leases (see Note 22)	64	87
Insurance contract liabilities, including unit-linked liabilities	2,386	2,409
Accruals, deferred income and other liabilities	12,580	13,233

Insurance liabilities relate principally to the Group's long-term business. Insurance contract liabilities associated with the Group's short-term non-life business are £118m (2010: £131m). The maximum amounts payable under all of the Group's insurance products, ignoring the probability of insured events occurring and the contribution from investments backing the insurance policies were £104bn (2010: £114bn)^a or £82bn (2010: £95bn)^a after reinsurance. Of this insured risk £89bn (2010: £99bn)^a or £69bn (2010: £82bn)^a after reinsurances was concentrated in short-term insurance contracts in Africa.

The impact to the income statement and equity under a reasonably possible change in the assumptions used to calculate the insurance liabilities would be £8m (2010: £12m).

Accounting for insurance contracts

The Group applies IFRS 4 *Insurance Contracts* to its insurance contracts. An insurance contract is a contract that protects a third party against a loss from non-financial risk. Some wealth management and other products, such as life assurance contracts, combine investment and insurance features; these are treated as insurance contracts when they pay benefits that are at least 5% more than they would pay if the insured event does not occur.

Insurance liabilities include current best estimates of future contractual cash flows, claims handling, and administration costs in respect of claims. Liability adequacy tests are performed at each balance sheet date to ensure the adequacy of contract liabilities. Where a deficiency is highlighted by the tests, insurance liabilities are increased, any deficiency being recognised in the income statement.

Insurance premium revenue is recognised in the income statement in the period earned, net of reinsurance premiums payable, in net premiums from insurance contracts. Increases and decreases in insurance liabilities are recognised in the income statement in net claims and benefits on insurance contracts.

The Financial Services Compensation Scheme (FSCS)

The FSCS is the UK's compensation fund for customers of authorised financial services firms that are unable to pay claims. The FSCS raises levies on all UK deposit taking institutions. Previously compensation has been paid out by loan facilities provided by HM Treasury to FSCS in support of FSCS's obligations to the depositors of banks declared in default. The outstanding loan facilities, totalling approximately £18.5bn, are to be reviewed from 1 April 2012 and the ongoing terms are still to be agreed with HM Treasury. While it is anticipated that the substantial majority of these loans will be repaid wholly from recoveries from the institutions concerned, there is the risk of a shortfall, such that the FSCS may place additional levies on all FSCS participants. Barclays has included an accrual of £58m in other liabilities as at 31 December 2011 (2010: £63m) in respect of levies raised by the FSCS, based on the indicative costs published by the FSCS.

Note

a Comparatives have been restated to include Motor, Liability and Engineering insured exposures within ABSA Group Ltd.

Notes to the financial statements

For the year ended 31 December 2011 continued

29 Provisions

Accounting for provisions

The Group applies IAS 37 *Provisions, Contingent Liabilities and Contingent Assets* in accounting for non-financial liabilities.

Provisions are recognised for present obligations arising as consequences of past events where it is more likely than not that a transfer of economic resources will be necessary to settle the obligation, which can be reliably estimated. Provision is made for the anticipated cost of restructuring, including redundancy costs when an obligation exists, i.e. when the Group has a detailed formal plan for restructuring a business and has raised valid expectations in those affected by the restructuring by announcing its main features or starting to implement the plan. Provision is made for undrawn loan commitments if it is probable that the facility will be drawn and result in the recognition of an asset at an amount less than the amount advanced.

Provisions expected to be recovered or settled within no more than 12 months after 31 December 2011 were £1,260m (2010: £658m). Provisions relating to taxation are included in current and deferred tax disclosures on pages 213 to 216.

As at 31 December 2010	74	177	229	–	151	316	947

Critical accounting estimates and judgements

On 20 April 2011, the judicial review proceedings brought by the British Bankers' Association in October 2010 against the FSA and the Financial Ombudsman Service regarding the assessment and redress of PPI complaints were dismissed. On 9 May 2011, Barclays announced that it would not be participating in any application for permission to appeal against the High Court judgment and that Barclays had agreed with the FSA that it would process all on-hold and any new complaints from customers about PPI policies that they hold. Barclays also announced that, as a goodwill gesture, it would pay out compensation to customers who had PPI complaints put on hold during the judicial review. Barclays took a provision of £1bn in the second quarter of 2011 to cover the cost of future redress and administration.

As at 31 December 2011, following payments made during the year, the provision was £565m, and represents management's best estimate of the remaining anticipated costs of related customer redress, including administration expenses. The provision requires significant judgement by management in determining appropriate assumptions. The key assumptions include:

- Customer claims – the volume and timing of actual customer claims. The assumption is based upon recent experience of claims received and has factored in a component for the amount of duplicate or non-PPI eligible requests that have been submitted. In addition, expectations in relation to claims management companies and other such activity have been considered.
- Uphold rates – the percentage of claims that are upheld as being valid upon review. The rate considers recent experience and excludes "gestures of goodwill" paid without challenge by the Group for claims received during the Judicial Review period and not processed until the Review was completed.
- Average payment – this is the expected average payment to customers for upheld claims. The assumption is based upon recent experience and the calculation of payment requirements as defined by the agreements and the FSA Policy Paper.

29 Provisions continued

There are a large number of inter-dependent assumptions under-pinning the PPI provision. Many of those assumptions remain highly subjective, and trends have been difficult to ascertain across all portfolios. Therefore, it is possible that the eventual outcome could differ from current management estimates, resulting in a material change to the amounts provided in the 2011 financial statements.

When considering the key assumptions independently, the most significant driver of the provision is complaint flow. If the level of complaints were 10% higher (lower) than the estimated level for all policies, assuming no change in other assumptions, then the provision would have increased (decreased) by approximately £100m.

The Group will re-evaluate the assumptions underlying its analysis at each reporting date as more information becomes available.

30 Contingent liabilities and commitments

Accounting for contingent liabilities and commitments

Contingent liabilities are possible obligations whose existence will be confirmed only by uncertain future events, and present obligations where the transfer of economic resources is uncertain or cannot be reliably measured, are not recognised but are disclosed unless they are remote.

The following table summarises the nominal principal amount of contingent liabilities and commitments which are not recorded on balance sheet:

	2011 £m	2010 £m
Securities lending arrangements	35,996	27,672
Guarantees and letters of credit pledged as collateral security	14,181	13,783
Performance guarantees, acceptances and endorsements	8,706	9,175
Contingent liabilities	58,883	50,630
Documentary credits and other short-term trade related transactions	1,358	1,194
Standby facilities, credit lines and other commitments	240,282	222,963

In common with other banks, the Group conducts business involving acceptances, performance bonds and indemnities. The majority of these facilities are offset by corresponding obligations of third parties.

Contingent liabilities

Up to the disposal of Barclays Global Investors on 1 December 2009, the Group facilitated securities lending arrangements for its managed investment funds whereby securities held by funds under management were lent to third parties. Borrowers provided cash or investment grade assets as collateral equal to 100% of the market value of the securities lent plus a margin of 2% -10%. The Group agreed with BlackRock, Inc. to continue to provide indemnities to support these arrangements for three years following the disposal. As at 31 December 2011 the fair value of collateral held was £37,072m (2010: £28,465m) compared to the fair value of stock lent of £35,996m (2010: £27,672m).

Guarantees and letters of credit are given as security to support the performance of a customer to third parties. In addition, the Group issues guarantees on its own behalf. The main types of guarantees provided are: financial guarantees given to banks and financial institutions on behalf of customers to secure loans; overdrafts; and other banking facilities, including stock borrowing indemnities and standby letters of credit. Other guarantees provided include performance guarantees, advance payment guarantees, tender guarantees, guarantees to Her Majesty's Revenue and Customs and retention guarantees. As the Group will only be required to meet these obligations in the event of the customer's default, the cash requirements of these instruments are expected to be considerably below their nominal amounts.

Performance guarantees are generally, short-term commitments to third parties which are not directly dependent on the customer's creditworthiness. An acceptance is an undertaking by a bank to pay a bill of exchange drawn on a customer. The Group expects most acceptances to be presented, but reimbursement by the customer is normally immediate. Endorsements are residual liabilities of the Group in respect of bills of exchange, which have been paid and subsequently rediscounted.

Documentary credits and other short-term trade related transactions

Documentary credits commit the Group to make payments to third parties, on production of documents, which are usually reimbursed immediately by customers.

Standby facilities, credit lines and other commitments

Standby facilities, credit lines and other commitments to lend are agreements to lend to a customer in the future, subject to certain conditions. Such commitments are either made for a fixed period, or have no specific maturity but are cancellable by the lender subject to notice requirements.

Notes to the financial statements

For the year ended 31 December 2011 continued

30 Contingent liabilities and commitments continued

Barclays Capital US Mortgage Activities

Barclays activities within the US residential mortgage sector during the period of 2005 through 2008 included: sponsoring and underwriting of approximately US\$39bn of private-label securitisations; underwriting of approximately US\$34bn of other private-label securitisations; sales of approximately US\$150m of loans to government sponsored enterprises (GSEs); and sales of approximately US\$3bn of loans to others. In addition, Barclays sold approximately US\$4bn of loans to Protium in 2009. As a result of Barclays acquisition of Protium in April 2011, Barclays reacquired the loans previously sold to Protium. Some of the loans sold by Barclays were originated by a Barclays subsidiary. Barclays also performed servicing activities through its US residential mortgage servicing business which Barclays acquired in Q4 2006 and subsequently sold in Q3 2010.

In connection with Barclays loan sales and some of its sponsored private-label securitisations, Barclays made certain loan level representations and warranties (R&Ws) generally relating to the underlying borrower, property and/or mortgage documentation. Under certain circumstances, Barclays may be required to repurchase the related loans or make other payments related to such loans if the R&Ws are breached. As at 31 December 2011, Barclays R&Ws in respect of approximately US\$1bn of loans sold to others (which excludes the reacquired loans previously sold to Protium and loans sold to GSEs) had expired. The R&Ws with respect to the balance of the loans sold to others were not subject to expiration provisions. However, such loans were generally sold at significant discounts and contained more limited R&Ws than loans sold to GSEs. Third party originators provided loan level R&Ws directly to the securitisation trusts for approximately US\$34bn of the US\$39bn in Barclays sponsored securitisations. Barclays or a subsidiary provided loan level R&Ws to the securitisation trusts for approximately US\$5bn of the Barclays sponsored securitisations. R&Ws made by Barclays in respect of such securitised loans, and the loans sold by Barclays to GSEs, are not subject to expiration provisions. Total unresolved repurchase requests associated with all loans sold to others and private-label activities were US\$21m at 31 December 2011. Current provisions are adequate to cover estimated losses associated with outstanding repurchase claims. However, based upon a large number of defaults occurring in US residential mortgages, there is a potential for additional claims for repurchases.

Claims against Barclays as an underwriter of RMBS offerings have been brought in certain civil actions (see page 249). Additionally, Barclays has received inquiries from various regulatory and governmental authorities regarding its mortgage-related activities and is cooperating with such inquiries. It is not practicable to provide an estimate of the financial impact of the potential exposure in relation to Barclays Capital US Mortgage activities.

31 Legal Proceedings

Lehman Brothers Holdings Inc.

On 15 September 2009, motions were filed in the United States Bankruptcy Court for the Southern District of New York (the Court) by Lehman Brothers Holdings Inc. (LBHI), the SIPA Trustee for Lehman Brothers Inc. (the Trustee) and the Official Committee of Unsecured Creditors of Lehman Brothers Holdings Inc. (the Committee). All three motions challenged certain aspects of the transaction pursuant to which BCI and other companies in the Group acquired most of the assets of Lehman Brothers Inc. (LBI) in September 2008 and the court order approving such sale. The claimants were seeking an order voiding the transfer of certain assets to BCI; requiring BCI to return to the LBI estate alleged excess value BCI received; and declaring that BCI is not entitled to certain assets that it claims pursuant to the sale documents and order approving the sale (the Rule 60 Claims). On 16 November 2009, LBHI, the Trustee and the Committee filed separate complaints in the Court asserting claims against BCI based on the same underlying allegations as the pending motions and seeking relief similar to that which is requested in the motions. On 29 January 2010, BCI filed its response to the motions and also filed a motion seeking delivery of certain assets that LBHI and LBI have failed to deliver as required by the sale documents and the court order approving the sale (together with the Trustee's competing claims to those assets, the Contract Claims). Approximately US\$4.2bn (£2.7bn) of the assets acquired as part of the acquisition had not been received by 31 December 2011, approximately US\$3.0bn (£2.0bn) of which were recognised as part of the accounting for the acquisition and are included in the balance sheet as at 31 December 2011. This results in an effective provision of US\$1.2bn (£0.8bn) against the uncertainty inherent in the litigation.

