* Stable income in a competitive market
- NIM of $3.22 \%$, including impact of mix shift given growth in secured lending
- Recategorisation of certain treasury income also impacted NIM
- Expect FY18 NIM to be at the lower end of 3.20-3.30\% guidance range
* Net L\&A increased 1\% QoQ to $£ 185$ bn
- Continued mortgage growth, up $£ 1.6$ bn QoQ and $£ 5.9$ bn YoY
* Savings balances continued to increase, demonstrating franchise strength
* Risk remained well-controlled, reflecting prudent appetite, with impairment broadly flat
- Stable underlying credit metrics, with improved UK cards 30 day and stable 90 day arrears QoQ and YoY
* Costs down 1\%, despite continued investment in digitising the bank, generating slight positive jaws
* RWAs increased $£ 2.5$ bn on Q118 largely reflecting regulatory methodology changes for ESHLA

* Markets income increased 11\%, or 15\% in USD
- Equities increased $37 \%$ in USD driven by derivatives and equity financing
- FICC increased 1\% in USD on stable macro and credit performance
* Second highest quarter for Banking fee income in GBP ${ }^{3}$, increasing $4 \%$ or $8 \%$ in USD
- Increased global banking fee share since FY17, ranked \#6 globally, and \#1 European bank in the US ${ }^{4}$
- Joint bookrunner on 8/10 largest investment grade debt issuances in H 118
* Corporate lending income impacted by redeployment of RWAs within CIB to improve returns, and negative fair value moves on hedges
* Net impairment release of $£ 23$ m included single name recoveries
* Committed to improving returns through continued investment in technology
* PBT increased 3\% excluding $£ 109 \mathrm{~m}$ oneoff in Q2175

| RWAs $\begin{aligned} & \text { £ } 4.7 \text { bn }\end{aligned}$ <br> £37.6bn (Mar-18: £32.9bn) |

* Income increased 8\% reflecting continued underlying growth in US Cards and $£ 53 \mathrm{~m}$ gain on sale of a US card portfolio
* Underlying US Cards net receivables grew $6 \% \mathrm{YoY}^{2}$, driven by continued strong growth in partnership balances
- American Airlines and JetBlue balances saw double digit growth
- Over $70 \%$ of partnership book is covered by agreements that last through 2022
* Impairment decreased 68\%
- Higher than expected seasonal repayment of certain US card balances
* Neutral underlying jaws ${ }^{3}$, as cost increase reflected investment and business growth
* Deposits increased by 5\% YoY across both Private Banking and International Cards
* RWAs increased due to changes in operational risk RWA allocations

## Head Office

* Income included a one-off gain of $£ 155$ m from settlement of receivables relating to Lehman Brothers acquisition and a $£ 46 \mathrm{~m}$ dividend from stake in BAGL
- Excluding these, negative income reflected c. $£ 90 \mathrm{~m}$ impact from certain legacy capital instrument funding costs per quarter and a hedge accounting drag, expected to be £100-200m per year
- Expect these two items to recur in coming quarters, but decline over time
* RWAs decreased primarily due to the regulatory deconsolidation of BAGL
* Period end allocated tangible equity was $£ 3.6$ bn
- Tangible equity is allocated to businesses at 13.0\% (2017: 12.0\%) of RWAs, adjusted for capital deductions
- Head Office represents the difference between the Group's average tangible shareholders' equity and the amounts allocated to businesses

## Strong Group CET1 and leverage ratios

## Managing Group capital position above mandatory distribution restrictions

- Maintained robust capital buffers based on 30 June 2018 capital position:
- Buffer to 30 June 2018 MDR hurdle: c.2.9\% or c.£9bn
- Buffer to 7\% AT1 trigger event: c.5.6\% or c.£18bn based on the fully loaded CET1 ratio of $12.6 \%$, excluding transitional relief, in line with AT1 terms and conditions

