hours of video conferencing each month

30,000
data network devices

236,413
desktop devices

95,000
servers

Our people

'Aim High' is a Barclays Women in Technology (WiT) global campaign to celebrate the different roles women have in Technology, the diversity of their backgrounds and career history and share where they are going today

BarclaysFreeWiFi – the new way to instantly access Wi-Fi at work

We have heard from many of our colleagues that they would like to have better technology tools to help them do their jobs. To respond to this, we are working hard to bring more features into the workplace that are widely available to us at home. The first of these is free and easy-to-access Wi-Fi at work

Dynamic working
Our Dynamic Working means you can balance your work and home life

How we innovate

An easier way to pay over 35,000 businesses
Since Pingit was introduced over 35,000 registered UK businesses can be paid just by scanning a QR code

bPay is a digital wallet that is linked to one of three new devices – a wristband, fob and sticker, giving you the choice to pay your way. All the devices can make contactless purchases up to the value of £30, at over 300,000 locations across the UK

'Fatafat' Data Platform brings real-time decisions/actions to Barclays
'Fatafat', (meaning very quickly in Hindi), is Barclays' first Group-wide Big Data real-time decisioning engine, initiated by Data Systems and Insights (DSI) in partnership with PCB. The platform enables actions on data as soon as an event occurs

What others say about us

Operations and Technology team scoops Special Recognition Award for Citizenship
The UK's Overcoming Challenges team picked up a Special Recognition Award in the Supporting Our Communities 325th Anniversary Citizenship Awards ceremony in London

Pingit powered by Barclays
Winner of the 'Most effective mobile payment solution' after the Barclays Mobile Banking app won five previous awards. The app allows users to send money to – and receive money from – anyone with a UK current account and mobile phone number.

It's been downloaded over one million times since it launched in February 2012. It is currently available in the UK and will soon be available in Ghana, Botswana and Zambia