On 22 February 2011, the Court issued its Opinion in relation to these matters, rejecting the Rule 60 Claims and deciding some of the Contract Claims in the Trustee's favour and some in favour of BCI. On 15 July 2011, the Court entered final Orders implementing its Opinion. BCI and the Trustee have each filed a notice of appeal from the Court's adverse rulings on the Contract Claims. LBHI and the Committee have withdrawn their notices of appeal from the Court's ruling on the Rule 60 Claims, rendering the Court's Order on the Rule 60 Claims final.

If the final Orders relating to the Contract Claims were to be unaffected by future proceedings, Barclays estimates that after taking into account the effective provision of US\$1.2bn (£0.8bn), its loss would be approximately US\$4.3bn (£2.8bn). Any such loss, however, is not considered probable and Barclays is satisfied with the current level of provision.

In addition, LBHI had been pursuing a claim for approximately US\$500m relating to bonuses that BCI was allegedly obligated to pay to former Lehman employees. On 14 September 2011, the Court issued a decision dismissing that claim and entered a final Order to that effect on 21 September 2011. LBHI has stated that it will not appeal that decision, rendering the Order dismissing that claim final.

31 Legal Proceedings continued

American Depositary Shares

Barclays Bank PLC, Barclays PLC and various current and former members of Barclays PLC's Board of Directors have been named as defendants in five proposed securities class actions (which have been consolidated) pending in the United States District Court for the Southern District of New York (the Court). The consolidated amended complaint, dated 12 February 2010, alleges that the registration statements relating to American Depositary Shares representing Preferred Stock, Series 2, 3, 4 and 5 (the ADS) offered by Barclays Bank PLC at various times between 2006 and 2008 contained misstatements and omissions concerning (amongst other things) Barclays portfolio of mortgage-related (including US subprime-related) securities, Barclays exposure to mortgage and credit market risk and Barclays financial condition. The consolidated amended complaint asserts claims under Sections 11, 12(a)(2) and 15 of the Securities Act of 1933. On 5 January 2011, the Court issued an order and, on 7 January 2011, judgment was entered, granting the defendants' motion to dismiss the complaint in its entirety and closing the case. On 4 February 2011, the plaintiffs filed a motion asking the Court to reconsider in part its dismissal order. On 31 May 2011, the Court denied in full the plaintiffs' motion for reconsideration. The plaintiffs have appealed both decisions (the grant of the defendants' motion to dismiss and the denial of the plaintiffs' motion for reconsideration) to the United States Court of Appeals for the Second Circuit.

Barclays considers that these ADS-related claims against it are without merit and is defending them vigorously. It is not practicable to estimate Barclays possible loss in relation to these claims or any effect that they might have upon operating results in any particular financial period.

US Federal Housing Finance Agency and Other Residential Mortgage-Backed Securities Litigation

The United States Federal Housing Finance Agency (FHFA), acting for two US government sponsored enterprises, Fannie Mae and Freddie Mac (collectively, the GSEs), filed lawsuits against 17 financial institutions in connection with the GSEs' purchases of residential mortgage-backed securities (RMBS). The lawsuits allege, among other things, that the RMBS offering materials contained materially false and misleading statements and/or omissions. Barclays Bank PLC and/or certain of its affiliates or former employees are named in two of these lawsuits, relating to sales between 2005 and 2007 of RMBS, in which Barclays Capital Inc. was lead or co-lead underwriter.

Both complaints demand, among other things: rescission and recovery of the consideration paid for the RMBS; and recovery for the GSEs' alleged monetary losses arising out of their ownership of the RMBS. The complaints are similar to other civil actions filed against Barclays Bank PLC and/or certain of its affiliates by other plaintiffs, including the Federal Home Loan Bank of Seattle, Federal Home Loan Bank of Boston, Federal Home Loan Bank of Chicago, Cambridge Place Investment Management, Inc., HSH Nordbank AG (and affiliates) and Stichting Pensioenfond ABP, relating to their purchases of RMBS. Barclays considers that the claims against it are without merit and intends to defend them vigorously.

The original amount of RMBS related to the claims against Barclays in these cases totaled approximately US\$6.8bn, of which approximately US\$2.0bn was outstanding as at 31 December 2011. Cumulative losses reported on these RMBS as at 31 December 2011 were approximately US\$0.1bn. If Barclays were to lose these cases it could incur a loss of up to the outstanding amount of the RMBS at the time of judgment (taking into account further principal payments after 31 December 2011) plus any cumulative losses on the RMBS at such time and any interest, fees and costs, less the market value of the RMBS at such time. Barclays has estimated the total market value of the RMBS as at 31 December 2011 to be approximately US\$1.1bn. Barclays may be entitled to indemnification for a portion of any losses.

Devonshire Trust

On 13 January 2009, Barclays commenced an action in the Ontario Superior Court seeking an order that its early terminations earlier that day of two credit default swaps under an ISDA Master Agreement with the Devonshire Trust (Devonshire), an asset-backed commercial paper conduit trust, were valid. On the same day, Devonshire purported to terminate the swaps on the ground that Barclays had failed to provide liquidity support to Devonshire's commercial paper when required to do so. On 7 September 2011, the court ruled that Barclays early terminations were invalid, Devonshire's early terminations were valid and, consequently, Devonshire was entitled to receive back from Barclays cash collateral of approximately C\$533m together with accrued interest thereon. Barclays is appealing the court's decision. If the court's decision were to be unaffected by future proceedings, Barclays estimates that its loss would be approximately C\$500m, less any impairment provisions taken by Barclays for this matter.

Other

Barclays is engaged in various other legal proceedings both in the United Kingdom and a number of overseas jurisdictions, including the United States, involving claims by and against it which arise in the ordinary course of business, including debt collection, consumer claims and contractual disputes. Barclays does not expect the ultimate resolution of any of these proceedings to which Barclays is party to have a material adverse effect on its results of operations, cash flows or the financial position of the Group and Barclays has not disclosed the contingent liabilities associated with these claims either because they cannot reliably be estimated or because such disclosure could be prejudicial to the conduct of the claims. Provisions have been recognised for those cases where Barclays is able reliably to estimate the probable loss where the probable loss is not de minimis.

In addition, the Bank has been named as a defendant in a number of lawsuits, including class actions, filed in US federal courts involving claims by purported classes of purchasers and sellers of LIBOR-based derivative products or Eurodollar futures or option contracts between 2006 and 2009; further details are provided on the following page.

Notes to the financial statements

For the year ended 31 December 2011 continued

32 Competition and regulatory matters

This note highlights some of the key competition and regulatory challenges facing Barclays, many of which are beyond our control. The extent of the impact of these matters on Barclays cannot always be predicted but may materially impact our businesses and earnings.

Regulatory change

The scale of regulatory change remains challenging with a significant tightening of regulation and changes to regulatory structures globally, especially for banks that are deemed to be of systemic importance. Concurrently, there is continuing political and regulatory scrutiny of the operation of the banking and consumer credit industries which, in some cases, is leading to increased or changing regulation which is likely to have a significant effect on the industry. Examples include Basel 3, the emerging proposals on bank resolution regimes and proposals relating to over-the-counter derivatives clearing and global systemically important banks.

In the UK, the FSA's current responsibilities are to be reallocated between the Prudential Regulatory Authority (a subsidiary of the Bank of England) and a new Financial Conduct Authority. In addition, the Independent Commission on Banking (the ICB) completed its review of the UK banking system and published its final report on 12 September 2011. The ICB recommended (amongst other things) that: (i) the UK and EEA retail banking activities of a UK bank or building society should be placed in a legally distinct, operationally separate and economically independent entity (so-called "ring-fencing"); and (ii) the loss-absorbing capacity of ring-fenced banks and UK-headquartered global systemically important banks (such as Barclays Bank PLC) should be increased to levels higher than the Basel 3 proposals. The UK Government published its response to the ICB recommendations in December 2011 and indicated that primary and secondary legislation relating to the proposed ring-fence will be completed by May 2015, with UK banks and building societies expected to be compliant as soon as practicable thereafter, and the requirements relating to increased loss-absorbing capacity of ring-fenced banks and UK-headquartered global systemically important banks will be applicable from 1 January 2019.

The US Dodd-Frank Wall Street Reform and Consumer Protection Act contains far reaching regulatory reform. The full impact on Barclays businesses and markets will not be known until the principal implementing rules are adopted in final form by governmental authorities, a process which is underway and which will take effect over several years.

Payment Protection Insurance (PPI)

See Note 29.

Interchange

The Office of Fair Trading, as well as other competition authorities elsewhere in Europe, continues to investigate Visa and MasterCard credit and debit interchange rates. These investigations may have an impact on the consumer credit industry as well as having the potential for the imposition of fines. Timing is uncertain but outcomes may be known within the next 2-4 years.

London Interbank Offered Rate (LIBOR)

The FSA, the US Commodity Futures Trading Commission, the SEC, the US Department of Justice Fraud Section of the Criminal Division and Antitrust Division and the European Commission are amongst various authorities conducting investigations into submissions made by Barclays and other panel members to the bodies that set various interbank offered rates. Barclays is co-operating in the relevant investigations and is keeping regulators informed. In addition, Barclays has been named as a defendant in a number of class action lawsuits filed in US federal courts involving claims by purported classes of purchasers and sellers of LIBOR-based derivative products or Eurodollar futures or options contracts between 2006 and 2009. The complaints are substantially similar and allege, amongst other things, that Barclays and other banks individually and collectively violated US antitrust and commodities laws and state common law by suppressing LIBOR rates during the relevant period. Barclays has been informed by certain of the authorities investigating these matters that proceedings against Barclays may be recommended with respect to some aspects of the matters under investigation, and Barclays is engaged in discussions with those authorities about potential resolution of those aspects. It is not currently possible to predict the ultimate resolution of the issues covered by the various investigations and lawsuits, including the timing and the scale of the potential impact on the Group of any resolution.

Capital instruments, equity and reserves

This section details information about the Group's loan capital and shareholders equity including issued share capital, retained earnings, other equity balances and interests of minority shareholders in our subsidiary entities (non-controlling interests). For more information on capital and the management of capital and how the Group maintains sufficient capital to meet our regulatory requirements see pages 130 to 138.

33 Subordinated liabilities

Accounting for subordinated debt

Subordinated debt is measured at amortised cost using the effective interest method under IAS 39. See Net interest income (Note 3).

Subordinated liabilities include accrued interest and comprise dated and undated loan capital as follows:

	2011 £m	2010 £m
Undated loan capital	6,741	9,094
Dated loan capital	18,129	19,405
Total subordinated liabilities	24,870	28,499

None of the Group's loan capital is secured. Regulatory capital differs from the amounts recorded in the balance sheet due to FSA requirements relating to: capital eligibility criteria; amortisation of principal in the final five years to maturity; and the exclusion of the impact of fair value hedging.

Undated loan capital	Initial call date	Subordinated liability per balance sheet		Regulatory capital

Notes to the financial statements

For the year ended 31 December 2011 continued

33 Subordinated liabilities continued

Undated loan capital

Undated loan capital is issued by the Bank and its subsidiaries for the development and expansion of their business and to strengthen their capital bases. The principal terms of the undated loan capital are described below:

Subordination

All undated loan capital ranks behind the claims against the bank of depositors and other unsecured unsubordinated creditors and holders of dated loan capital in the following order: Junior Undated Floating Rate Notes; other issues of Undated Notes, Bonds and Loans-ranking pari passu with each other; followed by TONs and RCLs-ranking pari passu with each other.

Interest

All undated loan capital bears a fixed rate of interest until the initial call date, with the exception of the 9% Bonds which are fixed for the life of the issue, and the Junior and Series 3 Undated Notes which are floating rate.

After the initial call date, in the event that they are not redeemed, the 6.875%, 6.375%, 7.125%, 6.125% Undated Notes, the 9.25% Bonds and the 6.140% Perpetual Notes will bear interest at rates fixed periodically in advance for five year periods based on market rates. All other undated loan capital except the two floating rate Undated Notes will bear interest, and the two floating rate Undated Notes currently bear interest, at rates fixed periodically in advance based on London interbank rates.

Payment of interest

Barclays Bank PLC is not obliged to make a payment of interest on its Undated Notes, Bonds and Loans excluding the 7.7% Undated Notes, 8.25% Undated Notes, 9.25% Bonds and 6.140% Perpetual Notes if, in the preceding six months, a dividend has not been declared or paid on any class of shares of Barclays PLC or, in certain cases, any class of preference shares of the Bank. The Bank is not obliged to make a payment of interest on its 9.25% Perpetual Subordinated Bonds if, in the immediately preceding 12-months' interest period, a dividend has not been paid on any class of its share capital. Interest not so paid becomes payable in each case if such a dividend is subsequently paid or in certain other circumstances. During the year, the Bank declared and paid dividends on its ordinary shares and on all classes of preference shares.

No payment of principal or any interest may be made unless the Bank satisfies a specified solvency test.