## Well managed and balanced total capital structure

- BBPLC issued capital instruments are expected to qualify as MREL in line with their regulatory capital values until 1 January $2022^{3}$. Those that are outstanding beyond 1 January 2022 will no longer qualify as MREL but, depending on their individual characteristics, may continue to qualify as Tier 2 regulatory capital
- Aim is to manage our capital structure in an efficient manner:
- Expect to continue to hold a surplus to 2.3\% of AT1 through regular issuance over time
- The appropriate balance of Tier 2 will continue to be informed by relative pricing of Senior and Tier 2, investor appetite, maturity profile of the existing stack and MREL eligibility
- Legacy capital instruments maturing or callable post 2022 is modest and short-dated, with the majority of the tail maturing within 2022

## Pillar 2A requirement

- Barclays' Pillar 2A requirement is set as part of a "Total Capital Requirement" (P1 + P2A) reviewed and prescribed at least annually by the PRA
- Barclays Group P2A requirement for 2018 is $4.3 \%$ and is split:
- CET1 of 2.4\% (assuming 56\% of total P2A requirement)
- AT1 of $0.8 \%$ (assuming 19\% of total P2A requirement)
- Tier 2 of 1.1\% (assuming 25\% of total P2A requirement)
- Basel Committee consultations and reviews of approaches to Pillar 1 and Pillar 2 risk might further impact the Pillar 2A requirement in the future

## Managing evolving future Group minimum leverage requirements

## Illustrative evolution of minimum leverage requirements and buffers under the UK regime

- BoE minimum leverage requirement
... Maximum BoE stress test hurdle rate for 2018 tests $^{1}$
- G-SII leverage buffer
... Regulatory minimum leverage requirement
- Countercyclical leverage buffer (CCLB)

30-Jun-18
Spot UK leverage ratio ${ }^{2}$ 4.9\%

Future UK leverage ratio = Regulatory minimum level + surplus

Jun-18

Leverage requirements

- Leverage continues to be a backstop requirement in determining the capital Barclays holds. Our business mix means RWAs remain our binding constraint
- The Group currently has one leverage requirement, as measured under the UK's PRA leverage regime. The requirement has to be met on a daily basis
- As at H118, spot UK leverage ratio was c.120bps above the 2018 requirement
- In terms of future regulatory requirements, we continue to monitor developments closely
- Under the BoE stress testing framework, we expect an adjustment to a banks' hurdle rates to reflect any incremental drawdown as a result of the IFRS 9 impact subject to P 1 requirements being met

## High quality liquidity and funding position with a conservatively positioned liquidity pool and stable LDR

- Liquidity pool increased $£ 7$ bn in the quarter to $£ 214$ bn, whilst LCR increased to $154 \%$ from $147 \%$, equivalent to a surplus of $£ 73$ bn to the 100\% requirement
- Increase was largely driven by deposit growth, lower loans and advances and lower Markets funding consumption
- Quality of the liquidity pool remains high, with the majority held in cash and deposits with central banks, and highly rated government bonds
- Liquidity pool continues to be conservatively positioned to meet the changing geopolitical and market environment, using cost efficient sources of funding
- NSFR continues to exceed expected future minimum requirements

## Reconciling items

Prior to the transfer of the Barclays UK banking business on 1 April 2018, the majority of the business results, including litigation and conduct, were reported within the BBPLC legal entity rather than BBUKPLC

Head Office sub-segmental results, as reported in BBUKPLC accounts. Includes hedge arrangements that were in place for the Barclays UK business that were terminated and re-established at a legal entity level when the business was transferred to BBUKPLC. The impact of re-establishing these hedging relationships has no impact at the Barclays PLC Group levelBBUKPLC pays BX (the Service Company) for services that it receives. The payment includes a margin that is paid over and above the direct cost of the services. The margin is recognised within the legal entity financial results but not in the business results of the Barclays PLC Group where it is eliminated on consolidation
(4) Other includes

- BBUKPLC Q118 P\&L, pre-ring fencing on 1 April 2018
- Intra group transactions which net to nil on consolidation at the Barclays PLC Group level