The Bank may elect to defer any payment of interest on the 7.7% Undated Notes and 8.25% Undated Notes. Until such time as any deferred interest has been paid in full, neither the Bank nor Barclays PLC may declare or pay a dividend, subject to certain exceptions, on any of its ordinary shares, preference shares, or other share capital or satisfy any payments of interest or coupons on certain other junior obligations.

The Issuer and the Bank may elect to defer any payment of interest on the 6.140% Perpetual Notes. However, any deferred interest will automatically become immediately due and payable on the earlier of: (i) the date on which any dividend or other distribution or interest or other payment is made in respect of any pari passu or any junior obligations or on which any pari passu or any junior obligations are purchased, (ii) the date of redemption or purchase of the 6.140% Perpetual Notes and (iii) certain other events including bankruptcy, liquidation or winding up of the Issuer or the Bank.

The Bank may elect to defer any payment of interest on the RCLs. Any such deferred payment of interest must be paid on the earlier of: (i) the date of redemption of the RCLs, (ii) the coupon payment date falling on or nearest to the tenth anniversary of the date of deferral of such payment, and (iii) in respect of the 14% RCLs only, substitution. Whilst such deferral is continuing, neither the Bank nor Barclays PLC may declare or pay a dividend, subject to certain exceptions, on any of its ordinary shares or preference shares.

The Bank may elect to defer any payment of interest on the TONs if it determines that it is, or such payment would result in it being, in non-compliance with capital adequacy requirements and policies of the FSA. Any such deferred payment of interest will only be payable on a redemption of the TONs. Until such time as the Bank next makes a payment of interest on the TONs, neither the Bank nor Barclays PLC may (i) declare or pay a dividend, subject to certain exceptions, on any of their respective ordinary shares or Preference Shares, or make payments of interest in respect of the Bank's Reserve Capital Instruments and (ii) certain restrictions on the redemption, purchase or reduction of their respective share capital and certain other securities also apply.

Repayment

All undated loan capital is repayable, at the option of the Bank generally in whole at the initial call date and on any subsequent coupon or interest payment date or in the case of the 6.875%, 6.375%, 7.125%, 6.125% Undated Notes, the 9.25% Bonds and the 6.140% Perpetual Notes on any fifth anniversary after the initial call date. In addition, each issue of undated loan capital is repayable, at the option of the Bank, in whole for certain tax reasons, either at any time, or on an interest payment date. There are no events of default except non-payment of principal or mandatory interest. Any repayments require the prior notification to the FSA.

All issues of undated loan capital have been made in the Euro currency market and/or under Rule 144A, and no issues have been registered under the US Securities Act of 1933.

All issues of undated subordinated liabilities are non-convertible.

Notes to the financial statements

For the year ended 31 December 2011 continued

33 Subordinated liabilities continued

Dated loan capital

Dated loan capital is issued by the Bank and respective subsidiaries for the development and expansion of their business and to strengthen their respective capital bases. The principal terms of the dated loan capital are described below:

Subordination

All dated loan capital ranks behind the claims against the bank of depositors and other unsecured unsubordinated creditors but before the claims of the undated loan capital and the holders of their equity. The dated loan capital issued by subsidiaries, are similarly subordinated.

Interest

Interest on the floating rate Notes are fixed periodically in advance, based on the related interbank or local central bank rates.

All other non-convertible Notes except the 10.125% Subordinated Notes 2017 are generally fixed interest for the life of the issue, but some are reset to a floating rate after a fixed period, with varying interest rate terms. The 10.125% Subordinated Notes 2017, if not called in 2012, will bear interest at a rate fixed in advance for a further period of 5 years.

The 5.14% Lower Tier 2 Notes were registered under the US Securities Act of 1933. All other issues of dated loan capital have been made in the Euro currency market, local markets and/or under Rule 144A.

Repayment

Those Notes with a call date are repayable at the option of the issuer, on conditions governing the respective debt obligations, some in whole or in part, and some only in whole. The remaining dated loan capital outstanding at 31 December 2011 is redeemable only on maturity, subject in particular cases, to provisions allowing an early redemption in the event of certain changes in tax law or, in the case of Barclays Botswana and Barclays Zambia, to certain changes in legislation or regulations.

Any repayments prior to maturity require, in the case of the Bank, the prior notification to the FSA, or in the case of the overseas issues, the approval of the local regulator for that jurisdiction.

There are no committed facilities in existence at the balance sheet date which permit the refinancing of debt beyond the date of maturity.

The other capital issued by Barclays Spain, Ghana, Kenya, Botswana and Zambia includes amounts of £26m (2010: £26m) issued by Barclays Botswana and Zambia that are convertible. These are repayable at the option of the issuer, prior to maturity, on conditions governing the respective debt obligations, some in whole or in part and some only in whole.

34 Ordinary shares, share premium, and other equity

Called up share capital, allotted and fully paid	Number of shares £m	Ordinary shares £m	Share premium £m	Total £m
As at 1 January 2011	12,182	3,045	9,294	12,339
Issued to staff under share incentive plans	17	5	36	41
As at 31 December 2011	12,199	3,050	9,330	12,380
As at 1 January 2010	11,412	2,853	7,951	10,804
Issued to staff under share incentive plans	12	2	33	35
Issue of new ordinary shares	758	190	1,310	1,500
As at 31 December 2010	12,182	3,045	9,294	12,339

Warrants

On 31 October 2008, Barclays PLC issued warrants to subscribe for up to 1,516.9 million new ordinary shares at a price of £1.97775, in conjunction with a simultaneous issue by Barclays Bank PLC of Reserve Capital Instruments. During the year there were no exercised warrants (2010: 758.4 million). The exercised warrants in 2010 resulted in credit to share capital of £190m and to the share premium account of £1,310m. As at 31 December 2011 there were unexercised warrants to subscribe for 379.2 million shares (2010: 379.2 million), which may be exercised at anytime up to close of business on 31 October 2013.

Share repurchase

At the 2011 AGM on 27 April 2011, Barclays PLC was authorised to repurchase 1,218,343,534 of its ordinary shares of 25p. The authorisation is effective until the AGM in 2012. No share repurchases were made during either 2011 or 2010.

35 Reserves

Currency translation reserve

The currency translation reserve represents the cumulative gains and losses on the retranslation of the Group's net investment in foreign operations, net of the effects of hedging. Currency translation movements in 2011 of £1,607m (2010: £1,184m), including £598m (2010: £442m) associated with non-controlling interests, are largely due to the depreciation of the Rand, Euro and Indian Rupee against Sterling.

The impact of the currency translation reserve recognised in the income statement during the year was nil (2010: £279m), as the £23m loss from the disposal of Barclays Bank Russia was offset by other movements.

Available for sale reserve

The available for sale reserve represents the unrealised change in the fair value of available for sale investments since initial recognition. The reserve increased £1,380m (2010: decreased £1,245m), largely driven by £2,748m gains from changes in fair value, offset by £1,557m of net gains transferred to the income statement after recognition of impairment on the Group's investment in BlackRock, Inc.

Cash flow hedge reserve

The cash flow hedge reserve represents the cumulative gains and losses on effective cash flow hedging instruments that will be recycled to the income statement when hedged transactions affect profit or loss. Movements in the cash flow hedge reserve principally reflected increases in the fair value of interest rate swaps held for hedging purposes, partially offset by related gains transferred to net profit.

Other reserves and treasury shares

Other reserves represent the excess of the repurchase price over the nominal of redeemed ordinary and preference shares issued by the Group.

Treasury shares are deducted from shareholders' equity within other reserves and treasury shares. A transfer is made to retained earnings in line with the vesting of treasury shares held for the purposes of share based payments.

The treasury shares primarily relate to Barclays PLC shares held by employee benefit trusts in relation to the Group's various share schemes. These schemes are described in Note 38.

36 Non-controlling interests

	Profit attributable to non-controlling interests		Equity attributable to non-controlling interests	
	2011 £m	2010 £m	2011 £m	2010 £m
Barclays Bank PLC issued:				
– Preference shares	465	478	5,929	5,933
– Reserve Capital Instruments	46	113	–	1,418
– Upper Tier 2 instruments	3	3	586	586
Absa Group	401	362	2,861	3,208
Other non-controlling interests	29	29	231	259
Total	944	985	9,607	11,404

The decrease in Absa Group equity attributable to non-controlling interest to £2,861m (2010: £3,208m) is principally due to £583m depreciation of African currencies against Sterling and £162m of dividends paid, offset by retained profits of £401m.

The reduction in Reserve Capital Instruments as at 31 December 2011 to nil (2010: £1,418m) is due to the buy back, at the Group's option, of instruments with a nominal value of \$1.25bn and \$0.75bn during June and December 2011 respectively.

Notes to the financial statements

Employee benefits

Employee benefits outlines the costs and commitments associated with employing our staff.

37 Staff costs

Accounting for staff costs

The Group applies IAS 19 *Employee benefits* in its accounting for most of the components of staff costs.

Short-term employee benefits – salaries, accrued performance costs, social security and the Bonus Payroll Tax are recognised over the period in which the employees provide the services to which the payments relate.

Performance costs – recognised to the extent that the Group has a present obligation to its employees that can be measured reliably and are recognised over the period of service that employees are required to work to qualify for the services.

Deferred cash bonus awards and deferred share bonus awards are made to employees to incentivise performance over the vesting period. To receive payment under an award, employees must provide service over the vesting period, typically three years from the grant date. The period over which the expense for deferred cash and share bonus awards is recognised is based upon the common understanding between the employee and the Group and the terms and conditions of the award. The Group considers that it is appropriate to recognise the awards over the period from the date of grant to the date that the awards vest as this is the period over which the employees understand that they must provide service in order to receive awards. The table on page 64 details the relevant award dates, payment dates and the period in which the income statement charge arises for bonuses. No expense has been recognised in 2011 for the deferred bonuses granted in March 2012, as they are dependent upon future performance rather than performance during 2011.

The accounting policies for share based payments and pensions and other post retirement benefits are under Note 38 and Note 39 respectively.

Staff costs	2011 £m	2010 £m	2009 £m
Performance costs	2,527	3,350	3,055
Salaries	6,277	6,151	4,893
Other share based payments	167	168	133
Social security costs	716	719	606
Post-retirement benefits	727	528	207
Total compensation costs	10,414	10,916	8,894
Bank payroll tax	76	96	225
Other	917	904	829
Non compensation costs	993	1,000	1,054
Staff costs	11,407	11,916	9,948

The UK Government applied a bank payroll tax of 50% to all discretionary bonuses over £25,000 awarded to UK bank employees between 9 December 2009 and 5 April 2010. The total bank payroll tax paid was £437m, of which £321m was recognised between 2009 and 2010. For 2011, a charge of £76m has been recognised in relation to prior year deferrals, with the remaining £40m to be recognised over the period 2012 to 2013.

Staff costs above relate to continuing operations only. Staff costs arising on discontinued operations for 2011 and 2010 totalled nil (2009: £735m).

The average total number of persons employed by the Group including both continuing and discontinued operations was 149,700 (2010: 151,300).

Notes to the financial statements

For the year ended 31 December 2011 continued

38 Share based payments

Accounting for share based payments

The Group applies IFRS 2 *Share Based Payments* in accounting for employee remuneration in the form of shares.

Employee incentives include awards in the form of shares and share options, as well as offering employees the opportunity to purchase shares on favourable terms. The cost of the employee services received in respect of the shares or share options granted is recognised in the income statement over the period that employees provide services, generally the period in which the award is granted or notified and the vesting date of the shares or options. The overall cost of the award is calculated using the number of shares and options expected to vest and the fair value of the shares or options at the date of grant.

The number of shares and options expected to vest takes into account the likelihood that performance and service conditions included in the terms of the awards will be met. Failure to meet the non-vesting condition is treated as a cancellation, resulting in an acceleration of recognition of the cost of the employee services.

The fair value of shares is the market price ruling on the grant date, in some cases adjusted to reflect restrictions on transferability. The fair value of options granted is determined using option pricing models to estimate the numbers of shares likely to vest. These take into account the exercise price of the option, the current share price, the risk-free interest rate, the expected volatility of the share price over the life of the option and other relevant factors. Market conditions that must be met in order for the award to vest are also reflected in the fair value of the award, as are any other non-vesting conditions – such as continuing to make payments into a share based savings scheme.

The charge for the year arising from share based payment schemes was as follows:

	Charge for the year		
	2011 £m	2010 £m	2009 £m
Share Value Plan	634	361	–
Executive Share Award Scheme	101	304	178
Others	137	172	100
Total equity settled	872	837	278
Cash settled	34	23	8
Total continuing operations	906	860	286
Discontinued operations	–	–	12
Total share based payments	906	860	298

The terms of the main current plans are as follows:

Share value plan (SVP)

The SVP was introduced in March 2010 and approved by shareholders (for Executive Director participation and use of new issue shares) at the AGM in April 2011. SVP awards are granted to participants in the form of a conditional right to receive Barclays shares (awards granted prior to May 2011 were granted as provisional allocations of Barclays shares) which vest over a period of three years in equal annual tranches. Participants do not pay to receive an award or to receive a release of shares. The grantor may also make a dividend equivalent payment to participants on vesting of a SVP award. SVP awards are also made to eligible employees for recruitment purposes under schedule 1 to the SVP. From 2010, the portion of a business unit LTIP award that was previously granted under ESAS is normally granted under SVP. All awards are subject to potential forfeiture in certain leaver scenarios.

Executive Share Award Scheme (ESAS)

For certain employees of the Group an element of their annual bonus is in the form of a deferred award of a provisional allocation of Barclays PLC shares under ESAS. The total value of the bonus made to the employee, of which ESAS is an element, is dependent upon the business unit, Group and individual employee performance. The ESAS element of the annual bonus must normally be held for at least three years. Additional bonus shares are subsequently awarded to recipients of the provisional allocation and vest upon achieving continued service for three and five years from the date of award. ESAS awards are also made to eligible employees for recruitment purposes under JSAP (Joiners Share Award Plan). All awards are subject to potential forfeiture if the individual resigns and commences work with a competitor business. LTIP plans are cash and equity performance plans which after 3 years (dependant on performance) pay half in cash and the remaining half in shares which are placed into ESAS for a further 1 or 2 years.

Other schemes

In addition to the above schemes, the Group operates a number of other schemes including schemes operated by and settled in the shares of subsidiary undertakings, none of which are individually or in aggregate material in relation to the charge for the year or the dilutive effect of outstanding share options. Included within other schemes are the Performance Share Plan, Incentive Share Plan, Sharesave, Sharepurchase, and the Barclays Long Term Incentive Plan which was introduced and approved at the AGM in April 2011.

38 Share based payments continued**Share option and award plans**

The weighted average fair value per award granted and weighted average share price at the date of exercise/release of shares during the year was:

	Weighted average fair value per award granted in year		Weighted average share price at exercise/release during year	
	2011 £	2010 £	2011 £	2010 £
SVP ^{a,b}	2.80	3.54	3.08	3.10
ESAS ^{a,c}	2.84	2.88	2.87	3.39
Others ^a	0.65 - 2.77	1.29 - 3.55	2.18 - 3.03	3.02 - 3.46

SVP and ESAS are nil cost awards and nil cost options respectively on which the performance conditions are substantially completed at the date of grant. Consequently the fair value of these awards/options is based on the market value at that date.

As described above, the terms of the ESAS scheme require shares to be held for a set number of years from the date of vesting. The calculation of the vesting date fair value of such awards includes a reduction for this post-vesting restriction. This discount is determined by calculating how much a willing market participant would rationally pay to remove the restriction using a Black-Scholes option pricing model. The total discount required in 2011 is £nil (2010: £22m, 2009: £10m).

Movements in options and awards

The movement in the number of options and awards for the major schemes and the weighted average exercise price of options was:

	SVP ^{a,b}		ESAS ^{a,c}		Others ^{a,d}		Weighted average ex. price (£)	
	2011	2010	2011	2010	2011	2010	2011	2010
Outstanding at beginning of year/acquisition date	226,842	–	383,483	464,511	175,253	189,871	2.80	3.01
Granted in the year	255,592	241,931	11,267	85,489	111,374	32,763	1.52	2.46
Exercised/released in the year	(77,315)	(4,932)	(117,126)	(139,220)	(18,164)	(11,211)	2.03	2.67
Less: forfeited in the year	(12,481)	(10,157)	(25,596)	(27,297)	(46,480)	(36,170)	2.59	3.42
Less: expired in the year	–	–	–	–	(7,620)	–	3.94	–
Outstanding at end of year	392,638	226,842	252,028	383,483	214,363	175,253	1.93	2.80
Of which exercisable:	–	–	25,025	5,220	20,424	8,383	2.78	4.35

Certain of the Group's share option plans enable certain directors and employees the option to subscribe for new ordinary shares of Barclays PLC between 2011 and 2019. For accounting for treasury shares see Note 35 Reserves.

Notes

a Options/award granted over Barclays PLC shares.

b Nil cost award and therefore the weighted average exercise price was nil.

c Nil cost options and therefore there was no weighted average exercise price.

d The number of awards within others at the end of the year principally relates to Sharesave (number of awards exercisable at end of year was 15,825,000). The weighted average exercise price relates to Sharesave. The weighted average exercise price for the other schemes was nil.

Notes to the financial statements

For the year ended 31 December 2011 continued

38 Share based payments continued

The weighted average contractual remaining life and number of options and awards outstanding (including those exercisable) at the balance sheet date are as follows:

	2011		2010	
	Weighted average remaining contractual life in years	Number of options/ awards outstanding (000s)	Weighted average remaining contractual life in years	Number of options/ awards outstanding (000s)
SVP ^{a,b}	2	392,638	2	226,842
ESAS ^{a,c}	2	252,028	3	383,483
Others ^a	0 - 4	214,362	0 - 4	175,252

There were no significant modifications to the share based payments arrangements in the years 2011, 2010 and 2009.

As at 31 December 2011, the total liability arising from cash-settled share based payments transactions was £12m (2010: £23m).

Treasury Shares

The Group, through various employee benefit trusts, holds shares in Barclays PLC ('treasury shares') to meet its obligations under its share based payment schemes. The total number of Barclays shares held in Group employee benefit trusts at 31 December 2011 was 3.9 million (2010: 259.0 million). The reduction is due to a change in the funding approach by the trustee, whereby holdings of treasury shares have been replaced with instruments that hedge the economic exposure to movements in the Barclays share price. Dividend rights have been waived on nil (2010: nil) of these shares. The total market value of the shares held in trust based on the year end share price of £1.74 (2010: £2.61) was £6.8m (2010: £676m).

Notes

a Options/award granted over Barclays PLC shares.

b Nil cost award.

c Nil cost options.

39 Pensions and post retirement benefits

Accounting for pensions and post retirement benefits

The Group operates a number of pension schemes including defined contribution, defined benefit and post-employment benefit schemes.

Defined contribution schemes – the Group recognises contributions due in respect of the accounting period in the income statement. Any contributions unpaid at the balance sheet date are included as a liability.

Defined benefit schemes – the Group recognises its obligation to members of the scheme at the period end, less the fair value of the scheme assets and unrecognised actuarial gains or losses. Each scheme's obligations are calculated using the projected unit credit method on the assumptions set out in the note below. Scheme assets are stated at fair value as at the period end.

The Group uses the option within IAS 19 *Employee Benefits* to defer actuarial gains and losses over the remaining service lives of the employees.

Actuarial gains and losses comprise experience adjustments (differences between previous actuarial assumptions and what has actually occurred) and the effects of changes in actuarial assumptions. Cumulative actuarial gains and losses, to the extent that they exceed the greater of: 10% of the fair value of the scheme assets or 10% of the present value of the defined benefit obligation, are deferred and the excess amortised in the income statement over the average service lives of scheme members. Gains and losses on curtailments are recognised when the curtailment occurs, which may be when a demonstrable commitment to a reduction in benefits, or reduction in eligible employees, occurs. The gain or loss comprises any change in the present value of the obligation, the fair value of the assets and any related unrecognised actuarial gain or loss and past service costs.

Where a scheme's assets and its unrecognised actuarial losses exceed its obligation, an asset is recognised to the extent that it does not exceed the present value of future contribution holidays or refunds of contributions.

Post-employment benefits – the cost of providing health care benefits to retired employees is accrued as a liability in the financial statements over the period that the employees provide services to the Group, using a methodology similar to that for defined benefit pension schemes.

Future accounting development

From 1 January 2013, in accordance with amendments to IAS 19, the Group balance sheet will fully reflect the pension liability or asset, including any unrecognised actuarial losses or gains. As at 31 December 2011 there were unrecognised actuarial losses of £1.7bn. In addition, the Group will recognise interest charge or income on the net pension liability or asset, rather than the expected return on the schemes' assets and interest cost on the schemes' benefit obligation. The Group will no longer recognise the amortisation of unrecognised actuarial gains or losses which in 2011 gave rise to a charge of £0.1bn. Given these amendments the charge for 2011 would have been £0.1bn higher under the amended standard, and a charge of £1.7bn would have been recognised in other comprehensive income.

Pension schemes

The UK Retirement Fund (UKRF) is the Group's main scheme, representing 92% of the Group's total retirement benefit obligations. The UKRF comprises ten sections, the most significant of which are:

- Afterwork: comprising of a voluntary defined contribution element and a contributory cash balance defined benefit. The cash balance element is revalued until Normal Retirement Age in line with the increase in Retail Price Index (RPI) (maximum 5%). An investment related increase of up to 2% a year may also be added at Barclays discretion. Since 1 October 2003 the majority of new employees outside of Barclays Capital have been eligible to join.
- The Pension Investment Plan (PIP): a defined contribution section providing benefits for Barclays Capital employees from 1 July 2001.
- The 1964 Pension Scheme: most employees recruited before July 1997 built up benefits in this non-contributory defined benefit scheme in respect of service up to 31 March 2010. Pensions were calculated by reference to service and pensionable salary. From 1 April 2010 members became eligible to accrue future service benefits in either Afterwork or PIP.

The costs of ill-health retirements and death in service benefits are borne by the UKRF.

Governance

The UKRF operates under trust law and is managed and administered on behalf of the members in accordance with the terms of the Trust Deed and Rules and all relevant legislation. The Corporate Trustee is Barclays Pension Funds Trustees Limited, a private limited company incorporated on 20 December 1990 and a wholly owned subsidiary of Barclays Bank PLC. The Trustee is the legal owner of the assets of the UKRF which are held separately from the assets of the Group.

The Trustee Board comprises six Management Directors selected by Barclays, of whom three are independent Directors with no relationship with Barclays or the UKRF, plus three Member Nominated Directors selected from eligible active staff and pensioner members who apply for the role.

The same principles of pension governance apply to the Group's other pension schemes, although different legislation covers overseas schemes where, in most cases, the Group has the power to determine the funding rate.

Notes to the financial statements

For the year ended 31 December 2011 continued

39 Pensions and post retirement benefits continued

Amounts recognised

The following tables include: the amounts recognised in the income statement, an analysis of benefit obligations and an analysis of scheme assets for all Group schemes. The net position is reconciled to the assets and liabilities recognised on the balance sheet. The tables include funded and unfunded post-retirement benefits.

Income statement charge	2011 £m	2010 £m	2009 ^a £m

Recognised liabilities	(321)	–	(365)	(51)
Net recognised asset/(liability)	1,482	1,680	(239)	(51)

As at 31 December 2011, the UKRF's IAS 19 scheme assets exceeded obligations by £277m (2010: deficit of £2,552m). The most significant drivers for this change were favourable asset performance and deficit contributions paid over the year.

Included within the benefit obligation was £1,560m (2010: £1,470m) relating to overseas pensions and £171m (2010: £158m) relating to other post-retirement benefits. Of the benefit obligations of £22,994m (2010: £21,801m), £334m (2010: £258m) were wholly unfunded.

Note

a Includes £3m relating to discontinued operations.

39 Pensions and post retirement benefits continued**Critical accounting estimates and judgements**

Actuarial valuation of the schemes' obligation is dependent upon a series of assumptions. Below is a summary of the main financial and demographic assumptions adopted for UKRF:

UKRF financial assumptions	2011 % p.a.	2010 % p.a.
Discount rate	4.74	5.31
Rate of increase in salaries	3.54	4.00
Inflation rate	3.04	3.50
Rate of increase for pensions in payment	2.94	3.35
Rate of increase for pensions in deferment	2.94	3.50
Afterwork revaluation rate ^a	3.47	3.97
Expected return on scheme assets	5.00	6.30

The UKRF discount rate assumption is based on a liability-weighted rate derived from an AA corporate bond yield curve and the inflation assumption reflects long-term expectations of RPI.

The UKRF's post-retirement mortality assumptions are based on a best estimate assumption derived from an analysis in 2011 of Barclays own post-retirement mortality experience which was carried out at the time of the latest triennial funding valuation, and taking account of the recent evidence from published mortality surveys. An allowance has been made for future mortality improvements based on the medium cohort projections published by the Continuous Mortality Investigation Bureau subject to a floor of 1% p.a. on future improvements. The table below shows how the assumed life expectancy at 60, for members of the UKRF, has varied over the last five years:

Assumed life expectancy	2011	2010	2009	2008	2007
Life expectancy at 60 for current pensioners (years)					
– Males	27.7	27.6	27.5	27.4	26.7
– Females	28.8	28.7	28.7	28.5	27.9
Life expectancy at 60 for future pensioners currently aged 40 (years)					
– Males	29.1	29.7	29.6	29.5	28.0
– Females	30.4	30.7	30.6	30.5	29.1

Sensitivity analysis on actuarial assumptions

The following table shows a sensitivity analysis of the most material assumptions on the UKRF benefit obligation:

Change in key assumptions	Impact on UKRF benefit obligation	
	(Decrease)/ Increase %	(Decrease)/ Increase £bn
0.5% increase in:		
– Discount rate	(8.7)	(1.8)
– Rate of inflation	9.1	1.9
1 year increase to life expectancy at 60	2.5	0.5

Note

a This is the assumption applied to the Afterwork cash balance element.