## Reconciling items

Head Office sub-segmental results, as reported in BBPLC accounts

- This is materially the same as the Head Office division as reported in Barclays PLC accounts, including, amongst other items, certain legacy capital instrument funding costs in income and the $£ 1.4 \mathrm{bn}$ settlement charge with the US DoJ relating to RMBS within operating expenses
- Also includes other Head Office reconciling items exclusive to BBPLC, which are primarily offset at a Barclays PLC Group level, and underlying hedge accounting effects

BBPLC pays BX (the Service Company) for services that it receives. The payment includes a margin that is paid over and above the direct cost of the services. The margin is recognised within BBPLC results, but not in the Barclays International business results of the Barclays PLC Group where it is eliminated on consolidationPrimarily relates to intra group transactions which net to nil on consolidation at the Barclays PLC Group levelThe $£ 725 \mathrm{~m}$ PBT does not include a $£ 47 \mathrm{~m}$ loss in respect of discontinued operations (net of tax). This primarily reflects Barclays UK and Head Office business transferred to BBUKPLC on 1 April 2018, including any BX margin relating to Barclays UK businesses in BBPLC during Q118

## Preparation for Brexit

## Plans in place to expand Barclays Bank Ireland (BBI) in advance of March 2019 to support activity with European clients

Allows passported activity for EEA-domiciled clients post Brexit

Expect to be operational by March 2019, with majority of existing positions expected to migrate in 2019

Wholly owned subsidiary of BBPLC and will operate a branch network across Europe

Expected to primarily consist of Corporate, Investment and Private Banking activity and the Barclaycard business in Germany ${ }^{1}$

Diversified, well balanced funding sources and strong liquidity ratios. MREL and capital provided from within the Group

Anticipate CET1 and CRR leverage ratios to be broadly in line with those of BBPLC and the Group

Regulated by both the Central Bank of Ireland and as a significant institution, by the ECB and rated in line with BBPLC²

To provide a sense of size, using December 2017 numbers, the EEA-domiciled clients and assumed migrated business would result in the following pro-forma financial metrics:

| BBI as at 31 December $\mathbf{2 0 1 7}^{\mathbf{3}}$ | £ bn |
| :--- | :---: |
| Total external assets | 170 |
| Total assets <br> Including internal transactions with Group entities | 224 |

## Impairment

## Q218 impairment

In the UK, underlying credit metrics were broadly stable and economic conditions steady, resulting in steady impairment charges in BUK

2 Material improvement in CC\&P reflecting higher than expected seasonal repayment of certain US card balances
(3)

Further single-name recoveries in CIB in Q2, following material recoveries in Q1, which are not expected to recur in coming quarters

## Interest rate sensitivity

Illustrative sensitivity of Group NII to a 100bps parallel upward shift in interest rates ${ }^{1}$

| Change in NII (£m) |  |  |
| :---: | :---: | :---: |
| Year 1 | Year 2 | Year 3 |
| Assuming higher pass-through on deposits |  |  |
| c. 200 | c. 550 |  |
| Assuming lower pass-through on deposits |  |  |
| c. 500 | c. 900 | c. 1,250 |

## Reconciling items

- This analysis is based on the modelled performance of the consumer and corporate banking book, and includes the impact of both the product and equity structural hedges
- It assumes an instantaneous +100 bps parallel shift in interest rate curves
- The NII sensitivity is calculated using a constant balance sheet i.e. maturing business is reinvested at a consistent tenor and margin
- However, it is assumed that a material proportion of balances deemed to be potentially rate sensitive immediately leave the bank following the rate shock
- The estimated NII change is highly sensitive to this assumption from Year 1
- The sensitivity scenarios illustrated assume a higher and a lower pass through of rate rises to deposit pricing. Neither of these scenarios necessarily reflect pricing decisions that would be made in the event of rate rises
- The majority of the increased benefits in Years 2 and 3 can be attributed to the income from structural hedges becoming incrementally larger over the 3 year period, as the balances are rolled into hedges at higher rates
- The sensitivities illustrated do not represent a forecast of the effect of a change in interest rates on Group NII