Notes to the financial statements

For the year ended 31 December 2011 continued

Assets

A long term strategy has been set for the asset allocation of the UKRF which comprises a mixture of equities, bonds, property and other appropriate assets. This recognises that different asset classes are likely to produce different long term returns and some asset classes may be more volatile than others. The long term strategy ensures that investments are adequately diversified. Asset managers are permitted some flexibility to vary the asset allocation from the long term strategy within control ranges agreed with the Trustee from time to time.

The UKRF also employs derivative instruments, where appropriate, to achieve a desired exposure or return, or to match assets more closely to liabilities. The value of assets shown reflects the actual physical assets held by the scheme, with any derivative holdings reflected on a mark to market basis.

The value of the assets of the schemes, their percentage in relation to total scheme assets, and their expected rate of return were as follows:

Analysis of scheme assets	Total			Of which relates to UKRF		
	Value £m	% of total fair value of scheme assets %	Expected rate of return %	Value £m	% of total fair value of scheme assets %	Expected rate of return %
As at 31 December 2011						
Equities	4,979	21.9	7.8	4,452	20.7	7.7
Bonds	11,246	49.4	3.8	10,872	50.5	3.7
Property	1,389	6.1	6.2	1,356	6.3	6.1
Derivatives	1,296	5.7	–	1,296	6.0	–
Cash	3,253	14.3	0.6	3,167	14.7	0.5
Other	585	2.6	4.4	397	1.8	2.5
Fair value of scheme assets	22,748	100	5.1	21,540	100	5.0
As at 31 December 2010						
Equities	5,865	31.0	8.3	5,349	30.4	8.4
Bonds	9,641	51.0	4.7	9,164	52.0	4.6
Property	1,297	6.9	6.9	1,277	7.2	6.8
Derivatives	410	2.2	–	410	2.3	–
Cash	1,215	6.4	1.2	1,057	6.0	0.5
Other	477	2.5	5.6	364	2.1	4.3
Fair value of scheme assets	18,905	100	6.3	17,621	100	6.3

Included within fair value of scheme assets were: £15m (2010: £14m) relating to shares in Barclays Group, £12m (2010: £13m) relating to bonds issued by the Barclays Group, and £12m (2010: £10m) relating to property occupied by Group companies. The UKRF also invests in pooled investment vehicles which may hold shares or debt issued by the Barclays Group. The UKRF scheme assets also includes £50m (2010: £58m) relating to UK private equity investments and £1,342m (2010: £1,128m) relating to overseas private equity investments. These are disclosed above within Equities.

The expected return on assets is determined by calculating a total return estimate based on weighted average estimated returns for each asset class. Asset class returns are estimated using current and projected economic and market factors such as inflation, credit spreads and equity risk premiums. The Group actual return on scheme assets was an increase of £2,595m (2010: £2,134m increase).

The overall expected return on assets assumption has recognised that some of the cash holding at 31 December 2011 was due to be reinvested shortly after year end in line with the long term strategy. The overall expected return on asset assumption has also been based on the portfolio of assets created after allowing for the net impact of the derivatives on the risk and return profile of the holdings.

39 Pensions and post retirement benefits continued**Actuarial gains and losses**

The actuarial gains and losses arising on scheme obligations and scheme assets are as follows:

Total actuarial gains and losses	2011 £m	2010 £m	2009 £m	2008 £m	2007 £m
Present value of obligations	(22,994)	(21,801)	(20,646)	(15,783)	(17,634)

– as percentage of scheme assets	7%	6%	9%	(33%)	2%

Funding

The latest triennial funding valuation of the UKRF was carried out with an effective date of 30 September 2010, and showed a deficit of £5.0bn. In compliance with the Pensions Act 2004, the Bank and Trustee agreed a scheme-specific funding target, statement of funding principles, a schedule of contributions and a recovery plan to eliminate the deficit in the Fund.

The recovery plan to eliminate the deficit will result in the Bank paying deficit contributions to the Fund until 2021. Deficit contributions of £1.8bn were paid to the fund in December 2011 and a further £0.5bn will be paid in 2012. Further deficit contributions are payable from 2017 to 2021 starting at £0.65bn in 2017 and increasing by approximately 3.5% per annum until 2021. These deficit contributions are in addition to the regular contributions to meet the Group's share of the cost of benefits accruing over each year. Including deficit contributions, the Group's estimated contribution to the UKRF in 2012 will be £877m. Excluding the UKRF, the Group is expected to pay contributions of approximately £1m to UK schemes and £94m to overseas schemes in 2012.

The Scheme Actuary prepares an annual update of the funding position as at 30 September. The latest annual update was carried out as at 30 September 2011 and showed a deficit of £6.4bn. This was prior to the payment of £1.8bn in December 2011.

Contributions paid with respect to the UKRF were as follows:

Contributions paid	£m
2011	2,128
2010	666
2009	525

Notes to the financial statements

For the year ended 31 December 2011 continued

Scope of consolidation

This section presents information on the Group's investments in subsidiaries, joint ventures and associates. Detail is also given on securitisation transactions the Group has entered into and arrangements that are held off-balance sheet.

40 Investment in subsidiaries

Accounting for investment in subsidiaries

In the individual financial statements of Barclays PLC, investments in subsidiaries are stated at cost less impairment, if any. Cost includes directly attributable costs of the investment.

Principal subsidiaries for the Group are set out below. This list has been revised to include those subsidiaries that are significant in the context of the Group's business, results or financial position.

Country of registration or incorporation	Company name	Nature of business	Percentage of equity capital held (%)
England	Barclays Bank PLC	Banking, holding company	100
England	Barclays Bank Trust Company Limited	Banking, securities industries and trust services	100
England	Barclays Stockbrokers Limited	Stockbroking	100
England	Barclays Capital Securities Limited	Securities dealing	100
England	FIRSTPLUS Financial Group PLC	Secured loan provider	100*
Isle of Man	Barclays Private Clients International Limited	Banking	100*
Japan	Barclays Capital Japan Limited	Securities dealing	100
Kenya	Barclays Bank of Kenya Limited	Banking	68.5*
South Africa	Absa Group Limited	Banking	55.5*
Spain	Barclays Bank SA	Banking	100*
USA	Barclays Capital Inc.	Securities dealing	100
USA	Barclays Bank Delaware	US credit card issuer	100
USA	Barclays Group US Inc.	Holding company	100*

The country of registration or incorporation is also the principal area of operation of each of the above subsidiaries. Investments in subsidiaries held directly by Barclays Bank PLC are marked*. Full information of all subsidiaries will be included in the Annual Return to be filed at UK Companies House.

Although the Group's interest in the equity voting rights in certain entities listed below may exceed 50%, or it may have the power to appoint a majority of their Boards of Directors, they are excluded from consolidation because the Group either does not direct the financial and operating policies of these entities, or another entity has a controlling interest in them. Consequently, these entities are not controlled by Barclays:

Country of registration or incorporation	Company name	Percentage of ordinary share capital held %	Equity shareholders' funds £m	Retained profit for the year £m
UK	Fitzroy Finance Limited	100	–	–
Cayman Islands	Palomino Limited	100	1	–

41 Acquisition of subsidiaries

In April 2011, Barclays acquired the third party investments in Protium for their carrying value of £163m and restructured the related management arrangements. This resulted in the general partner interest being acquired by Barclays for a nominal consideration and the remaining interest in Protium held by Protium's investment manager, redeemed for consideration of £50m (in accordance with the performance fees that would have been due under the original agreement, based on investment performance to date). Barclays become the sole owner and controlling party of Protium, which is consolidated by the Group. There was no gain or loss and no goodwill arising as the impairment on the loan was already calculated by reference to Protium's net asset value of £5,856m.

As part of this transaction, US\$750m of proceeds from a partial redemption of the loan to Protium was invested into Helix, an existing fund managed by Protium's investment manager. This represents a majority interest in the fund, which has also been consolidated by the Group.

The pre-acquisition carrying amounts of the acquired assets and liabilities, stated in accordance with the Group's accounting policies, were equal to their fair value on acquisition as set out below. There was no gain and no loss arising on the transaction.

	Fair values £m
Assets	
Trading portfolio assets	4,731
Financial assets designated at fair value	1,004
Derivative financial instruments	5
Loans and advances to banks	472
Reverse repurchase agreements	29
Other assets	46
Total assets	6,287
Liabilities	
Deposits from banks	1
Trading portfolio liabilities	93
Financial liabilities designated at fair value	76
Derivative financial instruments	23
Repurchase agreements	24
Other liabilities	51
Total liabilities	268
Net assets acquired (Group share 100%)	6,019
Considerations – cash	163
– loan	5,856
Total consideration	6,019

The Group's exposure to Protium prior to acquisition represented a loan. Subsequent to acquisition the underlying assets held by Protium were consolidated by the Group and have been integrated into the corresponding business lines.

The contribution of Protium and related underlying assets on the Group's profit before tax for the year of £55m reflected a £223m impairment release and £36m interest income on the loan prior to acquisition, offset by £204m post acquisition fair value reductions in the underlying assets offsets by gains arising on the unwind of structured assets. Post acquisition losses comprised £27m gain on US sub prime and Alt-A, £249m losses on commercial mortgage backed securities, £92m gains on CDO and other assets, £56m of net interest and other income, £74m of funding charges and £56m of fees to Protium's investment manager.

The £50m consideration paid by Protium to redeem the remaining interest held by its investment manager represents the settlement of an existing liability. As pre-acquisition impairment was calculated by reference to Protium's net asset value, this amount was reflected in the impairment charge and did not give rise to a loss on acquisition.

At the acquisition date, the contractual amounts due to maturity on the acquired assets were £28bn. These assets are predominantly held for trading purposes so are not expected to be held to maturity.

Acquisition related costs of £nil have been included in operating expenses. The aggregate net outflow of cash from acquisition during the year was £163m.

During the year, Barclays acquired £2.1bn gross consumer credit card assets from Egg UK, a £130m corporate card portfolio from MBNA Europe Bank Limited and a \$1.4bn Upromise by Sallie Mae credit card portfolio from FIA Card Services, N.A. (part of Bank of America). These acquisitions were asset purchases and therefore, have not been included in the table above. In addition Barclays acquired the Baubecon portfolio of German residential properties following a debt restructuring transaction for £0.8bn. The properties have a current fair value of £1bn and are accounted for as investment properties.

Notes to the financial statements

For the year ended 31 December 2011 continued

42 Investments in associates and joint ventures

Accounting for associates and joint ventures

Barclays applies IAS 28 *Investments in Associates* and IAS 31 *Interests in Joint Ventures*. Associates are entities in which the Group has significant influence, but not control, over its operating and financial policies. Generally the Group holds more than 20%, but less than 50%, of their voting shares. Joint Ventures are entities whose activities are governed by a contractual arrangement between the Group and one or more parties to share equally in decisions regarding operating and financial policies.

The Group's investments in associates and joint ventures are initially recorded at cost and increased (or decreased) each year by the Group's share of the post acquisition profit (or loss). In some cases, investments in these entities may be held at fair value through profit or loss, for example, those held by private equity businesses.

	2011 £m	2010 £m
Investment in associates	169	261
Investment in joint ventures	258	257
Total	427	518

Summarised financial information for the Group's associates and joint ventures is set out below. The amounts shown are assets, liabilities and net income of the investees, not just the Group's share, as at and for the year ended 31 December 2011 with the exception of certain undertakings for which the amounts are based on accounts made up to dates not earlier than three months before the balance sheet date.

	2011		2010	
	Associates £m	Joint ventures £m	Associates £m	Joint ventures £m
Total assets	4,001	3,447	4,819	3,452
Total liabilities	3,603	2,938	4,089	3,024
Profit/(loss) after tax	45	88	(167)	93

The Group's share of commitments and contingencies of its associates and joint ventures was comprised of insurance guarantees of £nil (2010: £nil) and unutilised credit facilities provided to customers of £1,265m (2010: £1,237m).

43 Securitisations

Accounting for securitisations

The Group uses securitisations as a source of finance and a means of risk transfer. Such transactions generally result in the transfer of contractual cash flows from portfolios of financial assets to holders of issued debt securities.

Securitisations may, depending on the individual arrangement, result in continued recognition of the securitised assets and the recognition of the debt securities issued in the transaction; lead to partial continued recognition of the assets to the extent of the Group's continuing involvement in those assets or to derecognition of the assets and the separate recognition, as assets or liabilities, of any rights and obligations created or retained in the transfer. Full derecognition only occurs when the Group transfers both its contractual right to receive cash flows from the financial assets, or retains the contractual rights to receive the cash flows, but assumes a contractual obligation to pay the cash flows to another party without material delay or reinvestment, and also transfers substantially all the risks and rewards of ownership, including credit risk, prepayment risk and interest rate risk.

The Group is party to securitisation transactions for funding purposes, involving its residential mortgage loans, business loans and credit card balances. In addition, the Group acts as a conduit for commercial paper, whereby it acquires static pools of residential mortgage loans from other lending institutions for securitisation transactions. In these transactions, the assets, or interests in the assets, or beneficial interests in the cash flows arising from the assets, are transferred to a special purpose entity, or to a trust which then transfers its beneficial interests to a special purpose entity, which then issues floating rate debt securities to third-party investors.

43 Securitisations continued

The following table shows the carrying amount of securitised assets, stated at the amount of the Group's continuing involvement where appropriate, together with the associated liabilities, for each category of asset on the balance sheet:

	2011		2010	
	Carrying amount of assets £m	Associated liabilities £m	Carrying amount of assets £m	Associated liabilities £m
Loans and advances to customers				
Residential mortgage loans	7,946	(8,085)	9,709	(10,674)
Credit card receivables	4,059	(3,477)	801	(723)
Wholesale and corporate loans and advances	1,391	(1,428)	2,560	(2,878)
Total	13,396	(12,990)	13,070	(14,275)
Assets designated at fair value through profit or loss				
Retained interest in residential mortgage loans	1		5	

Balances included within loans and advances to customers represent securitisations where substantially all the risks and rewards of the asset have been retained by the Group. As a result these securitisations represents secured financing, although for regulatory capital purposes they may give rise to a regulatory capital benefit due to risk sharing with investors.

The excess of total associated liabilities over the carrying amount of assets primarily reflects timing differences in the receipt and payment of cash flows, and foreign exchange movements where the assets and associated liabilities are denominated in different currencies. Foreign exchange movements and associated risks are hedged economically through the use of cross currency swap derivative contracts.

Retained interests in residential mortgage loans are securities which represent a continuing exposure to the prepayment and credit risk in the underlying securitised assets. The total amount of the loans was £2,299m (2010: £15,458m). The retained interest is initially recorded as an allocation of the original carrying amount based on the relative fair values of the portion derecognised and the portion retained.

44 Off-balance sheet arrangements

In the ordinary course of business and primarily to facilitate client transactions, the Group enters into transactions which may involve the use of off-balance sheet arrangements and special purpose entities (SPEs). These arrangements include the provision of guarantees, loan commitments, retained interests in assets which have been transferred to an unconsolidated SPE or obligations arising from the Group's involvements with such SPEs.

Guarantees

The Group issues guarantees on behalf of its customers. In the majority of cases, the Group will hold collateral against the exposure, have a right of recourse to the customer or both. In addition, the Group issues guarantees on its own behalf. The main types of guarantees provided are: financial guarantees given to banks and financial institutions on behalf of customers to secure loans; overdrafts; and other banking facilities, including stock borrowing indemnities and standby letters of credit. Other guarantees provided include performance guarantees, advance payment guarantees, tender guarantees, guarantees to Her Majesty's Revenue and Customs and retention guarantees. The nominal principal amount of contingent liabilities with off-balance sheet risk is set out in Note 30.

Loan commitments

The Group enters into commitments to lend to its customers subject to certain conditions. Such loan commitments are made either for a fixed period or are cancellable by the Group subject to notice conditions. Information on loan commitments and similar facilities is set out in Note 30.

Leasing

The Group leases various offices, branches, other premises and equipment under non-cancellable operating lease arrangements. With such operating lease arrangements, the asset is kept on the lessor's balance sheet and the Group reports the future minimum lease payments as an expense over the lease term. Information on leasing can be found in Note 27.

SPEs

SPEs are entities that are created to accomplish a narrow and well defined objective. There are often specific restrictions or limits around their ongoing activities. The Group's transactions with SPEs take a number of forms, including:

- the provision of financing to fund asset purchases, or commitments to provide finance for future purchases;
- derivative transactions to provide investors in the SPE with a specified exposure;
- the provision of liquidity or backstop facilities which may be drawn upon if the SPE experiences future funding difficulties; and
- direct investment in the notes issued by SPEs.

Notes to the financial statements

For the year ended 31 December 2011 continued

44 Off-balance sheet arrangements continued

A number of the Group's transactions have recourse only to the assets of unconsolidated SPEs. Typically, the majority of the exposure to these assets is borne by third parties and the Group's risk is mitigated through over-collateralisation, unwind features and other protective measures.

The business activities within the Group where SPEs are used include multi-seller conduit programmes, asset securitisations, client intermediation, credit structuring, asset realisations and fund management. These activities are described below. In addition, later sections provide quantitative information on the Group's involvements with CDOs, SIVs, SIV-Lites and conduits.

Multi-seller conduit programmes

Barclays creates, administers and provides liquidity and credit enhancements to several commercial paper conduit programmes, primarily in the United States. These conduits provide clients access to liquidity in the commercial paper markets by allowing them to sell consumer or trade receivables to the conduit, which then issues commercial paper to investors to fund the purchase. The conduits have sufficient collateral, credit enhancements and liquidity support to maintain an investment grade rating for the commercial paper.

Asset securitisations

The Group has assisted its customers with the formation of asset securitisations, some of which are effected through the use of SPEs. These entities have minimal equity and rely on funding in the form of notes to purchase the assets for securitisation. As these SPEs are created for other companies, the Group does not usually control these entities and therefore does not consolidate them. The Group may provide financing in the form of senior notes or junior notes and may also provide derivatives to the SPE. These transactions are included on the balance sheet.

The Group has also used SPEs to securitise part of its originated and purchased retail and commercial lending portfolios and credit card receivables. These SPEs are usually consolidated and derecognition only occurs when the Group transfers its contractual right to receive cash flows from the financial assets, or retains the contractual rights to receive the cash flows, but assumes a contractual obligation to pay the cash flows to another party without material delay or reinvestment, and also transfers substantially all the risks and rewards of ownership, including credit risk, prepayment risk and interest rate risk. The carrying amount of securitised assets together with the associated liabilities are set out in Note 43.

Client intermediation

The Group has structured transactions as a financial intermediary to meet investor and client needs. These transactions involve entities structured by either the Group or the client and are used to modify cash flows of third party assets to create investments with specific risk or return profiles or to assist clients in the efficient management of other risks. Such transactions will typically result in a derivative being shown on the balance sheet, representing the Group's exposure to the relevant asset. The Group also invests in lessor entities specifically to acquire assets for leasing. Client intermediation also includes arrangements to fund the purchase or construction of specific assets (most common in the property industry).

Credit structuring

The Group structures investments to provide specific risk profiles to investors. This may involve the sale of credit exposures, often by way of derivatives, to an entity which subsequently funds those exposures by issuing securities. These securities may initially be held by Barclays prior to sale outside of the Group.

Asset realisations

The Group establishes SPEs to facilitate the recovery of loans in circumstances where the borrower has suffered financial loss.

To the extent that there are guarantees and commitments in relation to SPEs the details are included in Note 30.

Collateralised debt obligations (CDOs)

The Group has structured and underwritten CDOs. At inception, the Group's exposure principally takes the form of a liquidity facility provided to support future funding difficulties or cash shortfalls in the vehicles. If required by the vehicle, the facility is drawn with the amount advanced included within loans and advances on the balance sheet. Upon an event of default or other triggering event, the Group may acquire control of a CDO and, therefore, be required to fully consolidate the vehicle for accounting purposes. The potential for transactions to hit default triggers before the end of 2011 has been assessed and is included in the determination of a £6m impairment charge (2010: £137m release) in relation to ABS CDO Super Senior and other credit market exposures for the year ended 31 December 2011.

The Group's exposure to ABS CDO Super Senior positions before hedging was £1,842m as at 31 December 2011 (2010: £1,992m), equivalent to an aggregate 51.68% (2010: 50.97%) decline in value on average for all investors. This represents the Group's exposure to High Grade CDOs, stated net of write downs and charges. These facilities are fully drawn and included within loans and advances on the balance sheet.

Collateral

The collateral underlying unconsolidated CDOs comprised 78% (2010: 78%) residential mortgage-backed securities, 2% (2010: 3%) non-residential asset-backed securities and 20% (2010: 19%) in other categories (a proportion of which will be backed by residential mortgage collateral). The remaining Weighted Average Life (WAL) of all collateral is 7.41 years (2010: 6.25 years). The combined Net Asset Value (NAV) for all of the CDOs was £1bn (2010: £1bn).

Funding

The CDOs were funded with senior unrated notes and rated notes up to AAA. The capital structure senior to the AAA notes on cash CDOs was supported by a liquidity facility provided by the Group. The senior portion covered by liquidity facilities is on average 82% of the capital structure. The initial WAL of the notes in issue averaged 6.7 years (2010: 6.7 years). The full contractual maturity is 38.2 years (2010: 38.2 years)

44 Off-balance sheet arrangements continued

Interests in third party CDOs

The Group has purchased securities in and entered into derivative instruments with third party CDOs. These interests are held as trading assets or liabilities on the Group's balance sheet and measured at fair value. The Group has not provided liquidity facilities or similar agreements to third party CDOs.

Structured investment vehicles (SIVs)

The Group does not structure or manage SIVs. Group exposure to third party SIVs comprised: £nil (2010: £nil) of senior liquidity facilities and derivative exposures included on the balance sheet at their net fair value of £6m (2010: £46m).

SIV-Lites

The Group has no exposure to a SIV-Lite transaction. The Group is not involved in its ongoing management. Exposures have decreased to £nil (2010: £345m) representing assets designated at fair value.

Commercial paper (CP) and medium-term note conduits

The Group provided £14bn (2010: £17bn) in undrawn backstop liquidity facilities to its own sponsored CP conduits. The Group fully consolidates these entities such that the underlying assets are reflected on the Group balance sheet. These consolidated entities in turn provide facilities of £717m (2010: £740m) to third party conduits containing prime UK buy-to-let Residential Mortgage Backed Securities (RMBS) assets. As at 31 December 2011, the entire facility had been drawn and is included in available for sale financial investments.

The Group provided backstop facilities to support the paper issued by one third party conduit. This facility totalled £259m (2010: £129m), with underlying collateral comprising 100% auto loans. There were no drawings on this facility as at 31 December 2011.

The Group provided backstop facilities to five third party SPEs that fund themselves with medium term notes. These notes are sold to investors as a series of 12 month securities and remarketed to investors annually. If investors decline to renew their holdings at a price below a pre-agreed spread, the backstop facility requires the Group to purchase the outstanding notes at scheduled maturity. The Group has provided facilities of £0.9bn (2010: £1.2bn) to SPEs holding prime UK and Australian owner-occupied RMBS assets. As at the balance sheet date these facilities had been drawn and were included in loans and advances.

45 Assets pledged

Assets are pledged as collateral to secure liabilities under repurchase agreements, securitisations and stock lending agreements or as security deposits relating to derivatives. The following table summarises the nature and carrying amount of the assets pledged as security against these liabilities:

	2011 £m	2010 £m
Trading portfolio assets	86,677	111,703
Loans and advances	40,613	30,584
Available for sale investments	19,974	22,941
Other	2	45
Assets pledged	147,266	165,273

As at 31 December 2011, Barclays has an additional £16bn loans and advances with its asset backed funding programmes that can readily be used to raise additional secured funding and available to support future issuance.

Collateral held as security for assets

Under certain transactions, including reverse repurchase agreements and stock borrowing transactions, the Group is allowed to resell or repledge the collateral held. The fair value at the balance sheet date of collateral accepted and repledged to others was as follows:

	2011 £m	2010 £m
Fair value of securities accepted as collateral	391,287	422,890
Of which fair value of securities repledged/transferred to others	341,060	347,557

The full disclosure as per IFRS7 has been included in collateral and other credit enhancements (page 80).

Notes to the financial statements

For the year ended 31 December 2011 continued

Other disclosure matters

This section details other disclosure matters, comprising: related party transactions, including any subsidiaries, associates, joint ventures, entities under common directorships and key management personnel.

46 Related party transactions and Directors' remuneration

a) Related party transactions

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operation decisions, or one other party controls both. The definition includes subsidiaries, associates, joint ventures and the Group's pension schemes, as well as other persons.

Subsidiaries

Transactions between Barclays PLC and subsidiaries also meet the definition of related party transactions. Where these are eliminated on consolidation, they are not disclosed in the Group financial statements. Transactions between Barclays PLC and its subsidiary, Barclays Bank PLC are fully disclosed in its balance sheet and income statement. A list of the Group's principal subsidiaries is shown in Note 40.

Associates, joint ventures and other entities

The Group provides banking services to its associates, joint ventures, the Group pension funds (principally the UK Retirement Fund) and to entities under common directorships, providing loans, overdrafts, interest and non-interest bearing deposits and current accounts to these entities as well as other services. Group companies also provide investment management and custodian services to the Group pension schemes. The Group also provides banking services for unit trusts and investment funds managed by Group companies and are not individually material. All of these transactions are conducted on the same terms as third-party transactions.

Entities under common directorships

The Group enters into normal commercial relationships with entities for which members of the Group's Board also serve as Directors. The amounts included in the Group's financial statements relating to such entities that are not publicly listed are shown in the table opposite under Entities under common directorships.

Amounts included in the accounts, in aggregate, by category of related party entity are as follows:

	Associates £m	Joint ventures £m	Entities under common directorships £m	Pension funds, unit trusts and investment funds ^a £m
For the year ended and as at 31 December 2011				
Income	(40)	20	1	17
Impairment	(2)	(6)	–	–
Total assets	176	1,529	364	–
Total liabilities	36	454	112	182
For the year ended and as at 31 December 2010				
Income	19	(15)	10	–
Impairment	(5)	(9)	–	–
Total assets	135	2,113	45	–
Total liabilities	28	477	110	142
For the year ended and as at 31 December 2009				
Income	(57)	(55)	(64)	6
Impairment	(2)	(5)	–	–
Total assets	155	2,080	43	–
Total liabilities	4	503	27	171

No guarantees, pledges or commitments have been given or received in respect of these transactions in 2011 or 2010. Derivatives transacted on behalf of the Pensions Funds, Unit Trusts and Investment Funds were £568.9m (2010: £206.8m)^a.

Note

a 2009 and 2010 balances have been revised to include cash collateral, deposit balances and derivatives transacted on behalf of the Pension Funds, Unit Trusts and Investment Funds.

46 Related party transactions and Directors' remuneration continued

Key Management Personnel

The Group's Key Management Personnel, and persons connected with them, are also considered to be related parties for disclosure purposes. Key Management Personnel are defined as those persons having authority and responsibility for planning, directing and controlling the activities of Barclays PLC (directly or indirectly) and comprise the Directors of Barclays PLC and the Officers of the Group (listed on page 279), certain direct reports of the Chief Executive and the heads of major business units.

There were no material related party transactions with Entities under common directorship where a Director or other member of Key Management Personnel (or any connected person) is also a Director or other member of Key Management Personnel (or any connected person) of Barclays.

The Group provides banking services to Directors and other Key Management Personnel and persons connected to them. Transactions during the year and the balances outstanding at 31 December 2011 were as follows:

	2011 £m	2010 £m
Loans outstanding at 1 January	4.4	6.6
Loans issued during the year	0.7	0.5
Loan repayments during the year	(0.7)	(2.1)
Loans outstanding at 31 December	4.4	5.0

No allowances for impairment were recognised in respect of loans to Directors or other members of Key Management Personnel (or any connected person).

	2011 £m	2010 £m
Deposits outstanding at 1 January	35.0	30.3
Deposits received during the year	244.1	104.9
Deposits repaid during the year	(240.4)	(99.3)
Deposits outstanding at 31 December	38.7	35.9
Interest expense on deposits	0.1	–

Of the loans outstanding above, £nil (2010: £0.5m) relates to Directors and other Key Management Personnel (and persons connected to them), who left the Group during the year. Of the deposits outstanding above, £1.1m (2010: £0.2m) related to Directors and other Key Management Personnel (and persons connected to them), who left the Group during the year. The amounts disclosed as at 1 January includes deposits outstanding for those who became Directors or Key Management Personnel during the year.

All loans to Directors and other Key Management Personnel (and persons connected to them), (a) were made in the ordinary course of business, (b) were made on substantially the same terms, including interest rates and collateral, as those prevailing at the same time for comparable transactions with other persons and (c) did not involve more than a normal risk of collectability or present other unfavourable features.

Remuneration of Directors and other Key Management Personnel

Total remuneration awarded to Directors and other Key Management Personnel below represents the awards made to individuals that have been approved by the Board Remuneration Committee as part of the latest payout decisions and is consistent with the approach adopted for disclosures set out on pages 54 to 65. Costs recognised in the income statement reflect the accounting charge for the year included within operating expenses. The difference between the values awarded and the recognised income statement charge principally relates to the recognition of deferred costs for prior year awards. Figures are provided for the period that individuals met the definition of Directors and other Key Management Personnel.

	2011 £m	2010 £m
Salaries	20.9	28.1
Employer social security costs	9.1	12.4
Post retirement benefits	0.4	1.0
Share-based payment awards	33.7	39.3
Other long-term benefit awards	39.1	41.9
Costs recognised for accounting purposes	103.2	122.7
Employer social security costs	(9.1)	(12.4)
Share-based payments – difference between awards granted and costs recognised	(17.7)	(20.8)
Other long-term benefit – difference between awards granted and costs recognised	(14.2)	(9.3)
Total remuneration awarded	62.2	80.2

Notes to the financial statements

For the year ended 31 December 2011 continued

46 Related party transactions and Directors' remuneration continued

b) Disclosure required by the Companies Act 2006

The following information is presented in accordance with the Companies Act 2006:

	2011 £m	2010 £m
Aggregate emoluments	15.9	15.8
Amounts paid under long-term incentive schemes	5.8	7.0
	21.7	22.8

There were no pension contributions paid to defined contribution schemes on behalf of Directors (2010: £13,588). There were no notional pension contributions to defined contribution schemes.

As at 31 December 2011, there were no Directors accruing benefits under a defined benefit scheme (2010: one Director).

Directors' and Officers' shareholdings and options

The beneficial ownership of ordinary share capital of Barclays PLC by all Directors and Officers of Barclays PLC (involving 22 persons) at 31 December 2011 amounted 43,978,451 (2010: 29,102,334) ordinary shares of 25p each (0.36% of the ordinary share capital outstanding).

At 31 December 2011 Executive Directors and Officers of Barclays PLC (involving 11 persons) held options to purchase a total of 1,920,575 Barclays PLC ordinary shares (2010: 2,961,264) of 25p each at prices ranging from 152p to 470p under Sharesave and ranging from 317p to 506p under the Incentive Share Option Plan, respectively.

Advances and credit to Directors and guarantees on behalf of Directors

In accordance with Section 413 of the Companies Act 2006 as at 31 December there were no advances and credits or guarantees in relation to those who served as Directors of the Company at any time in the financial year (2010: £nil).

Shareholder information

Graduating from the scheme

Graduates of the scheme will have benefited from the opportunity to develop their teamwork, communication and financial skills as well as having gained a recognised qualification. Successful graduates have gone on to work across the cycling industry in a variety of roles, including on the Barclays Cycle Hire scheme in London.

Shareholder information

Articles of Association

The Company was incorporated in England on 20 July 1896 under the Companies Acts 1862 to 1890 as a company limited by shares and was reregistered in 1982 as a public limited company under the Companies Acts 1948 to 1980. The Company is registered under company number 48839. The Company was reregistered as Barclays PLC on 1 January 1985.

Under the Companies Act 2006 (Act) a company's Memorandum of Association now need only contain the names of the subscribers and the number of shares each subscriber has agreed to take. For companies in existence as of 1 October 2009, all other provisions which were contained in the company's Memorandum of Association, including the company's objects, are now deemed to be contained in the company's articles. The Act also states that a company's objects are unrestricted unless that company's articles provide otherwise. Barclays PLC adopted new Articles of Association at its Annual General Meeting (AGM) on 30 April 2010 to reflect these changes and as a result, its objects are now unrestricted.

The Company may, by Special Resolution, amend its Articles of Association. In addition to the changes referred to above, the Articles of Association adopted at the 2010 AGM updated the Articles of Association to reflect the implementation of the remaining provisions of the Companies Act 2006. The following is a summary of the current Articles of Association (Articles):

Directors

- (i) The minimum number of Directors (excluding alternate Directors) is five. There is no maximum limit. There is no age limit for Directors.
- (ii) Excluding executive remuneration and any other entitlement to remuneration for extra services (including service on board committees) under the Articles, a Director is entitled to a fee at a rate determined by the Board but the aggregate fees paid to all Directors shall not exceed £2,000,000 per annum or such higher amount as may be approved by an ordinary resolution of the Company. Each Director is entitled to reimbursement for all travelling, hotel and other expenses properly incurred by him/her in or about the performance of his/her duties.
- (iii) No Director may act (either himself/herself or through his/her firm) as an auditor of the Company. A Director may hold any other office of the Company on such terms as the Board shall determine.
- (iv) At each AGM of the Company, one third of the Directors (rounded down) are required to retire from office by rotation and may offer themselves for re-election. The Directors so retiring are those who have been longest in office (and in the case of equality of service length are selected by lot). Other than a retiring Director, no person shall (unless recommended by the Board) be eligible for election unless a member notifies the Company Secretary in advance of his/her intention to propose a person for election.
- (v) The Board has the power to appoint additional Directors or to fill a casual vacancy amongst the Directors. Any Director so appointed holds office until the next AGM, when he/she may offer himself/herself for re-election. He/she is not taken into account in determining the number of Directors retiring by rotation.
- (vi) The Board may appoint any Director to any executive position or employment in the Company on such terms as they determine.
- (vii) A Director may appoint either another Director or some other person approved by the Board to act as his/her alternate with power to attend Board meetings and generally to exercise the functions of the appointing Director in his/her absence (other than the power to appoint an alternate).
- (viii) The Board may authorise any matter in relation to which a Director has, or can have, a direct interest that conflicts, or possibly may conflict with, the Company's interests. Only Directors who have no interest in the matter being considered will be able to authorise the relevant matter and they may impose limits or conditions when giving authorisation if they think this is appropriate.
- (ix) A Director may hold positions with, or be interested in, other companies and, subject to legislation applicable to the Company and the FSA's requirements, may contract with the Company or any other company in which the Company is interested. A Director may not vote or count towards the quorum on any resolution concerning any proposal in which he/she (or any person connected with him/her) has a material interest (other than by virtue of his/her interest in securities of the Company) or if he/she has a duty which conflicts or may conflict with the interests of the Company, unless the resolution relates to any proposal:
 - (a) to indemnify a Director or provide him/her with a guarantee or security in respect of money lent by him/her to, or any obligation incurred by him/her or any other person for the benefit of (or at the request of), the Company (or any other member of the Group);
 - (b) to indemnify or give security or a guarantee to a third party in respect of a debt or obligation of the Company (or any other member of the Group) for which the Director has personally assumed responsibility;
 - (c) to obtain insurance for the benefit of Directors;
 - (d) involving the acquisition by a Director of any securities of the Company pursuant to an offer to existing holders of securities or to the public;
 - (e) that the Director underwrite any issue of securities of the Company (or any of its subsidiaries);
 - (f) concerning any other company in which the Director is interested as an officer or creditor or shareholder but, broadly, only if he/she (together with his/her connected persons) is directly or indirectly interested in less than 1% of either any class of the issued equity share capital or of the voting rights of that company; and
 - (g) concerning any other arrangement for the benefit of employees of the Company (or any other member of the Group) under which the Director benefits or stands to benefit in a similar manner to the employees concerned and which does not give the Director any advantage which the employees to whom the arrangement relates would not receive.
- (x) A Director may not vote or be counted in the quorum on any resolution which concerns his/her own employment or appointment to any office of the Company or any other company in which the Company is interested.
- (xi) Subject to applicable legislation, the provisions described in sub-paragraphs (ix) and (x) may be relaxed or suspended by an ordinary resolution of the members of the Company or any applicable governmental or other regulatory body.
- (xii) A Director is required to hold an interest in ordinary shares having a nominal value of at least £500, which currently equates to 2,000 Ordinary Shares unless restricted from acquiring or holding such interest by any applicable law or regulation or any applicable governmental or other regulatory body. A Director may act before acquiring those shares but must acquire the qualification shares within two months from his/her appointment. Where a Director is unable to acquire the requisite number of shares within that time owing to law, regulation or requirement of any governmental or other relevant authority, he/she must acquire the shares as soon as reasonably practicable once the restriction(s) end.

(xiii) The Board may exercise all of the powers of the Company to borrow money, to mortgage or charge its undertaking, property and uncalled capital and to issue debentures and other securities.

Classes of Shares

The Company only has Ordinary Shares in issue. The Articles also provide for sterling preference shares of £100 each, dollar preference shares of US\$100 each, dollar preference shares of US\$0.25 each, euro preference shares of €100 each and yen preference shares of ¥10,000 each (together, the Preference Shares). In accordance with the authority granted at the AGM, Preference Shares may be issued by the Board from time to time in one or more series with such rights and subject to such restrictions and limitations as the Board may determine. No Preference Shares have been issued to date. The Articles contain provisions to the following effect:

(i) Dividends

Subject to the provisions of the Articles and applicable legislation, the Company in General Meeting may declare dividends on the Ordinary Shares by ordinary resolution, but such dividend may not exceed the amount recommended by the Board. The Board may also pay interim or final dividends if it appears they are justified by the Company's financial position.

Each Preference Share confers the right to a non-cumulative preferential dividend (Preference Dividend) payable in such currency at such rates (whether fixed or calculated by reference to or in accordance with a specified procedure or mechanism), on such dates and on such other terms as may be determined by the Board prior to allotment thereof.

The Preference Shares rank in regard to payment of dividend in priority to the holders of Ordinary Shares and any other class of shares in the Company ranking junior to the Preference Shares.

Dividends may be paid on the Preference Shares if, in the opinion of the Board, the Company has sufficient distributable profits, after payment in full or the setting aside of a sum to provide for all dividends payable on (or in the case of shares carrying a cumulative right to dividends, before) the relevant dividend payment date on any class of shares in the Company ranking *pari passu* with or in priority to the relevant series of Preference Shares as regards participation in the profits of the Company.

If the Board considers that the distributable profits of the Company available for distribution are insufficient to cover the payment in full of Preference Dividends, Preference Dividends shall be paid to the extent of the distributable profits on a *pro rata* basis.

Notwithstanding the above, the Board may, at its absolute discretion, determine that any Preference Dividend which would otherwise be payable may either not be payable at all or only payable in part.

If any Preference Dividend on a series of Preference Shares is not paid, or is only paid in part, for the reasons described above, holders of Preference Shares will not have a claim in respect of such non-payment.

If any dividend on a series of Preference Shares is not paid in full on the relevant dividend payment date, a dividend restriction shall apply. The dividend restriction means that, subject to certain exceptions, neither the Company nor Barclays Bank may (a) pay a dividend on, or (b) redeem, purchase, reduce or otherwise acquire, any of their respective ordinary shares, other preference shares or other share capital ranking equal or junior to the relevant series of Preference Shares until the earlier of such time as the Company next pays in full a dividend on the relevant series of Preference Shares or the date on which all of the relevant series of Preference Shares are redeemed.

All unclaimed dividends payable in respect of any share may be invested or otherwise made use of by the Board for the benefit of the Company until claimed. If a dividend is not claimed after 12 years of it becoming payable, it is forfeited and reverts to the Company.

The Board may (although it currently does not), with the approval of an ordinary resolution of the Company, offer shareholders the right to choose to receive an allotment of additional fully paid Ordinary Shares instead of cash in respect of all or part of any dividend.

(ii) Voting

Every member who is present in person or by proxy or represented at any general meeting of the Company, and who is entitled to vote, has one vote on a show of hands (when a proxy is appointed by more than one member, the proxy will have one vote for and one vote against a resolution if he has received instructions to vote for the resolution by one or more members and against the resolution by one or more members). On a poll, every member who is present or represented and who is entitled to vote has one vote for every share held. In the case of joint holders, only the vote of the senior holder (as determined by order in the share register) or his proxy may be counted. If any sum payable remains unpaid in relation to a member's shareholding, that member is not entitled to vote that share or exercise any other right in relation to a meeting of the Company unless the Board otherwise determine.

If any member, or any other person appearing to be interested in any of the Company's Ordinary Shares, is served with a notice under Section 793 of the Act and does not supply the Company with the information required in the notice, then the Board, in its absolute discretion, may direct that that member shall not be entitled to attend or vote at any meeting of the Company. The Board may further direct that if the shares of the defaulting member represent 0.25% or more of the issued shares of the relevant class, that dividends or other monies payable on those shares shall be retained by the Company until the direction ceases to have effect and that no transfer of those shares shall be registered (other than certain specified 'excepted transfers'). A direction ceases to have effect seven days after the Company has received the information requested, or when the Company is notified that an 'excepted transfer' of all of the relevant shares to a third party has occurred, or as the Board otherwise determines.

(iii) Transfers

Ordinary Shares may be held in either certificated or uncertificated form. Certificated Ordinary Shares shall be transferred in writing in any usual or other form approved by the Board and executed by or on behalf of the transferor. Transfers of uncertificated Ordinary Shares shall be made in accordance with the Act and Uncertificated Securities Regulations.

The Board is not bound to register a transfer of partly paid Ordinary Shares, or fully paid shares in exceptional circumstances approved by the FSA. The Board may also decline to register an instrument of transfer of certificated Ordinary Shares unless it is duly stamped and deposited at the prescribed place and accompanied by the share certificate(s) and such other evidence as reasonably required by the Board to evidence right to transfer, it is in respect of one class of shares only, and it is in favour of not more than four transferees (except in the case of executors or trustees of a member).

Preference Shares may be represented by share warrants to bearer or be in registered form.

Preference Shares represented by share warrants to bearer are transferred by delivery of the relevant warrant. Preference Shares in registered form shall be transferred in writing in any usual or other form approved by the Board and executed by or on behalf of the transferor. The Company's registrar shall register such transfers of Preference Shares in registered form by making the appropriate entries in the register of Preference Shares.

Shareholder information continued

Each Preference Share shall confer, in the event of a winding up or any return of capital by reduction of capital (other than, unless otherwise provided by their terms of issue, a redemption or purchase by the Company of any of its issued shares, or a reduction of share capital), the right to receive out of the surplus assets of the Company available for distribution amongst the members and in priority to the holders of the Ordinary Shares and any other shares in the Company ranking junior to the relevant series of Preference Shares and *pari passu* with any other class of Preference Shares, repayment of the amount paid up or treated as paid up in respect of the nominal value of the Preference Share together with any premium which was paid or treated as paid when the Preference Share was issued in addition to an amount equal to accrued and unpaid dividends.

(iv) Redemption and Purchase

Subject to applicable legislation and the rights of the other shareholders, any share may be issued on terms that it is, at the option of the Company or the holder of such share, redeemable. The Directors are authorised to determine the terms, conditions and manner of redemption of any such shares under the Articles. While the Company currently has no redeemable shares in issue, any series of Preference Shares issued in the future will be redeemable, in whole or in part, at the option of the Company on a date not less than five years after the date on which such series of Preference Shares was first issued. Note that under the Companies Act 1985, in addition to obtaining shareholder approval, companies required specific enabling provisions in their articles to purchase their own shares. Following implementation of the Act, this enabling provision is now included in the Act and is therefore no longer included in the Articles. Shareholder approval is still required under the Act in order to purchase shares.

(v) Calls on capital

The Directors may make calls upon the members in respect of any monies unpaid on their shares. A person upon whom a call is made remains liable even if the shares in respect of which the call is made have been transferred. Interest will be chargeable on any unpaid amount called at a rate determined by the Board (of not more than 20% per annum).

If a member fails to pay any call in full (following notice from the Board that such failure will result in forfeiture of the relevant shares), such shares (including any dividends declared but not paid) may be forfeited by a resolution of the Board, and will become the property of the Company. Forfeiture shall not absolve a previous member for amounts payable by him/her (which may continue to accrue interest).

The Company also has a lien over all partly paid shares of the Company for all monies payable or called on that share and over the debts and liabilities of a member to the Company. If any monies which are the subject of the lien remain unpaid after a notice from the Board demanding payment, the Company may sell such shares.

(vi) Variation of Rights

The rights attached to any class of shares may be varied either with the consent in writing of the holders of at least 75% in nominal value of the issued shares of that class or with the sanction of special resolution passed at a separate meeting of the holders of the shares of that class.

The rights of shares shall not (unless expressly provided by the rights attached to such shares) be deemed varied by the creation of further shares ranking equally with them.

Annual and other general meetings

The Company is required to hold an AGM in addition to such other general meetings as the Directors think fit. The type of the meeting will be specified in the notice calling it. Under the Companies Act 2006, the AGM must be held within six months of the financial year end. A general meeting may be convened by the Board on requisition in accordance with the applicable legislation.

In the case of an AGM, a minimum of 21 clear days' notice is required. The notice must be in writing and must specify the place, the day and the hour of the meeting, and the general nature of the business to be transacted. A notice convening a meeting to pass a special resolution shall specify the intention to propose the resolution as such. The accidental failure to give notice of a general meeting or the non-receipt of such notice will not invalidate the proceedings at such meeting.

Subject as noted above, all shareholders are entitled to attend and vote at general meetings. The Articles do, however, provide that arrangements may be made for simultaneous attendance at a satellite meeting place or, if the meeting place is inadequate to accommodate all members and proxies entitled to attend, another meeting place may be arranged to accommodate such persons other than that specified in the notice of meeting, in which case shareholders may be excluded from the principal place.

Holders of Preference Shares have no right to receive notice of, attend or vote at, any general meetings of the Company as a result of holding Preference Shares.

Limitations on foreign shareholders

There are no restrictions imposed by the Articles or (subject to the effect of any economic sanctions that may be in force from time to time) by current UK laws which relate only to non-residents of the UK and which limit the rights of such non-residents to hold or (when entitled to do so) vote the Company's Ordinary Shares.

Notices

A document or information may be sent by the Company in hard copy form, electronic form, by being made available on a website, or by another means agreed with the recipient, in accordance with the provisions set out in the Act. Accordingly, a document or information may only be sent in electronic form to a person who has agreed to receive it in that form or, in the case of a company, who has been deemed to have so agreed pursuant to applicable legislation. A document or information may only be sent by being made available on a website if the recipient has agreed to receive it in that form or has been deemed to have so agreed pursuant to applicable legislation, and has not revoked that agreement.

In respect of joint holdings, documents or information shall be sent to the joint holder whose name stands first in the register.

A member who (having no registered address within the UK) has not supplied an address in the UK at which documents or information may be sent is not entitled to have documents or information sent to him/her.

In addition, the Company may cease to send notices to any member who has been sent documents on two consecutive occasions over a period of at least 12 months and when each of those documents is returned undelivered or notification is received that they have not been delivered.

Capitalisation of profits

The Company may, by ordinary resolution, upon the recommendation of the Board capitalise all or any part of an amount standing to the credit of a reserve or fund to be set free for distribution provided that amounts from the share premium account, capital redemption reserve or any profits not available for distribution should be applied only in paying up unissued shares to be allotted to members credited as fully paid and no unrealised profits shall be applied in paying up debentures of the Company or any amount unpaid on any share in the capital of the Company.

Indemnity

Subject to applicable legislation, every current and former Director or other officer of the Company (other than any person engaged by the company as auditor) shall be indemnified by the Company against any liability in relation to the Company, other than (broadly) any liability to the Company or a member of the Group, or any criminal or regulatory fine.

Tel: +44 (0) 20 7116 1000

Registrar

The Registrar to Barclays
Aspect House
Spencer Road
Lancing
West Sussex
BN99 6DA
Tel: 0871 384 2055
or +44 (0) 121 415 7004 (from overseas)
Email: questions@share-registers.co.uk

ADR Depository

JP Morgan Chase Bank, N.A.
PO Box 64504
St. Paul
MN 55164-0504
USA
Tel: 1-800-990-1135 (toll-free for US domestic callers)
or +1 651 453 2128
Email: jpmorgan.adr@wellsfargo.com

Shareholder information

Your Barclays shareholding

Alternative formats

Shareholder documentation can be provided in large print, audio or Braille free of charge by calling the Barclays Shareholder Helpline.

0871 384 2055* (in the UK)
+44 121 415 7004 (from overseas)

Audio versions of the Annual Review will also be available at the AGM.

Barclays e-view

You do not have to receive paper shareholder documentation from us. An increasing number of shareholders receive their Barclays communications electronically and are discovering the convenience of using the internet and email to find out about their shareholding and Barclays.

Barclays e-view is an easy and convenient way to:

- access your Barclays shareholding details and check share sales, purchases or transfers;
- receive important shareholder information directly to your inbox;
- view dividend information, including electronic tax vouchers;
- change your address and bank details online;
- see shareholder documents such as the Annual Review, Annual Report or Results Announcements online; and
- register your voting instructions for General Meetings.

Why not log on to Barclays e-view and see the benefits for yourself in 3 easy steps?

3 step guide to Barclays e-view

Step 1	Go to www.eviewsignup.co.uk
Step 2	Register for electronic communications by following the instructions onscreen
Step 3	You will be sent a secure access number in the post the next working day

Your dividends

It is our policy to pay cash dividends on a quarterly basis. There will be three equal quarterly payments in June, September and December and a final variable payment in March each year.

Receiving your dividends

A majority of shareholders mandate their dividends to their bank or building society account. It is safer, quicker and easier for your dividends to be paid directly to you. You may be charged if you lose your dividend cheque and we have to reissue it to you. If you haven't already arranged to mandate your dividend and hold 2,500 shares or less, phone the Barclays Shareholder Helpline. For your security, if you hold more than 2,500 shares, you will need to write to The Registrar or you can download a form online at www.barclays.com/investorrelations

Key dates

Barclays goes to great lengths to keep to the dates published here but please note that all future dates are provisional and subject to change.

16 March 2012	2011 Final dividend payment date
27 April 2012	Barclays 2012 Annual General Meeting
8 June 2012	2012 First interim dividend payment date
7 September 2012	2012 Second interim dividend payment date
7 December 2012	2012 Third interim dividend payment date

How Barclays shareholders receive their dividends %
